Needless to say, the introduction of any of these taxes would have increased the percentages of income which Pennsylvania families now pay toward the support of government. However, different taxes affect differently circumstanced families quite differently.

Chapter VII

With a view of (1) improving the financial position of the Commonwealth, and (2) eliminating some acutely felt problems, groups of citizens have suggested changes in the procedures now employed in connection with the financing of relief and public education.

In substance, the proposals relating to relief financing suggest that some fraction of the cost of general assistance or direct relief be assumed by the local units of government.

These changes in Pennsylvania's per capita income are reflected in Pennsylvania's relative income position among the states. In 1929, Pennsylvania's per capita income was 11% higher than national per capita, by 1933 it was but 10% higher. In 1938 it was 6% above the national average, but in 1939 it had recovered somewhat and risen to 8% above the national average.

Had the counties been required to assume 10% of the cost of the estimated 1939-41 relief load, they would have had to levy effective real estate relief tax rates ranging from 2.36 mills in Snyder County to .14 mils in Montgomery County.

The proposals relating to the financing of public education, in essence, suggest that the general fund of the Commonwealth assume a larger share of the cost of education with a view of equalizing educational opportunities throughout the Commonwealth. Though these proposals differ in detail, they all call for additional tax effort on the part of the State government, the amount of additional tax money to be raised ranging from $35,500,000 to approximately $50,000,000 per year.

RECOMMENDATIONS

The Joint State Government Commission wishes to make two sets of Recommendations to the General Assembly. The first set of Recommendations is concerned primarily with matters of tax administrations which, in the main, are believed to be noncontroversial. The second set of Recommendations concerns important matters which, in the judgment of the members of the Joint State Government Commission, call for intensive further studies.

Recommendations I to X, inclusive listed below and considered in Chapter VII, Section III deal with what appear to be desirable administrative changes, and Recommendations XI to XVI suggest problems calling for further investigation.

I. The General Assembly should seriously consider the advisability of establishing an independent tax appeal body; such appeal body to consist of three members to be appointed by the Governor for overlapping terms and removable for cause only. Any decisions rendered by this body should be incorporated into memoranda and said memoranda should be open for taxpayers' inspection at the office of the appeal body. The Attorney-General should represent the Commonwealth in all cases before this agency and the agency should be allowed an appropriation sufficiently adequate to secure the services of a competent staff.

II. Refunds should be paid in cash or in the form of a credit to be applied against future taxes, and such credits may be assigned to other Pennsylvania taxpayers. Before cash refunds are made available, a certificate should be required indicating that no other taxes or moneys are owing to the Commonwealth.

III. Interest at the rate of 2% should be paid on all refunds from the date of overpayment to the date of refund.

IV. An appeal should be allowed to the courts from the decision of the Board of Finance and Revenue, or tax appeal body should it be created, in all refund cases.

V. The Department of Revenue should be required to settle all corporate tax returns within ninety days from the date when the request for resettlement is made, but the exercise of this right shall not be effective prior to ninety days before the end of the year following the year for which the report was made or became due. Otherwise, the tax report should become conclusive.

VI. The Department of Revenue should be required to dispose of a petition for resettlement within six months from the date of filing the petition, unless the petitioner in question agrees to file a waiver or causes delay by his own action. Interest liability should cease upon the expiration of the six month period if the Department fails to act unless the failure to act is due to any action of the petitioner.

VII. Petitions for resettlement should be required to be filed on or before ninety days from the date of the notice of mailing of the certified copy of the settlement.

VIII. The sixty day period for the filing of an appeal from a decision of the Board of Finance and Revenue, or the tax appeal body should it be created, should begin

with the date of mailing of the formal notice of resettlement by the Department of Revenue where a resettlement is granted, or the date of mailing of the notice of refusal by the Board of Finance and Revenue where no resettlement is allowed.

IX. An appeal from the decision of the Board of Finance and Revenue, or appeal body should it be created, should be filed with the court and the appeal petition served upon the Attorney-General and a copy left with him. The necessary bond should be filed currently with the appeal, instead of within ten days from the lodging of the appeal with the prothonotary by the Attorney- General as at present.

X. An additional extension of time beyond the sixty day period now granted for the filing of corporate net income tax returns should be permitted in cases where the Federal Income Tax Authorities have granted a longer extension.

In addition to these administrative changes, the Joint State Government Commission recommends that further studies be made of the following problems:

XI. Assessment procedures employed by local assessors.

XII. The effect of contemporary Pennsylvania state and local taxes upon:

A. Families in different income groups, and

B. Individuals following different occupations.

These studies should be supplemented by investigations of the effects of proposed taxes upon both families in different income groups and upon persons following different occupations.

XIII. Subsidy procedures now used or proposed by citizens groups in connection with the financing of:

1. Public Education (Vocational and General)

Such studies to give special attention to the problem presented by distressed school districts and the proposals relating to increased teachers' minimum salaries.

2. Public Assistance

Such studies to consider:

A. Possible future participation of the Federal Government as regards the financing of General Assistance or direct relief;

B. Possible future participation of the localities as regards the financing of General Assistance or direct relief.

3. Welfare Institutions

4. Public Works Programs

It is believed that the information called for above is essential if:

A. The financial position of the Commonwealth is to be improved, and

B. Subsidy procedures are to take cognizance of both local need for selective public services and local capacity to finance such services.

XIV. The members of the Joint State Government Commission recommend further intensive study of business tax impact differentials and that the allocation fraction currently used to determine the tax liability of foreign corporations be carefully reexamined from point of view of:

A. The revenue interests of the General Fund, and

B. Its effect upon industrial migration from and to Pennsylvania.

XV. In addition, the Joint State Government suggests that the collection cost of all contemporary Pennsylvania taxes (state and local) be studied further and that a survey be made of the cost of collection of similar taxes in other states.

XVI. In conclusion the Joint State Government Commission suggests that present tax exemption practices be re-examined with a view of determining:

A. The equity of contemporary arrangements, and

B. The revenue loss occasioned by these arrangements.

Chapter I

Economic and Population Characteristics of the Commonwealth of Pennsylvania: Past Trends and Present Structure

Section I

Introductory: Fiscal Policy and Economic and Population Trends

Preliminary to presentation and detailed discussion of Pennsylvania public expenditure and public revenue data, the Joint State Government Commission wishes to call the attention of the members of the Senate and the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania to selected population and economic trends which are deemed to have a significant bearing upon the fiscal operations of the Commonwealth and its subordinate jurisdictions.

It is the judgment of the members of the Joint State Government Commission that inspection of population trends is helpful to both the legislator and the public spirited citizen interested in appraising the casual factors partially responsible for the present financial plight of state and local governments.

To the careful observer, changes in the rate of population growth are meaningful indices of changes in economic opportunity and changes in economic opportunity, as a rule, are sooner or later reflected in changes in the aggregate value of tax bases.

Study of the occupational distribution of the population yields helpful clues to the legislator and citizen interested in public revenue and expenditure patterns. Typically, a change in the occupational distribution of the population is accompanied by at least a temporary decline in the value of selected tax bases and in increase in the pressure for selected public services such as general assistance and categorical relief. If the declining tax bases are highly concentrated in specific localities such as the mining section of the Commonwealth, the problems of state-local fiscal interrelationships are brought into high relief. Similarly, changes in the age composition of the population tend to rudely disrupt fiscal institutions which for generations past have operated adequately and equitably. In addition, changes in population composition provide a clue—not always reliable to be sure—as regards probable future expenditure trends. An increase, for instance, in the relative number of the aged is likely to eventuate in considerably increased demands upon public treasuries for old-age assistance of one form or another. Sometimes these demands are out of proportion to the increase in the

relative number of the aged, because as the relative number of the aged increases the political effectiveness of the group as a whole tends to increase as well, and public assistance offerings formerly accepted as reasonable are not longer considered adequate.

The members of the Joint State Government Commission are of the opinion that the significance of population trends is considerably enhanced if these trends are studied in conjunction with selected economic data.

Generally speaking, population and population trend data afford the legislator a first proximate measure of the needs and the probable changes in need of groups within the community. A study of economic data facilitates judgment as to the probable political pressure that will be brought to bear upon the General Assembly to satisfy these needs by means of public services. For instance, if the economic fortunes of a given group in the community are declining, the group in question is most likely to insist that some of the services which its members formerly bought in the markets of the Commonwealth be supplied now by public agencies of one type or another. When faced with these insistent demands for additional public services, which usually require increases in current tax rates, the imposition of new and additional taxes, or both; legislators can save themselves political grief and their constituents serious economic difficulties if they have at least a speaking acquaintance with the relative national market position of the economic activities which they propose to saddle with new or additional taxes.

It is with a view of facilitating the type of legislative judgment indicated above that the Joint State Government Commission presents population and economic data.

Section II

The Population of Pennsylvania: Size, Occupational and Age Distribution

According to preliminary United States census estimates, a population of approximately 9,900,000 persons lived within Pennsylvania's 45,000 square miles of area in 1940.

It is the public services which these ten million people demand and their willingness and collective capacity to pay for these services which constitute the sum and substance of the public expenditure-revenue problem with which legislators are faced.

Though the size of the population as at present is of importance, changes in population size which have taken place in time are likewise instructive.

The changes which have taken place in the size of Pennsylvania's population over the last half century are shown in Table I.[1]

Inspection of Table I, Cols. 2 and 3 indicates that though in terms of absolute numbers Pennsylvania's population has been increasing over the last half century, the rate of population growth has shown a consistently decreasing tendency. As regards the changing relationship between rural and urban population, Cols. 4 and 5 show that the relative number of Pennsylvanians residing in urban areas has steadily increased.

As regards changes in total population and changes in the value of the ratio urban-to-rural population Pennsylvania's pattern is rather similar to that for the nation as a whole. However, as Col. 6 indicates the percentages of total United States population residing in Pennsylvania has slowly decreased ever since 1890. This sagging of the relative population position of Pennsylvania suggests that the economic opportunities offered by Pennsylvania when compared with those of the nation as a whole have undergone a change for the worse, because as a general rule, people are alert to move from declining areas to those which hold a brighter promise.[2]

TABLE I

Population of Pennsylvania, 1890-1940

Year	Total* (000)	Percent increase from previous census	Percent urban of total population*	Percent rural of total population*	Percent of U. S. population
(1)	(2)	(3)	(4)	(5)	(6)
1890	5,258	22.8%	48.6%	51.4%	8.4%
1900	6,302	19.9	54.7	45.3	8.3
1910	7,665	21.6	60.4	39.6	8.3
1920	8,720	13.8	64.3	35.7	8.2
1930	9,631	10.4	67.8	32.2	7.8
1931	9,658				
1932	9,685				
1933	9,712				
1934	9,739				
1935	9,766				
1936	9,793				
1937	9,820				
1938	9,846				
1939	9,873				
1940	9,900	2.8			7.5

* U. S. Department of Commerce, Fifteenth Census of the United States, 1930; Population, Vol. III, part 2, p. 651. The figure for 1940 is obtained from the release of December 20, 1940; the years 1931 to 1939 inclusive are interpolations.

Changes in the year by year percentage ratios of urban to rural population are reflected in changes in the occupational adjustments of the gainful-worker segment of the population.

By 1930[3] the persistent migration from rural to urban areas was mirrored by the fact that approximately thirty-eight per cent of the gainful workers of Pennsylvania were employed by manufacturing enterprise.

Table II, shows the distribution of gainful workers in Pennsylvania by general occupational divisions.

TABLE II

Gainful Workers 10 Years Old and Over in Pennsylvania and the United States, 1930 By general divisions of occupations)

General Division of Occupations	Pennsylvania		United States	
	Number*	Percent of Total	Number*	Percent of Total
All	3,722,103	100.0	48,829,920	100.0
Manufacturing	1,416,590	38.1	14,110,652	28.9
Extraction of minerals	299,151	8.0	984,323	2.0
Agriculture	250,925	6.7	10,471,998	21.4
Trade	459,579	12.3	6,081,467	12.5
Transportation and communication	321,122	8.6	3,843,147	7.9
All other	974,736	26.3	13,338,333	27.3

* U. S. Department of Commerce, Fifteenth Census, Population, Vol. IV.

[1] For a recent discussion of Pennsylvania's population and population trends, see: Watson, J. P., "Comparative Growth of Population in Pennsylvania, 1790-1930", Pittsburgh Business Review, University of Pittsburgh, Bureau of Business Research, Vol. X, No. 7, p. 17 and following.

[2] Compare e.g., population extrapolation of the Census Bureau as published in the Statistical Abstract (Statistical Abstract of the United States, Washington, 1938, p. 10) for the period 1910 to 1937 with the population data as given by the preliminary Census releases for 1940. See also, Appendix C, p. 6563 for population changes in Pennsylvania and competitive states.

[3] The occupational breakdown of 1940 Census data is not yet available.

Inspection of Table II, Col. 3 indicates that manufacturing accounted for 38.1% of all gainful workers in 1930. Trade with 12.3% was a distant second, transportation and communication, extraction of minerals and agriculture with 8.6%, 8.0% and 6.7% of gainful workers, ranked third, fourth and fifth, respectively.

If the data for 1940 were available, they would probably show a decline of the relative number of gainful workers in the extractive industries[4] and a slight relative improvement of the positions of manufacturing and farming.

Regardless, however, of minor changes in the relative position as regards gainful employment which Pennsylvania's major industrial divisions offer, there is no question that manufcaturing continues to dominate the scene. Comparison of Cols. 3 and 5 show that the importance of manufacturing in Pennsylvania is considerably greater than the importance of the same branch of economic activity for the nation as a whole. In fact, there is reason to believe that future levels of welfare in the Commonwealth depend largely upon the expansion of manufacturing activities.[5]

Whereas the occupational distribution of the population facilities informed judgment regarding types and probable volume of production and the likely behavior of present and possible future tax bases, the age distribution of the population is of significance to the legislator because it indicates in a general and over-all fashion the expectable fiscal load that will have to be carried by the tax machinery of the Commonwealth.

Apart from the costs of the general departments of government and the relatively heavy expense of unemployment relief in one form or another, the principal items in the cost of government arise from the necessity of caring for the young and for the aged. The members of these two groups in the main are not engaged in gainful pursuits themselves from which they can derive an income and, accordingly, if they are to be maintained at all, they must have some type of access to the incomes of those who are engaged in productive pursuits. Increasingly, by means of taxation and public expenditure, such access is being facilitated.

According to the estimates of the Bureau of Research and Statistics of the Social Security Board[6] (made by the Division of Public Assistance Research with the advice of the U. S. Bureau of the Census), 32.5% of Pennsylvania's population was under 18 years of age as of July 1, 1937, while 6.0% was 65 years and over, and 61.5% was between the ages of 18 and 64. Or, putting the matter somewhat differently, children and aged together accounted for 62.6% of the estimated population between the ages of 18 and 64. The corresponding percentages for the nation as a whole were as follows: under 18, 31.9%; 65 and over, 6.1%; 18-64, 62.0%; and the ratio of children-plus-aged to the intermediate age group, 61.3%

Section III

Basic Production Activities in Pennsylvania

With the intent of making possible a more detailed view of the basic economic activities carried forward in the Commonwealth of Pennsylvania, the Joint State Government Commission submits below a set of tables relating to manufacturing, mining and farming.

These three economic pursuits, which account for more than fifty percent of the gainfully employed in Pennsylvania[1] were selected because of their strategic importance.

The members of the Joint State Government Commission consider Pennsylvania manufacturing, mining and farming of strategic importance, because employment in other economic divisions such as trade, banking, insurance, transportation, communication, amusement, etc., depends in large measure upon the level of activity that prevails in factories, in mines and on farms. These 'other' economic divisions, though of considerable importance, are typically activated by the 'primary' producers. In addition, the competitive position of the 'primary' producers is somewhat more precarious than the position of the so-called service divisions. By and large Pennsylvania manufacturers, Pennsylvania mine operators and Pennsylvania farmers have to compete in the national market. Any state fiscal policies that place Pennsylvania factories[2] mines and farms at a competitive disadvantage as compared with other states seriously jeopardize the levels of living of all Pennsylvanians, including those business men whose prosperity depends upon high levels of

[1] See, Table II, p. 6452.
[2] In this connection it should be observed that some states have developed fiscal policies which are frankly designed to attract enterprise. (Cf. Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, Oklahoma, South Carolina, Tennessee and Virginia. Laws and description of laws listed in Prentice-Hall, "State and Local Tax Service, Ala.-Wyo.") Though the members of the Joint State Government Commission are not persuaded that such policies are sound, they should be taken into account by members of the General Assembly when formulating tax measures.

TABLE III

Selected Data for Manufacturing in Pennsylvania, 1927-37*

Year	Value added by manufacture			Value of Product			Wages				Establishments		Wage Earners	
	Amount (000)	Percent of U. S. Total	Index (1927-100)	Amount (000)	Percent of U. S. Total	Index (1927-100)	Amount (000)	Percent of U. S. Total	Index (1927-100)	Percentage ratio of wages to value added	Number	Percent of U. S. Total	Number	Percent of U. S. Total
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)	(13)	(14)	(15)
1927	$2,987,502	10.8	100.0	$6,715,563	10.7	100.0	$1,315,993	12.1	100.0	44.0	17,314	9.0	987,414	11.8
1929	3,426,354	10.8	114.7	7,419,197	10.6	110.5	1,378,690	11.9	104.8	40.2	16,881	8.0	1,013,557	11.5
1931	1,982,419	10.2	66.4	4,090,548	10.0	60.9	845,045	11.6	64.2	42.6	14,711	8.4	778,227	12.0
1933	1,454,489	10.0	48.7	3,051,579	9.7	45.4	599,591	11.4	45.6	41.2	12,093	8.5	716,598	11.8
1935	1,960,950	10.1	65.6	4,291,848	9.4	63.9	848,837	11.2	64.5	43.3	13,050	7.7	841,234	11.4
1937†	2,664,410	10.6	89.2	6,032,083	9.9	89.8	1,176,957	11.6	89.4	44.2	13,084	7.8	954,340	11.1

productivity of the 'primary' producers. The service divisions are in a somewhat happier position. They can, within limits, recoup taxes from their customers. Though any such attempt on the part of a 'service' industry has adverse profit repercussions, the attempts, as a rule, do not endanger the very existence of 'service' enterprise as a whole, though specific firms in the service group may find their existence endangered.

Section IV

The Importance of Manufacturing in Pennsylvania

Summary data descriptive of manufacturing operations in Pennsylvania for the period from 1927 to 1937, the last year for which such data are available, are presented in Table III, below:

Extent and changes in manufacturing operations may be conveniently measured in terms of: 1) value added by manufacture, 2) value of products, 3) wages paid, 4) number of establishments, and 5) number of wage earners.

Application of these different measures sheds light upon different aspects of the same problem. 'Value added,' which is the difference between the cost of raw materials and the price of the finished product, is particularly useful when attempting appraisal of the welfare significance of a given industry in a given state. 'Value of product,' which is the product of average selling price multiplied by the number of units produced is particularly useful for interstate comparison. 'Wages paid' indicates the importance of manufacturing in general or of a specific group of manufacturing establishments as an employer. 'Number of establishments,' when taken in connection with either 'value added' or 'value of product' furnishes proximate measurement of concentration tendencies. 'Number of wage earners,' when taken in conjunction with 'wages paid,' facilitate judgment regarding changes in wage levels.

Inspection of Table III, Col. 5 indicates that in terms of 'value of product' Pennsylvania had about regained in 1937 the position which it occupied in 1927, though it had registered an extraordinary severe decline for the period from 1927 to 1933. Similar patterns are discernible when the year by year data for 'value added' and 'wages paid' are compared. Though 'value of product,' 'value added' and 'wages paid' showed pronounced recoveries after 1933, the 'number of establishments' showed a marked decline from which it never recovered to the same extent as the other series.

Though Pennsylvania's manufacturing rapidly regained its 1927 position after 1934, it never quite regained its pre-depression prominence as a member of the community of American states. Inspection of Cols. 3, 6, and 9 which represent year by year ratios for: 1) Pennsylvania value added to United States total value added, 2) Pennsylvania value of product to United States total value of products, and 3) Pennsylvania wages paid to total United States wages paid, show clearly that the relative position of the Commonwealth, like its relative population position, has changed for the worse. As yet the change in the relative position of Pennsylvania is not alarming, but inasmuch as economic trends tend to become cumulative, the change would seem to warrant the painstaking attention of the General Assembly.

It is also instructive to compare the changes in the values of the percentage ratios 'value added' in 'competitive states'[1] to 'total United States value added by manufacturers.' Table IV[2] shows these ratios for the period from 1927 to 1937 for states making products which are identical with or similar to those manufactured in Pennsylvania.

TABLE IV

Value Added by Manufacture as Per Cent of U. S. Total in Fourteen 'Competitive States,' 1927-1937[a]

State	1927	1929	1931	1933	1935	1937
(1)	(2)	(3)	(4)	(5)	(6)	(7)
Pennsylvania	10.8	10.8	10.2	10.0	10.1	10.6
California	4.0	4.2	3.9	4.2	4.2	4.3
Connecticut	2.5	2.5	2.4	2.5	2.6	2.7
Illinois	8.9	9.2	8.9	8.3	8.7	9.2
Indiana	3.4	3.6	3.3	3.2	3.7	4.0
Massachusetts	5.9	5.4	5.9	6.0	5.2	5.0
Michigan	6.9	6.5	6.5	6.5	8.1	8.3
New Jersey	5.3	5.6	5.9	5.6	5.5	5.4
New York	16.7	15.6	17.6	16.5	15.4	13.2
North Carolina	2.2	2.2	2.0	2.2	1.9	1.9
Ohio	8.5	9.1	8.1	7.8	8.6	9.2
Tennessee	1.0	1.0	1.1	1.2	1.2	1.2
West Virginia	.7	.8	.8	.9	.9	.9
Wisconsin	3.0	3.0	2.7	2.5	2.8	2.8

[a] For underlying dollar amounts and sources, see Appendix C.

Inspection of Table IV, indicates that of the thirteen states whose products may be presumed to compete with goods manufactured in the Commonwealth, only four—Massachusetts, New York, North Carolina, Wisconsin—experienced a relative decline of position. Among these four states the most pronounced decline occurred in the State of New York, which in 1927 had contributed 16.7% of total value added by manufactures in the United States, a percentage contribution which by 1937 had dropped to 13.2%. In passing, it should be observed that New York's relative decline in manufacturing position was considerably more marked than that of the Commonwealth of Pennsylvania.

For the purpose of facilitating a close-up view of the structure of Pennsylvania's manufacturing economy, the Joint State Government Commission submits below a table which shows in terms of: 1) value added, 2) value of product, 3) wages paid and 4) number of wage earners, the absolute and relative importance of different types of manufacturing enterprise located in Pennsylvania.

Inspection of Table V shows that among the principal manufactures in Pennsylvania, steel works and rolling mills products rank decidedly first no matter how their relative importance is measured.

In terms of 'value added,' steel works and rolling mills accounted for $510,023,000, or 19.1% of total 'value added' in Pennsylvania. In terms of 'value of product,' steel works and rolling mills in 1937 produced an output valued at $1,109,843,000, which accounted for 18.4% of the value of all manufactured products produced in Pennsylvania. Steel works and rolling mills paid 23.2% of all manufacturing wages in Pennsylvania and employed 17.4% of all Pennsylvania wage earners. The group of firms loosely referred to as the 'steel industry'—that is, steel works, rolling mills, blast furnaces, machine shops, machinery producers not elsewhere classified, coke ovens, structural and ornamental metal works—accounted for 26.8% of total value of Pennsylvania's manufactured product, for

[1] For a detailed definition of the term 'competitive state' see, Appendix B, p. 6551.

[2] For dollar amounts underlying the percentages shown in Table IV, see, Appendix C, p. 6563.

28.6% of 'value added' by Pennsylvania manufactures; 30.4% of all manufacturing wages paid in Pennsylvania, and 23.1% of all industrial wage earners employed in Pennsylvania.

Cursory inspection of Table V indicates that no other industry or group of related industries approaches steel in importance, no matter which of the enumerated measures of importance one chooses to apply.

Though detailed manufacturing data for the period after 1937 are not yet available, it is possible to appraise subsequent developments by reference to factory employment and factory payroll indices.

The table below shows both of these indices for the period from 1927 to 1939 inclusive.

TABLE V

Selected Data for Principal Manufactures in Pennsylvania, 1937*

Manufactures	Value Added			Value of Product		Wages			Wage earners	
	Amount (000)	Percent of State total	Percent of U. S.	Amount (000)	Percent of State total	Amount (000)	Percent of State total	Percentage ratio of wages to value added	Number	Percent of State total

1939	83.1	96.8	75.1	90.8

Legend:

Columns (2) and (4) Federal Reserve Bank of Philadelphia release of December 1939 and other mimeographed releases; columns (3) and (5) U. S. Department of Labor, Bureau of Labor Statistics, "Employment and Payrolls, August 1939", p. 20 (for years prior to 1939) and successive issues for 1939.

Inspection of Table V, Col. 2 shows that measured in terms of employment, the manufacturing situation in Pennsylvania in 1938 was considerably worse than it had been in 1937—the employment index dropping from 94.6 to 76.9. Again in 1939, the manufacturing situation improved somewhat with the employment index rising from 76.9 to 83.1.

Measured in terms of payrolls (Col. 4), Pennsylvania manufacturing activities registered a drop from 88.6 to 61.9, but improved again in 1939 when the payroll index rose from 61.9 to 75.1.

Section V

The Decline of Pennsylvania's Mines

Though the position of Pennsylvania manufacturing enterprise is far from encouraging, the plight of Pennsylvania's mines is far more discouraging.

Though of lesser importance than manufacturing activities, mining operations occupy an important place in the Commonwealth's economy.

Traditionally, mining operations have made a substantial contribution to the economic welfare of the Commonwealth through the employment which they have given, the profits which they have yielded, and the taxes which they have paid. During recent years, however, the extroactive industries of Pennsylvania have encountered serious economic difficulties and, although they still provide a substantial portion of the income of the residents of the state, they have also contributed heavily to relief and related social problems.

Significant indexes indicative of the contemporary importance of the extractive industries in Pennsylvania and the changes which they have undergone are presented in Table VII.

Inspection of Table VII, Col. 2 indicates that the value of Pennsylvania mineral production has declined from $936,773,000 in 1927 to $472,000,000 in 1938. In terms of an index number (Col. 3) this drop presents a decline of approximately fifty percent. Though the value of United States mineral production has also fallen over the period under consideration (Cols. 4 and 5), the Pennsylvania

TABLE VII

Mineral Production in Pennsylvania and the United States, 1927-38*

Year	Value of Pennsylvania Production		Value of total United States production		Percentage ratio of Pennsylvania to United States value
	Amount (000)	Index (1927=100)	Amount (000)	Index (1927=100)	
(1)	(2)	(3)	(4)	(5)	(6)
1927	$936,773	100.0	$5,530,000	100.0	16.9
1928	881,490	94.1	5,385,200	97.4	16.4
1929	892,914	95.3	5,887,600	106.5	15.2

1934	546,933	58.4	3,325,400	60.1	16.4
1935	520,576	55.6	3,650,000	66.0	14.3
1936	599,457	64.0	4,556,800	82.4	13.2
1937	599,817	64.0	5,413,600	97.9	11.1
1938†	472,000	50.4	4,354,000	78.7	10.8

* U. S. Bureau of Mines, Mineral Resources of the United States and Minerals Yearbook, and unpublished tabulations.
† Preliminary.

decline was decidedly more pronounced than that registered by the nation as a whole. Col. 6 shows the year by year percentage ratios of value of Pennsylvania mineral production to value of United States mineral production. Inspection of this column indicates that Pennsylvania's share of value of mineral production has declined from 16.9% in 1927 to 10.8% in 1938.

It has been suggested in public from time to time that Pennsylvania's decline as a mineral producer is due to the partial replacement of coal by fuel oil. Though the increased use of fuel oils is probably one of the factors contributing to the plight of Pennsylvania's mines, it is not the only one.

The table below was designed to show that Pennsylvania has not only lost ground as a mineral producer but has also suffered an adverse change as a coal producer.

TABLE VIII

Pennsylvania Bituminous and Anthracite Coal Production and Pennsylvania Coal Production as Percent of United States Coal Production*

Year	Pennsylvania Coal Production			Pennsylvania as Percent of U. S. Total
	Bituminous (000 tons)	Anthracite (000 tons)	Total (000 tons)	
(1)	(2)	(3)	(4)	(5)
1927	132,965	80,096	212,061	35.5%
1928	131,202	75,348	206,550	35.9
1929	143,516	73,828	217,344	35.7
1930	124,463	69,385	193,848	36.1
1931	97,659	59,646	157,305	35.6
1932	74,776	49,855	124,631	34.6
1933	79,296	49,541	128,837	33.6
1934	89,826	57,168	146,994	35.3
1935	91,405	52,159	143,564	33.8
1936	109,887	54,580	164,467	33.3
1937	111,002	51,856	162,858	32.7
1938	77,040	46,099	123,139	31.7
1939†	90,436	50,808	141,244	31.9

* U. S. Bureau of Mines, Mineral Resources of the United States and Minerals Yearbook, and unpublished tabulations.
† Preliminary.

Inspection of Table VIII, Col. 5, indicates that the value of Pennsylvania's coal production (anthracite plus bituminous) expressed as a percentage of the value of total United States coal production has declined from 35.5% in 1927 to 31.9% in 1939. In other words, the traditional markets of Pennsylvania mines have not only been invaded by fuel oil, but whatever coal market remains is being increasingly supplied by other than Pennsylvania mines.

Section VI

The Place of the Farmer in Pennsylvania's Economy

Farming in Pennsylvania has weathered the recent crucial years better than either manufacturing or mining.

One of the more convenient over-all measures of the position of farming is gross income from farm production. The table below shows gross income from farm production by principal sources as well as government payments to farmers for Pennsylvania and the United States as a whole.

Table IX, Col. 2 shows that the Pennsylvania farmers' gross income from crops decreased from $123,327,000 in 1927 to $91,013,000 in 1939. However, this decline in gross income from crops was partially compensated for by an increase in gross income from livestock. Gross income from livestock increased from $207,553,000 in 1927 to $212,468,000 in 1939. In further compensation for the loss of gross income from crops were government payments to farmers, which began in 1933 (Col. 6). Adding gross income from crops, live stock and government payments (Col. 7), it appears that total gross income of farmers declined but approximately seven percent between 1927 and 1939.

The relative position of Pennsylvania farming is indicated by Cols. 10 and 11.

Inspection of Col. 10 indicates that United States farming suffered a more severe decline than Pennsylvania farming (Col. 8), the index for the United States dropping from 100 to 83 over the period under consideration whereas the index for Pennsylvania dropped from 100 to but 93. Likewise the percentage ratios, Pennsylvania farm gross income to United States farm gross income show that while in 1927 Pennsylvania accounted for but 2.8% of total United States farm income, in 1939 Pennsylvania accounted for 3.2% of total United States farm income.

With a view of ascertaining the specific crops and type of livestock responsible for the improvement of the relative farming position of the Commonwealth, Table X was prepared.

Inspection of the crop blank of Table X indicates that among principal Pennsylvania crops, only corn and apples have held their own over the period from 1927 to 1938. Per contra, the livestock bank indicates that though hogs and chickens have lost ground, eggs have held their own and the position of milk, cattle and calves has actually shown some improvement.

Section VII

Pennsylvania's Income Stream: Changes in Size and Sources

The results of the productive efforts of men and machines are measured in terms of income. Income, or 'income payments to individuals,' as the technical phrase has it, is the most comprehensive measure of a group of individuals such as is presented by the residents of the Commonwealth of Pennsylvania. "Income payments to individuals, or income is the sum total of wages and salaries earned, including work project wages and unemployment insurance payments, monies withdrawn from business tills by single proprietors and partners, the dollar equivalent

† Includes benefit payments.
** Preliminary.

of the produce which the farmer serves at his own table, interest and dividends earned by the investments of lenders or owners, net rents and royalties received by landlords and others, as well as all income derived from all other sources whatever, as long as it has found its way into the pockets or bank accounts of individuals.

Manifestly, changes in 'income payments or income tell a revealing tale of changes in the degree of success with which men have applied their energies, efforts and ingenuity to available resources regardless of whether those resources be assembled in factories, in mines, on farms, in the vaults of banks, in the generating stations of utilities, on the rights of way of railroads, or behind the trading counters of retailers and wholesalers.

Table XI, tells, in terms of dollars totals, the story of ten millions of Pennsylvanians working and struggling to secure a living.

TABLE XI

Income Payments in Pennsylvania, 1929-39

Year	Total income payments		Per capita income payments

* Martin, John L., "Income Payments to Individuals, by States, 1929-39," Survey of Current Business, October, 1940, pp. 8-12.
† Adapted from "Income Payments to Individuals, by States," op. cit., pp. 8-12 and United States population interpolations. For population sources see, Table I, Chapter I, footnote 1, p. 6452.

Col. 2 of Table XI tells the story at a glance. It shows that the total income of Pennsylvania dropped from $7,230,000,000 in 1929 to $5,678,000,000 in 1939, striking a depression low of $4,002,000,000 in 1933. Because of the increase in population which took place in spite of economic adversity[1] this substantially decreased total income had to feed, clothe and shelter an increasing number of Pennsylvanians. Income and population are related to each other in Col. 4, which shows that the per capita income of Pennsylvania decreased from $758 in 1929 to $576 in 1939 with a depression low of $412 in 1933.

Col. 3 and Col. 5 relate total Pennsylvania income payments and Pennsylvania per capita income, respectively, to the corresponding national figures. Col. 3 shows that whereas in 1929, 8.8% of the total United States income was received by Pennsylvanians, in 1939 only 8.1% of the national total trickled through the Commonwealth which compares unfavorably with Pennsylvania's relative position in 1932 when Pennsylvania income payments amounted to 8.5% of the national total. Again, Col. 5 indicates that while Pennsylvania's per capita income was 11% above the national average in 1929, the same per capita income was closer to national per capita income in 1939 although it had improved somewhat as compared with 1938. In other words, the relative decline in the manufacturing,[2] mining,[3] and farming[4] position of the Commonwealth as well as the concurrent decline in other fields of economic endeavor, is reflected in the relative decline of the income position of Pennsylvania and Pennsylvanians.

It is likewise instructive to compare Pennsylvania's year by year per capita incomes when expressed as percentages of national per capita income with the comparable series for states whose products are similar to or identical with those manufactured in the Commonwealth.

Table XII, shows the per capita incomes of competitive states[5] as percentages of United States per capita income.

Inspection of Table XII, Cols. 2 to 10, inclusive, indicates that out of the fourteen competitive states, but five, including Pennsylvania, registered declines in relative income position. It should be noted that among the states registering relative declines of varying magnitude (Pennsylvania, Illinois, Massachusetts, New Jersey, New York) only three—Pennsylvania, Massachusetts, and New York—have registered relative declines in their value added positions.[6] It should likewise be noted that among the states whose relative manufacturing position is measured by value added has declined—Pennsylvania, Massachusetts, New York, North Carolina, Wisconsin—only Pennsylvania, Massachusetts, and New York experienced a corresponding decline in relative income position. In the case of North Carolina and Wisconsin, whose relative importance as manufacturing states has also declined over the period under consideration, the loss of manufacturing activities has apparently been compensated for by the development of other types of economic endeavor. North Carolina's relative income position actually improved in spite of the relative decline in value added. Wisconsin, though it too lost as a manufacturing state, occupied the same relative income position in 1937 it has enjoyed in 1929.

It is exceedingly instructive for fiscal purposes to ascertain the specific sources from which the income of Pennsylvanians was derived over the period under observation.

Regardless of the type of product or service that is being made available, effective production in a society characterized by private property and private enterprise requires the collaboration of men with skills, men with money to risk and men with funds to lend. The income of men who furnish skills is technically referred to as 'wages and salaries,' the income of the men taking risks on their own account (such as single proprietors or partners) is labelled 'entrepreneurial withdrawals,' the men who risk their money in corporate enterprises receive

* Dollar figures from Martin, John L., "Income Payments to Individuals, by States 1929-1939," Survey of Current Business, October, 1940, pp. 8-12.

† Adapted from "Income Payments to Individuals," op. cit., pp. 8-12.

income which is referred to as 'dividends,' the lenders' income is known as 'interest,' and the owners of special types of property receive either 'net rents' or 'royalties.' Men, temporarily out of work and men permanently withdrawn from private productive activities are said to receive 'other labor income' which consists of such items as unemployment insurance benefit payments, work project wages, and general or categorical relief.

The table following shows the above enumerated component parts of income payments in Pennsylvania and the United States.

Inspection of Table XIII, Col. 4 shows that wages and salaries, as percentages of total income payments have decreased from 68.3% in 1929 to 64.0% in 1939. This percentage decrease in salaries and wages was more than compensated for by a percentage increase in 'other labor income' (Col. 6) which consists largely of unemployment insurance benefits, work project wages, and general and categorical assistance. Adding the percentages in Col. 4 to those in Col. 6 'salaries and wages' plus 'other labor income' increased slightly from 69.5% in 1929 to 71.8% in 1939. 'Entrepreneurial withdrawals' likewise increased slightly from 10.6% in 1929 to 11.2% in 1939, whereas dividends, interest, net rents, and royalties decreased from 20.0% to 16.9% during the same period.[7]

In view of the great importance of salaries and wages as component parts of total income payments the table below has been prepared.

[7] In interpreting these data, it should be remembered that all personal taxes, that is, taxes assessed against natural persons, must be liquidated out of income payments. These personal taxes, however, have not been deducted from income payments as shown in Table XIII, p. 6459.

TABLE XIV

Percentage Ratios of Wages and Salaries Paid out in Major Industries to Total Wages and Salaries in Pennsylvania, 1938*

Industry	Percent
(1)	(2)
Total	100
Manufacturing	34
Trade	14
Government	12
Service	11
Transportation	8
Mining	7
Finance	4
Construction	3
Electricity and gas	2
Communication	1
Agriculture	1
Miscellaneous	3

* Computed from unpublished estimates furnished by the National Income Division of the Department of Commerce.

Inspection of Table XIV shows that manufacturing enterprise, of which steel is the most important single industry group,[8] accounts for thirty-four per cent of all wages and salaries paid in Pennsylvania. The percentage contribution of manufacturing is more than twice as large as the wage and salary contribution made by trade, more than three times as large as the wage and salary contribution of the service enterprises, and 34 times as large as the wages and salary contribution of agriculture.

In the light of the outstanding importance of Pennsylvania manufactures as a source of wages and salaries, the fiscal policies affecting manufacturers are of special significance.

Concluding its survey of population and economic trends in Pennsylvania the members of the Joint State Govern-

[8] See, Section IV, p. 6454.

ment Commission wish to note that manufacturing in the Commonwealth has shown some improvement in 1939 and 1940.[9] Unfortunately, at least part of some very recent improvement is not due to peacetime expansion of the American economy in general and the Pennsylvania economy in particular, but is caused by serious international strife and the stimulation given to heavy industry by the National Defense program. In the nature of the case, neither cause is likely to have any degree of permanency. On the contrary, there is every good reason to believe that history will repeat itself. If such should be the case, present industrial activities will cease abruptly and underlying tendencies will again reassert themselves.

It is the considered judgment of the members of the Joint State Government Commission that the interests of all the people constituting the Commonwealth of Pennsylvania will be better served in the end if legislators will heed the trends which have emerged over the last decade and a half rather than be comforted by the feeling that "things are looking up and looking better". As a matter of statistical fact, things industrial in Pennsylvania are looking better. But the present bright glow in Pennsylvania's industrial sky is in large part but the reflection of a conflagration which threatens to engulf all that used to be known as Western Civilization.

CHAPTER II

Expenditures, Actual and Estimated, of the State Government of the Commonwealth

Section I

Pennsylvania State Government Expenditures and Income of Pennsylvanians, 1927-1941

Changes in the magnitude of a state government's operations are conveniently measured in termes of changes in total state government expenditures. When total state government expenditures are expressed as percentages of the total income of Pennsylvanians a first and proximate judgment of the importance of the state government as a factor in the life of a citizen and as a claimant of part of the contents of his pocketbook are made possible.

Table I shows total state government expenditures, total income of Pennsylvanians, and, as far as availability of data permits, total state expenditures as percentages of income payments.

TABLE 1

Total State Expenditures and Income Payments, Biennia 1927-29 to 1939-41

Biennium	Pennsylvania Income (000)	Total Expenditures (000)	Col. 3 / Col. 2 x 100
(1)	(2)	(3)	(4)
1927-29	.....	$243,432	..
1929-31	$13,883,000	353,472	1.1
1931-33	9,884,000	328,864	3.3
1933-35	8,597,000	346,053	4.1
1935-37	10,645,000	438,646	4.2
1937-39	11,385,000	567,638	5.1
1939-41†	.....	548,439	..

Legend:
Col. (2), Martin, J. L., "Income Payments to Individuals by States, 1929-1939", Survey of Current Business, October, 1940, pp. 8-12. Col. (3), computation of the Joint State Government Commission.
† Estimated.

[9] Van Pelt, Henry W., "Pennsylvania is Leader in Manufacturing", Commonwealth of Pennsylvania, Department of Internal Affairs, Monthly Bulletin, Vol. 9, No. 1, p. 24.

Inspection of Table I, Cols. 2 and 3 indicates that total Pennsylvania state expenditures exclusive of Federal receipts for special purposes and total income payments to Pennsylvanians have tended to move in opposite directions during the last decade. For instance, during the biennium 1929-31 income payments to Pennsylvanians amounted to $13,883,000,000 and total state expenditures amounted to $353,472,000. When expressed as percentages of total income, these total state expenditures amounted to 1.1 (see Col. 4). However, during the biennium 1937-39 this percentage had reached 5.1.

Turning from the relationship of expenditures to income payments to the behavior of total state expenditures (see, Col. 3) over the period from 1927 to 1941 it will be observed that total state expenditures rose from $243,432,000 for the biennium 1927-29 to an estimated $548,439,000, for the biennium 1939-41. It will be observed that this last figure is more than twice as large as the first.

Section II

Pennsylvania's General Fund Expenditures by Principal Functions

The mounting sums of State expenditures are allocated among many public functions, the allocation method being somewhat different for different publicity rendered services.

In the case of highway construction and maintenance all state monies[1] collected from the gasoline tax are deposited in a separate fund[2] and the sum total in the fund—unless borrowed under special legislative authority and devoted to the financing of other public functions—is devoted to highway purposes.[3]

However, this procedure is followed only in the case of highways and in connection with certain fees of minor quantitive importance.

Typically, all monies collected by the state government in the form of taxes[4] are credited to the General Fund of the Commonwealth and allocated among the different public services by the General Assembly.

In view of the extent of the operations of the General Fund, its disbursements in time are of special legislative interest.

Table II Shows General Fund operations for the biennia 1927-29 to 1939-41.

Table II shows total General Fund expenditures as well as General Fund expenditures or disbursements for 1) protection of persons and property, 2) general government, 3) conservation of natural resources, 4) public health and welfare, 5) public assistance, and 6) public education.[5]

Inspection of Cols. 4, 6, 8, 10, 12, and 14 indicate that the above enumerated General Fund disbursements for different public functions have changed considerably as regards absolute amounts and relative importance over the period from 1927 to 1939.

[1] One-half cent per gallon of gasoline is transferred to the counties, see, Commerce Clearing House, "Tax Systems", 8th ed., Chicago, 1940, p. 59.
[2] For Special Fund receipts and disbursements, see, Appendix C, p. 6563.
[3] Part of the proceeds from the gasoline tax is returned to the counties to be used for highway purposes. See, Chapter VI, p. 6473.
[4] For a discussion of principal Pennsylvania state taxes, see, Chapter III, p. 6465.
[5] See Joint State Government Commission: "Report on the Organization the State Government of Pennsylvania", Harrisburg, Pa., 1941; also for details regarding these functions see, The Pennsylvania Manual, Harrisburg, 1938, Vol. 83, Section 4. See also, Appendix C, p. 6563.

By way of first observation it may be pointed out that inspection of Table II indicates that the Commonwealth's General Fund disbursements for all but one function (see, Col. 7) increased when the biennia 1927-29 and 1939-41 are compared.

Disbursements for protection of persons and property

§ Will amount to a minimum of $208,000,000.
‡ Infinite.

(see, Col. 3) increased from $18,172,000 to $19,202,000. Disbursements for General Government (see, Col. 5) increased from $12,401,000 to $37,575,000. Disbursements for Public Health and Welfare (see, Col. 9) rose from $34,531,000 to $48,030,000. Disbursements for Public Education (see, Col. 13) rose from $75,132,000 to $93,231,000. Expenditures for Public Assistance, (see, Col. 11) a function which was not in existence in 1927-29, rose from $32,934,000 for the biennium 1931-33 to $193,910,000 for the biennium 1939-41.

Regarding the increase in General Fund disbursements for Public Assistance, it should be observed that this was the most rapid of all the increases noted.

Again, when expressed as percentages of total General Fund disbursements, Public Assistance and Public Education account for the largest percentage shares.

For the biennium 1939-41, for instance, Public Education accounted for 23.7% (see, Col. 14) of total General Fund disbursements, and Public Assistance (see, Col. 12) accounted for 49.2% of total General Fund disbursements.

In other words, in the biennium 1939-41 Public Assistance accounted for close to one-half of the disbursements of the General Fund and public education absorbed approximately one-fourth of the total disbursements of the General Fund. In terms of absolute dollar amounts public assistance will cost the state government an estimated $208,000,000 for the fiscal period 1939-41 and public education an estimated $93,231,000.

Because of the substantial drain which both public assistance and public education make upon the General Fund of the Commonwealth, the financing of the two functions will be briefly considered below.

Section III

The Financing of General Assistance

It would appear that among the fourteen states whose products compete with ours, Pennsylvania is the only one financing general assistance exclusively out of state tax sources.

Before indicating the nature of the financial problems which are presented by general assistance, the members of the Joint State Government Commission wish to call attention to the differences between so-called general assistance and so-called public assistance.

The term public assistance relates to the following functions: 1) aid to the blind, 2) aid to dependent children, 3) aid to the needy aged, and 4) so-called general assistance.

Aid to the blind, takes the form of "pensions" granted by the Commonwealth to blind residents of Pennsylvania. This form of aid is financed exclusively out of state tax funds.[1] Aid to dependent children, sometimes referred to as mothers' assstance consists of grants designed to benefit needy children. The state funds made available for this purpose are matched by the Federal Treasury upon proper authorization of the Social Security Board. Aid to the needy aged consists of payments to needy aged individuals, resident in Pennsylvania. Again, state payments to the needy aged are matched by the Federal Government. So-called general assistance consists of cash

[1]The Federal Government stands ready to match grants to the blind, provided the blind to whom the grants are made are in need, need being defined by Federal statute. To be eligible for aids or so-called "pensions" the Pennsylvania blind do not have to be "needy" in the Federal sense of the word.

payments to persons not eligible for any of the other aids who are temporarily or permanently unemployed and without other means of support.

General assistance, or direct relief as it is commonly referred to in states other than Pennsylvania, is the most costly of the public assistance functions, having accounted for an estimated total of approximately $132,000,000 for the biennium 1939-41.[2]

Table III indicates in a summary fashion how state and local governments of fourteen 'competitive states' share in the financing of general assistance, or direct relief.

TABLE III

State and Local Percentage Contributions toward the Financing of General Assistance: Pennsylvania and 'Competitive States' as of January 1, 1939[a]

State	State Share	Local Share
(1)	(2)	(3)
Pennsylvania	100	0
California	x[b]	x
Connecticut	0	100[c]
Illinois	x	x[d]
Indiana	0	100
Massachusetts	0	100[c]
Michigan	x	x
New Jersey	x	x
New York	60	40[e]
North Carolina	0	100
Ohio	50	50[f]
Tennessee	0	100
West Virginia	x	x
Wisconsin	x	x

[a] Lowe, R. C., State Public Welfare Legislation, pp. 70-76 and pp. 254-255. Washington, 1939.
[b] When used in this table x indicates that the state and locality share, but the percentages are not given.
[c] The state reimburses towns for the expenses of state paupers.
[d] Local share determined by formula prescribed by law.
[e] State reimburses 100% of cost of state poor.
[f] Does not apply to $1,500,000 appropriated from 1939 sales tax revenue.

Inspection of Table III shows that: 1) out of the fourteen competitive states only Pennsylvania finances general assistance exclusively out of state government funds, 2) five—Connecticut, Indiana, Massachusetts, North Carolina and Tennessee—make no state contribution whatever toward the financing of general assistance, and 3) in the remaining eight states—California, Illinois, Michigan, New Jersey, New York, Ohio, West Virginia and Wisconsin—the financing of general assistance or direct relief, as it is sometimes called, is a joint state-local responsibility with the state governments contributing varying proportions toward the payment of general assistance obligations incurred.

Because of the unique method of financing general assistance in Pennsylvania and the strain which this arrangement imposes upon the General Fund, it has been suggested that part of the responsibility for financing general assistance be returned to the local units of government[3] with whom the responsibility rested prior to 1933.

Section IV

The Financing of Public Education: Some Facts and a Challenge

The financing of public education[1] in Pennsylvania, unlike the financing of general assistance, is a joint function of the state and local governments.

By way of introductory observation the members of the Joint State Government Commission wish to point out that in their judgment the financial policies of the state government as they relate to public education may well be different from those relating to the financing of general assistance or direct relief.

This judgment is bottomed upon the observable fact that whereas educational offerings made available through the local school districts can and are standarized by the General Assembly by means of legislation stipulating minimum teacher salaries as well as minimum teacher qualifications no such state wide standardization seems possible in the case of general assistance, because the determination of a given citizen's need for public relief is a highly individualized matter involving the ascertainment of facts which tend to differ in each and every individual case.[2] Inasmuch as the pertinent facts necessary to the satisfactory establishment of eligibility for general assistance can best be determined locally, a state legislature that assumes exclusive responsibility for the financing of general assistance loses virtually all effective control as regards the magnitude of the financial obligations which it incurs.

Passing from the general to the concrete, the members of the Joint State Government Commission wish to outline contemporary procedures as they relate to the financing of public education in Pennsylvania.

These dollar disbursements of the Commonwealth General Fund, which are usually made available to the local school districts, constitute on the average 23.2%[3] of the current cost of public education and about 21.2% of the total cost of public education, the remainders of 76.8% and 78.8% being financed by the local school districts out of local real estate and local per capita taxes.[4]

It is interesting to compare state and local percentage

TABLE IV*

Percentage of Total Public School Costs Derived from State Funds in 'Competitive States,' 1935-36

State	State Percentage Share of Total Cost

* Adapted from Pennsylvania State Education Association, "Report of the Committee on Survey of School Costs," p. 21.

[2] For details regarding General Fund expenditures for general assistance, see Joint State Government Commission, "Relief Report."
[3] For a fuller discussion of proposals of this type, see Chapter VII, p. 6489. See also, Joint State Government Commission, "Relief Report," Harrisburg, 1941.
[1] The treatment of public education presented in this section is confined to grade, high, and vocational school education. It does not include so-called 'higher education' which is in part financed by the General Fund of the Commonwealth by means of biennial subsidies to selected colleges and universities.

[2] For further details see: Joint State Government Commission "Relief Report." Harrisburg, 1941.
[3] Pennsylvania Education Association, "Report of the Committee on Survey of School Costs," Harrisburg, 1938, pp. 21 and 22. Also, Pennsylvania State Education Association, "Financing Public Education in Pennsylvania," Harrisburg, 1940, p. 30.
[4] Pennsylvania State Education Association "Financing Public Education in Pennsylvania," op. cit., p. 9. It should be observed that the Federal government makes a contribution toward the financing of vocational education. However, in the recent past the Federal contribution has never exceeded one-half of one per cent of the total cost of public education.

contributions toward meeting the cost of public education for Pennsylvania and selected[5] competitive states. Table IV presents the pertinent data as far as they are available.

It is interesting to observe that three out of eight competitive states for which data are readily available made larger state percentage contributions toward the financing of public education than Pennsylvania, whereas four made substantially smaller relative contributions.

In Pennsylvania, the local school districts—some 2,500 in number— are divided into four different classes on the basis of population. Different class school districts obtain different percentages of their current expenses from the General Fund of the Commonwealth.

At the present these percentages—which are often referred to as reimbursement percentages or reimbursement fractions[6]—are as follows:[7]

First Class districts	25%
Second Class districts	35%
Third Class districts	35%
Fourth Class districts	50%

These reimbursement fractions are applicable to the current expenses of all school districts unless 1) a district's true valuation of real property per teacher is between $50,001 and $100,000, in which case the district in question has its minimum salaries reimbursed to the extent of 60%, or 2) a given district's true valuation of real property per teacher is less than $50,000, in which case the General Fund of the Commonwealth reimburses the district to the extent of 75% of its minimum salaries.

Generally speaking, the dollar amount of reimbursement which a given school district derives from the General Fund of the Commonwealth is obtained by multiplying teachers' minimum salaries as fixed by the General Assembly of the Commonwealth by the reimbursement fractions (.25, .35, .50, .60, and .75, respectively) which have previously been established for different classes of school districts.

Though the present system of school reimbursement which was established in 1921[8] under the sponsorship of the Hon. Franklin Spencer Edmonds, now Senator from Montgomery County, is immeasurably superior to previous systems, the members of the Joint State Government Commission wish to call the attention of the General Assembly to some stresses and strains which the present setup has developed since its inception.

In the first place, the members of the Joint State Government Commission wish to point out that though 'true valuation' of the property per teacher is an important factor in determining the reimbursement fraction of the less well-to-do school districts of the Commonwealth, at the present, no state agency has adequate powers and means to assure 'true valuation' assessments. As regards the direct interest of the state government in reliable 'true valuation' assessments and the defects of contemporary procedures the former Superintendent of Public Instruction of the Commonwealth of Pennsylvania, Dr. Lester K. Ade, observed in 1938:

"One of the major defects is the system of determining the true valuation per teacher. The factors used in this calculation are the assessed valuation of property, the percentage of true value at which the property is assessed, and the number of teachers. Obviously, the higher the assessment percentage, and the greater the number of teachers, the lower the true valuation per teacher.

"The assessment percentages reported by the school boards are presumably the percentages used by the assessors in making the valuation of property for levying of the county, school, and township taxes. These percentages cannot be accurate, because many assessors do not use a uniform percentage in assessing property. To most assessors the relationships between the true values and the assessed values for many properties are very indefinite. Therefore, the assessment percentages reported by school boards may or may not be accurate, and the school district may or may not be obtaining the rate of State-aid to which it is really entitled.

"When the valuation per teacher of a school district is close to the division line in determining State-aid percentages, a slight boost in the assessment percentage or in the number of teachers can put the district in a group receiving a higher percentage of State-aid. The Department of Public Instruction has made a study of districts whose rate of reimbursement has been changed under the Edmonds Act for the biennium of 1935-37 in order to ascertain the causes of the changes. Of the 289 districts studied in which the rate of reimbursement had changed, 242 had moved to a higher rate of reimbursement and 47 to a lower rate. Of 242 changes wherein the districts moved to a higher rate of reimbursement, 152 were due to increases in the rate of assessment, twenty-one to increases in the number of teachers in the districts, seven to a combination of increases in the assessment rate and increases in the number of teachers in the districts, thirty-seven to decreases in assessed value not due to changes in the rates of assessment, nine to a combination of an increase in assessment percentages and a decrease in assessed value, one to a combination of three factors—increase in assessment percentage, decrease in assessed valuation, and increase in the number of teachers, and fifteen to a higher rate of reimbursement were unexplained. Of forty-seven changes in which districts moved to a lower rate of reimbursement, twelve changes were due to decreases in the number of teachers, sixteen to decreases in the assessment rates, eleven to increases in assessed value not due to a change in the assessment rate, and two to increases in asessed valuation and decreases in assessment rates. No explanation was given for the change in the status of six districts.

"It is plain to be seen that most of the changes are toward a higher rate of reimbursement, and that the major causes are increases in the assessment rate, decreases in assessed value not due to changes in the assessment rates, and increases in the number of teachers.

"A closer view of the manner in which the system operates can be obtained by examining the situation in some of the school districts. In North Union Township in Fayette County the rate of reimbursement changed from thirty-five per cent in 1933 to sixty per cent in

[5] The pertinent data for some competitive states would not seem to be readily available.

[6] For a brief historical note regarding the origin of the contemporary reimbursement system, see, Pennsylvania State Education Association, "Report of the Committee on Survey of School Costs," Harrisburg, 1938, Chapter IV, p. 111.

[7] Pennsylvania State Educatin Association, "Financing Public Education in Pennsylvania," Harrisburg, 1940, pp. 31 and 32.

[8] Pennsylvania State Education Association "Report of Committee on Survey of School Costs," p. 111.

1935-37, although there was a decrease of forty teachers. The increase in the rate is explained by the fact that the assessment rate of 40.5 per cent upon which the 1933-35 rate was based changed to an average of 76.6 per cent. In Madison Township School District in Lackawanna County, where the rate of assessment has been 100 per cent since 1930 and has given that school district a sixty per cent reimbursement, the addition of one teacher raised the district to a rate of reimbursement of seventy-five per cent for the biennium of 1935-37. These examples serve to show the manner in which many changes of reimbursement come about under the existing system.

"At the present time the State Council of Education has authority to correct and approve assessment percentages after investigation, but with locally elected assessors with whom they have scarcely any contact and who are not assessing property at a uniform percentage within a given school district, the task of accurately revising the assessment percentages reported is one the State Council is not equipped to do."[9]

The members of the Joint State Government Commission wish to suggest that their colleagues in the General Assembly take the real estate property assessment problem under serious advisement because inadequate assessments when utilized for school reimbursement purposes may place unjustifiable strains upon the General Fund of the Commonwealth.

Second, as has been pointed out above,[10] school reimbursement fractions vary with the class into which a given school district belongs. A district's membership in a given class, in turn, depends upon the population resident in the district, and the larger the population the lower the reimbursement fraction on the basis of which the General Fund of the state government shares in the current expenses involved in operating the schools of the Commonwealth.

Underlying the classification of school districts according to population is the assumption that taxable real estate (the main source of local school revenue) varies with population. In terms of an illustration, the assumption underlying the present reimbursement system is that a given school district of the third class has more taxable real estate per child of school age under its jurisdiction than a school district of the fourth class. Hence a school district of the third class is reimbursed for its minimum salaries to the extent of 35% whereas a school district of the fourth class is reimbursed to the extent of 50%. In addition, it would seem that the contemporary reimbursement system is built upon the assumption that all school districts in the same class show substantially the same amount of effectively taxable real estate per child of school age.

In the light of the problem presented by the so-called 'distressed school district'[11] a problem of which the General Assembly has taken legislative cognizance at several sessions[12] the validity of the assumption outlined above has been questioned in public discussion. With a view of testing the supposition underlying the present school reimbursement system, the Joint State Government Commission has developed the data submitted below which are believed to shed light upon the problem at hand.

TABLE V

Adjusted Taxable Real Estate Valuation per Pupil in Average Daily Membership for Selected Fourth Class School Districts, 1938-1939*

Adjusted Valuation Per Pupil	Frequency	Cumulative Frequency
	(1)	(2)	(3)

38,000—38,500	1	330
Total	330	

* From Joint State Government Commission.

Table V shows for selected 'distressed' fourth class school districts the 'adjusted' assessed valuation of taxable real estate, the main source of local school tax revenue.

Table V, Col. 1 presents the adjusted[13] real estate valuation per child in average daily attendance and Col. 2 shows a number of selected[14] distressed fourth class school districts which had a given adjusted assessed realty valuation per child in average daily attendance. To illustrate, in 1938-39 there were four (Col. 2) distressed school districts having an adjusted assessed realty valuation between $0 and $500. In the same year there were 41 (Col. 2) distressed fourth class school districts having an adjusted assessed real estate valuation (Col. 1) of between $500 and $1000 per child in average daily attendance.

Inspection of Col. 1 indicates that adjusted assessed realty valuation per child in average daily attendance ranged from $250 to $38,250, the mean or average value being $2,871 and the coefficient of variation exceeding 68%[15]. Further inspection indicates that most of the fourth class school districts investigated in Table V had adjusted assessed realty valuations per pupil in average daily attend-

[9] Pennsylvania State Education Association "Report of the Committee on Survey of School Costs," Harrisburg, 1938, pp. 83 and 84.

[10] See, pp. 6463 and following.

[11] For a complete list of distressed school districts, their assessed and adjusted real estate valuation and their per capita tax levies see, Appendix C, p. 6563.

[12] Between 1931 and 1941 the following amounts were appropriated for distressed school districts: 1—Biennium 1931-33, $1,250,000; 2—Biennium 1933-35, $5,000,000; 3—Biennium 1935-37, $4,000,000; 4—Biennium 1937-39, $3,000,000; 5—Biennium 1939-41, $4,000,000. From a computation of the Joint State Government Commission.

[13] "Adjusted real estate valuations" are assessed valuations equalized at market value levels. For technique employed in equalizing actual assessments at market levels see, Appendix B, p. 6551.

[14] For methods by means of which fourth class school districts have been selected see, Appendix B, p. 6551.

[15] For a discussion of the significance of the coefficient of variation, see Appendix B, p. 6551.

ance ranging from $250 to $5,250. This segment range as well as the over-all-range are of considerable significance from a state of reimbursement point of view, for they indicate that if a reimbursement fraction of 50%[16] is adequate for, say, the well-to-do districts, it is necessarily inadequate for the less fortunate districts.

Table VI shows for all third class school districts, data comparable to those shown for the selected fourth class districts previously presented in Table V.

TABLE VI

Adjusted Taxable Real Estate Valuation per Pupil in School Census for Third Class School Districts, 1936-1937*

Adjusted Valuation Per Pupil	Frequency	Cumulative Frequency
(1)	(2)	(3)
$ 0— 1,000	4	4
1,000— 2,000	46	50
2,000— 3,000	49	99

73,000—74,000	1	255
Total	255	

* Adjusted valuation of real estate taken from Report of the Committee on Survey of School Costs, Pennsylvania State Education, Association, pp. 126-203.
School census taken from Statistical Report of the Superintendent of Public Instruction, Harrisburg, 1937, pp. 8-11.

Inspection of Table VI, Col. 1 reveals that adjusted assessed realty valuation per child as given by the school census in third class districts ranges from $500 to $73,500, the mean or average assessed valuation per child being $5,261 and the mean having a coefficient of variation of 61.3%[17]. Close inspection of Col. 1 further indicates that if a given reimbursement fraction (35% of minimum salaries in the case of third class school districts) is adequate for the upper bracket districts it is necessarily inadequate for the less well-to-do districts. Similarly, if the present reimbursement fraction of .35 if considered adequate for the less well-to-do districts, it would seem to follow that it must be in excess of needs as regards the more fortunate districts.

It is likewise instructive to compare adjusted assessed valuation per child in fourth and third class districts.

Comparison of Table V and VI shows that numerous fourth and third class districts have the same adjusted taxable real estate valuation per child. The following table which is based upon Tables V and VI, shows the most frequently occurring instances of virtually identical adjusted realty valuation per child in fourth and third class districts.

TABLE VII

Number of Fourth and Third Class School Districts Having Similar Adjusted Realty Valuations per Child

Adjusted Realty Valuation Per Child	Number of Districts Fourth Class	Third Class
(1)	(2)	(3)
$1,000—$2,000	14	46
2,000— 3,000	69	49
3,000— 4,000	30	39
4,000— 5,000	14	21
5,000— 6,000	9	24
	136	179

In interpreting Table VII, it should be recalled that this table does not present a complete recapitulation of Tables V and VI. It merely shows adjusted realty valuation identity in fourth and third class school districts for those districts where such identity occurs with relatively high frequency.

With this limitation in mind, it is instructive to observe that there are at least 136 fourth class districts which have approximately the same adjusted realty valuation as 179 third class districts. Unless all these districts come under the special rule which provides for reimbursement on an adjusted valuation per teacher basis,[18] the third class districts will have their current school expenses reimbursed to the extent of 35%, whereas the fourth class districts will have their current expenses reimbursed to the extent of 50%.

It is the judgment of the members of the Joint State Government Commission that the situation outlined above is worthy of the attention of the General Assembly the members of which might well raise the question: Should the contemporary reimbursement system not be modified with a view of what seem to be defects which have developed in the course of its twenty years of operation? If any modifications of the system are taken under advisement they may well aim at the liquidation of the 'distressed school district' problem. The present 'emergency' method of dealing with this problem by special legislative appropriations to be allocated among the school districts at the discretion of the Superintendent of Public Instruction would not seem to be in conformity with American precepts of government. As Dr. Francis B. Haas, present Superintendent of Public Instruction of the Commonwealth of Pennsylvania has so ably said, " . . . in a democracy, no man should have the power to distribute so much public money (referring to the dollar totals involved in making grants to the distressed school districts) at his discretion."[19]

CHAPTER III

Pennsylvania State and Local Tax Bases, Tax Rates and Tax Yields

Section I

Changes in Pennsylvania's 'Over-all Tax Effort,' 1929-1940:

Definitions and Measurements

Any increases in public expenditures[1] necessitate cor-

[16] See, pp. 6463 and 6464.
[17] A coefficient of variation measures the variations of actually observable values from a computed average. Assuming that a given average is 100, a coefficient of variation of 20% means that the actually observable values range anywhere from 80 to 120. The larger a given coefficient of variation, the less representative the average. See, Appendix B, p. 6551.

[18] See, pp. 6463 and 6464.
[19] Remarks of Dr. Francis B. Haas, meeting of the Pennsylvania Education Congress in the Forum, Harrisburg, October 2, 1940.
[1] For recent expenditure trends in Pennsylvania, see, Chapter II, p. 6460.

responding and proportional increases in public revenues. Though legislators, under pressure from constituents whose interests are diverse and sometimes at cross-purposes, may ardently desire to break the discomforting connection between increases in public expenditures and the necessity for increases in public revenues, all experience and logic shows that the magic circle cannot be broken save by repudiation and bankruptcy. To be sure, legislators inconvenienced by the necessity of paying bills lawfully contracted may temporarily delay the day of reckoning. But though they may temporarily disregard the revenue and tax obligations imposed upon them inevitably and automatically by their favorable action upon appropriation bills, they cannot abolish the day of reckoning either by statute or joint resolution.

Pennsylvania's Constitution makes it relatively difficult for legislators to refuse to pay the piper that attends whenever an appropriation bill is favorably acted upon, because Article IX, section 4[2] of that basic instrument decrees that the indebtedness of the Commonwealth may not exceed $1,000,000 at any one time. However, in spite of this Constitutional restriction, some deferment is possible. For a limited time the difference between public expenditures and public revenue can be maintained by manipulations of the fiscal year, shifting of the dates on which taxes fall due, and so called temporary borrowing from Special Funds.[3] Though sometimes any one of these manipulations can be justified, their persistence in time tends to introduce an element of uncertainty in the affairs of the state and the citizens who compose it which is prejudicial to the interests of both.

With a view of facilitating comparisons between the outgo and income of the public treasury, the Joint State Government Commission submits below data for Pennsylvania and selected 'competitive states'[4] showing estimated tax yields, tax bases, tax rates and other relevant data. Before presenting these data in detail the members of the Joint State Government Commission wish to submit certain preliminary observations which they believe germane to the problem under consideration.

In the first place, tax yield or tax collection data are not particularly meaningful unless related to some general measure of welfare. That is to say, it is not particularly consequential to point out that tax collections have either risen or fallen over a specified period of time unless such a statement is accompanied by some other statement relative to the changes in the economic position of those individuals or groups of individuals from whom the taxes whose yields are shown to have been collected. A convenient general measure of changes in the economic position of individuals or groups of individuals is presented by income or, as the technical phrase goes, 'income payments to individuals.'[1] When the percentage ratio of 'total tax collections' to 'total income' is calculated, a useful measure is obtained which shows to what extent public revenues impinge upon private purses.[2] If the measurement indicated is taken for successive years, the observant legislator can learn a great deal regarding the causes of tax agitation. For instance, if the value of the percentage ratio 'tax collections' to 'income' rises rapidly over a short period of time, such rise is usually accompanied by extensive and emphatic complaints about "excessive tax burden," although the allegedly "excessive burden" may be considerably lighter than the "burden" in comparable and 'competitive states.'

Section II

Pennsylvania's Principal State Tax Sources

Table I, shows for the period from 1929 to 1940 Pennsylvania state tax collections, actual and estimated[5] local tax collections; state plus estimated local tax collections, estimated per capita state taxes, estimated per capita local taxes, estimated per capita state plus local taxes, Pennsylvania per captia income, and Pennsylvania per capita taxes (state, local, state plus local) as percentages of Pennsylvania per capita income.

Inspection of Table I Col. 4 shows that Pennsylvania state plus estimated local tax collections have risen from $468,945,000 in 1929 to $528,155,000 in 1939. As inspection of Cols. 2 and 3 indicates, this increase in total tax collection is due exclusively to an increase in state tax collections—local tax collections over the period under consideration having actually declined, but state tax collections registering a rise from $125,851,000 in 1929 to $247,702,000 in 1940. In terms of indices (Cols. 5, 6, and 7) total Pennsylvania tax collections have risen from 100 in 1929 to 112.6 in 1939, an increase of approximately 12 per cent, local collections have declined approximately 15 per cent (Col. 6) and state collections (Col. 5) have increased 96 per cent.

The changes in tax collections—total, state, and local—are reflected in changes in per capita tax collections shown in Cols. 8, 9, and 10. Over the period under consideration, Pennsylvania total per capita tax collections increased from $49.20 in 1929 to $53.50 in 1939. Local per capita tax collections decreased from $36.00 in 1929 to $29.70 in 1939, but state per capita tax collections increased from $13.20 in 1929 to $25.00 in 1940, having reached an all time high of $28.30 in 1937.

Cols. 12, 13 and 14 show Pennsylvania per capita tax collections—state, local and total—as percentages of Pennsylvania per capita income. Inspection of these columns indicates that total per capita tax collections as percentages of per capita income increased from 6.5% in 1929 to 9.3% in 1939. Though per capita local tax collections (Col. 9) decreased between 1929 and 1939, local per capita tax collections as percentages of per capita income increased from 4.8% in 1929 to 5.2% in 1939. State per capita tax collections as percentages of per capita income exhibited the same tendency as total—and local—per capita collections as percentages of per capita income, rising from 1.7% in 1929 to 5.0% in 1938 and then dropping back to 4.2% in 1940. It should be observed that though all percentage ratios: 'per capita collections' to 'per capita income' increased over the period under consideration, the value of the ratio 'state per capita tax collections' to 'per capita income' increased more rapidly than the value of the two other 'per capita tax collections' to 'per capita income' ratios.

Col. (11) Data from Martin, J. L., "Income Payments to Individuals by States, 1929-1939," Survey of Current Business, October, 1940, pp. 8-12, and Col. (2) Table I, Chapter I, p.
* Estimated For local tax collections, see, Appendix B, p. 6551.
For 1940 per capita income, see Appendix B, p. 6551.

For convenience of reference the percentage ratio 'total per capita tax collections' to 'per capita income' will henceforth be designated as 'over-all tax effort'. In other words, the 'over-all tax effort' of any one jurisdiction is measured by the value of the ratio 'total per capita tax collections of the jurisdiction in question' to the 'per capita income received by the persons constituting the jurisdiction'.

It seems apparent that though this measure is useful for the purpose indicated above[4] it does not furnish the legislator who is interested in ascertaining the specific effects of a given tax system with sufficient detail. Typically, the legislator is not only interested in what percentage the operations of government take from the income of his constituents, he is likewise vitally interested in ascertaining who among his constituents bears the brunt of an increase in over-all tax effort. A first and tentative answer to this question is facilitated by a review of statutory changes in tax rates and tax bases.

Table II, was prepared to facilitate such a review as far as tax rates are concerned.

Cursory inspection of Table II, Col. 2, which shows the title and measure of principal Pennsylvania state taxes, and Cols. 3, 4, 5, 6, 7 and 8 which show the receipts from these titles for the years 1929, 1935, 1936, 1937, 1938, 1939 and 1940, indicates that the bulk of Pennsylvania's state tax collections is derived from business taxes, the only quantitatively consequential exception being represented by the personal property tax, the cigarette tax, the inheritance tax, and the gasoline tax.

Inspection of Cols. 9 to 15, inclusive, which show the rates carried by the titles listed in Col. 2, indicates that the specific tax effort required from selected tax payers has increased considerably between 1935 and 1940.

To mention only the more conspicuous increases in specific tax effort—a term which may be defined as the percentage ratio 'tax due' to 'value of tax base'—such increased specific state tax effort has been primarily required from the corporate stock base, the corporate net income base, the personal property base, and that segment of the transaction or commodity base represented by cigarettes, alcoholic beverages, and gasoline.[5]

Table III, presents an index of major changes in specific state tax effort which have taken place between 1935 and 1940.

TABLE III*

Index of Changes in Specific Tax Effort Required from Principal Tax Bases

Tax Base	State Taxes Due as Percentages of Unit Value of Bases	
	1935	1940
(1)	(2)	(3)
Corporate Loans	4	8
Bank Stock	4	8
Title Insurance and Trust Companies	5	8
Personal Property	0	4
Utilities Gross Receipts	14	20
Emergency Relief-Sales	1	0
Cigarettes	0	1
Gasoline	3	4
Emergency Liquor	0	10
Corporate Net Income	0	7

* Computed on the basis of data shown in Table II.

Inspection of Table III indicates, for example, that one dollar of corporate net income, while not subject to any state income tax whatever prior to 1935, was subject to a seven percent corporate net income tax in 1940, was subject to a seven per cent corporate net income tax in 1940. Similarly, whereas a gallon of gasoline was subject to a tax of three cents in 1935, it was subject to a tax of four cents in 1940.

Generalizing upon Table III, it appears that though the tax contribution of certain personal consumption items (gasoline, liquor, cigarettes) as well as the taxes required from personal property have increased, the increases in specific tax effort are decidedly concentrated in the so-called business tax field.

The increase in specific tax effort required from business bases is somewhat more severe than would appear upon inspection of Table III, because the corporate stock base was considerably broadened in 1935 by the removal

[4] See, p. 6486.

[5] For a detailed legislative history of these levies, see, Appendix A, p. 6496.

of the manufacturers' exemption which, prior to that date exempted manufacturing concerns from liability under the levy in question.[6]

Section III

Recent Changes in Over-all Tax Effort in Pennsylvania and in 'Competitive States'

With a view of comparing changes in Pennsylvania's over-all tax effort with changes in over-all tax effort in 'comparative states,'[1] Tables IV, V, VI, and VII have been prepared.

Table IV, immediately following, shows changes in over-all total tax effort[2] for Pennsylvania and thirteen competing states for the year 1929 and the period from 1932 to 1938.

TABLE IV

Percentage Ratio 'Total Tax Collections' to 'Income Payments of Residents' of 'Competitive States' for Selected Fiscal Years*
1929, 1932-38

State	1929	1932	1933	1934	1935	1936	1937	1938
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)
Pennsylvania	6.5	10.4	10.5	9.0	8.8	8.15	9.16	10.6
California	7.7	12.2	10.8	9.7	9.4	9.1	9.7	11.0
Connecticut	6.8	11.3	10.9	9.6	9.2	8.7	8.5	9.6
Illinois	5.5	11.6	11.1	10.8	11.1	9.3	9.2	10.7
Indiana	8.8	16.3	13.2	11.2	11.4	9.5	9.6	11.2
Massachusetts	8.0	11.7	11.9	11.5	11.2	10.4	10.9	12.2
Michigan	9.0	15.7	15.4	11.9	10.2	9.1	8.8	10.3
New Jersey	9.7	13.1	15.5	14.2	13.6	13.3	12.5	14.1
New York	7.5	11.9	11.6	11.3	11.1	11.0	11.2	12.5
North Carolina	9.5	15.5	12.5	9.3	9.3	9.2	9.7	10.6
Ohio	7.5	13.3	10.7	9.4	9.9	9.1	8.6	9.2
Tennessee	7.2	13.1	12.9	9.0	8.5	8.3	9.2	11.3
West Virginia	8.8	14.8	12.0	8.9	9.9	9.0	9.1	10.4
Wisconsin	9.2	17.1	15.7	12.9	11.3	10.5	10.7	12.4

* For underlying tax data and sources, see Appendix B. Also, Martin, J. L., "Income Payments to Individuals, by States, 1929-1939," Survey of Current Business, October, 1940, pp, 8-12.

Inspection of Table IV[3] indicates that 1) contemporary (1938) over-all tax effort varies considerably among the states, 2) the changes in time of over-all tax effort are somewhat different for different states.

As regards 1938 differences in over-all total state tax effort, it should be observed (Table IV, Col. 9) that whereas the Pennsylvania percentage ratio 'total per capita tax collections' to 'per capita income' stood at 10.6, four of the thirteen 'competing states,' showed somewhat lower over-all tax effort ratios than Pennsylvania. These states were Connecticut with an over-all tax effort of 9.6%, Michigan with 10.3%, Ohio with 9.2%, and West Virginia with 10.4%. It should be noted, however, that though all these states showed a lower over-all tax effort than the Commonwealth, the percentage differential between Pennsylvania and any one of the other 'competitive states' in no case exceeds twenty per cent. Per contra, eight of the thirteen 'competitive states' showed higher over-all percentage tax effort ratios than Pennsylvania. The states showing greater tax effort than Pennsylvania in 1938 were: California with an over-all tax effort of 11.0%, Illinois with 10.7%, Indiana with 11.2%, Massachusetts with 12.2%, New Jersey with 14.1%, New York with 12.5%, Tennessee with 11.3% and Wisconsin with 12.4%. Again it should be noted that the over-all tax effort differentials between Pennsylvania and those states with a greater tax effort than the Commonwealth are relatively small.

As regards changes in time in total over-all tax effort in Pennsylvania and 'competitive states' for the period from 1929 to 1938, the last year for which complete comparative data are available, Table V, which is based upon Table IV, shows that the increase in Pennsylvania's over-all tax effort exceeded 63 per cent.

TABLE V

Index of Total Over-all Tax Effort for Pennsylvania and 'Competing States,' 1929-1938

State	Index of Total Over-all Tax Effort 1929	1938
(1)	(2)	(3)
Pennsylvania	100	163.1
California	100	142.9
Connecticut	100	141.2
Illinois	100	194.5
Indiana	100	127.3
Massachusetts	100	152.5
Michigan	100	114.4
New Jersey	100	145.4
New York	100	166.7
North Carolina	100	111.6
Ohio	100	122.7
Tennessee	100	156.9
West Virginia	100	118.2
Wisconsin	100	134.8

Inspection of Col. 3 indicates that for the period from 1929 to 1938 Pennsylvania's total over-all tax effort increased with 63.1%, a rise which was exceeded only by Illinois which registered a tax effort increase of 94.5% and New York with a tax effort increase of 66.7%.

Table VI shows changes in local over-all tax effort.

TABLE VI

Percentage Ratios 'Local Tax Callections' to Income Payments of Residents of 'Competitive States' for Selected Fiscal Years*

Tennessee	4.9	8.2	8.3	5.3	4.8	4.7	5.2	6.4
West Virginia	6.3	11.0	8.8	4.6	4.2	3.5	3.4	3.9
Wisconsin	6.9	12.4	11.0	7.8	6.9	6.1	6.1	7.0

* For underlying tax data and sources see Appendix C. Also, Martin, J. L., "Income Payments to Individuals, by States, 1929-1939," Survey of Current Business, Oct. 1940 pp. 8-12.

Inspection of Table VI shows that unlike total tax effort, local tax effort—e. g. per capita local tax collection over per capita income—has shown somewhat different tendencies.

Local over-all tax effort, like total tax effort, increased in eight of the fourteen 'competitive states.' The states registering increases are Pennsylvania, Connecticut, Illinois, Massachusetts, New Jersey, New York, Tennessee, and Wisconsin. The following five 'competitive states' registered a decrease in local over-all tax effort: Indiana, Michigan, North Carolina, Ohio and West Virginia. California was the only state among the fourteen under con-

[6] For details of the history of the manufacturers' exemption, see Appendix A, p. 6496.
[1] For a definition of 'competitive state' see, Appendix B, p. 6551.
[2] For a definition of 'over-all tax effort' see, p. 6467.
[3] The absolute dollar amounts underlying Table IV are shown in Appendix C, p. 6563.

sideration whose local over-all tax effort remained constant over the period from 1929 to 1938.

Table VII, was designed to measure changes in state over-all tax effort, that is, changes in the value of the percentage ratio 'state per capita tax collection' to 'per capita income.'

Inspection of Table VII shows that, unlike local tax effort, state over-all tax effort has increased in every one of the fourteen 'competitive states' with Illinois registering the largest percentage and Pennsylvania occupying a close to median position.

In the light of the above observed tendencies with respect to changes in tax effort, it appears established that the increase in total over-all tax effort is primarily due to substantial increases in state rather than local over-all tax effort.[4]

TABLE VII

Percentage Ratio 'State Tax Collections' to 'Income Payments of Residents' of 'Competitive States' for Selected Years, 1929-1939*

* For underlying tax data and sources see Appendix C. Also, Martin, J. L., "Income Payments to Individuals, by States, 1929-1939," Survey of Current Business, Oct. 1940, pp. 8-12.

Though interstate comparisons of changes in time of over-all tax effort (total, state and local) shed light upon general tendencies, a knowledge of which facilitates informed judgment with regard to possible and probable future developments, the significance of the over-all picture is considerably enhanced by factual knowledge regarding the group or groups of taxpayers, whose contributions to the public treasury account for the above noted increases in over-all tax effort.

Section IV

Relative Group Tax Effort in Pennsylvania and 'Competitive States'

Relative group tax effort may be defined as the value of the percentage ratio of 'total taxes paid by a defineable group in the community' to 'total tax collections'.

Before this definition can be given quantitative content, it is necessary to define the groups in the community whose relative group tax effort is to be measured.

In view of the fact that recent and contemporary public[1] and legislative discussion[2] seems to be largely concerned with the relative contributions which 'business' and natural persons, respectively, make toward the maintenance of public functions, the Joint State Government Commission has essayed to determine the magnitude of the relative tax contribution which 'business' and natural persons are required to make in Pennsylvania and 'competitive states'.

Before submitting the actual data relating to relative group tax effort, however, the members of the Joint State Government Commission wish to caution their colleagues in the General Assembly as well as the general public against inappropriate use of the data.

To present a wholly satisfactory picture of relative tax effort required of 'business' and natural persons, two conditions would have to be met. In the first place, 'business' would have to be defined in such rigorous manner as to exclude all natural persons. Second, business taxes would have to be painstakingly segregated from taxes upon natural persons.

It is widely agreed that 'business' does not lend itself to the rigorous definition required[3] and but a brief consideration of the problems involved shows that so-called business taxes cannot be satisfactorily segregated from so-called personal taxes.

With regard to the second point, consider for instance the gasoline tax. This tax is a state levy and paid by both 'business' and natural persons. In the light of the limited data available at the present, it is well nigh impossible to determine what percentage of total gasoline tax yield is paid by private persons and business firms, respectively. Again, consider the real estate tax which, though primarily local, is a quantitatively consequential levy. It again is paid by both private citizens and business firms and again readily available data do not permit valid generalizations as to what percentage of the realty tax falls upon each of the two groups whose relative tax effort is under consideration.

Fully cognizant of these and related difficulties, the members of the Joint State Government Commission have reluctantly decided to omit all local taxes[4] from relative group tax comparisons and to make certain assumptions with regard to state taxes which are payable by both 'business' and private individuals.

As regards state taxes to which both 'business' and private persons are subjected, the members of the Commission have proceeded upon the assumption that all consumption excises, admission taxes, retail sales taxes, and gasoline taxes, though liquidated in the first instance by 'business' are paid in the end by private persons.[5] Hence, for purposes of determining relative group tax effort, con-

[4] It would appear that the decline in local over-all tax effort is primarily due to two factors: 1) a decrease in the relative importance of realty as a tax base, and 2) severe statutory and constitutional limitations upon local realty tax rates. See, Wueller, P. H., "Real Property as a Tax and Reimbursement Base During the Depression," in Property Taxes, Tax Policy League, 1940, p. 21 and following. See also, Holmes, L. G., "Over-all Tax Limitation," in Property Taxes, p. 35 and following; Haygood, T. F., "Over-all Tax Limits in West Virginia," in Property Taxes, p. 44 and following; Emch, D. F., "The Effects of Tax Limitation in Ohio," in Property Taxes, p. 6470 and following.

[2] See, Commonwealth of Pennsylvania, "Report to the General Assembly of the Industrial Tax Survey Committee," Harrisburg, 1939. (Dent Committee) See also, Commonwealth of Pennsylvania, "Joint Legislative Industrial Tax Survey Committee," Supplemental Report by Israel Stiefel, Harrisburg, 1939.

[3] Williamson, K. M., "What Is Business and What are Business Taxes?" in How Shall Business be Taxed? Tax Policy League, 1937, p. 1 and following.

[4] For local realty tax rates, see Appendix C, p. 6563.

[5] Those interested in appraising the partial justification for this assumption are referred to: Haig, R. M., and Shoup, C., The Sales Tax in the American States, New York, 1934, and Jacoby, N. H., Retail Sales Taxation, Chicago, 1938.

sumption excises, admission taxes and retail sales taxes have been considered personal taxes.[6]

So-called gasoline taxes and motor registration fees have been omitted from all group tax effort comparisons, because both types of imposts partake of the nature of price levies. A price levy, in contradistinction to a tax proper, is a charge for specific governmental services rendered. In the case under consideration the charge is made for the use of highway facilities.

Table VIII, shows group tax effort for Pennsylvania and competitive states for the year 1939.

Inspection of Table VIII, Cols. 6 and 11 indicates the relative state collections from 'business' and personal taxes, respectively. It will be observed that on the basis of the assumption noted above, Pennsylvania received 41.8% of its total state collections from personal taxes in 1939. It will likewise be noted that among the remaining thirteen 'competitive states' only New Jersey (33.9%), Tennessee, (38.7%), and Wisconsin (27.5%) derived a lesser relative amount from personal taxes. All the remaining states received a larger amount of their total state tax collections from personal levies, West Virginia, with 91.3% of its taxes derived from personal levies, leading this group of states, and Indiana and California with 74.1% and 73.0%, respectively, ranking second and third.

[6] For the absolute dollar amounts underlying the percentages shown in Table VIII, see, Appendix C, p. 6563.

With a view of ascertaining the form rather than the relative magnitude of group tax effort, Table VIII, Cols. 2, 3, 4, 7, 8 and 9 indicate the percentage contribution which different types of bases make toward total 'business' and personal tax collections, respectively.

It will be observed that the collections from all personal taxes and all business taxes are segregated according to the bases upon which specific business and personal taxes are imposed.

The bases whose relative contributions to total business and personal tax collections are shown, are: (1) the capital value base, (2) the net income base, (3) the transaction or commodity base and (4) licenses. A capital value base tax is a levy which is assessed against some capital value such as real estate, bonds and stocks. Net income base taxes are assessed against income. The transaction or commodity base classification comprises such levies as retail sales taxes, admission taxes, gross receipts taxes, gross premiums taxes, and such commodity excise as e. g., cigarette taxes.

Classification of taxes in the manner indicated serves two important purposes. In the first place, it permits preliminary judgments regarding the yield stability in time of a state tax system. Second, it facilitates first approximations regarding the probable effect of different state tax systems upon economic development.[7]

[7] For an extended discussion of this point, see, Chapter IV, p. 6473.

TABLE VIII

Relative Yield of Capital-, Net Income-, Transactions-, and License-, Base State Taxes for Major Taxpayer Groups, Fiscal Year 1939*

State	Business Taxes					Personal Taxes					Total Business and Personal Taxes
	Capital Value	Income	Transactions	License	Total	Capital Value	Income	Transactions	License	Total	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
Pennsylvania	24.0	11.4	17.9	4.9	58.2	28.7	0.0	13.1	0.0	41.8	100.0
California	0.2	11.8	11.7	3.3	27.0	4.9	11.9	53.5	2.7	73.0	100.0
Connecticut	0.0	29.0	22.6	0.6	52.1	36.6	0.0	11.2	0.0	47.8	100.0
Illinois	2.5	0.0	22.7	2.5	27.7	5.0	0.0	66.7	0.6	72.3	100.0
Indiana	0.5	0.0	15.9	9.5	25.9	20.3	1.8	49.8	2.2	74.1	100.0
Massachusetts	21.0	0.8	14.8	0.0	36.6	37.4	24.2	1.5	0.4	63.4	100.0
Michigan	16.7	0.0	4.9	9.5	31.1	8.1	0.0	60.8	0.0	68.9	100.0
New Jersey	6.3	0.0	59.7	0.1	66.1	33.9	0.0	0.0	0.0	33.9	100.0
New York	11.1	15.1	21.6	5.8	53.6	11.7	34.2	0.5	0.0	46.4	100.0
North Carolina	10.0	19.9	17.9	8.6	56.4	4.2	7.9	31.5	0.0	43.6	100.0
Ohio	3.8	0.0	31.1	5.1	40.0	10.5	0.0	48.7	0.8	60.0	100.0
Tennessee	11.2	10.2	30.9	9.0	61.3	15.2	8.0	15.5	0.0	38.7	100.0
West Virginia	4.7	0.0	4.0	0.0	8.7	7.1	6.1	77.1	1.0	91.3	100.0
Wisconsin	33.9	17.5	8.1	13.0	72.5	10.6	16.9	0.0	0.0	27.5	100.0

* For underlying taxes and sources see, Appendix C, p. 6563. Gasoline and motor registration fees have been omitted.

Generally speaking, capital base taxes are not sensitive to cyclical fluctuations. That is to say, their year by year yield, in the absence of changes in rates, does not tend to vary with the ups and downs of the business cycle. Net income base taxes, of the type used in most American states, tend to fluctuate with changes in business activities, whereas transaction base or commodity base taxes show a stability in response to cyclical changes which is similar to that of capital base taxes. However, transaction and commodity base taxes differ from capital base taxes by virtue of the fact that they seem to exhibit a higher trend decline resistance than the former. In other words, while capital base taxes tend to crumble under the strain of prolonged depressions, transaction and commodity base taxes tend to hold their own under such adverse conditions.

Inspection of Table VIII, Cols. 2, 3, 4, 7, 8 and 9 shows that in 1939 Pennsylvania derived 24.0% of its business taxes from capital base levies, 11.4% from net income taxes, 17.9% from transaction base taxes, and 4.9% licenses. As regards the relative yields of capital base business taxes in Pennsylvania and 'competitive states' it will be observed that only one state (Wisconsin) derived a higher percentage of business taxes from this base than the Commonwealth. As regards the relative exploitation of net income business taxes, Pennsylvania ranked sixth from the top. As regards the relative contribution of transaction base taxes, it should be noted that among the fourteen

'competitive states' considered, six (California, Indiana, Massachusetts, Michigan, West Virginia and Wisconsin) derived a lesser percentage from this source than the Commonwealth.

As regards personal taxes (Table VIII, Cols. 7, 8, and 9) the relative contribution of different bases to total tax collections is somewhat different from the picture presented by business taxes. Only three states derived a larger percentage of personal taxes from the capital base than did the Commonwealth in the year under consideration. However, the relative contribution of the net income base was considerably larger in eight states (California, Indiana, Massachusetts, New York, North Carolina, Tennessee, West Virginia, Wisconsin) than it had been in Pennsylvania. Eight states derived a larger percentage of their personal taxes from the transaction and commodity base than was derived from the same base in Pennsylvania.

It is highly instructive also to classify taxes in accordance with their rate structure.

From point of view of rate structure one can differentiate between proportional taxes and progressive taxes. Proportional taxes are levies whose rate does not vary as the value of the base changes. Progressive taxes provide for rates which increase as the value of the base increases. In ennsylvania, the personal property tax,[8] the gross receipts tax,[9] and the corporate net income tax[10] are good illustrations of proportional taxes, because regardless of the value of a person's investment portfolio, or a utility's volume of gross receipts, or the magnitude of a corporation's net income, the tax rate applied does not change. The Pennsylvania inheritance transfer tax,[11] on the other hand, is a progressive tax, because its rate increases as the value of the inheritance transferred increases.[12]

Broad social considerations aside, the use of progressive as compared with proportional taxes has far-reaching implications as regards the yield possibilities of a given levy. For purposes of illustration only, consider the case of a personal net income tax. If a personal net income tax is to be proportional, the legislator must provide for a rate low enough so as not to seriously impinge upon the low income brackets.

Hence, one is justified in saying that the yield of a proportional income tax is limited by the rate which may be imposed upon the lowest income groups. Manifestly, a progressive net income tax, which, by definition, provides for low rates on low income brackets, and increasingly higher rates on higher income brackets, does not suffer from these severe yield limitations.

Table IX[13] shows collections from proportional and progressive taxes as percentages of total collections and collections from proportional and progressive business taxes as well as collections from proportional and progressive personal taxes as percentages of total tax collections.

[8] For details regarding the present structure and past changes in structure of this levy, see, Appendix A, p. 6496.
[9] Appendix A, p. 6496.
[10] Appendix A, p. 6496.
[11] Appendix A, p. 6496.
[12] Although Pennsylvania's rates are nominally flat (2% direct heirs and 1% collateral heirs) they are in effect progressive by virtue of the credit clause in the Federal estate tax.
[13] For the absolute dollar amounts underlying Table IX see, Appendix C, p. 563.

Inspection of Table IX, Col. 4 and 7, shows that in Pennsylvania, proportional taxes (business plus personal) accounted for 85.3% of total tax collections, whereas progressive taxes accounted for 14.7% of total tax collections. As regards the relative position of Pennsylvania from point of view of relative importance of proportional taxes it should be observed that all but three of the 'competitive states' other than Pennsylvania derived a larger percentage of their respective total tax collections from the imposition of proportional levies.

Column 2 shows collections from proportional business taxes as percentages of total state tax collections. Inspection of this column indicates that the percentage of total taxes which Pennsylvania derives from proportional business taxes is larger than the comparable proportion in all but two of the 'competitive states.' Again, inspection of Col. 6 indicates that the percentage ratio 'collections from proportional personal taxes' to 'total tax collections' shows a lower value for Pennsylvania than for four of the 'competitive states.'

TABLE IX

Relative Yield of Proportional and Progressive State Taxes Imposed Upon Major Groups of Taxpayers. Fiscal Year 1939*

State	Proportional			Progressive			Total Taxes
	Business	Personal	Total	Business	Personal	Total	
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
Pennsylvania	58.3	27.0	85.3	0.0	14.7	14.7	100.0
California	27.0	56.3	83.3	0.0	16.7	16.7	100.0
Connecticut	51.2	31.6	82.9	1.0	16.2	17.2	100.0
Illinois	27.3	67.8	95.1	0.3	4.6	4.9	100.0
Indiana	19.2	71.5	90.7	6.7	2.6	9.3	100.0
Massachusetts	36.6	49.2	85.8	0.0	14.2	14.2	100.0
Michigan	30.3	63.1	93.4	0.7	5.9	6.6	100.0
New Jersey	66.1	24.2	90.3	0.0	9.7	9.7	100.0
New York	53.5	0.5	54.0	0.0	46.0	46.0	100.0
North Carolina ...	56.5	33.0	89.5	0.0	10.5	10.5	100.0
Ohio	39.9	55.3	95.2	0.0	4.8	4.8	100.0
Tennessee	61.3	30.5	91.8	0.0	8.2	8.2	100.0
West Virginia	6.1	83.8	89.9	2.6	7.5	10.1	100.0
Wisconsin	49.1	2.1	51.2	23.4	25.4	48.8	100.0

* For underlying taxes and sources see, Appendix C, p. 6563. Gasoline taxes and motor vehicle registration fees have been omitted.

The above outlined changes in over-all tax effort, specific tax effort, and relative group tax effort have affected different types of economic enterprise and differently circumstanced natural persons differently.

Chapter IV shows in considerable detail how contemporary business taxes in the fourteen 'competitive states' affect different types of corporate enterprise and Chapter V essays to ascertain the effects of contemporary personal taxes upon the members of different income groups.

CHAPTER IV

Impact of the Pennsylvania Tax System Upon Selected Types of Corporate Enterprise

Section I

Introductory

It has been frequently alleged that Pennsylvania's business taxes are "oppressive," that Pennsylvania manufacturers are leaving the Commonwealth, that industrial promoters fail to locate new enterprises in the Commonwealth, and that those manufacturers who still operate within the borders of Pennsylvania are eagerly looking for an opportunity to bid the state goodbye.

The members of the Joint State Government Commission have been impressed by these allegations, for if they are substantially true the already lowered levels of living which now prevail in Pennsylvania[1] are in grave danger of further impairment. Such possible impairment is the more serious by virtue of the fact that Pennsylvania's mining appears to be suffering from the effects of a trend decline,[2], which, if persistent in the immediate future, calls for the development of compensatory types of economic activities if Pennsylvania's standard of living is to be restored to its relative pre-depression level.[3]

In view of the serious implications of the charge, the members of the Joint State Government Commission have investigated the facts bearing upon the problem under consideration, but before submitting their evidence, they wish to call attention to some general considerations.

Section II

Motives and Mechanics of Industrial Migration

Plants and business operations are moved from one state to another in response to more favorable wage rate differentials, more favorable freight rate differentials, more favorable tax rate differentials and attitudes of the community toward business and business men. Manifestly all these factors are given due consideration when a given manufacturer contemplates expansion. In other words any study confined to tax rate differentials only does not tell the whole story and should be supplemented by pertinent observations regarding the three other migration-inducing factors. By the same token, a state imposing heavier business taxes than other competing states does not necessarily push enterprise across its borders unless its heavy business taxes are not compensated for by a more attractive freight and wage rate situation.

Regardless, however, of the combined effect of wage, freight, tax rate differentials and attitudes, there are but certain selected types of business that have a meaningful option as regards the state in which they choose to operate. Generally speaking, it is only producers who operate in the national market who can decide whether to locate their operations in one state rather than in another. The baker, the corner grocer, the retail merchant, in short all types of so-called 'service' enterprisers are pretty firmly tied to local markets and while taxes may harass them unduly and impinge heavily upon their margin and even force them into bankruptcy, the possibility that they may move is remote. The cause is quite different when the options available to a national or regional manufacturer are considered. The operations of such a manufacturer—and it is manufacturing operations which generate the bulk of Pennsylvania's salaries and wages[4]—may be concentrated in one of quite a large number of states without necessarily involving the impairment of essential markets.[5]

An established national or regional corporate manufacturer who contemplates the transfer of his operations from one state to another is usually not free to act spontaneously upon the inducement offered by more favorable wage, freight and tax differentials. In the first place, the matter of primary concern to him is the stability in time of what appear to be more favorable differentials at a given moment. As a rule he must study these differentials carefully, for it would profit him little to move his operations in response to favorable differentials which are likely to be wiped out in the near future. In the second place, even if he were persuaded that attractive differentials in a given state were likely to be maintained over a considerable period of time, he usually has made a substantial commitment by way of specialized plant facilities in his present location; he must carefully weight the magnitude of the cost involved in scrapping the equipment, (which is generally necessary and may be calculated almost exactly) and compare it with the probable advantages which are likely to accrue to him in consequence of a change in location.[6] In other words, changes in significant cost differentials including tax cost differentials, are not likely to produce industrial migration at the very moment when they appear. On the contrary, the rule would seem to be that a considerable period of time must elapse before established manufacturers can conveniently and advantageously act upon cost differentials or changes in cost differentials. But though most industries of the type domiciled in Pennsylvania cannot very well move on short notice, some businesses not requiring much fixed equipment may move without much delay. Sometimes the presence of highly mobile business in a small community spells the difference between communal prosperity and heavy relief rolls. It goes without saying that a manufacturer contemplating expansion is not limited in his movements by previous investments such as are represented by fixed units of one type or another.

Section III

Industrial Migration from Pennsylvania: The Nature of the Evidence: Pro and Con

With a view of ascertaining the effect of Pennsylvania's taxes, the General Assembly of Pennsylvania (132d regular session, 1937) created the Industrial Tax Survey Committee,[1] generally known as the Dent Committee, and charged it—among other duties—with the task of making a "careful, thorough and impartial investigation of the total tax burdens placed upon industry in Pennsylvania and other industrial and mining states."[2] Inasmuch as the General Assembly saw fit to appropriate but $5,000.00 for the purposes of the Industrial Survey Committee, Senator John H. Dent, Chairman of the Committee, had to abandon the "detailed factual study" which he had contemplated[3] and confine the activities of the Committee to public hearings and the inspection of secondary materials, the validity and adequacy of which he could not intensively investigate because of inadequate funds.

The Industrial Tax Survey Committee, after two years of operation made two Reports in 1939. One of the Reports was submitted by Senator Dent, apparently re-

[1] See, Chapter I, Table I, p. 6458.
[2] See. p. 6455.
[3] See, p. 6458.
[4] See, Chapter I, Table XIV, p. 6459.
[5] In passing, it may be observed that most of the complaints regarding the weight of Pennsylvania's business taxes refer to the effect of these taxes upon corporate manufacturers.

[6] See, Clark, J. M., Studies in the Economics of Overhead Costs, Chicago, 1923, passim.
[1] Concurrent resolution adopted by the Senate on March 8, 1937 and by the House of Representatives on March 15, 1937.
[2] Commonwealth of Pennsylvania, "Report to the General Assembly of the Industrial Tax Survey Committee," 1939, (Dent Committee Report).
[3] Dent Committee Report, p. 7.

porting for the Committee majority, the other was presented by Senator Israel Stiefel,[4] who apparently dissented from what seems to be the majority opinion.

The mojority report, in the main, is confined to the reproduction of testimony gathered at various hearings. Though certified factual evidence was not extensively[5] submitted at the hearings which the Committee held in various parts of the state, apparently the majority members of the Committee were inclined to conclude that Pennsylvania business taxes tended to place manufacturers located in the Commonwealth at a disadvantage as compared with manufacturers operating out of other states. Speaking of migration and Pennsylvania business taxes as a factor inducing such migration, the majority of the Committee concluded: " . . . there is no conclusive evidence that this (referring to industrial migration) is due alone to the tax burden. The reasons are more widespread and involved and not attributable to taxation alone . . . the Commission (referring to the Industrial Tax Survey Committee) is, however, of the opinion that taxation is one of the most important factors influencing migration and that the present system of taxation unquestionably retards the expansion of industry in this Commonwealth."[6]

It would appear that Senator Stiefel did not quite agree with his fellow Committee members, for he submitted a Supplemental Report and pointed out in his letter of transmittal to the Hon. John H. Dent that his report was designed to "concentrate mostly upon the tenability of 'the general argument that industries are driven out of Pennsylvania by burdensome taxation.'"[7]

With a view of showing that it was "an egregious error . . . to maintain that there is an exodus of industry from our state"[8] Senator Stiefel submits extensive statistics[9] which, in the main, mirror industrial operations in Pennsylvania for the period from 1933 to 1937. Though these statistics are exceedingly interesting and show in a persuasive and reliable fashion what happened in industrial Pennsylvania over the period from 1933 to 1937, they unfortunately do not facilitate judgment regarding the effect of the frequently complained of business taxes upon enterprise, because most of these taxes were not enacted until 1935 and 1936, and did not become effective until 1937.[10] In the judgment of the members of the Joint State Government Commission the period between the enactment of the allegedly "oppressive" business taxes and the terminal period for which Senator Stiefel submits data was not of sufficiently long duration to facilitate informed judgments as regards the effect of these taxes upon the industrial development of the Commonwealth.

Though Mr. Clarence L. Turner's "Report on the Comparative Study of Corporate Taxes in Fifteen Industrial States," prepared for the Pennsylvania State Chamber of Commerce,[11] is not an official document of the Commonwealth, it warrants extensive mention in connection with the problems under consideration, because the Dent Committee, Majority Report, leans heavily upon Mr. Turner's findings,[12] findings which in the judgment of the members of the Joint State Government Commission convey a limited impression of the probable effects of Pennsylvania's business taxes upon the industrial development of the Commonwealth.

Section IV

Estimated Tax Impact Differentials for Corporate Manufacturers Engaged in Diverse Types of Industrial Activity

In an attempt to facilitate appraisal of the effect of Pennsylvania's business taxes upon the industrial development of the Commonwealth, Mr. Turner computes selected taxes which a hypothetical manufacturer would have to pay if he should operate in fifteen different industrial states.

This approach to the problem, which for convenience may be designated as the tax impact differential approach, though of limited significance[1] is highly instructive, provided: 1) the computation of tax impact differentials takes account of all taxes and not merely of a selected number of taxes, and 2) the balance sheet underlying the computation of tax impact differentials is typical of the major types of manufacturing activities carried forward in the state whose taxes are under investigation.

First as regards the necessity of considering all taxes rather than a selected number of taxes when computing tax impact differentials. It goes without saying that an established manufacturer who contemplates moving from one state to another considers all taxes in his calculations rather than a selected number, because any taxes which he might neglect in his calculation might spell the difference between bankruptcy and prosperity. Likewise any enterpriser contemplating the establishment of a factory or some other business considers all taxes imposed in alternative and optional jurisdictions, because it is only upon consideration of all cost factors (including all taxes) that he can make a rational choice. Hence it would seem mandatory upon the investigator who is interested in ascertaining what business men are likely to do to perform the same calculations as the business man in whose decision he is interested and whose action he attempts to anticipate.

Mr. Turner frankly admits[2] that he has computed his tax differentials without taking account of local real estate taxes and other local property levies. Mr. Turner explains that he has omitted local property taxes from his calculations because "there is great diversity of tax rates, tax laws, and assesment policies as between the various states, counties and municipalities within a given state. To undertake to make any comparisons of local taxes which would be representative would be practically impossible since it would depend upon the city or town selected in the state illustrated to determine the total amount of taxes which the corporation would be required to pay for local purposes."[3]

The members of the Joint State Government Commission cannot share Mr. Turner's view as regards the neces-

[12] Dent Report, pp. 10, 11, 12.

[3] Turner, op. cit., pp. 8 and 9.

sity for omitting local taxes, because of the admitted variability in local tax rates.

With a view of facilitating meaningful comparisons, average local industrial real estate tax rates have been constructed[4] and these rates have been applied to Mr. Turner's hypothetical balance sheet.[5] Both Mr. Turner's tax impact differentials and those calculated by a group of certified public accountants[6] associated with the Joint State Government Commission, who, in calculating tax differentials have taken account of all state as well as local realty taxes are shown in Table I, below.

Table I

Estimated Taxes Payable by a Hypothetical Manufacturing Corporation Doing an Intrastate Business When Located in 'Competitive States'*

State	State Taxes from Turner Report†		Local Taxes on Real Property‡	Total	
	Amount	Index Penna. =100		Total Col. (2) plus Col. (4)	Index Penna. =100
(1)	(2)	(3)	(4)	(5)	(6)
Pennsylvania	$66,272	100.00	$46,442	$112,714	100.00
Connecticut	15,612	23.55	42,474	58,086	51.53
Illinois	1,875	2.82	40,122	41,997	37.26

Tennessee	35,407	53.42	51,339	86,746	78.64
West Virginia	73,088	110.28	25,612	98,700	89.25

* From, Turner, C. L., "Report on Comparative Study of Corporate Taxes in Fifteen Industrial States," Pennsylvania State Chamber of Commerce, Harrisburg, 1938, p. 17.

† State Taxes are taken from above report. No recomputation was made in the state taxes to compensate for changes of rates and effect of local tax payments upon income taxes, since it is believed that the Index would not be changed materially.

‡ Local taxes were computed from data given in Turner Mfg., Company Balance Sheet and Income Statement. Rates used were compiled by Dr. Paul H. Wueller and explained in Appendix B, and are applied to book values on balance sheets.

Table I, Col. 2 presents the state taxes for eleven competitive states[7] as computed by Mr. Turner. Col. 3 presents the dollar amounts shown in Col. 2. Inspection of Col. 3 indicates that the differences in state taxes, which are the only levies Mr. Turner considers in his report, imposed by the states listed in Col. 1 including Pennsylvania, vary widely. According to this column Pennsylvania imposes higher taxes than any other state listed, the difference between Pennsylvania and New Jersey, for instance, being infinitely large.

Col. 4 shows the local real estate taxes as computed by the certified public accountants associated with the Joint State Government Commission, and Col. 5 shows state taxes as per Turner plus estimated local property taxes. Col. 6 presents an index of Col. 5. Inspection of Col 6 is of particular interest. This column indicates that when state plus local real estate taxes are considered, Pennsylvania, though still ranking higher than any other state listed, is much closer to other states than if the comparison is confined to state taxes only, (see Col. 3). For instance, on the basis of state plus local realty taxes, Pennsylvania, having been assigned a value of 100, ranks close to New York with 93, Massachusetts with 89 and Indiana with 84. Again, whereas the difference between Pennsylvania and New Jersey was infinitely large on the basis of state taxes only (See, Col. 3) the difference in taxes payable by a hypothetical manufacturing corporation is but finite when state taxes plus local realty taxes are considered. On the basis of Mr. Turner's report a given manufacturing corporation would pay $66,272,000 in state taxes in Pennsylvania (See, Col. 2) and nothing in New Jersey. Assigning a value of 100 to Pennsylvania state taxes, New Jersey's value then becomes 0. However, the story is utterly different when state plus local real estate taxes are considered. In terms of absolute amounts, the hypothetical manufacturing corporation now pays $112,714,000 in Pennsylvania and $72,237,000 in New Jersey. Again assigning a value of 100 to Pennsylvania state plus local taxes, New Jersey receives a value of 65. In other words, New Jersey, while still taxing the hypothetical manufacturing corporation at a lesser over-all rate than Pennsylvania, ranks closer to Pennsylvania than it did when state taxes only were under consideration.

However, state taxes plus realty taxes do not tell the entire story of corporate enterprise taxation in all the states, because some of the states under consideration use what is technically known as "general property taxes". Under this tax all property, not merely real estate is taxable at the same rate. For the purpose in hand, this means that a corporate manufacturer located in a state using the general property tax is not merely taxed on his real property but has the real property tax rate aplied to the machinery, his equipment, and his inventory.

It goes without saying that in all those states which use general property taxes, the figures shown in Col 5 which present state taxes plus local real estate taxes are in the nature of lower limits. In other words, in general property tax states taxes upon a corporate manufacturer are higher than indicated by the dollar amounts shown in Col. 5.

Unfortunately little is known as regards the exact practice of the general property tax states with regard to the percentages at which such property as machinery, equipment and inventory is assessed.

Because of the absence of reasonably reliable knowledge regarding assessment practices, no attempt was made to cover the taxation of property other than real property when computing tax impact differentials.

As was pointed out above, the taxes which a given corporate manufacturer pays in a given state depend upon the composition of his balance sheet and his income statement. For instance, a corporate manufacturer who has a relatively large percentage of his assets in real property may pay less by way of taxes in a given state than a corporate manufacturer who uses but relatively little realty. With a view of illustrating how balance sheet composition affects tax liability, the Joint State Government Commission submits below several tables showing tax impact differentials for corporate manufacturers engaged in the making of different types of products and having balance sheets of different composition.

[4] See, Appendix B, p. 6551.

[5] For the details of Mr. Turner's hypothetical balance sheet see Appendix C, p. 6563.

[6] The group of accountants who made the calculation of tax impact differentials consisted of Sterling K. Atkinson, Ph.D. and Charles J. Rowland, C. P. A., assisted by Dr. Russell H. Mack and Dr. Robert W. Mayer. Responsibility for the average effective industrial real estate tax rates rests with Dr. Paul H. Wueller. For further details see, Appendix B, p. 6551.

[7] Upon examination of the economies of the states for which Mr. Turner computes corporate tax impact differentials it was found that only the eleven states for which impact differentials are shown in Table I make similar or identical products.

Though the Joint State Government Commission purposely refrains from identifying the line of business in which the manufacturers for whom tax impact differentials are shown below are engaged, all balance sheets and associated income statements for which tax impact differentials are shown are important in Pennsylvania's economy.[8] Likewise, the states other than Pennsylvania for which tax impact has been computed compete with Pennsylvania in the manufacture of one or more products.

TABLE II

Estimated Taxes Payable by an Average Corporation A Doing an Intrastate Business When Located in 'Competitive States'*

State	State Taxes		Local Taxes on Real Property†	Total	
	Amount	Index Penna. =100		Col. (2) plus Col. (4)	Index Penna. =100
(1)	(2)	(3)	(4)	(5)	(6)
Pennsylvania	$2.666	100.00	$1.258	$3,924	100.00
Illinois	72	2.90	1,086	1,158	29.89
Massachusetts	1,677	62.90	1,861	3,538	90.10
Michigan	881	33.24	1,299	2,180	55.94
New York	1,472	55.40	1,514	2,986	76.48
Ohio	910	34.32	951	1,861	47.81
Wisconsin	1,245	46.89	1,492	2,737	70.13
New Jersey	none	.....	1,957	1,957	50.26

* Based upon balance sheet and income statement of an average Corporation A; constructed by the Accountants' Committee from statements supplied by the Pennsylvania Department of Revenue.
† Local taxes have been computed from data given in the statements referred to above. The rates used are the mean effective rates compiled by Dr. Paul H. Wueller and explained in Appendix B. Attention is called to the fact that the rates are applied to book values shown on the balance sheets

Table II shows tax impact differentials for an average corporation, designated as Corporation A, whose products compete with products manufactured in Illinois, Massachusetts, Michigan, New York, Ohio, Wisconsin and New Jersey.

Inspection of Table II, Col. 6 and Table I, Col. 6 indicates that the fiscal treatment accorded Corporation A in different competitive states varies from the treatment accorded the hypothetical manufacturing corporation in many respects. For instance, state taxes plus local realty taxes payable by the hypothetical manufacturing corporation when located in Illinois would be about 63% lower than the sum of state taxes plus local realty taxes if the hypothetical manufacturing corporation were located in Pennsylvania.

TABLE III

Estimated Taxes Payable by an Average Corporation B Doing an Intrastate Business When Located in 'Competitive States'*

State	State Taxes		Local Taxes on Real Property†	Total	
	Amount	Index Penna. =100		Col. (2) plus Col. (4)	Index Penna. =100

North Carolina	1,890	89.19	519	2,409	82.81
New Jersey	none	.....	1,230	1,230	42.30
Tennessee	1,109	52.34	875	1,984	68.21
Wisconsin	929	43.84	938	1,867	64.19

* Based upon balance sheet and income statement of an average Corporation E; constructed by the Accountants' Committee from statements supplied by the Pennsylvania Department of Revenue.

† Local taxes have been computed from data given in the statements referred to above. The rates used are the mean effective rates compiled by Dr. Paul H. Wueller and explained in Appendix B, p. 6551. Attention is called to the fact that the rates are applied to book values shown on the balance sheets.

TABLE VII

Estimated Taxes Payable by an Average Corporation F Doing an Intrastate Business When Located in 'Competitive States'*

State	State Taxes		Local Taxes on Real Property†	Total	
	Amount	Index Penna. =100		Col. (2) plus Col. (4)	Index Penna. =100
(1)	(2)	(3)	(4)	(5)	(6)
Pennsylvania	$39,663	100.00	$16,094	$55,757	100.00
Connecticut	7,313	18.46	14,678	21,991	39.48
Illinois	1,602	4.06	13,865	15,467	27.78
Indiana	12,874	32.48	15,659	28,533	51.22
Michigan	12,373	31.21	16,570	28,943	51.95
New York	24,256	61.17	19,315	43,571	78.19
Ohio	12,176	30.72	12,130	24,306	43.64

* Based upon balance sheet and income statement of an average Corporation F; constructed by the Accountants' Committee from statements supplied by the Pennsylvania Department of Revenue.

† Local taxes have been computed from data given in the statements referred to above. The rates used are the mean effective rates compiled by Dr. Paul H. Wueller and explained in Appendix B, p. 6551. Attention is called to the fact that the rates are applied to book values shown on the balance sheets.

Inspection of Tables V to X, inclusive, shows that if consideration is given only to the sum of state taxes plus local realty taxes, Pennsylvania's taxes (see, Tables V, VI, VII, VIII, IX, and X, Col. 6) are heavier than those of the states which produce one or more products competing with products manufactured in Pennsylvania. However, the state to state differences as regards the taxes under consideration are not anything like the differences suggested by the state taxes computed for a hypothetical manufacturing corporation (see, Table I, Col. 3).

Uniformly assigning a value of 100 to the sum of Pennsylvania state plus Pennsylvania local real estate taxes, New York, Massachusetts and Indiana frequently come close to Pennsylvania. In the case of Corporation D (See, Table V, Col. 6) Massachusetts approximates Pennsylvania with 96. In the case of Corporation E (See, Table VI, Col. 6), Indiana approaches Pennsylvania with 90. In the cases of Corporations F, G, H, and I, New York approaches Pennsylvania with 78, 85, 71 and 83, respectively.

TABLE VIII

Estimated Taxes Payable by an Average Corporation G Doing an Intrastate Business When Located in 'Competitive States'*

State	State Taxes		Local Taxes on Real Property†	Total	
	Amount	Index Penna. =100		Col. (2) plus Col. (4)	Index Penna. =100
(1)	(2)	(3)	(4)	(5)	(6)
Pennsylvania	$46,518	100.00	$12,134	$58,652	100.00
Illinois	1,558	3.35	10,483	12,041	20.53

Ohio	13,700	29.45	9,171	22,871	38.99
West Virginia	18,094	38.89	6,691	24,785	42.26

* Based upon balance sheet and income statement of an average Corporation G; constructed by the Accountants' Committee from statements supplied by the Pennsylvania Department of Revenue.

† Local taxes have been computed from data given in the statements referred to above. The rates used are the mean effective rates compiled by Dr. Paul H. Wueller and explained in Appendix B, p. 6551. Attention is called to the fact that the rates are applied to book values shown on the balance sheets.

TABLE IX

Estimated Taxes Payable by a Corporation H Doing an Intrastate Business When Located in 'Competitive States'*

State	State Taxes		Local Taxes on Real Property†	Total	
	Amount	Index Penna. =100		Col. (2) plus Col. (4)	Index Penna. =100
(1)	(2)	(3)	(4)	(5)	(6)
Pennsylvania	$115,032	100.00	$50,309	$165,341	100.00
New York	57,808	50.25	60,547	118,355	71.58
Ohio	35,970	31.27	38,024	73,994	44.75
New Jersey	none	.....	78,253	78,253	47.33

* Based upon balance sheets and income statements of a Corporation H; constructed by the Accountants' Committee from statements supplied by the Pennsylvania Department of Revenue.

† Local taxes have been computed from data given in the statements referred to above. The rates used are the mean effective rates compiled by Dr. Paul H. Wueller and explained in Appendix B, p. 6551. Attention is called to the fact that the rates are applied to book values shown on the balance sheets.

As was pointed out previously, the above impact differentials do not tell the whole story. To give all the details of a fiscal picture it would be necessary to have considerable and reliable knowledge regarding the taxation practices in competing states with respect to tangible property other than realty. As such knowledge becomes available it may well be found that in some instances Pennsylvania, from a tax point of view, is more attractive than the above computations would suggest.

TABLE X

Estimated Taxes Payable by an Average Corporation I Doing an Intrastate Business When Located in 'Competitive States'*

State	State Taxes		Local Taxes on Real Property†	Total	
	Amount	Index Penna. =100		Col. (2) plus Col. (4)	Index Penna. =100

* Based upon balance sheet and income statement of an average Corporation I; constructed by the Accountants' Committee from statements supplied by the Pennsylvania Department of Revenue.

† Local taxes have been computed from data given in the statements referred to above. The rates used are the mean effective rates compiled by Dr. Paul H. Wueller and explained in Appendix B, p. 6551. Attention is called to the fact that the rates are applied to book values shown on the balance sheets.

In conclusion, the members of the Joint State Government Commission wish to point out again that it is not tax impact differentials alone that induce enterprise to move into, out of, or avoid a given state. Tax impact differentials merely afford a first clue, sometimes significant and sometimes misleading. Any such first clue must be carefully followed up by an investigation of tax types, marketing possibilities, wage rates, insurance rates, freight rates, supply of equity capital, and last but not least the community's attitude toward business. These other factors, at times, more than compensate for what may appear to be an unfavorable tax situation.

CHAPTER V

Taxes Paid by Typical Families Resident in Pennsylvania and Selected 'Competitive States'

Section I

The Problem of Determining Taxes (State, Local and Federal) Paid by Individuals in Different Income Brackets

The problem of determining the approximate amount of taxes paid by individual families is of the same importance as the problem of determining business tax impact differentials.[1]

The determination of business tax differentials facilitates informed judgment as to the probable effects of state and local taxes upon the location and migration of industries. The migration of industries in turn affects the volume of wages and salaries and general levels of living. Given a certain volume of wages and salaries, or income, generally speaking, it becomes important to inquire what percentages of the incomes of differently circumstanced individuals or families is absorbed by state, local and Federal taxes. It is only after these percentages are at least tentatively approximated that legislators concerned with fiscal affairs can adequately appraise the consequences of their deeds.

The estimation of the dollar amounts of taxes paid by single individuals or individual families is precarious business. At every turn the investigator meets with inadequate statistics and stubborn facts which do not yield their secrets. To proceed at all, he must make assumptions and hazard guesses which may or may not be correct. After he has labored his way through a dimly illuminated labyrinth of uncertainty he emerges with some few figures which, if they are to be of any value whatever, must be swallowed with a generous dose of good common sense and the judgment of his forbearing contemporaries.

To visualize some of the difficulties of the task in hand it must be realized that single individuals or individual families, no matter where domiciled in the United States, are subject to three distinct sets of taxes. In the first place, they are subject to the taxes that their state of domicile and its minor jurisdictions choose to impose. Second, they are subject to certain taxes which other states choose to levy. Last but not least, the citizens of every state are also citizens of the United States and hence subject to such taxes, excises and fees as Congress in its wisdom may care to write into the Federal statute books.

[1] See p. 6473 and following.

Again the inter-relationship between state and local taxes on the one hand, and Federal taxes on the other, is not a simple one. Frequently state and/or local taxes may be deducted when computing Federal taxes due. For instance, a citizen of Pennsylvania who has paid Pennsylvania's state and county personal property taxes[2] may deduct both these taxes when computing his net income for Federal income tax purposes.

The table, below, which is introduced for purely illustrative purposes, shows how the relative importance of state and Federal taxes as determinants of total taxes due changes as taxpayers in different income groups are taken under consideration.

Inspection[3] of Table I, Col. 3, shows that if the General Assembly should decide to abolish both the county and the state personal property or intangibles taxes, a taxpayer's "total tax obligation," assumed to consist of the Federal income tax and Pennsylvania personal property taxes, would undergo different percentage changes—the difference in percentage change depending upon the income bracket in which a given taxpayer belongs. For instance, a taxpayer having a net income of $5,414 (Col. 2), upon abolishment of the Pennsylvania personal property taxes, would have his "total tax obligation" decreased by 60.12%. However, a taxpayer having a net income of $594,691 would have his "total tax obligation" decreased by but 4.36%.

This illustration shows clearly that state and Federal taxes are mutually dependent upon each other.

The difficulties of an investigator concerned with the determination of the total amount of taxes due from single individuals or individual families belonging to different income classes, though already formidable, are further accentuated by the fact that some taxes, though payable in the first instance by some business entity, are included in the price which the business obtains for its products, and hence are in the last analysis liquidated out of the incomes of the persons buying the commodities. At the present state of knowledge it is impossible to say with any degree of certitude which taxes are shifted from business to natural persons. To overcome the present inadequacies of knowledge it is necessary to make certain assumptions, believed to be reasonable, regarding the shiftability of the major taxes.

Section II

Typical Families: Their Income Sources and Expenditure Patterns

In view of the limited time and funds the Joint State Government Commission has not attempted to ascertain the taxes payable by single individuals who belong in different income brackets. The subsequently presented tables show tentatively estimated taxes paid for families only.

Before proceeding with the presentation and discussion of the tables it would seem advisable to consider briefly how individual families are being taxed.

All families are taxed on both their income and their outgo. The taxes imposed upon family income vary with the source or sources from which the income is derived.

[2] See Chapter III, Table II, pp. 6468, 6469.

[3] For the methods employed in constructing Table I, see, Appendix B, p. 6551.

TABLE I

Indifference Index for the Pennsylvania Intangibles or Personal Property Taxes

Net Income Classes	Average Net Income	Indifference Index of Intangible Taxes
(1)	(2)	(3)
$ 5,000— 6,000	$ 5,414	60.12%
6,000— 7,000	6,465	56.20
7,000— 8,000	7,470	53.43
8,000— 9,000	8,465	50.18
9,000— 10,000	9,481	48.76
10,000— 11,000	10,478	46.18
11,000— 12,000	11,478	44.23
13,000— 14,000	13,474	41.43
14,000— 15,000	14,490	39.97
15,000— 20,000	17,180	35.87

Column (2) Statistics of Income, 1937.
Column (3) See Appendix B.

Typically, a family unit having no investment income whatever—that is, income from stocks, bonds, real property—is taxed on that income only under Federal and state income tax statutes, provided, of course, the magnitude of the income is such as to subject it to tax. Per contra, a Pennsylvania family deriving its income in part in the form of salary and in part from investments, is taxed under both the Pennsylvania personal property tax statute and the Federal income tax statute.[1] In addition to income and personal property taxes, there are assessed against family incomes what may be called "deferred tax charges" which are represented by inheritance and state taxes. However, these "deferred tax charges" have been disregarded throughout the entire subsequently presented statistical analysis.

Family outgo or family expenditure is subjected to a multiplicity of taxes. There are real estate taxes upon the house in which the family lives. There are taxes upon the family automobile, the tires on the automobile, the inner tubes, the oil in the crankcase, the gasoline in the tank, the radio under the dashboard, and the upholstery on the seats. There are taxes upon the cigarettes, cigars, and tobacco smoked in the family parlor. There are taxes upon the case of beer in the pantry, the wine in the cellar and the spirits in the cupboard. There are taxes upon the accoutrements of charm exhibited on caressing tables. There are taxes upon the coal in the bin. There are taxes upon the electricity that illuminates the home. There are taxes upon the sugar that sweetens the coffee. There is barely a household article that is not taxed and the tax gatherer stands by and takes his due when the desperate family, tired of taxes and other realities, escapes into the movies.[2]

[1] See, p. 80 and following for the relationship between Pennsylvania personal property taxes and the Federal personal income tax.

[2] For a complete catalogue of Pennsylvania state and Federal taxes, see, Commerce Clearing House, "Tax Systems," 8th edition, Chicago, 1940, p. 1 and p. 59. For the legislative history of principal Pennsylvania state taxes, see, Appendix A, p. 6496.

It goes without saying that taxes on both family income and family outgo are different for different classes of families.

For instance, a family having an annual income of, say, $1,000 pays no Federal income tax whereas a family enjoying an annual income of $5,000 does pay this tax. Again, a family having an income of $1,000 usually derives no part of such income from the ownership of intangibles and hence is not subject to Pennsylvania state and county personal property taxes. However, a family having an annual income of $5,000 typically derives some small fraction of such income from the ownership of taxable intangibles and hence pays the Pennsylvania state and county personal property taxes on whatever fraction of its income is derived from taxable securities.

Looking at families from the point of view of expenditure pattern, noticeable differences become apparent. Families, for instance, in different income classes spend different proportions of their income for houses, the proportion of income spent for housing typically decreasing as family income increases. Hence, the Pennsylvania real estate tax takes increasingly smaller fractions of family income as one moves from lower income bracket families to higher income bracket families.

For purposes of the subsequently presented computations it has been assumed that individual families consist of 3.5 members, that they reside in urban sections, and that their expenditure patterns conform to national expenditure patterns,[3] that Pennsylvania families pay on the whole the same amounts in Federal indirect taxes as similarly circumstanced families anywhere in the United States, and that they do not evade any of the Pennsylvania taxes (state and local) to which they are subject under contemporary Pennsylvania tax statutes.[4]

Section III

Taxes Paid (state, local and Federal) in 1938-39 by Typical Families Resident in Pennsylvania and 'Competitive States'

Table II, below, shows tentative and preliminary estimates of Pennsylvania state and local taxes, Federal taxes, and combined Pennsylvania and Federal taxes paid by typical families in different income brackets as percentages of family income.

Table II, Col. 1 shows average family income[1] for families having annual incomes ranging from $1,000 to $20,000. As regards the social significance and numerical importance of this income range, it should be observed that according to Statistics of Income[2] only 0.06% of the population of Pennsylvania have incomes in excess of $20,000 per year.

Table II, Cols. 2, 3, and 4 shows: 1) Pennsylvania state plus local taxes as percentages of family income; 2) Fed-

[3] See, National Resources Committee, "Consumer Incomes in the United States," Washington, 1938, Parts I and II, p. 13 and following; also, National Resources Committee "Consumer Expenditures in the United States," Washington, 1939, Part I, Section 3, p. 37 and following.

[4] For a detailed description of all procedures employed in computing taxes paid by families in different income groups as well as the limitations of these procedures, see, Appendix B, p. 6551.

[1] For the items entering into the computation of family income see, National Resources Committee, "Consumer Incomes in the United States," Part II, p. 13.

[2] U. S. Treasury Department, Bureau of Internal Revenue, "Statistics of Income for 1937," Washington, 1940.

eral taxes as percentages of family income, and 3) Pennsylvania state[3] plus Pennsylvania local plus Federal taxes as percentages of the incomes of families in different income classes, respectively.

Because the imposition of per capita school taxes and occupational taxes is optional with school districts and counties, respectively,[4] two sets of Pennsylvania state and local taxes have been computed. Set I (Table II, Col. 2) shows Pennsylvania state and local taxes in communities where both per capita and occupation taxes are imposed. Set II (Table II, Col. 3) shows Pennsylvania state and local taxes as percentages of family incomes where neither occupation nor per capita taxes are imposed.

* State, local and Federal taxes are for 1939-1940; Federal consumption taxes are for 1938-1939.

† Average family of two adults and 1.5 children assumed.

‡ Bases: (a) Real Property Tax—housing expenditures capitalized at 10%; see National Resources Committee, "Consumer Expenditures in the United States," Washington, 1939, pp. 78 and 86.

(b) Occupation Tax—estimated on the basis of material received from county officials, see Appendix B, p. 6551.

(c) Per Capita Tax—estimated on the basis of material received from the Superintendent of Public Instruction, see, Appendix B, p. 6551.

(d) Intangible Tax—national pattern of investment income utilized, see, U. S. Treasury Department, Bureau of Internal Revenue, "Statistics of Income for 1937." Washington, 1940, pp. 133-137, 162. Capitalization rate assumed to be 4%; investment income for incomes between $3,000 and $5,000 was extrapolated.

(e) Cigarette tax—tobacco expenditures assumed entirely for cigarettes; see "Consumer Expenditures in the United States," op cit. pp. 78 and 86.

(f) Gasoline Tax—average number of gallons purchased by families in three middle-sized East Central cities, U. S. Department of Labor, Bureau of Labor Statistics, "Family Expenditures in Selected Cities, 1935-36," Bulletin 648, Vol. 6, Washington, 1940, p. 126.

(g) Liquor taxes—data for gross liquor store sales taken from the Joint State Government Commission. For techniques and sources underlying the allocation of these sales to consumer groups, see Temporary National Economic Committee, "Who Pays the Taxes?" Monograph No. 3, Washington, 1940, pp. 19 and 20, and "Consumer Expenditures in the United States," op. cit., pp. 78 and 86.

Rates: (a) Real property and Occupation Tax—mean, weighted, urban real estate rate utilized; for underlying rates, see, Mohaupt, R., "Comparative Tax Rates of 287 Cities, 1939," National Municipal Review, Vol. 28, December, 1939, pp. 848-866. Population weights taken from U. S. Department of Commerce, Bureau of the Census, preliminary release of September, 1940.

(b) All other tax rates taken from Commerce Clearing House, "Tax Systems" 8th edition, Chicago, 1940, p. 59.

Taxes: (a) Motor Vehicle Registration—average registration fees for three middle sized East Central cities were assumed applicable; see, "Family Expenditures in Selected Cities, 1935-36," op. cit. p. 126.

(b) All other taxes obtained by multiplication of base by rate.

§ Obtained by subtracting per capita and occupation taxes due from taxes underlying Col. (2) and expressing result as percentage of consumer income.

¶ (a) Federal Personal taxes—the Federal Income Tax only was considered; the base and rates were taken from Altman, G. T., "The Revenue Act of 1940," Taxes, Vol. 18, No. 8, August, 1940, pp. 467-470.

(b) Federal Consumption taxes—percentages were taken from "Who Pays the Taxes?" op. cit., pp. 13, 42, 47.

[3] For details concerning the computation of Pennsylvania taxes see, Appendix B, p. 6551.

[4] First, second and third class counties are not permitted under state law to use the occupation tax. Act of May 22, 1933, P. L. 853.

Inspection of Table II, Cols. 2 and 3 indicates that families resident in Pennsylvania having an annual income from $1,000 to $1,500 pay an estimated 7.1% and an estimated 6.1% of their income in Pennsylvania state and local taxes. The families who pay an estimated 7.1% live in communities where both occupation and per capita taxes are imposed, and the families who pay an estimated 6.1% live in communities where neither of the above mentioned local levies are used.

Further inspection of Table II indicates that families having incomes ranging from $1,500 to $3,000 pay a somewhat lower percentage of their incomes in Pennsylvania taxes than families having annual incomes of from $1,000 to $1,500 but that families having annual incomes in excess of $3,000 pay a higher percentage than the other two family groups mentioned.

As regards the causes underlying the behavior of the 'Pennsylvania taxes paid' to 'family income' ratio, it may be observed that four factors are in all likelihood primarily responsible for it.

In the first place, as regards the somewhat larger tax-due-income ratio of low bracket families as compared with higher bracket families, Pennsylvania's per capita taxes, the yield of which is devoted exclusively to school purposes and which seems to be levied at the rate of about $5.00[5] in the less fortunate sections of the state, rest relatively heavily upon low income bracket families. Second, occupation taxes, like per capita taxes appear to extract a larger percentage of income from low bracket families than from higher income bracket families.[6] In the third place, low value real estate, typically owned or rented by low income bracket families, tends to be assessed closer to market value—and is thereby subjected to a heavier real estate tax—than high value real property.[7]

In the fourth place, as regards the increase in the tax-due-income percentage ratios which occur when one moves from families having incomes up to $3,000 to families having above $3,000, it may be observed that this increase is in all likelihood due to the fact that families in the second group are frequently subject to Pennsylvania's personal property or intangibles taxes.

Inspection of Col. 4[8] indicates that families having annual incomes of $1,250 pay 5.6% of their income in Federal taxes, whereas families having annual incomes of $17,500 pay 9.7% of their income in Federal taxes.

Inspection of Table II, Cols. 5 and 6 shows that total taxes paid by the families under consideration range from 12.7% and 11.7% in the case of a family having an income of $1,250 to 21.0% and 20.8% in the case of a family having an income of $17,500.

The members of the Joint State Government Commission wish to call the special attention to their colleagues in the General Assembly to the taxes paid by families in the lower income brackets. Many low income bracket families operate at an annual deficit. This is to say, some low income bracket families, year after year, spend in

[5] See Appendix C, p. 6563.

[6] See Appendix C, p. 6563.

[7] See, Logan, E. B., The Taxation of Real Property in Pennsylvania, Philadelphia, 1934, p. 39.

[8] For methods used in computing Col. 3 see, Temporary National Economic Committee, "Who Pays the Taxes?" Monograph No. 3, Washington, 1940.

excess of their incomes.[9] It is believed that this situation is of grave concern to responsible legislators who take an active interest in the welfare of their constituents. The basic remedy, in the judgment of the members of the Joint State Government Commission is action on the part of the General Assembly aiming at a revision of the Pennsylvania tax system with a view of creating a fiscal situation conducive to the expansion of Pennsylvania enterprise—the only effective means of improving employment opportunities and levels of living.

Following its general plan of facilitating comparisons between population,[10] and economic,[11] and fiscal differences[12] which set Pennsylvania apart from other states, the Joint State Government Commission submits below tentative computations showing estimated taxes paid by families resident in the State of New York and the State of California.

The comparison of taxes paid by families in different income brackets is not extended to the other competitive states,[13] because the data in question are admittedly highly tentative and any extension of the survey in hand must wait until the basic data utilized can be considerably strengthened.

The Joint State Government Commission decided to choose New York and California for this comparison because among the thirteen states whose manufactured products may be presumed to compete with those of Pennsylvania, the two states mentioned occupy an extreme position from point of view of recent changes in the volume of national income to their respective residents.

As regards the State of New York, the decline in the value of the ratio[14] 'per capita income payments of New York residents' to 'national per capita income payments' has been more pronounced than in any of the other competitive states. Per contra, the increase in the value of the ratio 'per capita income payments of California residents' the 'national per capita income payments' has been more marked than the increase in any other of the competitive states. In other words, the per capita income payments of New Yorkers have undergone the most severe relative decline, whereas the per capita income payments of California have shown the most pronounced relative improvement.

Table III, below, which from point of view of contents and construction is comparable to Table II shown above[15] presents taxes (state-plus-local, Federal and total) as percentages of the incomes of differently circumstanced families resident in urban areas in the State of New York.

Inspection of Table III, Col. 2 shows that tentatively estimated New York taxes[16] paid by families in different income brackets, when expressed as percentages of family income, range from 6.1% in the case of a family having an income of $1,250 to 7.4% in the case of a family having an income of $17,500, the in-between families devoting a modal percentage of approximately 6 to the payment of New York state and local taxes.

TABLE III

Tentative and Preliminary New York State and Local, Federal, and Total New York State, Local and Federal Taxes* as Percent of Consumer Income for an Average Urban Family †

(c) Gasoline Tax—average number of gallons purchased by families in three middle-sized East Central cities; see, U. S. Department of Labor, Bureau of Labor Statistics, "Family Expenditures in Selected Cities, 1935-36," Bulletin 648, Vol. 6, Washington, 1940, p. 126.

(d) Personal Income Tax—average income less deductions for family allowances, dependents, all state taxes except the Income Tax; see, U. S. Department of Commerce, Bureau of the Census, "Digest of State Law Relating to Net Income Taxes, 1938," Washington, 1938, p. 82; and Commerce Clearing House. "Tax Systems," 8th edition, Chicago, 1940, p. 190.

Rates: (a) Real Property Tax—mean weighted, urban real estate rate utilized, for underlying rates, see Mohaupt, R., "Comparative Tax Rates of 287 Cities, 1939," National Municipal Review, Vol. 28, December, 1939, pp. 848-866. Population weights taken from U. S. Department of Commerce, Bureau of the Census, preliminary release of September, 1940.

(b) All other rates taken from Tax Systems, op. cit., pp. 51, 191.

Taxes: (a) Motor Vehicle Registration—average registration fees for three middle sized East Central cities were assumed applicable, see "Family Expenditures in Selected Cities, 1935-36," op. cit., p. 126.

(b) All other taxes obtained by multiplying base by rate.

§ (a) Federal Personal Taxes—the Federal Income Tax only was considered; the base and rates were taken from Altman, G. T., "The Revenue Act of 1940," Taxes, Vol. 18, No. 8, August, 1940, pp. 467-470.

(b) Federal Consumption Taxes—percentages were taken from Temporary National Economic Committee, "Who Pays the Taxes?" Monograph No. 3, Washington, 1940, pp. 13, 42 and 47.

If these percentages are compared with those shown in Table II, Col. 2, it will be observed that, by and large, New York families in the income brackets under consideration enjoy lighter taxes than comparable Pennsylvania families.

It would seem that the reason for this difference is twofold. First, as regards lower income bracket families, New York, unlike Pennsylvania, does not use per capita or occupation taxes, levies, which if imposed[17] and collected, take a relatively large percentage of the income of less well-to-do families. Second, as regards families having annual incomes in excess of $3,000, it should be observed that New York taxes the incomes of these families under a personal income tax which grants the average family under consideration an exemption of $3,100 and provides for rates ranging from 2% to 7%.[18] In Pennsylvania, on the other hand, such fraction of income as is derived from the ownership of intangibles is taxed at

[18] Commerce Clearing House, op. cit., pp. 51 and 189.

the rate of eight mills per thousand dollars of capital value of taxable intangibles owned. Assuming that on the average intangibles yield a three percent return, Pennsylvania's state and county personal property taxes are the equivalent of an income tax upon income from intangibles levied at a rate of approximately 26.0%.

Table IV, below, which from point of view of contents and construction is comparable to Tables II and III shown above[19] presents taxes (state plus local, Federal and total) as percentages of the incomes of differently circumstanced families resident in urban areas in the State of California.

Inspection of Table IV, Col. 2 indicates that California state-plus-local taxes as percentages of family income range from 7.1% in the case of a family having an income of $1,250 to 4.4% in the case of a family having an income of $17,500, the average percentage for the in-between families being somewhat larger than 5.

By way of comparison it may be observed that the 'state-plus-local taxes paid' to 'family income' percentage ratios for California differ in several respects from those for

Taxes: (a) Motor Vehicle Registration—average registration fees for three middle-sized Pacific Northwest cities were assumed applicable; see, "Family Expenditures in Selected Cities, 1935-36," op. cit., p. 128.

(b) All other taxes obtained by multiplying base by rate.

§ (a) Federal Personal Taxes—the Federal Income Tax only was considered; the base and rates were taken from Altman, G. T., "The Revenue Act of 1940," Taxes, Vol. 18, No. 8, August, 1940, pp. 467-470.

(b) Federal Consumption Taxes—percentages were taken from "Who Pays the Taxes?" op. cit., pp. 13, 42 and 47.

[19] See, Table II p. 6481 and Table III p. 6482.

Pennsylvania[20] and New York.[21] While it would appear that the tax burden on the lower income bracket families in all three states is approximately the same, it may be pointed out that as regards state and local taxation of incomes from $3,000 to $15,000, Pennsylvania imposes heavier taxes than the other two. This difference would seem to be largely due to the Pennsylvania personal property taxes.[22]

The difference between Pennsylvania, California and New York is particularly striking in the case of families in the income bracket from $15,000 to $20,000. In the order of magnitude, families in this bracket pay an effective over-all rate of 11.3% and 11.1% in Pennsylvania, 7.4% in New York and 4.4% in California. This difference is again largely due to the presence of personal property taxes in the Pennsylvania system and the existence of the institution of 'community of property' in California.[23]

Before leaving the subject in hand, the members of the Joint State Government Commission wish to remind their colleagues in the General Assembly and the general reader that the 'taxes paid' to 'family income' percentage ratios presented above are to be regarded as tentative and preliminary.[24] All those who wish to use the percentage ratios extensively are urged to familiarize themselves thoroughly with their limitations as set forth in Appendix B.

CHAPTER VI

A Review of Selected Revenue Bills Introduced in the General Assembly 1936-39

Section I

Summary of Types of Revenue Bills

A large variety of revenue bills has been introduced in the General Assembly between 1936 and 1939 which for one reason or another failed of passage.

Though the bills introduced with a view of providing for sadly needed tax revenue for the chronically depleted coffers of the Commonwealth range anywhere from lotteries[1] to a tax upon labor saving machinery,[2] the bulk of the bills, which if favorably acted upon, might have produced substantial revenue provide for taxes upon public utilities, amusements, personal income and retail sales.

Apparently leading among the proposed measures providing for additional taxes upon utilities is a bill which proposes to tax the operating properties of utilities,[3] a bill providing for the repeal of all laws now exempting public utilities from general taxes,[4] a bill providing for a tax upon telephones,[5] a bill providing for a tax on public pay stations and private switch boards,[6] and a tax on gas, water, electricity and other meters.[7]

Legislators intent upon making amusements of one type

or another contribute toward the replenishment of the treasury of the Commonwealth proposed taxes upon the gross receipts of gambling houses,[8] "every form of entertainment,"[9] dog racing tracks,[10] pin ball games,[11] bingo games,[12] coin machines,[13] music producing machines,[14] and prizes received at bank nights.[15]

The taxation of personal incomes had its share of attention. A special tax upon the income from corporate stock debentures and mortgages was proposed.[16] The emoluments from elective public office were covered by another income tax bill.[17] A resolution to amend the Constitution of the Commonwealth which would permit the imposition of graduated personal income taxes[18] was introduced. Again another bill provided for the imposition of a tax upon all income, the proceeds from such tax to be used for the relief of distressed school districts.[19] Still another bill provided for the imposition of a personal income tax, the proceeds to be used for school purposes in general.[20]

Sales taxes of one sort or another have had their proponents. It has been proposed to tax the sale of soft drinks,[21] books,[22] natural gas,[23] "luxuries,"[24] and cosmetics.[25] Last but not least, it was proposed to impose a retail sales tax.[26]

In view of the limited funds available to the Joint State Government Commission, the members have decided to confine the review of revenue proposals to those measures providing for the imposition of general taxes which, if enacted, promise to yield substantial revenue.

From point of view of revenue yield possibilities, personal income taxes and general retail sales taxes are more promising than any one of the other tax measures suggested in the recent past. It is for this reason that the yield as well as the possible impact implications of these two levies will be discussed further in the following pages.

Section II

The Retail Sales Tax

The common type of state retail sales tax is represented by a levy which is imposed upon sales at retail of tangible personal property[1]

Sales taxes of one type or another are not newcomers upon the American fiscal scene.[2] Gross receipts taxes,[3] gross premiums taxes,[4] and Pennsylvania's mercantile license tax[5] are well established members of the Pennsylvania tax family. What is familiarly known as a state retail sales tax is new only by virtue of its relatively high rates and the fact that it is collected at the counters of retail merchants.

The so-called retail sales tax came into its own after 1929 when the pressure for additional state revenues sent legislators scrambling for new taxes.[6] In 1938 and 1939 state general sales taxes were used in 29 out of the forty-eight states.[7] The total yield of these taxes was close to a half billion dollars.[8] While not used in all states,[9] some states derive a substantial portion of their total tax revenue from retail sales levies. For instance, in 1939 Illinois derived 32% of its total state tax collections from the imposition of a retail sales tax, California obtained 24% of its tax revenue from this source, and Indiana ranked third with 21%[10]

Though state retail sales taxes are substantial revenue producers they are frequently and sometimes violently objected to because they are alleged to be decidedly regressive.[11]

However, the members of the Joint State Government Commission feel that before a retail sales tax is ruled out of consideration, its effects upon differently circumstanced taxpayers should be carefully compared with the effects of other taxes now on the statute books of the Commonwealth. Again, the social significance of the regressivity of any retail sales tax depends upon its coverage.

TABLE I *

Estimated Net Yield of a Two Percent Pennsylvania Retail Sales Tax Exempting Food, Gasoline, and Alcoholic Beverages Sold at State Stores

Year	Value of Base (000)	Rate	Estimated Net Yield at Different Degrees of Effectiveness (000) 100%	95%	90%	85%	80%
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1940	$1,843,000	2%	$35,754	$33,967	$32,179	$30,391	$28,604
1939	1,827,000	2%	33,504	31,829	30,154	28,478	26,803

* For methods used in estimating net yields, see, Appendix B.

The Joint State Government Commission has estimated the probable net yield of a two percent retail sales tax, exempting food, gasoline and beverages sold at state liquor stores. Table I shows the estimated yield of such a tax for 1939 and 1940.

[9] In 1939 the following states did not use state retail sales taxes: Florida, Georgia, Idaho, Maine, Massachusetts, Minnesota, Montana, Nebraska, Nevada, New Hampshire, New Jersey, Oregon, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia and Wisconsin.
[10] Tax Systems, op. cit., pp. 330 and 326.
[11] When used in this sense the term 'regressive' indicates that the value of the ratio 'tax due' to 'income of taxpayer' decreases as the taxpayer's income increases. In other words, a regressive tax is a tax which takes a larger percentage of the income of less well-to-do taxpayers than of the income of economically more fortunate taxpayers.

TABLE II

Tentative and Preliminary Pennsylvania Present State and Local plus Proposed Retail Sales and Total Pennsylvania and Federal Taxes* as Percent of Consumer Income for an Average Urban Family†

Average Family Income	Taxes as Percent of Consumer Income: State and Local Set I ‡	State and Local Set II §	Total Taxes: Federal ¶	Col. (2) Plus Col. (3) plus Col. (4)	Col. (2) Plus Col. (3) plus Col. (4)

* State, local and Federal personal taxes are for 1939-40; Federal consumption taxes are for 1938-39.

† Average family of two adults and 1.5 children assumed.

‡ Bases: (a) Real Property Tax—housing expenditures capitalized at 10%: see, National Resources Committee, "Consumer Expenditures in the United States," Washington, 1939, pp. 78, 86.

(b) Occupation Tax—estimated on the basis of material received from county officials, see, Appendix B, p. 6551.

(c) Per Capita Tax—estimated on the basis of material received from the Superintendent of Public Instruction, see, Appendix B, p. 6551

(d) Intangibles Tax—national pattern of investment income utilized, see, U. S. Treasury Department, Bureau of Internal Revenue, "Statistics of Income for 1937," Washington, 1940, pp. 133-137, 162. Capitalization rate assumed to be 4%; investment income for incomes between $3,000 and $5,000 was extrapolated.

(e) Cigarette Tax—tobacco expenditures assumed entirely for cigarettes; see, "Consumer Expenditures in the United States," op cit. pp. 78, 86.

(f) Gasoline Tax—average number of gallons purchased by families in three middle-sized East Central cities: see, U. S. Department of Labor, Bureau of Labor Statistics, "Family Expenditures in Selected Cities, 1935-36." Bulletin 648, Vol. 6, Washington, 1940, p. 126.

(g) Liquor Taxes—data for gross liquor store sales were taken from the Joint State Government Commission. For techniques and sources underlying the allocation of these sales to consumer groups, see Temporary National Economic Committee, "Who Pays the Taxes?" Monograph No. 3, Washington, 1940, pp. 19 and 20; and "Consumer Expenditures in the United States," op. cit. pp. 78 and 86.

(h) Proposed Retail Sales Tax—obtained by subtracting percentages of consumer income expended for food, imputed housing and tobacco from percent of total income expended; see, "Consumer Expenditures in the United States," op. cit., pp. 78, 79, 86; for gasoline exemption the average gasoline expenditures for families in three middle-sized East Central cities were assumed applicable; see, "Family Expenditures in Selected Cities, 1935-36," op. cit., p. 126.

Rates: (a) Real Property and Occupation Tax—mean, weighted, urban real estate rate utilized; for underlying rates, see Mohaupt, R., "Comparative Tax Rates of 287 Cities, 1939," National Municipal Review, Vol. 28, December, 1939, pp. 848-866. Population weights taken from U. S. Department of Commerce, Bureau of the Census, preliminary release of September, 1940.

(b) Proposed Retail Sales Tax—2%.

(c) All other tax rates were taken from Commerce Clearing House, "Tax Systems," 8th edition, Chicago, 1940, p. 59.

Taxes: (a) Motor Vehicle Registration—average registration fees for three middle-sized East Central cities were assumed applicable, see, "Family Expenditures in Selected Cities, 1935-26," op. cit., p. 126.

(b) All other taxes obtained by multiplication of base by rate.

§ Obtained by subtracting per capita and occupation taxes due from taxes underlying Col. (2) and expressing the result as a percentage of consumer income.

¶ (a) Federal Personal Taxes—the Federal Income Tax only was considered; the base and rates were taken from Altman, G. T., "The Revenue Act of 1940," Taxes Vol. 18, No. 8, August, 1940, pp. 467-470. The sales tax was assumed deductible for Federal Income Tax purposes.

(b) Federal consumption taxes—percentages were taken from "Who Pays the Taxes?" op. cit., pp. 13, 42, 47.

Inspection of the above table indicates that assuming an effectiveness of 80% (Col. 8) a Pennsylvania retail sales tax exempting food, gasoline and alcoholic beverages sold at state stores could have been expected to yield $28,604,000 in 1940.

With a view of showing the proximate effect of such a retail sales tax upon families in different income groups resident in the Commonwealth, Table II, has been prepared.

Inspection of Table II, Cols. 2 and 3 shows that the introduction of a two percent Pennsylvania retail sales tax exempting food, gasoline, and alcoholic beverages sold at state stores would increase Pennsylvania state and local taxes payable by Pennsylvania families in all income brackets shown in the table.

Pennsylvania families having average annual incomes of $1,250 and living in communities where both per capita taxes and occupation taxes are imposed (see, Table II, Col. 2) would pay 8.1% of their incomes in Pennsylvania taxes if a retail sales tax of the type indicated were imposed in addition to contemporary taxes, and families having average annual incomes of $17,500 would be required to pay 12.0% of those incomes in Pennsylvania taxes.

Similarly Pennsylvania families having average annual incomes of $1,250 and living in a community where no per capita or occupation taxes are imposed (see Tabe II, Col. 3) would pay 7.1% of their income in Pennsylvania taxes under the new set up and families having average annual incomes of $17,500 would be called upon to pay 11.9% of those incomes in Pennsylvania taxes.

In view of these increases in taxes which would ensue if a retail sales tax were imposed in addition to all levies now on Pennsylvania's statute books, it has been suggested that a retail sales tax be imposed in lieu of both contemporary occupation and per capita taxes.[12]

When evaluating the effect of a retail sales tax imposed in addition to contemporary Pennsylvania levies it must not be forgotten, however, that even in communities where both occupation and per capita taxes are levied, the collection of either levy seems to present serious difficulties. These difficulties are not just current phenomena but have been characteristics of the local tax situation in Pennsylvania for quite some time.[13]

In connection with the occupation tax the total value traditionally set upon occupations for tax purposes is ludicrously low. To mention but one example, in 1935 the value of salaries and occupations as determined for occupation tax purposes was $203,492,530.[14] When evaluating the adequacy of this total it should be remembered that between 1930 and 1940 annual wages and salaries earned in Pennsylvania fluctuated between three and three and a half billion dollars.[15]

As regards the per capita tax, which is used exclusively for school purposes, it should be observed that while its assessment too appears inadequate, its collection record is positively scandalous.

Table III, shows per capita tax collections as percentages of per capita taxes levied for selected school districts for which the information was available for the fiscal year ending June 30, 1938.

Inspection of the above table (Col. 2) shows that a collection record of 69% for school per capita taxes is outstanding and that collections of from 25% to 40% seem to be about normal. The members of the Joint State Government Commission are persuaded that the collection record of the Pennsylvania per capita tax is not equalled anywhere in these United States by any tax collection

record except possibly right here in Pennsylvania as exemplified by jurisdictions attempting in vain to collect the occupation tax.[10]

These facts regarding the collectibility of both per capita and occupation taxes should be remembered when attempting to appraise the percentage ratios presented in Table II, Col. 2, because they would seem to indicate that even in communities where per capita and occupation taxes are imposed only a relatively small percentage of the families discharge their lawful obligations.

Section III

Personal Income Taxes

As has been previously noted[1] several bills which provide for the imposition of personal income taxes have been introduced in the General Assembly in the recent past.

On the chance that similar bills may be introduced in the General Assembly during the Regular Session of 1941, the Joint State Government Commission presents below 1) net yield estimates of various types of state personal income taxes, and 2) approximations of the burden which different types of income taxes would be likely to impose upon families in different income groups.

By way of preliminary remark, it may be observed that for the purpose in hand, personal income taxes[2] may be divided into two groups. These two groups may be distinguished by virtue of the rate schedule and the source of the income the taxation of which is contemplated.

On the basis of rate schedule differences, one may conveniently differentiate between progressive and proportional income taxes. Progressive income taxes carry a rate schedule which provides for rates which increase as the taxpayer's income increases. Most state income taxes as well as the Federal income tax are of this type.[3]

As regards source of income differences, it is useful to distinguish between personal income taxes which contemplate—by means of a progressive or proportional rate schedule—the taxation of 1) all income from whatever source derived, 2) investment income, that is, income from securities of one type or another, and 3) labor income, that is, income derived in the form of wages, salaries and from business operations carried forward by means of individual proprietorships or partnerships.

The Joint State Government Commission presents estimates of the probable 1940 net yield of: 1) a one percent personal income tax upon all income received or paid within Pennsylvania, such tax providing for no exemption whatever, 2) a one per cent personal income tax upon all labor incomes received or paid in Pennsylvania, such tax providing for no exemption whatever, 3) a two per cent clear income tax upon all income received and paid within Pennsylvania, such tax permitting the deduction of necessary living costs up to a maximum of $800 per income recipient, and 4) a progressive personal income tax providing the same exemptions now permitted in the State of New York and carrying the same rates as those of the New York State Income Tax, except the 'emergency' rate of one per cent which was imposed in New York in 1940.[4]

In addition to net yield data, the Joint State Government Commission presents several tables showing the tentatively estimated effect of these personal income levies upon families in different income brackets.

A One Per Cent Personal Income Tax Upon All Income received a paid within Pennsylvania providing for no exemption whatever, if imposed upon 1940 income would have produced an estimated net yield of $47,433,688.[5]

It is interesting to observe how such an income tax, if it had been on the Pennsylvania statute books in 1940, would have affected families in different income brackets.

Table IV, shows the tentatively estimated effect of the tax in question upon families having annual incomes up to $20,000.

Inspection of Table IV, Cols. 2 and 3 shows that the introduction of a one per cent personal income tax upon all income received or paid within Pennsylvania would increase Pennsylvania state and local taxes payable by Pennsylvania families in all the income brackets shown in the table.[6]

Pennsylvania families having average annual incomes of $1,250 and living in communities where both per capita and occupation taxes are imposed (see, Table IV, Col. 2) would pay 8.1% of their incomes in Pennsylvania taxes, if an income tax of the type suggested were imposed in addition to contemporary taxes. Families in the same communities having average annual incomes of $17,500 would be required to pay 12.2% of these incomes in Pennsylvania taxes.

Likewise, Pennsylvania families having average annual incomes of $1,250 and living in communities where no per capita or occupation taxes are imposed (see, Table IV, Col. 3 would pay 7.1% of their incomes in Pennsylvania taxes. Families living in the same communities with average annual incomes of $17,500, however, would be expected to contribute 12.1% of these incomes in Pennsylvania taxes.

It is instructive to observe that while families having average annual incomes of $1,250 and living in both types of communities would be taxed at the same percentage

under either the personal income tax on all income or the retail sales tax,[7] Pennsylvania families in the $17,500 income bracket however, would have a somewhat heavier burden if this income tax were to be enacted.[8]

(h) Proposed Total Income Tax—no exemptions were allowed, but interest from all Government obligations was not considered taxable.

Rates: (a) Real Property and Occupation Tax—mean, weighted, urban real estate tax utilized; for underlying rates, see, Mohaupt, R., "Comparative Tax Rates of 287 Cities, 1939," National Municipal Review, Vol. 28, December, 1939, pp. 848-866. Population weights taken from U. S. Department of Commerce, Bureau of the Census, preliminary release of September, 1940.

(b) Proposed Total Income Tax—1%.

(c) All other tax rates were taken from Commerce Clearings House, "Tax System," 8th edition, Chicago, 1940, p. 59.

Taxes: (a) Motor Vehicle Registration—average registration fees for three Middle-sized East Central cities were assumed applicable, see, "Family Expenditures in Selected Cities, 1935-36," op. cit., p. 126.

(b) All other taxes obtained by multiplication of base by rate.

§ Obtained by subtracting per capita and occupation taxes due from taxes underlying Col. (2) and expressing the result as a percentage of consumer income.

¶ (a) Federal Personal taxes—the Federal Income Tax only was considered; the base and rates were taken from Altman, G. T., "The Revenue Act of 1940," Taxes, Vol. 18, No. 8, August, 1940, pp. 467-470.

(b) Federal Consumption Taxes—percentages were taken from "Who Pays the Taxes?" op. cit., pp. 13, 42, 47.

A One Percent Income Tax Upon All Labor Incomes which does not provide for any exemptions whatever, if levied in Pennsylvania in 1940 would have produced an estimated net yield of $27,819,590.*

[7] Compare Cols. 2 and 3, Table II, p. 6485.

[8] Compare Cols. 2 and 3, Table II, p. 6485.

* For methods and techniques used in estimating net yields, see, Appendix B.

As regards the expectable effects of such a levy upon families in different income classes, Table V facilitates appraisal.

Inspection of Table V, Cols. 2 and 3 indicates that a one percent personal income tax upon all labor incomes, providing for no exemptions whatever would somewhat increase taxes due from Pennsylvania families.[9]

It will be observed that Pennsylvania families having average annual incomes of $1,250 and living in communities where both per capita and occupation taxes are imposed (see, Table V, Col. 2) would pay 8.1% of these incomes in Pennsylvania state and local taxes. Families in the same communities having average annual incomes of $17,500 would pay 11.8% of their incomes in Pennsylvania taxes.

Pennsylvania families having average annual incomes of $1,250 and living in communities not using per capita and occupation taxes (see, Table V, Col. 3) would pay 7.1% of their incomes in Pennsylvania taxes and families having average annual incomes of $17,500 would be required to pay 11.7% of those incomes in state and local taxes.

Comparing these percentages with the comparable percentages in Table IV, Cols. 2 and 3,[10] it will be noted that whereas the burden upon families in the $1,250 income class is identical, Pennsylvania families having average annual incomes of $17,500 would pay slightly less under an earned income tax than they would if a total income tax were imposed.

A Two Percent Clear Income Tax Upon All Income received or paid in Pennsylvania which would permit the deduction of necessary living expenses up to a legislative stipulated maximum of $800 per income recipient would have produced an estimated net yield of $40,150,592 in 1940.[11] This net yield is estimated on the assumption that every income recipient would have claimed the maximum allowable living expenses.

Table VI shows the effect of a clear income tax, as defined, upon families in different income groups.

Inspection of Table VI, Cols. 2 and 3 shows that a two percent clear income tax permitting the deduction of necessary living expenses up to $800 per year for each in-

(c) All other tax rates were taken from Commerce Clearings House, "Tax System," 8th edition, Chicago, 1940, p. 59.

Taxes: (a) Motor Vehicle Registration—average registration fees for three Middle-sized East Central cities were assumed applicable, see, "Family Expenditures in Selected Cities, 1935-36," op. cit., p. 126.

(b) All other taxes obtained by multiplication of base by rate.

§ Obtained by subtracting per capita and occupation taxes due from taxes underlying Col. (2) and expressing the result as a percentage of consumer income.

¶ (a) Federal Personal taxes—the Federal Income Tax only was considered; the base and rates were taken from Altman, G. T., "The Revenue Act of 1940," Taxes, Vol. 18, No. 8, August, 1940, pp. 467-470.

(b) Federal Consumption Taxes—percentages were taken from "Who Pays the Taxes?" op. cit., pp. 13, 42, 47.

come recipient would increase the amount of taxes payable by Pennsylvania families in the income brackets under consideration.[12]

It should be noted that families having average annual incomes of $1,250 and living in communities where both per capita and occupation taxes are levied (see, Table VI, Col. 2) would pay 7.8% of their incomes in Pennsylvania state and local taxes. Families in the same communities having average incomes of $17,500 would be required to contribute 13.1% of their incomes to the public treasury.

In the case of families having average annual incomes of $1,250 and living in localities where per capita and occupation taxes are not used (see, Table VI, Col. 3) would be expected to pay 6.8% of their incomes in state and local taxes. Families in the same communities with average annual incomes of $17,500 would pay 12.9% of their incomes in taxes.

A Progressive Personal Income Tax[13] Providing for the Same Exemption now Permitted in the State of New York and Imposed at New York Rates,[14] if levied in Pennsylvania in 1940 would have produced an estimated net yield of $46,352,927.[15]

Table VII shows the estimated effect of a progressive personal income tax upon families in different income groups.

Inspection of Table VII, Cols. 2 and 3 indicates that a progressive income tax of the type in use in the State of New York would not change the percentage of taxes due from Pennsylvania families having average annual incomes from $1,250 to $2,750. However, it would appear

[12] Compare Cols. 2 and 3, Table II, Chapter V, p. 6483.

[13] It should be noted that the Pennsylvania Supreme Court has declared Progressive Personal Income Taxes unconstitutional. See, Appendix A, p. 6496.

[14] For the exemptions and rates of the New York State Personal Income Tax, see, Appendix C, p. 6563.

[15] For methods and techniques used in estimating net yields, see, Appendix B, p. 6551.

that the remaining income groups considered would be required to contribute a larger percentage of their incomes in taxes than is required at present.[16]

Pennsylvania families having average annual incomes of $1,250 and living in communities imposing both per capita and occupation taxes (see, Table VII, Col. 2) would be required to pay 7.1% of these incomes in Pennsylvania taxes, while families having average annual incomes of $17,500 would pay 14.5%.

Moreover, Pennsylvania families having average annual incomes of $1,250 and living in communities where per capita and occupation taxes are not levied (see, Table VII, Col. 3) would contribute 6.1% of the incomes to Pennsylvania governmental agencies, while families in the same localities having average annual incomes of $17,500 would contribute 14.4%.

It will be observed that a progressive personal income tax of this type would extract a considerably larger percentage of the incomes of families in the higher brackets

than a tax on clear income.[17] This effect of the progressive incomes tax is also characteristic of the clear income tax.

At the risk of being considered unduly repetitive, the members of the Joint State Government Commission wish to conclude this chapter by pointing out again[18] that the tax-due-income percentage ratios shown above must not be regarded as tentative and preliminary. They should not be made to bear more than they were designed to carry.[19] The membership of the Joint State Government Commission wishes to point out, too, that the discussion of the taxes mentioned above does not imply their endorsement. These taxes have been discussed merely because, in the face of pressure for additional state tax revenues which still prevails, they have been the object of legislative consideration at the sessions of the General Assembly.[20]

CHAPTER VII

Some Proposals Relating to State-Local Transfer Payments

Section I

Present State-Local Transfer Payments

For some purposes it is useful to distinguish between direct state expenditures and state-local transfer payments. Direct state expenditure differs from a state-local transfer payment by virtue of the fact that the first is made in connection with some public function which is under the exclusive financial and administrative control of the state government, whereas the transfer payment involves joint state and local administrative responsibility.

In Pennsylvania direct state expenditures, which for brevity's sake will henceforth be referred to as state expenditures, are represented by expenditures for the salaries of the state judiciary, the state highway patrol, etc. State-local transfer payments are illustrated by state General Fund payments to the local school districts which in turn are applied by the local school districts toward the payment of the salaries of teachers and supervisors.[1]

State-local transfer payments give rise to a problem which does not enter at all into state expenditures.

To fully appreciate the nature of the problem which

[16] Compare Cols. 2 and 3, Table II, Chapter V, p. 6483.

[17] Compare Cols. 2 and 3, Table VI, p. 6488.

[18] See, Chapter V, p. 6479.

[20] See, Chapter VI, p. 6483.

[1] See, p. 6462 and following.

arises out of state-local transfer payments[2] it may be well to indicate briefly typical state-local transfer payment arrangements.

A state government may collect certain taxes and turn back part or all of the receipts to the local units of government in whose jurisdiction the taxes were collected in the first place. Whatever receipts are so turned back to the localities may be earmarked for specifically enumerated functions of the local governments or may be applied to any legitimate local function in accordance with the judgment and discretion of local authorities.

Usually when tax receipts are turned back to the localities, the economically stronger local units of government tend to receive larger absolute and relative amounts than the less fortunate jurisdictions. If the funds so transferred are "earmarked for a specific public function," it sometimes follows that the poorer jurisdictions perform that function less adequately than their more fortunate neighbors.

Again, a state government may appropriate out of its general funds sums certain (such as a given dollar amount per child of school age) to local units of government with the expectation that the local government will obtain from its own tax sources sufficient revenue to supplement the state transfer payment with a view of offering adequate public services of one type or another. When state governments employ this second transfer arrangement, it frequently happens that the less fortunate units of local government offer less adequate services, simply because their tax resources are frequently under considerable strain. Here again, the statesman and legislator is confronted with inequalities in public service offerings.

The third type of transfer payment arrangement which does not tend to perpetuate differences in public service offerings is represented by the so-called variable grant.[3] Generally speaking,[4] this fiscal device provides for state-local transfer payments, the volume of which varies from locality to locality in accordance with both the receiving locality's need for a given service and its tax capacity to partially finance a service for services.

At the present Pennsylvania transfers to the localities out of its tax revenues 1) part of the liquid fuels tax, 2) the premiums tax upon foreign fire insurance companies, provided such tax does not exceed two per cent,[5] and 3) liquor license fees collected from licensees.

One-half cent per gallon of the liquid fuels tax, popularly known as the gasoline tax, is returned to the counties of the Commonwealth where the tax was collected in the first place. For the biennium 1937-39 total liquid fuel tax transfer payments to the counties amounted to $13,785,648.[6]

The foreign fire insurance premiums tax is returned to the cities, boroughs and townships where insured property is located. For the biennium 1937-39 total foreign fire insurance premiums tax transfer payments to these jurisdictions to be remitted to the firemen's relief fund amounted to $1,960,527.[7]

Liquor license fees, like the foreign insurance premiums tax, are returned to cities, boroughs and townships. For the biennium 1937-39 liquor license transfer payments to these jurisdictions combined amounted to $7,612,968.[8]

In addition to these payments, involving the transfer from the state to the localities of specially earmarked tax yields, the General Fund, to which all taxes not specially earmarked accrue, makes transfer payments of considerable magnitude to the local school districts. For the biennium 1937-39 total state transfer payments from the General Fund to the local school districts amounted to $65,879,288.[9]

It is sometimes suggested in public discussions that the Commonwealth of Pennsylvania is rather parsimonious in its transfer payments to the local units of government and it is contended without submission of satisfactory evidence that other states are more lavish when it comes to the sharing of state tax revenues with their local subdivisions.

Whatever the facts of the case may be, the members of the Joint State Government Commission are persuaded that all these comparisons lack validity unless a thorough investigation is made of the functions which are financed exclusively by state governments in other states.

As has been previously noted,[10] Pennsylvania among the competing states frequently referred to is unique by virtue of the facts that it finances general assistance exclusively out of state tax resources. This situation in the past has proved a serious drain upon the General Fund. If it had not been for this drain, the present accumulated operating deficit of the state government would be nonexistent.

Section II

General Assistance: A Problem in State-Local Financial Relations

For the biennium 1937-39, total disbursements for public assistance amounted to $238,741,369. Of this total $18,774,699 was spent for administration, $8,194,035 for blind pensions, $45,616,968 for old age assistance, $15,649,490 for mothers assistance, and $145,722,759 for general assistance—sometimes referred to as direct relief.[1]

Though payments for aids of various types represent substantial dollar amounts, general assistance or direct relief exceeds all others from point of view of magnitude of disbursements.

The large General Fund disbursements for general assistance have given serious alarm to groups of citizens throughout the Commonwealth.

These groups of citizens allege that our system of financ-

[1] Biennial Report of the Auditor General for the biennium from June 1, 1937 to May 31, 1939, p. 191.

ing general assistance is seriously defective[2] because it does not call upon local units of government for a financial contribution out of local tax resources. Allegations of minor consequence aside, it is argued that the absence of a local financial contribution toward the maintenance of general assistance is at least in part responsible for the large volume of general assistance payments, because, so it is held, local communities, called upon to tax themselves directly to maintain general assistance would be likely to exert some communal pressure to keep the general assistance load at the minimum necessary to make certain that nobody in this Commonwealth become a victim of destitution.

In addition, it is claimed that the present operating deficit of the Commonwealth,[3] estimated at $74,000,000, is in large measure due to present methods of financing general assistance. Again, it is alleged that the accumulated operating deficit of the state government of the Commonwealth introduces an undesirable element of uncertainty into the fiscal situation and that this uncertainty coupled with already heavy business taxes, prevents the expansion of manufacturing operations in the Commonwealth which might otherwise take place.[4]

As regards the establishment of the validity of all these allegations and their implications, further intensive studies are required. It is certain, however, that if it were not for general assistance disbursements no accumulated operating deficit would be in existence at this time and no Special Sessions of the General Assembly—which involve considerable cost to the taxpayers—would have been required during the last few years.

It is largely because of these factors which are held to be detrimental to the industrial progress of the state, that individual citizens and organized groups of citizens have suggested that administration and part of the financial responsibility for "general assistance be turned back to local units of government," the local units being presumably the counties of the Commonwealth.

It would seem that any such "turning back" of the financial responsibility for general assistance might take four basically different forms.

First, the General Assembly, by proper statutory enactment might make the financing of general assistance a local function, leaving it to the counties to get the necessary tax revenue out of the tax bases (real estate, intangibles, and occupations) which they may now tax for their own purposes. Second, the General Assembly by proper statutory enactment might make the financing of general assistance a local function, and with a view of aiding the counties in carrying the new load, might return to them a larger share of state-collected taxes. Third, the General Assembly might turn primary responsibility for the financing of general assistance back to the localities, but simultaneously provide that the General Fund of the Commonwealth assume some fixed percentage of the total cost of carrying the assistance load in each county. Fourth, the General Assembly might turn general assistance back to the counties and authorize the General Fund of the Commonwealth to assume variable percentages of county assistance loads, such state participation percentages to vary in accordance with a given county's assistance needs and a given county's capacity to finance these needs out of county tax sources.

The enumeration of these four possibilities is not to be construed as a suggestion with regard to the feasibility or desirability of all or any one of them.

However, it is believed that if the first course were considered both feasible and desirable, some counties would undoubtedly face serious financial difficulties.[5] The second course, if considered both feasible and desirable, would probably necessitate the substitution of new state taxes for some of the levies now on our statute books, the choice among such substitute taxes to be guided by the ease with which they can be passed back to the localities the origin, that is, the localities where they were collected in the first place. The third course, if feasible and desirable, would place tax burdens of considerable inequality upon local units of government. The fourth course, however, would tend to equalize the inequalities in local tax loads which would ensue if the third course had been chosen.[6]

With a view of illustrating the intricacies of the problem under consideration and to facilitate legislative judgments, the Joint State Government Commission has prepared Table I.

Table I shows in Col. 2 equalized[7] assessments of taxable real estate for every county. Col. 3 shows 1939 state general assistance or direct relief payments for all counties.

Col. 4 shows what the effective county real estate tax rate[8] would have been in 1939 if the counties had been obligated to (a) assume ten percent of the cost of general assistance, and (b) finance their ten percent share out of a levy upon taxable realty. Inspection of Col. 4 shows that under these assumed conditions estimated effective county real estate relief tax rates would have ranged from 2.36 mills in Snyder County to .14 mills in Montgomery County.

Col. 5, which is comparable to Col. 4, shows what the effective county real estate tax rate would have been in 1939 if the counties had been obligated to (a) assume twenty percent of the cost of general assistance, and, (b) finance their twenty percent share out of a levy upon taxable realty. Inspection of Col. 5 shows that under these purely hypothetical conditions estimated effective county real estate relief tax rates would have ranged from 4.71 mills in Snyder County to .29 mills in Montgomery County.

Because it is sometimes contended that the counties least able to raise taxes by levying upon realty tend to have relatively high relief loads, the Joint State Government Commission presents in Col. 6 the effective county relief realty rates which would obtain if (a) on the average the counties had assumed twenty percent of the cost of direct relief in 1939, and (b) the aggregate share of the counties of twenty percent had been apportioned among the counties in accordance with a variable grant plan.

See Footnote at bottom of Page 6492.

Before proceeding with the inspection of the effective county relief tax rates shown in Col. 6, it may be well to briefly state the principle underlying the variable grant plan on the basis of which the hypothetical computations have been made.

From point of view of principle, the variable grant plan underlying the computation merely stipulates that counties having higher than average equalized per capita real estate assessments shall contribute a percentage larger than twenty percent toward financing the cost of direct relief and counties having lower than average equalized per capita real estate assessments shall contribute less than twenty percent toward the cost of maintaining direct relief.[9]

Inspection of Col. 6 shows that under the variable grant plan underlying the computation, effective county real estate relief tax rates would have ranged from 2.72 mills in Lackawanna and Wyoming Counties to .30 mills in Fulton County.

It is likewise instructive to compare the millages shown in Col. 5 (millage required by individual counties if the county had assumed a flat twenty percent of the cost of relief in 1939) and Col. 6 (millage required if counties on the average had been required to contribute twenty percent of the cost of relief in 1939 but if an individual county's contribution has been varied in accordance with variable grant plan). Inspection and comparison of these two columns indicates that Snyder County, which would have had to impose a rate of 4.71 mills under the flat twenty percent plan (see, Col. 5) would have been able to manage with a millage of 2.27 under the variable grant plan. Per contra, Montgomery County, which would have been required to levy .29 mills under the flat twenty percent plan, would have been called upon to impose .33 mills under the variable grant plan.

As was suggested above, the difficulties arising out of local inequalities with respect to the supporting of public functions as well as inequalities in specific local burdens may be overcome by: 1) an increase in state-local transfer payments for general local purposes, such as is represented by shared taxes[10] or 2) the introduction of variable grant plans tied to the financing of specific functions.

As regards the considerations bearing upon the choice of either method, it may be observed that variable grant plans when tied to specific functions such as general assistance are more likely to produce the results contemplated by legislators than shared taxes, simply because shared taxes, when returned to collection points (which is the standard state practice[11]) may or may not flow to the points of greatest need and lowest capacity.

[9] For purpose of the computation underlying Col. 6, this general variable grant principle has been translated into the following formula:

$$R_1 = 1 - k \frac{A_1}{A_s - A_1}$$

where R_1 is the percentage reimbursement which the state allots to a given county (i), k is a constant which in the case under consideration equals two fifths, A_1 is a given county's equalized per capita real assessment, A_s is the state's equalized per capita real estate assessment.

Legend:

Col. (2) Unequalized county assessments from a compilation of The Pennsylvania Manual, 1939, p. 981. These unequalized assessments were equalized at the market level by multiplying each county's assessed-market value ratio as given by Moody's 'Governments and Municipals' New York, 1934-1940; Prentice-Hall, Pennsylvania State and Local Tax Service, New York, 1938-1939; Logan, E. B., Taxation of Real Property in Pennsylvania, Philadelphia, 1934; and Commerce Clearing House, The Pennsylvania Tax Service, New York, 1939.

Col. (3) From a compilation of the Joint State Government Commission.

[10] See, Newcomer, M., "Revenue Sharing Between Federal and State Governments and Between State and Local Govrnments," Proceedings of the 29th Annual Conference on Taxation of the National Tax Association, 1936, pp. 275-282.

[11] See, Tax Systems, op. cit., pp. 5 to 107, Disposition Columns.

Because of the relative accuracy with which a variable grant plan facilitates realization of the legislative intent, such a plan has been developed for the financing of general assistance in Pennsylvania.

Needless to say, the members of the Joint State Government Commission do not recommend nor reject the variable grant plan which is likely to accomplish certain objectives.

The variable grant plan, outlined below, is based upon the assumptions that 1) it is desirable that the counties assume some fraction of the cost of financing general assistance, and 2) a given county's percentage share in financing its public assistance load is to vary in accordance with both, the given county's need as measured by general population,[12] and the given county's fiscal capacity as measured by equalized county real estate assessments.

In order to facilitate computations of the percentage shares of the total cost of carrying general assistance which different counties would have to assume if a variable grant of the type outlined above were adopted by the General Assembly, the Joint State Government Commission had to make some assumptions regarding the average percentage share of the cost of general assistance which the counties might assume. For computation purposes only, the members of the Commission have assumed that on the average the counties might finance ten and twenty percent, respectively, of the total cost of general assistance. It is again pointed out that this assumption is made for computation purposes only. It is not to be construed as a recommendation on the part of the Commission.

It should also be pointed out that the computations in Table I,[13] Column 6, are based upon the expenditure of $91,000,000 for General Assistance for the calendar year 1939. This represents the largest sum expended by the Commonwealth from State Funds for unemployment relief (General Assistance) in any calendar year.

Since 1939 represents the peak year in such costs, it is obvious when computing costs to the counties under the variable grant plan they will rise and fall with the relief burden. Expenditures for general relief in the calendar year 1940 was approximately $60,000,000, a reduction of about one-third under the amount spent in 1939. On the 1940 basis, the costs computed for each county would be correspondingly reduced.

Section III

Public Education: Another Problem In State-Local Financial Relations

Members of the General Assembly have for quite some time been aware of the fact that all is not well with public education in Pennsylvania.

Legislative solicitude for the welfare of public education, a function of government which is specifically mentioned in the Constitution of the Commonwealth and which according to Constitutional mandate is to be at least partially supported out of state government funds[1] has been in evidence on various occasions.

This solicitude on the part of Pennsylvania legislators is reflected in several bills,[2] which, though failing of passage at recent sessions of the General Assembly, provided for additional school tax revenue, special legislative appropriations made available to so-called "distressed school districts"[3] and the Hon. Franklin Spencer Edmonds' proposal[4] to increase contemporary school district reimbursement fractions[5] by five points each.

The problems of public education in Pennsylvania have recently been set forth by the 1940 Pennsylvania Education Congress[6] called by Dr. Francis B. Haas, Superintendent of Public Instruction, the Pennsylvania Federation of Teachers,[7] and the Pennsylvania State Education Association.[8]

Though these different organizations and agencies propose somewhat different remedies for the relief of the contemporary educational situation, in the main they seem to agree upon the nature of the major sore spots.

Generally speaking, it is claimed by all these organizations that 1) present general levels of school support are in grave danger of serious impairment because of the shrinkage of the real estate base, the financial mainstay of public education in the Commonwealth, 2) the present state reimbursement system does not facilitate equal educational opportunities to all Pennsylvania children of school age, 3) levels of education in Pennsylvania public schools are not as high as they might be and steps should be taken to remove the financial handicaps which at present make it difficult if not impossible to offer all children adequate "foundation programs."

It will be observed that these three claims are of somewhat different order. Claims one and two relate to observable facts, but the third claim is concerned with matters of broad social policy.

As regards the validity of the first claim, it does appear that real property assessments in Pennsylvania have been declining from $9,960,000,000 in 1931-32 to $9,100,000,000 in 1936-36.[9] This decline in aggregate realty assessments, though considerable, was not uniformily distributed among the different levying jurisdictions. As regards the uneven distribution, the "Report" observes:

"From 1931-32 to 1936-37 the decrease in reported assessed valuation in districts of the first class was $940,000,000, approximately 20 per cent. Computed on a per teacher basis and an average tax rate of 10 mills, this decrease is equivalent to a loss in local revenue of $900 per teacher. In one of the second-class districts, assessed valuation decreased from approximately $74,000,000 in 1931 to approximately $54,000,000 in 1935, a net decrease of

[9] See, Pennsylvania State Education Association, "Report ....." p. 113; see, too, below, Appendix C, which presents assessment data compiled by the Pennsylvania Department of Internal Affairs, which show that real property assessments have declined in most Pennsylvania jurisdictions.

$20,000,000 or approximately 30 per cent. On another second-class district, assessed value decreased from $127,000,000 in 1931 to approximately $105,000,000, estimated for 1938, or an approximate decrease of $22,000,000, which, in the opinion of the president of the board in this area, may require an increase in the tax rate for next year of 10 mills to maintain the present program.

"The extent to which schools are handicapped by delinquencies in tax payments is evident from the fact that in 1935-36 out of a total tax levy of $133,000,000, approximately $27,000,000 remained delinquent. The decline in the net amount of taxes collected for school purposes has dropped from $137,000,000 in 1930-31 to $106,000,000 in 1935-36, a net decrease of $31,000,000."[10]

As regards the second claim to the effect that the present reimbursement system does not facilitate equal educational opportunities, the Joint State Government Commission has previously submitted data[11] which show that school districts having equal roperty assessments per child of school age, receive different state reimbursement percentages.[12] In this connection, it should be observed, too, that Dr. E. B. Logan, present Budget Secretary of the Commonwealth, and a student of property assessment problems,[13] observed when addressing Pennsylvania educators during Schoolmen's Week: "In my opinion the present method of granting state aid has outstanding defects . . . there can be no sound defense for the wide state aid groupings as now arranged . . . In my opinion fundamental changes need to be made in the method of granting state aid. About three-fourth of the states use the system of supplying from state funds the amount necessary to finance a standard minimum program after a flat millage has been applied to the valuation of property and it appears to me that the method is far superior to the method now used here."[14]

As regards the contention of the education groups to the effect that the offerings of Pennsylvania public schools might well be enriched[15] and levels of education might well be raised, it should be observed again that this contention involves matters of basic legislative policy. Who after all is to decide how comprehensive public education is to be? Manifestly, the answer must be given by the members of the General Assembly speaking for their constituents.

It is rather difficult to determine exactly how "rich" and "comprehensive" contemporary Pennsylvania educational offerings are. A first clue to the relative quality of education in Pennsylvania, however, is afforded when current expenditures for education per pupil in Pennsylvania are compared with those of other states.

Table II has been prepared with a view of facilitating such comparisons.

Inspection of the above table indicates that Pennsylvania with a per pupil current expenditure of $79.70 ranks lower than New York, California, New Jersey, Massachusetts, Connecticut, Illinois, Ohio and Wisconsin. Pennsylvania's per pupil expenditures are about equal to those of Michigan, and higher than those of Indiana, West Virginia, Tennessee and North Carolina.

TABLE II

Current Expenditures for Public Education in Pennsylvania and 'Competitive States'
1935-36

State	Current Expenditures Per Pupil	Current Expenditures Per Child
(1)	(2)	(3)
Pennsylvania	$ 79.70	$54.53
California	115.60	97.07
Connecticut	90.76	62.12
Illinois	86.06	55.70
Indiana	69.08	53.65
Massachusetts	104.51	74.53
Michigan	78.82	56.10
New Jersey	108.33	74.18
New York	134.13	95.08
North Carolina	31.11	22.09
Ohio	82.42	58.86
Tennessee	35.81	24.15
West Virginia	57.93	42.11
Wisconsin	80.87	55.18

* From Report of the Advisory Committee on Education, Washington, 1938, p. 225.

It goes without saying that dollar figures do not tell the whole story of the quality of education. The members of the Joint State Government Commission are of the opinion that the whole subject of publicly supported and publicly subsidized education should be thoroughly and intensively studied. Such a study should cover all education in which the Commonwealth has a contingent financial interest and should not be confined to present financial arrangements but should also endeavor to ascertain what the Pennsylvania taxpayer obtains at the present time for his dollar and how the quality of the service now obtained might be improved and how inequalities might be removed without the expenditure of additional amounts of public monies.

To remedy the above discussed conditions the Pennsylvania Education Congress, Pennsylvania State Education Association, and the Pennsylvania Federation of Teachers suggest certain measures. Some of these measures are identical, others are somewhat different in character.

The Education Congress,[16] the Pennsylvania State Education Association,[17] and the Pennsylvania Federation of Teachers[18] agree that the present difficulties faced by public education in Pennsylvania can be solved only if the state government makes larger state appropriations available to the local school districts.

The Education Congress and the Pennsylvania State Education Association, on the one hand, and the Pennsylvania Federation of Teachers, on the other, differ, however, with regard to the volume of additional state aid to the schools, the method to be used in making such additional state aid available, and the state sources of tax revenue to be tapped to finance the additional state aid called for.

First, as regards the volume of additional state aid recommended. The Pennsylvania Federation of Teachers suggests that the state government of the Common-

[18] Pennsylvania Federation of Teachers, "Improve Educational Opportunities for Pennsylvania Children", p. 9.

wealth, in addition to amounts now allocated to the school districts, make available $51,900,000 annually.[19] The Pennsylvania State Education Association suggests that an additional $35,500,000 be made available to the school districts annually.[20] And the Committee on Taxation Policies and Procedures of the Education Congress suggests that the state government of the Commonwealth assume on the average between 35% and 40% of the cost of public education.[21] In terms of dollar amounts, the Education Congress proposal is the approximate equivalent of the Pennsylvania State Education Association recommendation.

Second, as regards the procedure to be employed in transferring the called for state aid to the local school districts the Pennsylvania State Education Association and the Tax Policy Committee of the Education Congress are in accord, but the Pennsylvania Federation of Teachers proposes a method of its own.

Technicalities aside, the Pennsylvania State Education Association proposes that a foundation program of $1,600 be established for every elementary teaching unit and that a foundation program of $2,000 be established for every secondary teaching unit. These foundation programs ar to be financed as follows: 1) increase the present reimbursement fractions[22] by twenty points each, that is, increase the reimbursement fraction of fourth class school districts from .50 to .70 etc., and 2) have the General Fund of the Commonwealth pay to each school district the difference between the cost of the foundation program and the amount raised by a five mill tax upon real estate plus the amounts made available to each school district under the increased reimbursement fractions.[23]

If put into operation this plan would work as is illustrated by the example below:

"Gettysburg, a third-class district in Adams County, has 25.5 elementary teachers and 19.5 secondary teachers. The total true value of property in 1936-37 in Gettysburg was $3,993,000. Providing a school program equivalent in cost to $1,600 for every elementary teacher and $2,000 for every secondary teacher would cost $79,800. A uniform tax levey of five mills on the true value of property in Gettysburg would produce $19,965 toward the school program. Present aids, that is appropriations now received, would provide $27,000 toward the cost of this program. The proposed amendments to the Edmonds Act would provide additional State appropriations of $12,120. The total amount provided by the five-mill levy on true value, the present appropriatinos, and the new Edmonds appropriations would total $59,085. This amount is $20,715 less than the cost of the foundation program indicated in column 5. The State would, therefore, provide an additional appropriation as an equalization grant in the amount of $20,715, thus guaranteeing the foundation program in the amount of $79,800 with a local tax effort of five mills."[24]

The reimbursement plan of the Pennsylvania Federation of Teachers agrees with the plan outlined above as regards dollar definition of the foundation program, but stipulates that the program be financed by having the General Fund of the Commonwealth "pay each scchool district $1,600 per elementary teaching unit, $2,000 per secondary teaching unit, less a deduction of yield of two mill tax on true value of real estate."[25]

Third, as regards the financing of the additional state aid to the schools the suggestions of the Taxation and Sources of Revenue Committee of the Pennsylvania State Education Association, again differ from those of the Pennsylvania Federation of Teachers.

Purely administrative changes aside, the Committee on Taxation and Sources of Revenue of the Pennsylvania State Education Association suggests that the General Fund of the Commonwealth be placed in a position to finance the additional state aids and that in order to make it possible for the General Fund to carry the additional load, the following taxes be imposed: 1) a clear income tax levied at the rate of 2% and providing for the deduction of necessary living costs up to a legislatively stipulated maximum of $1,800 per taxable return, 2) a two percent retail sales tax, exempting food, gasoline and alcoholic beverages sold by the state monopoly, and 3) a tax, imposed at the average state rate, upon the operating properties of public utilities.[26] In addition, the Taxation and Sources of Revenue Committee of the Pennsylvania State Education Association recommends that a state agency be established, such agency, among other functions, to equalize the assessed value of all taxable real estate at market levels, and that legislation be enacted to make it mandatory upon the Superintendent of Public Instruction to reimburse the school districts on the basis of these equalized real estate assessments.[27]

The tax measures suggested by the Pennsylvania Federation of Teachers are: 1) a tax at a rate not specified upon the operating properties of public utilities, 2) a tax at rates not specified upon gifts, such tax to supplement the present Pennsylvania transfer inheritance tax, 3) increases at rates not specified of the present inheritance transfer tax, 4) taxes at rates not specified upon the income from stocks, bonds, and mortgages, and 5) better enforcement of personal property taxes.[28]

The members of the Joint State Government Commission are of the opinion that the determination of the quantity and quality of educational offerings made available to the children of Pennsylvanians rests exclusively with the General Assembly. As regards the facts in the case, it may be observed that at present, equality of educational opportunity on the levels suggested by the Education Congress, the Pennsylvania State Education Association and the Pennsylvania Federation of Teachers is exceedingly difficult of attainment because of: 1) the real estate assessment situation which prevails throughout the state, and 2) the heavy drains imposed upon the General Fund of the Commonwealth by virtue of general assistance disbursements.

In this connection it should be observed that the Pennsylvania State Council on Education, an advisory body to the Superintendent of Public Instruction now has the authority to investigate local real estate assessments used for school tax purposes. However, the General Assembly has never seen fit to appropriate sufficient funds to the Council to enable it to carry this authorized function. The assessment situation might be somewhat relieved if the General Assembly chose to make an appropriation available to permit the Council to perform this particular function.

Section IV

Some Problems of Tax Administration

Although today's crucial fiscal problems are concerned with tax burdens borne by different groups in the community and state-local payment procedures, tax administration presents certain difficulties which call for legislative attention.

Tax adminisration problems differ from tax and transfer payment problems by reason of the fact that they are virtually non-controversial.

Among the tax administration problems brought to the attention of the Joint State Government Commission at various public hearings which might well receive legislative attention at this time, three stand out conspicuously: 1) the administrative procedures which must be followed if a Pennsylvania taxpayer wishes to appeal a decision of the Pennsylvania Department of Revenue; 2) the refunds allowed a taxpayer for overpayment; and 3) the interest payable in consequence of additional assessments.

As regards appeal procedures it should be observed that a taxpayer who wishes to appeal from a revenue department decision petitions for a so-called resettlement. Upon such petition the taxpayer appears before what is known as the "small board" consisting of the Secretary of Revenue and the Auditor General. If no satisfactory agreement can be reached with the "small board," the taxpayer may take the case before the Board of Finance and Revenue consisting of the Secretary of Revenue, the Auditor General, the Attorney General, the State Treasurer, and the Secretary of the Commonwealth, or their representatives.

Representatives of taxpayers groups are of the opinion that this arrangement is unsatisfactory because some of the same officials who determine a taxpayer's liability in the first instance hear the appeal. These representatives of taxpayer groups suggest that the General Assembly create a special tax appeal body to consist of three members to be appointed by the Governor for overlapping terms and removable for cause only.

As regards refunds it should be noted at present the Department of Revenue grants no cash refunds whatsoever. All refunds are granted in the form of credits, such credits to be applicable only to other tax obligations. As regards this situation the members of the Joint State Government Commission feel that the procedure now prescribed by law is inequitable and they recommend that the taxpayer be allowed either a cash or a credit refund and that interest be allowed, such interest to run from the date of payment.

It should likewise be noted that at present the taxpayer does not have the privilege to appeal to the courts in refund matters. Again the members of the Joint State Government Commission are of the opinion that the taxpayer should be granted the privilege to appeal to the courts. In addition, the members of the Joint State Government Commission would welcome legislation which would require the Department of Revenue to settle all corporate tax returns within 90 days from the date when the request for settlement is made, provided that the exercise of this right shall not be effective prior to 90 days before the end of the year following the year for which the report was made or became due. Similarly, the Department of Revenue should be required to dispose of a petition for resettlement within six months from the date on which the petition was filed unless the petitioner in question agrees to file a waiver or by his own action causes delay.

Section I

The Legislative Histories of Major Pennsylvania Taxes

Appendix A presents outlines of the legislative histories of major Pennsylvania taxes and a memorandum prepared by Sheldon C. Tanner titled "Constitutional Limitations of the Taxing Power in Pennsylvania." This memorandum is in the nature of a historical survey of important Pennsylvania court decisions in the light of which the so-called uniformity clause of the Pennsylvania Constitution must be interpreted. Needless to say, this memorandum has an important bearing upon the constitutionality of so-called "progressive" or "graded" state taxes.

The legislative histories of major Pennsylvania state taxes are arranged in accordance with the base by reference to which the taxes in question are levied in the following order: 1) capital base, 2) net income base, and 3) transaction base.

Each legislative history consists of: 1) legislative enactments pertinent to a given tax, 2) judicial interpretations of the pertinent tax statutes, and 3) the contemporary status of the act. In addition, each legislative history is accompanied by yield statistics covering, as a rule, the last decade.

Legislative History

Capital Stock and Bonus Tax

Date of Act	Principal Changes from Prior Act	Rate
6-11-1840 P. L. 612		No profit—no tax ½ mill of C. S. value for each % of Dividend.

Date of Act	Principal Changes from Prior Act	Rate
3-21-1843 P. L. 121	Joint Stock Assos. added	Same
4-29-1844 P. L. 486	Rate	As above if Div. is 6% or more. 3 mills if Div. is less.
4-12-1859 P. L. 529	Repeal tax on Div. on Co's. paying C. S. tax	As in 1844 Act
5-1-1868	Foreign corporations taxed except for insurance Co's.	As in 1844 Act
4-24-1874 P. L. 68	Value of C. C. not less than selling price—Fiscal officers can revalue C. S.	As in 1844 Act except transportation Co's.—Increased rate.
6-7-1879 P. L. 112	Limited partnerships taxed except Mfg. & Mercantile Co's. ...	As in 1844 Act
6-30-1885 P. L. 193	Corps. granted mfg. exempt. except those mfg. gas, malt, and vinous liquors	As in 1844 Act
6-1-1889 P. L. 420	Mfg. exempt. limited to Co's. organized exclusively for mfg. except brewing and distilling or those with eminent domain ...	As in 1844 Act
6-8-1891 P. L. 229	Rate—Attempt to equalize taxes	5 mills on actual value of C. S. of taxables except fire and marine insurance Co's. (3 mills).
7-15-1897 P. L. 292	Independent Act for Distilling Co's.	10 mills
6-7-1907 P. L. 430	Securities exempt from further taxes limited to those in which all shareholders have equitable interest	5 mills
6-7-1911 P. L. 673	Reenacted Act of 1907 correcting defective title Exempted B. & L. Assos.	3 mills 5 mills
7-22-1913 P. L. 903	Exempted laundering co's. Overruled court decision to contrary	3 mills 5 mills 3 mills
6-2-1915 P. L. 730	3rd element (intrinsic value of assets) of valuation added	5 mills 3 mills
7-15-1919 P. L. 948		
4-20-1927 P. L. 311	Exemption granted on value of shares in auxiliary corps represented by tangibles outside of Pa.	5 mills
3-15-1927	Exempted 1st class corps.	3 mills
5-4-1927 P. L. 713	Changed filing date to March 15	5 mills 3 mills
4-25-1929 P. L. 657	Exemption to corps. "processing and curing meats"—To overrule court decision	5 mills 3 mills
6-22-1931 P. L. 685	Definite formula to properly exempt non-taxable assets—Change of 4-20-27 limited to corps. owning majority of shares of foreign corps.	5 mills 3 mills
5-16-1935 P. L. 184	Mfg. ex. repealed for 2 yrs.—Foreign corps. etc., relieved from C. S. tax, subject to Franchise tax instead	5 mills
4-18-1937	Repeal of mfg. ex. made permanent	5 mills

2 Year Period.

6 Month period to mark change of fiscal year from that ending Nov. 30th to the present basis ending May 31st.

‡ 12 Month period; final fiscal year ending Nov. 30th.

† First biennium including self-assessing taxes. Year ended 5-31-37 included two years of capital stock tax revenue in one.

Note: The above amounts are those collected in the years indicated. The amount for a particular year not necessarily indicate the capital stock tax imposed for the year immediately preceding. Some figures may include tax for two or three or even more preceding years. Court appeals, tardy settlements, etc., may delay final payment of tax beyond the year of normal settlement.

It was found in the first half of the nineteenth century the revenues derived from sale of public lands, surveys of boundary lands, rents reserved to the Commonwealth, etc., were insufficient to meet the ever-expanding expenses of the state. Domestice corporations as a class were decided upon as a new source of revenue.

The Act of June 11, 1840, P. L. 612 marked a distinct and radical departure in the public policy of the Commonwealth. Although bank dividends had been taxed since 1814 corporations were the first time set apart as a separate class for the purpose of taxation. This act imposed for a period of five years from January 1, 1841 a tax upon "the capital stock paid in of all banks, institutions and companies whatsoever, incorporated by or in pursuance of any law of this Commonwealth. . . ."

Joint stock associations were added to the list of taxables by the Act of March 21, 1843, P. L. 121. Under this act and the act it amended, that of 6-11-40, P. L. 612 the Capital Stock of such domestic corporation and Joint stock associations on which dividends or profits of one per cent or more per annum were made or declared were alone subject to the new tax at the rate of (a) one-half mill on every dollar of the value thereof and in addition (b) at one-half mill for each per cent of dividend or profit made or declared. If no profit was earned no tax was imposed.

The tax was imposed on the shareholder until changed by the Act of April 24, 1874, P. L. 68 when it was levied directly upon the corporation. This feature of having the treasurer of the corporation or joint stock association

deduct the amount of the tax from the dividends or profits made or declared is similar to that of the present Corporate Loans Tax wherein the corporation treasurer is required to withhold the amount of the tax when paying interest to the holder of the taxable indebtedness. It does not appear, however, that in case the treasurer failed to withhold the tax the corporation became liable therefor as is provided in the Loans Tax Act.

The Act of April 29, 1844, P. L. 486 changed the no profit no tax feature of the Act of 1840 by providing that "where any such . . . company shall fail to make and declare any dividend or profit or shall make or declare . . . a profit of less than 6% per annum the cashier or treasurer and a majority of the directors or managers thereof . . . shall estimate and appraise the capital stock . . . at its actual value in cash . . . and pay a tax of 3 mills on such value." The provision of the Act of 1840 as to a tax of one-half mill for each per cent of dividend remained in force in all cases where the dividend or profit was 6% or more. The rates set by this Act remained in force until changed by the Act of June 8, 1891, P. L. 299, a period of almost fifty years.

In the Act of April 12, 1859, P. L. 529 was provided a method of collecting the tax when the dividends payable to stockholders were not sufficient to pay the tax due the State. The treasurer was empowered, after notice and demand upon the shareholder, and due advertisement, to sell the shares of stock at public sale to realize the amount of the tax.

For 15 years from 1844 to 1859 the law remained unchanged. In the latter year (Act of April 12, 1859, P. L. 529) banks of deposit and discount, or savings banks became subject to the capital stock tax. All companies liable to the capital stock tax and a tax on dividends, except banks of issue, were exempt from the latter tax. This act also provided for an exemption to building and loan associations, plank road, and turnpike companies, when dividends were not made or declared.

By the Act of May 1, 1868, foreign corporations were for the first time made subject to the capital stock tax. Banks and saving institutions and foreign insurance companies were expressly exempted. The exemption from the tax on dividends to corporations which paid a capital stock tax was continued.

An effort was made to exempt manufacturing, mining and quarrying corporations which paid a capital stock from the 3% tax on net earnings. This failed and an amendment was proposed to exempt manufacturing, mechanical, mining and quarrying companies paying the 3% tax on net earnings and income from the capital stock tax. This also was defeated. It apparently marked, however, the first effort to exempt manufacturing corporations from the capital stock tax.

By the Act of April 24, 1874, P. L. 68, a more definite measure or test was provided for determining the value of the capital stock. Under this Act the value should not be less than the average selling price of the shares. This measure of value has remained through the years and forms today one of the three tests for determining the value of the capital stock. The fiscal officers of the Commonwealth were authorized to revalue the capital stock when not satisfied with the value as appraised by the corporation officers. On certain transportation companies was imposed a special rate of a tax at 9/10 of a mill for each one per cent of dividends made or declared with a minimum rate of 6 mills on actual value of capital stock when dividends were not made or declared. This was in contrast to the votes of ½ mill and 3 mills respectively as applied to all other companies. Building Associations were expressly exempted from the capital stock tax.

The Act of March 20, 1877 repealed the Act of 1874 but substantially re-enacted its provisions.

What amounts substantially to a corporation tax code was incorporated in the Act of June 7, 1879, P. L. 112. A safeguard was thrown about the method prescribed by previous acts in arriving at a value of capital stock for capital stock purposes. Apparently the practice had grown up of not declaring and paying dividends to stockholders but carrying them into a surplus or sinking fund account. The Act of 1879 provided that profits added to sinking fund should be regarded as having been paid to the stockholders and so taxed. Another definite measure of capital stock valuation was provided in that the valuation should be not less than the value indicated by the amount of dividends made or declared.

A new provision of the Act of 1879 was to impose for the first time the capital stock tax on limited partnerships. It expressly provided, however, that the tax should not be imposed on limited partnerships organized for manufacturing or mercantile purposes. This was the first time the policy of encouraging manufacturing in Pennsylvania appeared in the statutes. From a date some six years later it was applied to corporations and continued without interruption for a period of fifty years.

An Act passed in 1874 had provided for the formation of limited partnerships but they enjoyed an immunity from state taxes until 1879. In the legislative session of that year there was some considerable opposition to imposition of a state tax on limited partnerships. Opponents charged a breach of promises held out to capital by the Act of 1874 which in effect invited formation of limited partnerships. The danger of having the Act declared unconstitutional as an improper classification of taxable subjects was mentioned repeatedly. Harm to industries of the State was feared by the opposition. The proponents of the bill cited the special privilege of limited liability enjoyed by the members of the limited partnerships as compared to those of a general one; unfairness to corporations which had been paying a capital stock tax since 1840; the loss of corporation tax revenue—which was claimed as great a shrinkage as 65%—by many corporations giving up their charters and becoming limited partnerships. A determined effort was made to limit the tax, which was imposed on the actual value of capital stock—the interest of the partners being regarded for the purposes of this act as capital stock, to limited partnerships which were to be organized "hereafter." The Assembly, however, imposed it on those already in existence as well. Comparatively little resistance in both the House and Senate was made to the provision which exempted manufacturing and mercantile limited partnerships from the tax.

The policy of the Commonwealth of fostering manufacturing by corporations within it, adhered to for a period of fifty years and abandoned in 1935 because of the acute need for additional revenue caused principally

by the relief demands incident to the economic depression, had its origin in the Act of June 30, 1885, P. L. 193. The presentation of the exempting provisions of the bill to the legislative assembly, at least, to the House, was somewhat unusual. House Bill 514 which provided for a penalty on banks and saving institutions for failure to file their annual reports and to pay the four mill tax was passed and sent to the Senate. On third reading in the latter body after extended debate it was amended to exempt all manufacturing corporations, limited partnerships and joint stock associations, except gas companies and those engaged in the manufacture of malt, spiritous or vinous liquors. In explanation of the manner of presenting the question of amending House Bill 514, it was stated in the Senate that, because of the lateness of the date, there was no prospect at the current session of passage of any of the several bills before the House repealing the State Tax on capital stock. In the debate those favoring the manufacturing exemption dwelt upon the salutory effect of the amendment, which equalized the burden of state taxation upon corporations and limited partnerships, upon formation of new corporations which were then becoming limited partnerships and the cessation of changing of existing corporations to this form of business enterprise. A leading manufacturer of the State in a letter read in the Senate cited the revenue of—bonus from charters in 1883 as only $7500, according to a report of the Secretary of the Commonwealth, and in 1884 probably only half of that sum and prophesied if the manufacturing exemption were passed such revenue would rise to $150,000 or $200,000 in a single year.

The manufacturing exemption was defended as a direct benefit to employers and employees of industry and an indirect benefit to agricultural classes because it provided a home market for their products. Fostering manufacturing corporations was claimed to be the only solution of labor troubles—declared to be the worst in Pennsylvania of any State in the country—as the wage-earner is given a chance to become a partner. Attention was called to the fact that the adjoining states of New Jersey, Ohio, and Delaware imposed no similar state tax on corporations. The principal opposition to the bill as amended developed in the House after it was sent from the Senate for concurrence in the amendment. It was strenuously contended the bill was unconstitutional because its original purpose was changed in its passage through the Senate in violation of Section 1 of Article III of the State Constitution and because it contained more than one subject in violation of section 3 of the same article. Another objection was the loss of revenue to the Commonwealth. This was answered by the claim that the increase in revenue provided by other measures in the same session would be three times the amount lost by the extension of the manufacturing exemption to corporations. The bill was finally passed without further amendment and sent to the Governor. Later it was recalled from the Governor because of the question of its Constitutionality and in its stead House Bill 513 was finally passed and became law.

House Bill 513 which finally became the Act of June 30, 1885, P. L. 193, supplemented the Act of 1879 and dealt principally with the tax on Loans and the four mill tax on personal property. It passed the House with such provisions and was sent to the Senate. There it was amended on final passage by including the penalty provision on banks and saving institutions of House Bill 514 and Section 20 which extended the manufacturing exemption to all corporations except gas companies and those engaged in the manufacture of malt, spiritous or vinous liquors. Similar arguments were advanced in the deliberations of this bill in the Senate and House as in the case of House Bill No. 514 discussed above. One interesting statement made was that nine-tenths of all employees of corporations in Pennsylvania except railroad companies, work for manufacturing corporations.

The present Capital Stock Tax Act is the Act of June 1, 1889, P. L. 420, as amended. Although the Act has been amended frequently in the last fifty years it has never been repealed entirely. Sections 20, 21 and 22, which are the heart of the Act, are for the most part a re-enactment of the pre-existing law. Section 20 sets forth the corporations required to file reports and outlines the form of the annual report—a form of report practically unchanged until 1915. Section 21 imposes the tax which was arrived at as in prior acts, being based on a variable rate of one-half mill on each dollar of the value of the capital stock for each per cent of dividend made or declared when such dividend was six per cent or more and on a flat rate of three mills upon each dollar of the actual value of the capital stock when the dividends earned or declared were less than 6%. Section 22 imposes a penalty for failure to file reports and possible loss of charter for failure to file for three successive years. Under this Act for the first time mortgages, bonds and other securities owned by a corporation in its own right were exempt from further taxation.

The manufacturing exemption was continued but was limited to corporations, limited corporations and joint stock associations, organized exclusively for manufacturing purposes and actually engaged in manufacturing in the state. The exemption was not allowed companies engaged in brewing, or distilling of spirits or malt liquors or to those enjoying and exercising the right of eminent domain. In the discussion on the measure an amendment was proposed which would repeal entirely the manufacturing exemption. The debate that ensued was more extended than in 1885 when the exemption was first provided for. The proponents of the amendment were mostly rural members and the advocates of continuance of exemption came from the cities and industrial centers. All of the old arguments were repeated and new ones were advanced. The question of the constitutionality of the exemption was again raised.

Section 1 and 2 of Article I, which provided that general laws may exempt from taxation public property used for public purposes, would be violated, it was argued. A House member from Mercer County contended "to classify for taxation is constitutional, to classify for exemption is not." It was argued the farmer was over-taxed and needed relief. To continue the exemption would not aid him but make his burden heavier by removing the tax from an element better able to bear it. The opposition maintained the farmer would be aided for he would have a larger home market for his products by reason of the influx of workers neighboring manufacturing centers. In favor of the manufacturing exemption it was argued capital in manufacturing companies benefits the great middle class investor and the laborer by giving the one a chance to invest his small savings and the other employment. Com-

petition was encouraged by encouraging manufacturing corporations. Wages of labor in Pennsylvania were higher than in neighboring states—Massachusetts and the South were cited—but repeal of the exemption would force the lowering of wages to the level of these other states. One member of the lower house advanced the rather novel argument that he was not a friend of the corporations as opposed to the individual but he did not favor discrimination against individuals who had associated themselves together in corporations. On the other side it was contended corporations should pay for the special privileges they are allowed by the state, such as limited liability and perpetual existence; most manufacturing corporations have the protection of the tariff system; monopolies are encouraged in various industries by the failure to apply the Capital Stock Tax to all corporations, manufacturing corporations are declaring dividends from 240% to 600% in one year; manufacturing industry was not ruined by the Capital Stock exacted from corporations prior to 1885; border states all have taxes of other kinds which would discourage our manufacturing companies from migrating. The bill was finally passed by both houses after adopting the conference report which limited the exemption to those companies organized exclusively for manufacturing purposes and actually engaged in manufacturing in the state with the exceptions noted above.

In the debate on the measure in the House it was brought out that a "strong effect" had been made in the Constitutional convention of 1873 to insert a provision in the Constitution which would have placed the manufacturing exemption beyond the reach of adverse legislation. Advocates of exemption, while a majority, were divided into two camps. One wanted the exemption provided for in the Constitution while the other wanted the Legislature to provide it. The Constitutional clause was stricken out by a vote of 71 to 38.

The Act of June 8, 1891, P. L. 229, marks the most important change in the Capital Stock Tax Law. It amended sections 20 and 21 of the Act of 1889 by changing the basis for determining the amount of tax. It provides for a flat tax of 5 mills on each dollar of actual value in cash of the capital stock of taxable corporations—except fire and marine insurance companies taxed at 3 mills—regardless of whether dividends are earned or declared. According to the preambles of the Act certain corporations were escaping their share of the tax under the old system of imposing the tax when dividends less than 6% were earned or declared. These preambles recite there is a widespread demand for "equalization of taxation" and relief of real estate from "local taxation" and "moneyed capital" taxable under the Act of 1889 "does not bear its just proportion of the burdens of local taxation," and a flat tax of 5 mills is necessary to make taxes more uniform. The valuation measure was changed to provide that the stock should be valued "at its actual value in cash, not less however than the average price which said stock sold for during said year, and not less than the price or value indicated or measured by net earnings or by the amount of profit made and either declared in dividends or carried into surplus or sinking fund . . . ."

The Act of June 8, 1893, P. L. 353 provided that manufacturing exemption should be allowed on capital "invested in and actually and exclusively employed in carrying on manufacturing within the State." This change from the Acts of 1889 and 1891 allowed the exemption to corporations not organized exclusively for manufacturing purposes. Under the Act of 1889 and also the Act of 1891 a corporation which included in its charter a non-manufacturing purpose was not entitled to exemption under judicial interpretation even if it was engaged exclusively in manfacturing and never exercised the non-manufacturing privilege.

The Act of July 15, 1897, P. L. 292, imposed a Capital Stock tax of ten mills on companies incorporated for the purpose of distilling liguors and selling them at wholesale. This act was not an amendment to the Act of 1889 but an independent statute.

The Act of June 7, 1907, P. L. 430, purported to exempt companies paying capital stock tax from any further payment on bonds, mortgages, etc., in which the whole body of the shareholders as such had the entire equitable interest in remainder, but was held unconstiutional because of defective title in Provident Life & Trust Co. v. Hammond, 230 Pa. 407 (1911).

The Act of June 7, 1911, P. L. 673, Sec. 21 was successful in accomplishing what the Act of June 7, 1907, supra, had attempted. It was held constiutional in Provident Life & Trust Co. v. Klemmer, et al., Apps. 257 Pa. 91 (1917). It provided for the exemption recited supra and also expressly exempted domestic building and loan associations. The exemption originally granted these organizations by the Act of 1859, supra, was apparently lost in the subsequent revisions of the law.

The exemption from further tax of securities owned by a corporation paying a Capital Stock Tax is discussed more at length in Volume 1 of "Corporation Taxation and Procedure in Pennsylvania" by Stradley & Krekstein at page 86. Exemption was first provided under the Act of 1889 for securities owned by a corporation in its own right. The County of Philadelphia tried to impose a Pensonal Property Tax upon securities of Provident Life and Trust Company representing investments of surplus funds held by the company as a reserve to meet policy obligations. This corporation was engaged in a combined life insurance and trust company business under a special charter. The company appealed the imposition of the tax and the Supreme Court in Provident Life and Trust Company v. Durham, 212 Pa. 68 (1905) held the securities were exempt as they were held by the company in its own right and were under its absolute control.

The Act of June 7, 1907, P. L. 430, referred to above was passed apparently to permit the imposition of the Personal Property Tax by the County of Philadelphia against Provident Life and Trust Company. Accordingly the County made another attempt to collect such tax but failed because the Act of 1907 was held unconstitutional as noted. The latter Act purported to amend Section 21 of the Act of June 27, 1879, whereas there was no such Act. The Act of 1911 also referred to above enabled the County of Philadelphia to impose the Personal Property Tax upon the securities which had been set aside for the protection of the policyholders of the corporation.

The Act of July 22, 1913, P. L. 903, extended the provisions of the manufacturing exemption so as to include corporations engaged in the business of laundering. The history of this amendment is interesting. Previously the

State Supreme Court in Commonwealth v. Keystone Laundry Company, 203 Pa. 289, held that a corporation organized to conduct and conducting a laundering business was not entitled to the manufacturing exemption. In the legislative session of 1913 House Bill 1341 was introduced amending the Act of 1879, supra, and its supplements, defining a laundry company as a manufacturing corporation and entitled to manufacturing exemption. In the debate on the measure the report of the Legislative Commission of 1911 was cited as classifying laundry business as manufacturing. It was similarly classified by the bulletin report of the U. S. Census Bureau. The bill was passed finally by both houses and sent to the Governor. He vetoed the bill saying in his veto message "I see no reason why a corporation incorporated to conduct a laundry should be relieved of taxation under guise of being a manufacturing company when it manufactures nothing. This would open the door on any class of corporations being declared manufacturing corporations for the purpose of being relieved from taxation."

Later Senate Bill 1305 was amended so as to exempt laundering corporations from the capital stock tax not as manufacturing companies but as an additional class of corporations, the bill providing for exemption of "laundering or manufacturing corporations." In the debate on this measure the Governor was quoted as saying he had made a mistake in vetoing the earlier bill as he did not give it sufficient thought. According to the Legislative Journal the Governor suggested the amendment to the bill to correct his mistake.

The Act of June 2, 1915, P. L. 730, made important changes in the capital stock law. A new form was provided for the making of the annual report to the Auditor General. From this year there was included in the form a schedule calling for a history of the corporation's earnings and dividends for 5 years. The form has called for this schedule each year since but it has received little attention from the taxing officers of the fiscal departments in the last five years. The Act also provided for the filing of annual reports on a fiscal year basis for corporations that ended their year on a basis other than calendar year and so reported to the Federal Government. The present statutory rules for fixing the valuation of the capital stock of a reporting company by adding the third valuation factor, were provided by this Act:

". . . at its actual value in cash as it existed at the close of the year for which the report is made; not less, however, than, first, the average price at which the stock sold for during the year; and second, not less than the price or value indicated or measured by net earnings or by the amount of profit made, and either declared in dividends, expended in betterments, or carried into surplus or sinking fund; and third, not less than the actual value indicated or measured by consideration of the intrinsic value of its tangible property and assets, and of the value of its good will and franchises and privileges as indicated by the material result of their exercise taking also into consideration the amount of its indebtedness . . ."

The Act of July 15, 1919, P. L. 948, made minor changes such as the right to file fiscal reports to joint stock associations and limited partnerships and for extension of time for filing reports, etc.

The Act of April 20, 1927, P. L. 311, pertained to the Capital Stock Tax Act although it was not an amendment thereto. By its terms corporations owning shares of stock of other corporations were granted exemptions upon such shares represented by tangible assets located outside Pennsylvania provided such other companies were engaged in a business auxiliary to the owning corporation. This Act was a direct result of the decision of the Pennsylvania Supreme Court in the case of Commonwealth of Pennsylvania v. Sunbury Converting Works, 286 Pa. 545 (1926). In this case the Court held taxable shares of a foreign subsidiary corporation even if the tangible property of the subsidiary, if held by the parent outright, would be exempt because it was located outside the Commonwealth.

The Act of May 4, 1927, P. L. 713, changed the date capital stock reports were due from February 28 to March 15 in the case of calendar year corporations. Another Act passed the same day, that of May 4, 1927, P. L. 742, exempted "first class corporations and cooperative agricultural associations without capital stock" from the filing of capital stock tax reports. Subsequently by an opinion of the Attorney General it was held the phrase "without capital stock" did not apply to first class corporations so that these corporations were exempt from the filing of reports even though they had capital stock.

The Act of April 25, 1929, P. L. 657, transferred to the Revenue Department, created by the Act of April 9, 1929, P. L. 343, all the powers possessed by the Auditor General's Department in reference to the administration of the Capital Stock Tax. House Bill 1942 which subsequently became this Act was amended on third reading in the Senate to exempt from the Capital Stock Tax corporations, etc., engaged in "processing and curing meats, their products and by products." This amendment was the result of the decision of the Pennsylvania Supreme Court in Commonwealth of Pennsylvania v. Consolidated Dressed Beef Co., 242 Pa. 163 (1913).

Prior to 1929 it was the practice of the fiscal departments in settling capital stock tax to allow an exemption of so much of the value of the capital stock as the value of exempt assets bore to the value of total assets. Two decisions of the State Supreme Court rendered in that year cast a doubt upon the validity of such practice. Accordingly the Act of June 22, 1931, P. L. 685, was passed to remove any doubt as to the legality of the practice. In the discussion on the measure in the lower branch of the General Assembly it was brought out that the bill was twice reported to the House from the Ways and Means Committee by a very close vote. Opponents to the bill claimed it increased taxes at a time when the Governor was under obligation not to raise them; that it amounted to double taxation on shares of Pennsylvania corporations; that it would increase unemployment; that the budget didn't need increased revenue. The proponents of the bill cited the confusion incident to the upsetting of the old method of settling the capital stock tax, the need for the revenue that would be lost as a result of the court decisions, revenue that was necessary for increase to hospital appropriations and mothers pension fund.

The Act of June 22, 1931, P. L. 687, changed the exemption allowed for shares of a subsidiary company under the Act of April 20, 1927, P. L. 311, by limiting it to those corporations which held a majority of the shares of the total issued and outstanding voting stock of the subsidiary corporation. The latter corporation was no longer required to be engaged in an auxiliary business.

The most radical and far-reaching change in the Capital Tax Law in recent times was accomplished by the Act of May 16, 1935, P. L. 184, which repealed for two years the exemption previously granted to manufacturing corporations for a period of fifty years and to laundering companies and those engaged in the processing and curing of meats for shorter periods. By the terms of this act, which was not an independent and separate act, but an amendment to the Act of June 1, 1889, P. L. 420, foreign corporations, joint-stock associations and limited partnerships were relieved from the Capital Stock Tax and were made liable to a new Franchise Tax Act, intended to enable the Commonwealth to get a more equitable tax from such companies. Under the Capital Stock Tax Law these corporations escaped tax altogether on the portion of their capital stock represented by intangibles as they had as their tax situs the domicile of the corporations regardless of which the physical evidences of their existence might be located. Foreign distilling corporations, joint stock associations and limited partnerships were still taxable under the Act of July 15, 1897, P. L. 292, regardless of this amendment of 1935.

The proponents of the changes of 1935 cited the need of greater revenues to carry the relief burden caused by the wide-spread unemployment. In the belief that this condition was temporary the repeal of the manufacturing exemption was enacted for a period of two years. The substitution of the Franchise Tax for the Capital Stock Tax as to foreign corporations, however, was made permanent. It had been the judgment of tax authorities in the fiscal departments for some years that such corporations were escaping their just share of taxation under the Capital Stock Tax law.

There was little opposition to the amendments in the House. In the Senate they were limited to a two year period. A proposed amendment was introduced to eventually repeal the capital stock tax by gradually reducing the rate—3 mills for years 1936 and 1937 (on reports filed in the years 1937 and 1938); one mill for 1938 and 1939 (on reports filed in the years 1939 and 1940); and no tax for 1940 and succeeding years. It was defeated. A motion to give parties interested in the amendments a chance to appear at a public hearing was defeated presumably on grounds that passage of the bill was necessary without further delay to provide the State's share of relief funds insisted upon by Federal officials in Washington. Opposition to the bill was based upon the claim it would increase unemployment, delay a return to normalcy and place an unnecessary burden on manufacturing corporations of the State. The prosperity of the State during the past 40 years was cited and attributed to a wise system of taxation. Under it Pennsylvania became the greatest manufacturing state in the union. The effect of the bill in causing loss of industries to Beaver County in particular was mentioned. Passed and sent to House for Concurrence in amendments. Passed House. Signed by Governor and became law.

The Act of April 8, 1937, made permanent the repeal of the manufacturing exemption. This act also exempted non-profit corporations which had been previously exempted as first class corporations under the Act of May 4, 1927, P. L. 742. Under the Corporation Code of 1933 this classification was substituted for the old first class corporation type.

Legislative History Personal Property Tax

Date of Act	Principal Changes from Prior Act	Rate
3-25-1831 P. L. 206		1 mill
6-11-1840 P. L. 612	Omitted ground rents Added securities of other states, furniture, etc.	On intangibles; ½ mill for each % of div. or int.
7-27-1842 P. L. 444	Actual value of securities used	2 mills
4-29-1844 P. L. 486	Added horses, mules, etc. ..... Added bonds, etc. of counties ..	Varied On intangibles, 3 mills
4-16-1845 P. L. 532	Added State of Pa. bonds, etc.	Varied; On State bonds ½ mill for each % of int.
4-22-1846 P. L. 486	Added vehicles	Varied; On vehicles, 3 mills
3-15-1847 P. L. 396	Exempted book accts. for goods sold or work done	Varied
5-18-1857 P. L. 571	Rate changed	On intangibles, 2½ mills
1-3-1868 and 4-4-1868	Expressly exempted corporations and all mtgs. etc. from all taxes except for State purposes	Varied
6-2-1871 P. L. 281	Exempted salaries, etc.	Varied
3-21-1873	Exempted horses, mules, etc. .	Varied
4-9-1873 P. L. 68	Exempted municipal securities	Varied
6-7-1879 P. L. 112	Reclassified personal property of Act of 1844	4 mills
6-10-1881 P. L. 99	Repealed & reenacted Act of 1879; simplified & clarified it .	4 mills
6-30-1885 P. L. 193	Enumerated clearly classes of per. prop. subject to tax—attempted to set this tax apart from loans tax	3 mills
5-1-1887 P. L. 114	Repealed tax on furniture, watches, pleasure carriages ..	3 mills
6-1-1889 P. L. 420	1/3 tax returned to counties ..	3 mills
6-8-1891 P. L. 229	3/4 of tax returned to counties	4 mills
5-1-1909 P. L. 298	Exempted B. & L. Assos. and savings institutions without C. S.	4 mills
5-11-1911 P. L. 265	Exempted fire companies, labor unions, beneficials, etc.	4 mills
6-17-1913 P. L. 507	Tax became a county tax as to entire revenue realized	4 mills
7-15-1919 P. L. 955	Taxes only personal property not subject to Sec. 17 of 1913 Act	4 mills
7-11-1923 P. L. 1038	Assumpsit provided as additional means of collection;	4 mills
5-31-1923 P. L. 474	Reassessment allowed in case of false returns	
5-13-1927 P. L. 985	Allowed to go back 5 yrs. where no returns or incorrect returns filed	4 mills
4-30-1929 P. L. 871	Exempted personal property from outside Pa. held in trust by	
5-2-1929 P. L. 509	resident for benefit of non-residents and securities of brokers for trading	4 mills
6-12-1931 P. L. 544	Reenacted Acts of 1923 and 1927 correcting defective titles	4 mills
4-21-1933 P. L. 54	Exempted bank accounts bearing interest	4 mills

Personal Property Tax—Continued

Date of Act	Principal Changes from Prior Act	Rate
6-22-1935 P. L. 414	New State personal property tax Act—not an amendment to prior acts	1 mill
7-17-1936 P. L. 51	Added equitable interests with nonresident trustees	4 mills
5-18-1937 P. L. 633	Added ground rents; exempted stages, cabs & other vehicles and B. & L. Assos.	4 mills
5-5-1939 P. L. 76	Exempted ground rents and personalty held by resident executor of nonresident decedent	4 mills
6-19-1939 P. L. 413	Amended Act of 1913—personalty held by resident exec. of nonresident decedent exempted	4 mills

Receipts from State Personal Property Tax 1936-1939 (inclusive)

Year Ended	Tax	Rate
5-31-1939	$12,095,284	4 mills
5-31-1938	11,919,750	4 mills
5-31-1937*	17,794,517	see note
5-31-1936**	518,787	1 mill

* Rate: 1 mill June 1, 1936 to Dec. 31, 1936
4 mills Jan. 1, 1937 to May 31, 1937
** 5-month period

Originally this tax was a state tax and continued so until passage of the Act of June 17, 1913, P. L. 507, even though prior thereto a portion of the tax was returned to the county. Beginning with the Act of 1913, however, the tax became a county tax and has remained so.

By the Act of June 22, 1935, P. L. 414, entitled the "State Personal Property Tax Act" the Legislature imposed, for a two year period, tax of one mill for state purposes upon the same classes of property as had heretofore been taxable only for county and city and county purposes under Section 1 of the Act of 1913. This State tax was increased to four mills by the Act of July 17, 1936, P. L. 51, and extended for another four years, that is, for the years 1938 to 1941 inclusive by the Acts of May 18, 1937, P. L. 633, and May 5, 1939, P. L. 76. Technically, therefore, there are at present in force a local and a state personal property tax each with a rate of four mills and each imposed upon the same classes of personal property but imposed and collected by different taxing authorities. For all practical purposes, however, we have a tax on personal property at the rate of eight mills per annum.

The first act imposing the tax was that of May 25, 1831, P. L. 206, which provided that the following classes of personal property should be subject to taxation for state purposes at the rate of "one mill on every dollar thereof, to be assessed in the same manner as county rates and levies," viz: ground-rents, moneys at interest, debts due from insolvent debtors, whether by promissory note (except bank notes), penal or single bill, bond, judgment, mortgage, and stock in corporations (wherein shares have been subscribed in money) on which dividend or profit is received by the holder, and public stock (except those issued by this Commonwealth), and all pleasure carriages, kept for use. By an express provision in the Act it was to remain in force for five years from the date thereof. Eastman in his work on taxation in Pennsylvania says that the reason for this limit was the general belief that the earnings of the great public works then in course of construction such as canals, railroads, etc., would, by the expiration of that time, defray all expenses of the State Government and make further imposition of the tax unnecessary. This Act was repealed by the Act of February 18, 1936, P. L. 36 just before the expiration of the limit fixed in the 1831 act. From 1836 to 1840 there was no state tax on personal property.

The Act of June 11, 1840, P. L. 612, again imposed a state personal property tax. All taxable personalty contained in the Act of 1831 was included in the 1840 Act except ground-rents and in addition tax was imposed on loans or investments on interest to citizens of other states, securities of other states, public loans or stocks (except those issued by this Commonwealth), household furniture (including gold or silver plate of a value exceeding $300) and watches. Bank notes and notes or bills given for goods sold were excepted.

By the Act of July 27, 1842, P. L. 444, the rate of tax for the use of the Commonwealth was increased by one mill. This Act required the actual value of stocks, mortgages and other securities to be used in assessing the tax. The next Act including personal property tax is that of April 29, 1844, P. L. 486. Section 32 of this Act provided for the imposition of the tax on various classes of personal property included in the prior Acts and in addition horses, mares, geldings, mules and meat cattle over the age of four years were made subject to the tax. The Act of March 21, 1873, P. L. 46, repealed this latter provision, however. It likewise included salaries and offices, posts of profit, professions, trades and occupations except that of farmers. As was said by one of the State Supreme Court Justices, in a case deciding that stock of national banks was taxable for state purposes in the hands of the stockholders under the Act, its purpose was to tax money in every form of investment. The rates of tax under this Act varied, that on intangibles being three mills although for the year 1844 only it was set at four mills. Section 42 of this Act assessed the tax on script, bond or certificate of indebtedness issued by a county, city district and borough. This type of personal property continued to be taxed under this Act until passage of the Act of June 1, 1889, P. L. 420.

The Act of April 16, 1845, P. L. 532, provided for the taxation of all public loans and stocks issued by the Commonwealth of Pennsylvania. Such intangibles had been exempt up to this time. The rate provided was one-half mill on each dollar of the value thereof, on which one per cent per annum of interest shall accrue to the holder, and an additional one-half mill for every additional one per cent of interest. This tax was to be withheld by the State Treasurer when he paid interest to the holder.

Under the provisions of the Act of April 22, 1846, P. L. 486 all vehicles used to transport passengers for hire, all annuities over $200 except those granted by Pennsylvania or the United States, and all property, real or personal—not taxed under existing laws—held, owned, used or invested by any person, company, or corporation, in trust for the use, benefit or advantage of another person, company or corporation, except that held in trust for religious

purposes, were assessed a tax of three mills on the value thereof, In interpreting the Act of 1846, the Act of March 15, 1847, P. L. 396, provides that said act "shall not be so construed as to impose a tax on the running or book accounts of merchants or others, for goods sold or work done."

The Act of April 25, 1850, P. L. 572, exempted from any taxes levied for borough and township purposes all moneys owing by solvent debtors "liable to be assessed and taxed for any purpose."

The rate of the personal property tax imposed by the Act of April 29, 1844, was reduced from three to two and one-half mills by the Act of May 18, 1857, P. L. 571.

Mortgages, recognizances, and moneys owing upon articles of agreement for the sale of real estate were subject to both local and State taxation by the Act of 1844. By the Act of April 4, 1868, these subjects, except those given by corporations, were restricted to taxes for State purposes in certain named counties. These provisions were extended to additional counties by the Acts of March 18, 1869, P. L. 415; April 10, 1869, P. L. 850; April 13, 1869, P. L. 901; February 12, 1870 P. L. 144; and March 1, 1870, P. L. 278.

The State tax imposed by Act of 1844, on salaries or emoluments of public offices and on incomes of tradesmen, occupations and professions was repealed by the Act of June 2, 1871, P. L. 281.

Municipal securities exempted from the State tax by prior acts were made taxable by the Act of April 9, 1873, P. L. 68. The Act contained a proviso that it should "not apply to any bonds negotiated into the hands of innocent holders."

The Act of March 24, 1877, P. L. 44, provided: "The Script, bonds and certificates of indebtedness in any County of this Commonwealth, owned by any public corporation within such county, and the income from which is by law appropriated exclusively to the support of the poor and the maintenance of the public roads of such county, be and the same are hereby exempted from taxation for State purposes."

The Act of June 7, 1879, P. L. 112, in Section 17, was the first to bring together the different subjects made taxable by the Act of 1844 and subsequent acts and to provide a general measure applicable to all such classes of personal property. The rate was increased from three to four mills. Personal property was taxable only when held by "any person or persons" construed by the courts to exclude corporations. Trust funds were not taxed and mortgages, judgments, etc., were exempt from all taxation for state purposes.

The Act of June 10, 1881, P. L. 99, repealed Section 17 of the Act of 1879 and reenacted it in another form; that is by using practically the same language but arranging it in a less confused, more convenient and more logical way.

The Act of June 30, 1885, P. L. 193, codified and reenacted with some modifications all previous acts. It reduced the rate to three mills. Section 1 was a reenactment of Section 1 of the 1881 Act. It imposed the personal property tax, enumerating the property liable to the tax and exempting therefrom interest-bearing agreements and accounts for work and labor done, obligations to banks for loans, bank notes and loans or stock issued by Pennsylvania or the United States. All taxable subjects included by its provisions were exempted from all taxation except for state purposes and building and loan associations were expressly exempted from its application. In order to prevent double taxation it provided "the taxable person shall not include in said return obligations of public or private corporations, the tax upon which is required by law to be collected from the holder of such obligations and paid into the State Treasury by the corporation. The Act of 1885 was passed to correct the confusion which followed the Supreme Court decision in the case of Com. v. Lehigh Valley R. R. Co., 104 Pa. 90. The Court held under the Acts of 1879 and 1881 "it was the duty of the local assessors in making the general assessment . . . to value and assess corporate bonds, wherever found, in the hands of resident owners." Under this line of reasoning it was presumed the local assessors had included the bonds of corporations held by resident owners—and collected the State tax on such bonds and the corporation, being only a collector could not be charged with duty of collecting the tax a second time. This was in spite of the provisions of Section 17 of the 1879 Act that corporations were required to deduct the tax when paying interest to holders of taxable loans for state purposes and the Act of 1881 that they were required to deduct the tax from the interest on loans whether secured by bond, mortgage, recognizance or otherwise.

All taxes on watches, household furniture, and pleasure carriages for whatever purpose were removed by the Act of May 1, 1887, P. L. 114.

The Act of June 1, 1889, P. L. 420, amended the Act of 1879 and imposed tax on 1. personal property, 2. corporate loans, 3. capital stock, and 4. gross receipts. Section 1 in substantially the same language reenacted Section 1 of the 1885 Act which had replaced Section 17 of the Act of 1879 but added to taxables "any joint-stock company or association, limited partnership, bank or corporation, whatsoever." This was done for the purpose of including companies that might have mortgages or other assets not properly part of their capital stock but investments of reserve fund or surplus, which would not be reached by the capital stock tax. Also there were companies without capital stock which had mortgages, etc. The rate of the tax was continued at three mills. Section 16 of this Act provided that one-third of the personal property tax should be returned to the counties.

The Act of June 8, 1891, P. L. 229, amended the Act of 1879 and again increased the rate from three to four mills. It also returned to the counties three-fourths of the personal property tax to the counties instead of one-third as provided by the Act of 1889.

The Act of May 1, 1909, P. L. 298, exempted from the personal property tax building and loan associations or savings institutions without capital stock. It also provided that if any person or corporation agreed to issue securities free and clear of the four mill tax, or agree to pay the same, nothing in the act should be construed so as to relieve him, it or them from paying the said tax on any of such securities held or owned by or owing to such savings institutions without capital stock.

The Act of May 11, 1911, P. L. 265, amended the Act of 1879 by exempting from its provisions, "fire companies,

firemens relief associations, secret and beneficial societies, labor unions and labor union relief associations, etc.

The basis of the present so-called "four mills tax" for county purposes is the Act of June 17, 1913, P. L. 507. This Act gave the entire personal property tax to the counties both as to the tax collected and as to the work of levying and collecting it. The first sixteen sections of the act deal with the classes of property taxable and the taxpayers subject to the tax, and the machinery for assessment and collection thereof. Section 17 pertains to the corporate loans tax. Considerable confusion followed the enactment of this Act because of the fact the language of Sections 1 and 17 overlapped. Both taxed the same property. The confusion was increased by two Supreme Court decisions in the cases of Com. v. Lehigh and New England R. R. Co., 268 Pa. 271 and Com. v. Roxford Knitting Co., 268 Pa. 266.

The Act of July 15, 1919, P. L. 955, amending the Act of 1913 at least partly cleared up the confusion by defining that all script, bonds, certificates and evidences of indebtedness made taxable under Section 17 (the Loans Tax section) are not taxable under Section 1 (personal property tax section) of the Act of 1913 and that only evidences of indebtedness that cannot be made taxable under Section 17 are to be taxed under Section 1.

The Act of July 11, 1923, P. L. 1038, provided the additional remedy of the action of assumpsit against the owner or owners of personal property subject to the four mills tax, to first and second class cities before a magistrate, justice of the peace or court of record depending upon amount involved. Another act passed in the same year, that of May 31, 1923, P. L. 474, provided for collection by the county of any additional tax found owing where the assessor had made a return and the county commissioners added a penalty or failed to add one. It also allowed a reassessment where "in every case" a false return had been made for any former year or years.

The Act of May 13, 1927, P. L. 985, provided in a case where an incomplete return was made by an assessor or no return by him because of refusal or failure on part of taxable (including a corporation—not in prior act) there was no estoppel against county or city for assessment and collection from the taxable or estate of decedent so failing or refusing to pay tax due or additional tax due. It was duty of officers to assess or reassess any such personal property for any prior years not exceeding five and collect tax or balance thereof with interest at 6%. Executors and administrators required to file an affidavit in duplicate at time of filing with Register or Orphans Court Clerk inventory and appraisal or affidavit of real and personal property, giving items listed in such inventory or affidavit which may be liable to tax during last complete taxing period. Officers required to send a copy to county commissioners or board of revisions of taxes.

Act of April 30, 1929, P. L. 871, amended Section 1 of Act of 1913 and provided "That the provisions of this section shall not apply to personal property of the class hereinabove enumerated, hereafter received from any person or persons, co-partnership or unincorporated association or company, non-resident in, or not located within the Commonwealth, or from any joint stock company or association, limited partnership, bank or corporation formed, erected or incorporated by, under, or in pursuance of any law of the United States or of any state or government other than this Commonwealth, and not doing business in this Commonwealth, by any person or persons, corporation, union corporated association, company, joint stock company or association, ... as active trustee, agent .... for the use, benefit or advantage of any person .... non-resident in or not located within this Commonwealth or for use .... of any joint stock company formed .... any law of U. S. or any state other than this Commonwealth, and not doing business in this Commonwealth."

Act of May 2, 1929, P. L. 1509, amended Section 1 of Act of 1913 by providing the Section shall not apply to . . . . "nor to loans, shares of stock and other securities held by bankers or brokers solely for trading purposes nor to accounts or debit balances owing by customers of bankers or brokers in the usual course of business."

Act of June 12, 1931, P. L. 544, reenacted with corrected title the Acts of May 31, 1923, P. L. 474, and May 13, 1927, P. L. 985, which the Northampton Co. Common Pleas Court had declared unconstitutional because of defective titles. These later acts had amended Section 5 of Act of 1913.

Act of April 21, 1933, P. L. 54, added to list of exemptions by providing the tax did not apply to interest bearing accounts in any bank or banking institution, savings institution or trust company.

The Act of June 22, 1935, P. L. 414, as mentioned above was an entirely new act. Section 1 was similar in its provisions to corresponding section of Act of June 17, 1913, P. L. 507, and its supplements. The rate was one mill. Returns were to be made to Department of Revenue and tax paid thereto. Act of 1913 was not repealed. The tax is a state tax and is additional to the four mill tax. Effective for calendar years 1936 and 1937 as to personal property tax.

Act of July 17, 1936, P. L. 51, amended Act of 1935 to include equitable interests in property held by non-resident trustees, etc., and to broaden scope of the exemption in favor of shares of stock subject to the capital stock tax by inserting the words "bank and trust company, national banking association, savings institution, building and loan association" between word "Bank and corporation" in the seventh paragraph. Rate increased to four mills and administration of tax was revised. Returns now due February 15 and tax made selfassessing due when return was due. Department can make reassessment in case of erroneous returns or in correct computation of tax. Duplicate returns required, one copy being sent by Revenue Department to County Commissioners. Taxable value of personal property is "actual" value.

Act of May 18, 1937, P. L. 633, amending Act of 1935 made ground rents taxable, deleted shares of stock in building and loan associations, and stages, omnibuses, hacks, cabs and other vehicles formerly included in taxable list. The principal value of all annuities was substituted for "all annuities yielding over $200." Section 3 provided the act shall not apply to "personal property held for use .... of any resident who shall have in each of preceding ten calendar years, given or contributed all of his net income to any corporation organized or operated exclusively for religious, charitable, scientific, literary or educational purposes."

Act of June 19, 1939, P. L. 413, amending Act of June 17, 1913, P. L. 507, defined, clarified and limited certain exemptions imposed tax on value of certain equitable interest, personal property held or possessed by certain executors, administrators or fiduciaries and by employees, thrift or saving association, personal property held by trustees for religious, charitable, etc., for non-resident and foreign corporations. Section 1 exempts from taxables resident as executor, etc., of a non-resident decedent, and trustee for resident or non-resident, charitable, religious, educational organization, no part of which inures to benefit of any stockholder or individual. Exempts from taxable property—"assets held in commercial department of bank, etc., and owned in own right, in liquidation. 2. Shares of stock of building and loan association to parallel state act. 3. Personal property held for use of resident who in ten preceding calendar years gave all his net income to charity, etc.

Provide measure of equitable interest.

Tax on personal property owned by decedent at time of death and held by executor or administrator to be paid to county of domicile notwithstanding residence of executor or administrator or beneficiary or place where security is kept. Personal property held, owned or possessed by trustee, etc., by two or more persons, etc., all of which are residents of Pennsylvania but not domiciled in same county return shall be made in each county where any of same are domiciled and apportioned according to number of trustees in each county bears the total number thereof notwithstanding domicile of beneficiary or place where such personal property is kept.

Act of May 5, 1939, P. L. 76, amended Act of June 22, 1935, P. L. 414, the State Personal Property Act by deleting ground rents from list of taxables and excepting personal property held by an executor, etc., of a non-resident decedent or by a trustee for a religious, etc., organization.

Transfer Inheritance and Estate Tax

The first inheritance tax imposed by the Commonwealth of Pennsylvania was the tax on collateral inheritances. The Act of April 27, 1826, P. L. 227 which provided for such tax was the first passed by any of the American Commonwealths. In the intervening years other states followed Pennsylvania's example so that in 1938 every state in the Union except Nevada had an inheritance tax. In that year Pennsylvania's tax amounted to $2.80 for each man, woman and child in the State[1] and in 1930 to $0.96 for each $1000 of capital in the Commonwealth.[2]

No attempt was made to impose a tax upon estates of decedents passing to lineal heirs until the passage of the Act of May 12, 1897, P. L. 56. This act was held unconstitutional as will appear below, principally because of the provisions therein exempting estates under $5000 from the operation of the tax. No further attempt was made to tax direct inheritances until the Act of July 11, 1917, P. L. 832, which imposed such a tax at the rate of 2% with no exemption from the operation of the act.

From 1917 to 1919 there were in force a tax of 5 per cent on collateral inheritances under the Act of May 6, 1887, P. L. 79 and its amendments and a tax of 2% on direct inheritances under the Act of July 11, 1917, P. L. 832. The Act of 1919, P. L. 521, repealed both of these acts and provided for the present Transfer Tax, which is in fact a succession tax, with a rate of 5% on property passing to collaterals, which was changed to 10% by the Act of May 4, 1921, P. L. 165, and 2% on property passing to non-collaterals.

The collateral inheritance tax according to a very early case "is not to be viewed as a tax assessed upon the estate of the decedent or of any one, but a restriction upon the right of acquisition by those, who, under the law regulating the transmission of property, are entitled to take as beneficiaries without consideration. The state is made one of the beneficiaries. It lays its hands upon estates under such circumstances and claims a share, and whether the same is exacted as a tax or duty or whatever else . . . it is of no consequence.[3]" "The tax does not attach to the very articles of property of which the deceased died possessed . . . It is on the net succession to the benficiaries, and not on the securities in which the estate of the decedent was invested."[4]

According to another decision, it is "not a tax on the property or money bequeathed, but a diminution of the amount that otherwise would pass under the will or other conveyance, and hence that which the legatee really received is not taxed at all."[5]

In a later case the lower court said "Though called a tax or duty, it has been uniformly held that the toll of the state is in the nature of a bonus for upholding the right of succession or acquisition and that an estate so 'passing,' as provided in the original or supplementary acts, is to be distinguished from the property comprising such estate, or the purposes for which such property is to be used."[6]

The tax is imposed upon the transfer of any property real or personal, or of any interest therein, or income therefrom, except real property and tangible personality, without the state.[7]

The first section of the Act of April 7, 1826, P. L. 227 imposed the tax at the rate of 2½%. Estates of less than $250 were exempt. Section 2 provided that payment of the tax to be made to the County Treasurer by whom duplicates were to be given, of which one the executor or administrator was to lodge with the register of wills for

transmission to Auditor General. The third section requires the county Commissioners to have the real estate assessed by the local assessors.

The Act of February 24, 1834, P. L. 70, section 69, provided for the refunding of the tax where by reason of subsequent discovery of claims against the estate, the legacy or distributive share has been reduced or altogether taken away.

Under the Act of March 22, 1841, P. L. 99, registers of wills were required to issue citations to executors and administrators of estates subject to tax, who failed to file accounts within a year; registers received the tax after being bonded.

The Act of March 17, 1842, P. L. 95, construed the Act of 1841 as requiring the register to collect the tax upon all real estate subject thereto.

Under section 3 of the Act of May 6, 1844, P. L. 565, credit for payment of collateral inheritance tax should not be allowed an executor or administrator unless vouched for by receipt of register countersigned by Auditor General.

The Act of April 16, 1846, P. L. 358, made it a duty of the assessors of the townships, boroughs, wards, etc., when required by the Commissioners or register to make a valuation and return of any property designated to them as liable to the tax.

The Act of April 22, 1846, P. L. 483, required the publication by commissioners of accounts of registers for collateral inheritance tax as settled by county auditors.

Under another act of the same year, that of April 22, 1846, P. L. 489, the rate of the tax was increased from 2½% to 5%.

Under section 11 of the Act of April 10, 1846, P. L. 571, property passing to a wife or widow of a son of a decedent shall not be subject to the tax. It was held, however, a legacy to the widow of the son of the testator, remarried in the testator's lifetime, her second husband being alive at the time of the testator's death was taxable.[8] Section 13 required payment of the tax upon estates in remainder, after life estates not subject to tax, immediately. Real estate and personalty of persons not domiciled in the Commonwealth were made subject to tax. Section 14 imposed a penalty of 12% on taxes not paid in year and allowed a deduction of 5% on taxes paid in three months.

Sec. 1 of Act of March 11, 1850, P. L. 170 provided that the tax on estates in remainder need not be paid until tenant in remainder came into actual possession, security for the tax with interest at 6% being given in the meantime. Section 3 provided for tax upon estates of persons domiciled in the state and construed the Act of 1826.

The Act of May 15, 1850, P. L. 772, section 1, provided the Act of April 10, 1849, P. L. 571, should not apply to estates of decedents dying prior to its passage.

Under Act of May 4, 1855, P. L. 425, no penalty was to be imposed where the settlement of the estate was prevented by litigation or other unavoidable cause and the rate of interest was not to exceed that realized by the estate. This act also made it a misdemeanor for an appraiser to take a fee from an executor or administrator.

The Act of June 12, 1878, P. L. 206, authorized the State Treasurer to refund a collateral inheritance tax paid in error within two years of such erroneous payment.

[8] Com. v. Powell, 51 Pa. 438 (1866).

The next act affecting the collateral inheritance tax is that of May 6, 1887, P. L. 79, which is chiefly a compilation and re-enactment of former laws on the subject and does not subject to the tax other or different estates from those subject thereto under the provisions of the previous acts.[9]

Section 3 of this act provided, however, that interest on the tax should not run against persons entitled to estates in remainder until the right of possession accrues. There were a number of other changes in other sections, such as, right of appeal to Orphans Court from appraisal of State appraisers (Section 12); increased punishment for taking fees from executor or administrator by appraisers (Section 13); proceedings for collection of unpaid taxes to take place in Orphans Court instead of Common Pleas (Section 14); registers returns to be made 1st Mondays of April, July, October and January (Section 19); lien period to be 5 years instead of 20 years (Section 19).

The exemption of estates of less than $250.00 in the Act of 1887 would have been void for lack of uniformity in the operation of the tax, under Section 1, Article IX of the Constitution except for the fact that the Act of 1887 merely re-enacted a provision that existed in the Act of 1826.[10]

The rate of commission allowed registers of wills for collecting the collateral inheritance tax was changed to a graduated percentage, depending on the amount of tax collected, by the Act of May 14, 1891, P. L. 59.

The Act of June 26, 1895, P. L. 325, provided for the compensation of collateral inheritance tax appraisers appointed by registers of wills and the appointment and compensation of expert appraisers, when found necessary.

The next important act relating to the inheritance tax was that of May 12, 1897, P. L. 56, which imposed a direct inheritance tax. The tax was imposed on "personal property of whatsoever kind and nature which shall pass by will or by the intestate laws of this State, from any person who may die seized or possessed of same . . .: Provided, That personal property to the amount of five thousand dollars shall be exempt." The personalty was "subject to a tax of two dollars on every one hundred dollars of the clear value of such personal property, after deducting the debts of the decedent and costs of administration . . ." The act caused the tax to be imposed upon such portions of estates of persons theretofore deceased as has not actually been distributed and paid to persons entitled thereto prior to its passage as well as estates of persons who died thereafter. According to the proviso of Section 16 of the Act the intention was "to impose a direct inheritance tax upon all estates or parts of estates not subject to the act or acts providing for the collecting of collateral inheritance taxes." This act was held unconstitutional principally because of its exemption of estates under $5000.00 from the operation of the tax.[11]

The Act of March 22, 1899, P. L. 20, provided for the refund by the State Treasurer of collateral inheritance tax paid where it appears the estate is not subject to a collateral inheritance tax because of a discovery of lineal heirs. No time limit is mentioned.

The Act of March 25, 1901, P. L. 59, amends the Act of 1878 by allowing an extension of the 2 year period for application of refund of collateral inheritance tax paid

[9] Cooper v. Com. 127 Pa. 435 (1889).
[10] Cope's Estate, 191 Pa. 1 (1899).

in error under certain conditions, for instance, where the estate was in whole or part a partnership or involved in litigation and there is over-valuation of the portion of the estate on which tax was paid. The extended period is one year from the end of the litigation.

Under the Act of May 11, 1901, P. L. 173 the Auditor General is authorized and directed to issue to executors and administrators, who paid the direct inheritance tax under the Act of 1897, subsequently declared unconstitutional, refunding checks for the taxes paid.

Bequests and devices in trust, the income from which is for the care and preservation of family burial lots of the donors are exempted from the collateral inheritance tax by the Act of March 5, 1903, P. L. 12.

The Act of April 22, 1905, P. L. 258, amending Section 1 of the Act of May 6, 1887, exempted from the collateral inheritance tax estates "to or for the use of children of a former husband or wife."

Under the Act of May 5, 1911, P. L. 112, all estates "passing from any adopting parent . . . or any part of such estate or estates, . . . to or for the use of any legally adopted child or any legally adopted children,—shall not be subject to the collateral inheritance tax . . ."

The direct inheritance tax again appeared in the Act of July 11, 1917, P. L. 832. The tax was imposed at 2% upon the clear value of all estates "to or for the use of father, mother, husband, wife, children, lineal descendants born in lawful wedlock, children of a former husband or wife, or the wife or widow of the son, of a person dying seized or possessed thereof, or to legally adopted children." It also applied to an estate passing from a mother to an illegitimate child, his wife or widow or from the child to the mother. No estates were exempt from the operation of the act. Provisions for the administration of the law, similar to those provided in the collateral inheritance tax acts, were included.

This act was approved by the Governor but he states, in a memorandum attached to the act and made a part thereof, "with the greatest reluctance." He felt "constrained to do so solely because the necessities of the Commonwealth require the raising of additional revenue." It was evidently his opinion that the additional revenue necessary should have been raised by a tax upon coal, oil, natural gas and a one mill tax upon the capital stock of manufacturing corporations. Bills providing for such taxes passed the House by a large vote but were defeated in Senate Committees. He further recommended the people adopt in 1919 a Constitutional amendment permitting a graduated inheritance tax, resolution for which had passed the 1917 Legislative Assembly. It is stated in the memorandum "the approval of this bill is in its last analysis, based upon the fact that this Assembly has passed a resolution providing for an amendment to the Constitution which will correct the injustices of this measure."

This act was not retroactive and did not apply to persons dying before its passage.[12] The widow's exemption granted by the Act of June 7, 1917, P. L. 447, is not subject to the direct inheritance tax.[13]

The Act of June 20, 1919, P. L. 521, repealed both the collateral inheritance tax act of 1887, as amended, and the direct inheritance tax act of 1917 and provided for what is known as a "Transfer Tax." This tax is in fact a succession tax, imposed at the rate of 5% on the "clear value" of property passing to collateral heirs and at 2% on the "clear value" of property passing to direct heirs. In the language of the act the "tax shall be, and is hereby, imposed upon the transfer of any property, real or personal, or of any interest therein or income therefrom, in trust or otherwise, to persons or corporations" in the cases specified. The tax on transfers of future estates "shall not be payable, nor shall interest start to run thereon, until the person liable for the same shall come into actual possession of such estate." The tax "shall be assessed upon the value of the estate at the time the right of possession accrues to the owner but the owner may pay the tax at any time prior to his coming into possession. In such cases the tax shall be assessed on the value of the estate at the time of payment of the tax after deducting the value of the life-estate or estates for years."

In arriving at the "clear value" of property the only deductions allowable are debts of the decedent, reasonable and customary funeral expenses, including cost of tombstones, and expenses of administration.[14] Deduction was not allowed, however, on bequest for care of family burial lot, which provides that the balance is to go to the cemetery.[15]

The rate of tax on property passing to or for the use of collateral heirs, "bodies corporate or politic" was increased from 5% to 10% by the Act of May 4, 1921, P. L. 341.

The Act of May 17, 1921, P. L. 893, provided for the refund of transfer inheritance tax paid on property or estate of a supposed decedent, adjudged legally dead by a court of record, who later reappears and has court order rescinded. Application for such refund must be made within six months from such order of the court.

Under the Act of May 16, 1923, P. L. 244, additional deductions were allowed in arriving at the clear value of taxable estates. They were "the expenses of the burial of the decedent and the expenses of erecting at the grave of the decedent a suitable tombstone, monument or marker."

The Act of July 12, 1923, P. L. 1078, provides for the additional deductions noted in the paragraph immediately above in these words, "reasonable and customary funeral expenses, bequests or devises in trust, in reasonable amounts, the entire interest or income from which is to be perpetually applied to the care and preservation of the family burial lot or lots, their enclosures and structures erected thereon, reasonable expenses for the erection of monuments or gravestones, grave and lot markers." This act also outlines the necessary proceedings for collection on the failure of executor, etc. to file inventory or make payment of tax within time prescribed and the duties of register and Auditor General.

The daily compensation of inheritance tax appraisers actually engaged in making appraisement of property subject to the tax was increased by the Act of June 29, 1923, P. L. 932, amending the Act of June 20, 1919, P. L. 521.

The Act of May 15, 1925, P. L. 806, amended Section 2 of the Act of June 20, 1919, P. L. 521, which provided for the rates of the transfer tax, by adding to the phrase

[12] Gilmer's Estate, 26 D. R. 949 (1917).
[13] Hildebrand's Estate, 262 Pa. 112 (1918).
[14] Re Lines, 155 Pa. 378; Nead's Estate, 55 Pa. Super. 573; Mellor's Estate, 286 Pa. 149.
[15] Lefevre's Estate, 9 D. & C. 654.

"all taxes imposed by this act" the words "shall be imposed upon the clear value of the property subject to the tax and shall in each estate be equal to twenty-five per centum of the estate tax imposed upon the net estate of such decedent under the provisions of section 301 of the Revenue Act of 1924 of the United States, but if said section of said Revenue Act is repealed or if no tax is imposed upon such estate by said section of said act or if 25 per centum of the tax imposed by said section amounts to less than the following rates, then in either event the taxes imposed by this act "shall be at the rate of 2% for direct descendents and at the rate of 10% for collateral descendents.

In order for the Commonwealth to receive the benefit of the Federal Act of 1926 or similar legislation which grants a credit on the Federal estate tax for inheritance taxes and transfer inheritance taxes paid to the state governments, the Act of May 7, 1927, P. L. 859, was passed.[16] This act provided for additional transfer taxes for State purposes in the following cases, viz:

> "Whenever in any estate the total tax paid or payable to the Commonwealth and any other states or territory, at the rates fixed under the inheritance tax law, shall be less than the total credit allowed by the Federal law for taxes paid to the states, then the tax imposed by this act upon the transfer of such property shall be an amount equal to the difference between the total credit, allowable by the Federal law for taxes payable to the State governments and the total taxes actually paid or payable to the Commonwealth and any other state or territory under the inheritance tax laws, and the portion of the increased tax, so imposed, which shall be chargeable to each of the respective beneficiaries shall be ascertained by multiplying the total amount of such increase in tax by a fraction, the numerator of which shall be the amount actually paid or payable by the respective beneficiary to the Commonwealth and any other state or territory under the said inheritance tax laws and the denominator of which shall be the total taxes paid by all beneficiaries to the Commonwealth and any other state or territory under said inheritance tax laws."

Under the Act of March 28, 1929, P. L. 118, amending the Act of 1919, the proceeds of life insurance policies, payable otherwise than to the estate of the insured, were exempted from the transfer inheritance tax. Under prior acts it had been held that proceeds of insurance are taxable when made payable to the estate but not taxable when payable to a named beneficiary.[17] Proceeds of an adjusted service certificate of the United States are not subject to inheritance tax, although made payable to the estate.[18]

Where a deed of trust of life insurance policies names no beneficiaries of the trust but provides that the principal shall be distributed in accordance with the terms of the settlor's will, and reserves to the settlor the right to revoke or alter the trust, to withdraw property from it and add to it, and to receive all dividends and other cash distributions on account of the policies named in the trust, the proceeds of such policies are subject to the transfer inheritance tax.[19]

Sections 724, 725 and 726 of the Fiscal Code, the Act of April 9, 1929, P. L. 343, provided respectively for monthly statements by registers, returns by transferees of future interest in non-resident decedent's estate, and notice of property in Pennsylvania passing from a non-resident decedent to be filed with the newly created Department of Revenue. Sections 1201 and 1202 provided for the exercise of certain powers and the performance of certain duties in reference to the collection of tax on transfers of resident and nonresident decedents, theretofore exercised and performed by the Auditor General.

The Act of May 2, 1929, P. L. 1258, provided the transfer inheritance tax shall not be payable in the case of personal property (except tangible personal property having an actual situs in this Commonwealth), if the state of which the transferor was a resident, reciprocated in not taxing similar property therein of Pennsylvania residents.

The Act of May 8, 1929, P. L. 1673, appropriated the sum of $1200 to the Board of Finance and Revenue for the purpose of refunding any transfer inheritance tax paid on the proceeds of a Federal War Risk Insurance Policy on the life of a decedent.

The Act of May 16, 1929, P. L. 1782, expressly named the additional taxes, imposed by the Act of May 7, 1927, P. L. 859, "estate taxes." The act also required a copy of the executor's return with the Federal Government to be filed with the register of wills of the proper county.

Under the Act of May 16, 1929, P. L. 1795, amending Section 1 of Act of 1919 as amended, transfers of property made one year prior to the death of the grantor, etc. without adequate valuable consideration are to be considered as having been made in contemplation of death, "unless shown to the contrary" and therefore taxable.

The act does not apply to gifts which were fully executed before its passage.[20] A specific sum of money payable to the wife of a decedent from his estate under an antenuptial agreement, is not subject to the tax.[21]

Under the collateral inheritance tax act of 1887 it was held the right of the Commonwealth to collect the tax was not defeated by a conveyance or transfer of title to property during the lifetime of the owner nor by possession taken under such conveyance if the enjoyment of the property conveyed is not intended to take effect until the death of the grantor.[22]

This act also provides for the portion of property held jointly, except as tenants by the entirety, owned by decedent to be subject to transfer inheritance tax in hands of survivor. It was held under this act that property held in joint names, or a joint bank account where the transaction was consummated or the joint bank account created prior to passage of the act, is not subject to the tax.[23]

Amending the Act of May 16, 1929, P. L. 1782 the Act of May 12, 1931, P. L. 114 required a copy of any communication from the Federal Government making any final change in the return for Federal estate tax pur-

poses, to be filed with the register of wills of the proper county.

Manuscripts, specimens of natural history, or other scientific collections are added to those articles, passing to any municipality etc. for the sole use of the public by way of free exhibition within the state, exempt from any collateral inheritance tax by the Act of June 12, 1931, P. L. 553, amending Section 1 of the Act of July 9, 1919, P. L. 794.

As to shares of capital stock of a corporation incorporated in more than one state, including Pennsylvania, only that portion of the value of such shares shall be deemed, for inheritance tax purposes, as property of a non-resident decedent within Pennsylvania as the value of the property of such corporation located within Pennsylvania bears to the entire value of the property according to the Act of June 22, 1931, P. L. 640, amending section 32 of the Act of June 20, 1919, P. L. 521, as amended.

The Act of June 22, 1931, P. L. 689 amending section 13 of the Act of 1919, limited the objections to the appraisement of property of a resident decedent in an appeal filed with the Orphans' Court to those objections specified in the appeal.

The title of the Act of June 20, 1919, P. L. 521, was amended by the Act of June 22, 1931, P. L. 690, by including notice in the title that said act taxes transfers made in contemplation of death. This act also required banks to notify Department of Revenue of the death of one of joint tenants, except husband and wife as tenants by entireties, owning personal property deposited in such banks in joint names. Where deposits are made in a bank by husband payable to himself or wife or to himself and wife the account is held "by entireties" and the legal ownership thereof vests in the survivor.[24]

The Act of 1931 is a valid exercise of legislative power.[25]

The Act of May 22, 1933, P. L. 839, provided for reciprocal relations in respect to death duties in taxation of estates of non-resident decedents.

Provision is made for payment of estate taxes, whether decedent is a resident or non-resident of the Commonwealth, under protest where Federal Government asserts deficiency tax by the Act of July 15, 1935, P. L. 1026 amending the Act of May 7, 1927, P. L. 859.

By the Act of July 15, 1935, P. L. 1028 amending the Act of 1919 as amended, in appeal to the orphans' court from an appraisement of the property of a resident decedent, permission is given to pay the full amount of tax assessed without prejudice to file and prosecute the appeal.

Similar provision in the case of non-resident decedents is made by the Act of July 15, 1935, P. L. 1031, amending the Fiscal Code, the Act of April 9, 1929, P. L. 343.

The Act of June 4, 1937, P. L. 1597, amends section 21 of the Act of June 20, 1919, P. L. 521, by limiting the total commissions due registers of wills for collection of transfer inheritance tax in the case of resident decedents to $10,000 per year.

By the Act of June 5, 1937, P. L. 1701, amending the Act of July 20, 1917, P. L. 1143, "all gifts, devises . . . to a national library . . . shall be free from collateral inheritance tax."

An apportionment of estate tax was provided for in certain cases by the Act of July 2, 1937, P. L. 2762, amending the Act of June 7, 1917, P. L. 447.

The Act of June 21, 1939, P. L. 619, amending section 3 of the Act of 1919, provided for the release of lien on remainder interests in real property in the case of sale and conveyance or mortgage, if fiduciary shall enter into security for the payment of the tax to the satisfaction of the Revenue Department. Assessments of inhreitance tax against previously mortgaged property do not disturb the lien of the mortgage; the inheritance tax assessment is only a charge upon the equity of redemption which belonged to the deceased owner.[26]

Supplemental appraisements are provided for by the Act of June 24, 1939, P. L. 721, amending the Act of 1919 as amended. Prior to this act it had been held that where a final appraisement had been made for the purpose of assessing the inheritance tax, a second appraisement is without authority in law.[27] Deductions for debts are further restricted.

The exemption from the collateral inheritance tax of works of art for free exhibition was extended to funds given in connection therewith by the Act of June 24, 1939, P. L. 724, amending the Act of 1919, as amended.

The Act of June 24, 1939, P. L. 725, amending the Act of May 7, 1927, P. L. 859, as amended, imposed interest and penalties upon estate taxes not paid as specified time.

Legislative History

Shares Tax, National and State Banks and Savings Institutions

Summary

Date of Act	Principal Changes from Prior Act	Rate
5-21-1814 P. L. 154		6% (of dividends)

* Emergency Shares Tax of 3 mills not included.

Tax on Shares

National and State Banks and Savings Institutions

The Pennsylvania State Tax imposed on National and State Banks and Savings Institutions has been primarily a tax on the shareholders of such institutions instead of the institutions themselves. This was true prior to the Act of 1897, except as to the capital stock tax of those early years when banks were required to pay a capital stock tax. It was also true under the Act of 1897 and its amendments. As to national banks the Commonwealth is without power to levy a tax upon their capital.[1] It has, however, the power to levy a tax upon the property of its citizens and can do so notwithstanding that this property may exist in the form of shares of stock in national banks.[1] In that it is not a tax on the corporation, the tax on bank shares is similar to the corporate loans tax.

National banks which are given fiduciary powers by the Federal Reserve Board and State banks given like powers by the Act of 1919, P. L. 1032, are not taxable as trust companies under the Act of 1907, but as banks under the Act of 1897.[2] It has been held that a savings bank having power to "accept the appointment of certain trusts," where the business done under such authority was incidental to its savings bank business and less than 2% of its receipts from all business is taxable as a savings bank rather than a trust company.[3]

Banks were the first class of corporations selected for taxation in Pennsylvania. The first act imposing a tax upon banks as a distinct class is that of May 21, 1814, P. L. 154. Section 10 of this act imposed a tax of 6% on the whole amount of dividends declared. The act further provided, "if the said bank shall, at any time, be exempted from the payment of tax or duty to the United States, then and during such exemption, an additional sum of two per cent on the dividends of each bank shall be transmitted, as aforesaid, to the State Treasurer for the use of the Commonwealth." Under this act, if a bank did not pay the tax or declared no dividends in any year, its charter was declared forfeited.

Under the Act of April 1, 1835, P. L. 99 it is provided that "the several banks in the Commonwealth now subject by law to the payment of a tax on their dividends shall hereafter pay into the treasury of this Commonwealth, in the manner now directed by law, eight per cent on all dividends which do not exceed 6% per annum; nine per cent on all dividends exceeding 6 and not exceeding 7% per annum; ten per cent on all dividends exceeding 7 and not exceeding 8% and eleven per cent on all dividends exceeding 8% per annum."

In addition to the tax on dividends banks were made subject to the state capital stock tax by the Acts of June 11, 1840, P. L. 612 and April 29, 1844, P. L. 486. That the tax on capital stock was in addition to the tax on dividends imposed by the Act of 1835, is apparent from the 6th section of the Act of April 16, 1845, P. L. 507, which provides that the 33d section of the Act of 1844, the capital stock tax act, shall not be construed to release the banks and savings institutions of this Commonwealth from the payment of a tax on their dividends, respectively, according to the several laws in force at the time of the passage of said act.

The rate per cent to be paid on the amount of dividends declared imposed by the Act of 1835 was increased by the Act of March 15, 1849, P. L. 168. They ranged from 8% when dividends paid were not more than six per cent to 30% when the dividends exceeded twenty per cent.

Section 21 of the Act of April 16, 1850, P. L. 457, required banks to pay a tax on dividends at varying rates as high as 30%. In addition Section 46 of the Act imposed a tax of 4½ mills on the capital stock paid in. This latter provision replaced the capital stock tax imposed by the Act of April 29, 1844 and remained in force until its repeal by the Act of April 27, 1852, P. L. 443 when the Act of 1844 again became effective as to banks.[4]

The Act of April 12, 1859, P. L. 529 which imposed a capital stock tax upon corporations generally provided that any company liable for a tax on capital stock and also upon dividends shall be exempt from the tax on dividends. This provision, in effect, abolished the tax on dividends. This construction was supported by the express provisions of the Act of March 24, 1860, P. L. 250 that the Act of 1859 should not be so construed that

banks of deposit and discount or savings banks shall be liable to a tax on dividends.

Under Section 1 of the Act of February 23, 1866, P. L. 82 a tax of one per cent upon the par value of the capital stock "of every bank" was imposed, to be collected annually from each shareholder by the cashier of the bank and to be paid into the State Treasury. Banks were exempted from all other taxation on their capital stock. It was not until the passage of this act that banks ceased to be the principal corporations subject to the tax on capital stock.[5]

The Act of April 12, 1867, P. L. 74, repealed the part of the Act of 1866 that applied to the taxation of national bank capital stock and provided for the taxation of the shares of such banks. It was provided under Section 1: "That all the shares of stock held by any person in any bank incorporated by or in pursuance of any law of the Government of the United States are hereby declared subject to taxation in the hands of the holders of such shares, at the same rate as the shares, or stock, of banks incorporated by, or under, any law of the Commonwealth of Pennsylvania are now taxable, in the hands of the individual holders of such shares, and at no other, or greater, rate; that is to say, a tax of three mills upon every dollar of the value of such shares or stock shall annually be assessed and collected in the manner hereinafter provided." The 5th section of the Act of 1867 provided that should any bank, national or state, pay to the State Treasurer a tax of one per cent per annum on the par value of its capital stock, the shareholders of the bank should be exempt from all other taxation on the value of said shares. The tax on shares of state banks remained at one per cent as per the Act of 1866 until 1869.

Under the Act of April 2, 1868, P. L. 55 the method was changed of appraising the shares of national banks by assessors as provided in the Act of 1867.

The Act of December 22, 1869, P. L. 1870, P. 1373 provided that the shares of state and savings bank should be subject to the same tax as was imposed on national bank shares by the Acts of 1867 and 1868. By collecting a tax of one per cent of the par value of the shares from the shareholders and paying same to the Commonwealth, the bank was exempted from all other state taxes on the shares, capital and profits.

The Act of March 21, 1870, P. L. 42 directed that the State Treasurer repay to each bank, that had paid the tax of one per cent on the par value of all their shares of stock such tax paid, "after first deducting the tax of 3 mills upon such assessed value." The Act of 1870 also provided that national banks should be taxable for county, school, municipal and local purposes, at the same rate as other moneyed capital in the hands of citizens of the state.

By the Act of June 7, 1879, P. L. 112, supplemented by the Act of June 10, 1881, P. L. 99, the tax on shares of bank stock was increased from 3 to 4 mills. The system of assessment created by the Act of 1867 was abolished and replaced by a new one whereby reports were required to be filed with the Auditor General. State and national banks were allowed to elect to pay a tax of 6 mills upon their par value and to pay such tax to the State Treasurer by March 1st of each year. Such election exempted from further taxation their shares and so much of their capital and profits as was not invested in real estate. In the absence of such election the President or Treasurer of each state and national bank was required to file a report with the Auditor General on or before June 20th furnishing certain information including the value of the stock of the bank and a list of names and addresses of the shareholders with their holdings. The state fiscal officer then made a settlement against each shareholder. The lists and settlements were then forwarded to the several county commissioners and used in assessing taxes against the shareholders at the increased rate of four mills.

The Act of June 30, 1885, P. L. 193, substantially reenacted the Act of 1881. The rate of four mills was, however, reduced to three in the case where no election was made to pay the 6 mills tax on shares by March 1st. Trust, Safe Deposit, Guarantee, Surety, and Real Estate Insurance or Trust Companies were also given the option of choosing to pay the 6 mill tax in lieu of other taxation on their stock.

In construing the Act of 1885 a lower court held that the shares of stock of banks failing to pay the optional 6 mills tax on or before June 20th in each year, were taxable to the bank and the shares thereof taxable in the hands of the holders.[6] In another case involving the construction of the same act the court said:

> "The fact remains, however, that no intent is apparent in our legislation upon this subject treating the different statutes as a scheme of taxation, to tax both the capital stock and the shares of stock in the hands of the shareholders. Such taxation, notwithstanding the subtle distinction of the court below, would be substantially double taxation. Conceding the power of Legislature to tax in this manner, its exercise is never to be presumed. The intent to impose double taxation must be clearly expressed."[7]

Under the Act of June 1, 1889, P. L. 420, the last mentioned option was taken away from Trust, Safe Deposit, etc. Companies. As to State and National Banks choosing to pay the 6 mill tax the exemption "from further taxation upon their shares and so much of their capital and profits as shall not be invested in real estate" was limited to "local taxation under the laws of this Commonwealth."

The Act of June 8, 1891, P. L. 239 Sections 6 and 7, substantially re-enacted the Act of 1889, Sections 24 and 25. The rates were changed, however, the rate which could be paid on or before March 1st being increased from 6 to 8 mills and the rate which applied when the option to pay on the par value of the shares was not exercised, being raised from ? to 4 mills.

The next change in the tax on shares of banks was made by the Act of July 15, 1897, P. L. 292. This is the basic act for the present-day state taxation of banks. Section 1 provides:

> "That from and after the passage of this act every bank or savings institution, having capital stock, incorporated by or under any law of this Commonwealth

[5] Com. v. N. Y. P. & O. RR Co., 188 Pa. 169 (1898).

[6] Gorley v. Bowlby, 8 Pa. C. C. 17 (1890).

[7] Penna. Co. for Ins. on Lives, etc. v. Com. 22 W. N. C. 340 (1888).

or under any law of the United States, and located within this Commonwealth shall, on or before the 20th day of June in each and every year, make to the Auditor a report in writing, verified by the oath or affirmation of the president, cashier, or treasurer, setting forth the full number of shares of capital stock subscribed for or issued by such bank or savings institution, and the actual value thereof, which shall be ascertained as hereinafter provided; whereupon it shall be the duty of the Auditor General to assess such shares for taxation at the same rate as that imposed upon other moneyed capital in the hands of individual citizens of the state: that is to say, at the rate of four mills upon each dollar of the actual value thereof, the actual value of each share of stock to be ascertained and fixed by adding together the amount of capital stock paid in, the surplus and undivided profits, and dividing this amount by the number of shares. . . . It shall be the duty of every bank or savings institution, within a period of forty days after the date of such settlement by the Auditor General, at its option to pay the amount of said tax to the State Treasurer from its general fund or collect the same from its shareholders and pay over to the State Treasurer . . . And provided further, that in case any bank or savings institution having capital stock, incorporated under the law of this state or of the United States, shall collect annually from the shareholders thereof of said tax of four mills on the dollar upon the actual value of all the shares of stock of said bank or savings institution, according to the rule hereinbefore stated, that have been subscribed for or issued, and pay the same into the State Treasury on or before the 1st day of March in each year, the shares and so much of the capital and profits of such bank or savings institution as shall not be invested in real estate shall be exempted from local taxation under the laws of this Commonwealth and such bank or savings institution shall not be required to make any report to the local assessor or county commissioners of its personal property owned by it in its own right for purposes of taxation and shall not be required to pay any tax thereon."

The Act of 1897 was intended to abolish the system of permitting the payment of an optional tax.

The Legislative Record (Journal) shows the bill passed the House of Representatives without the provision. In the discussion in the House the proponents of the bill argued that the Commonwealth was losing revenue by many banks electing the method of tax computation most favorable to them and the elimination of the option would serve to equalize the tax on all banks. In the Senate, however, the bill was amended to include the following provision.

"Except, however, that any bank or savings institution incorporated as aforesaid, in lieu of the method hereinbefore set out for ascertaining the actual value of the shares of capital stock thereof may elect to collect annually from the stockholders thereof a tax of ten mills on the dollar upon the par value of all shares of said bank that have been subscribed for or issued, and pay the same into the State Treasury on or before the first day of March in each year; and the shares of such bank or savings institution and so much of the capital and profits of such bank or savings institution as shall be invested in real estate, shall be exempted from local taxation under the laws of this Commonwealth."

The above provision replaced those of prior acts permitting the payment of an optional tax of first six (Act of 1879) and then eight mills (Act of 1891). It was not until 1925 that the election given banks to pay upon par value of their stock was abolished. The Act of May 2, 1925, P. L. 497 eliminated the option. The 1925 Report of the Pennsylvania Tax Commission to the General Assembly of the Commonwealth shows 442 state banks elected in 1924 to pay the 10 mill tax. The average rate on book value of the assets of banks choosing this method was 2.7 mills so that most of the banks so electing paid less than 4 mills upon their actual capital. These facts brought about the change in 1925 that had been proposed in 1897 but defeated in the Senate.

The method of determining the actual value of each share by adding together the amount of capital stock paid in, surplus and undivided profits and dividing this amount by the number of shares has been held constitutional.[8]

The Act of April 25, 1929, P. L. 677 and the Fiscal Code, the Act of April 9, 1929, P. L. 343, provided for the filing of annual reports by state banks and savings institutions and national banks with the newly created Department of Revenue instead of the Auditor General's Department and re-enacted the provisions of existing laws as to the valuation of the shares for the purpose of state tax.

The Act of May 31, 1933, P. L. 1130 changed the date for filing annual shares tax reports from June 20th to March 15th, thereby changing the period for which the reports were to be filed from one ending June 20th to that ending December 31st. It necessarily eliminated the provision of prior acts for the optional filing of annual reports and payment of tax prior to March first for the year ending December 31st preceding.

The Act of July 28, 1936, P. L. 76 again changed the date for the filing annual shares tax reports. They now become due February 15th instead of March 15th of the year following that for which they were filed. This act also increased the rate of tax for the calendar year 1936 from 4 mills to 8 mills upon each dollar of the actual value of the shares of stock.

The Act of April 8, 1937, P. L. 254, continued the increased rate of 8 mills for the calendar years 1937 and 1938.

The rate of 8 mills was further continued for the calendar years 1939 and 1940 by the Act of May 4, 1939, P. L. 53.

* Emergency Shares Tax of 3 mills not included.

Shares Tax

Title Insurance and Trust Companies

As in the case of national banks and state banks and savings institutions the tax on shares of title insurance and trust companies is a tax on the shareholders of the institutions of the companies themselves.

Trust Companies were first incorporated under the Act of April 29, 1874, P. L. 73, the general corporation act. Originally they were chartered for the purpose of engaging in the business of title insurance. Their powers were increased by the Legislature under acts passed in 1881, 1889 and 1895.

Banks incorporated under special acts and possessing in addition to their banking powers the power to transact to a limited extent the business of a trust company, which trust business they transact to a very small extent are not subject to taxation under this act, but are taxable as banks under the Act of July 15, 1897.[1] Title insurance companies are not designated in the acts imposing a tax upon gross premiums of insurance companies. Likewise trust companies are not included. Therefore, there is no authority for the imposition of a tax on the gross premiums of either company.[2]

Prior to 1885 title insurance and trust companies were subject to the capital stock tax in common with all other corporations incorporated under the general corporation act of 1874 (See Preliminary Legislative History of Capital Stock Tax.) The 3d section of the Act of June 30, 1885, P. L. 193, provided that title insurance and trust companies, in common with national and state banks and savings institutions might pay a tax of 6 mills upon the value of all their shares of stock in lieu of the capital stock tax. Payment of one of these two taxes exempted them from liability to the other.[3]

The Act of June 1, 1889, P. L. 420, omitted title insurance and trust companies from the corporations entitled to pay the optional tax of 6 mills on the par value of their capital stock. Thereafter until passage of the Act of June 13, 1907, P. L. 640 title insurance and trust companies remained subject to the capital stock tax. Thus for a period of 33 years, except for the brief period of four years (1885-1889) when they were allowed the option of paying a 6 mill tax on the par value of their capital stock, title insurance and trust companies were taxed by the Commonwealth in the same manner and at the same rate as other corporations created under the general corporation act of 1874. "They made their reports to the Auditor General under the general revenue acts of 1879, 1889 and 1891 and other statutes, just as other private corporations did, and the valuation of their capital stock was ascertained and the tax settlement made on the same basis.[4]

The Act of June 13, 1907, P. L. 640 was intended to put trust companies upon practically the same basis as banking institutions for the purpose of taxation.[5] It provided:

> "From and after the passage of this act, every company incorporated under the provisions of section 29 of an Act, entitled "An act to provide for the incorporation and regulation of certain corporations," approved April 29th, 1874, and its supplements; for the insurance of owners of real estate, mortgages, and others interested in real estate, from loss by reason of defective titles, liens and encumbrances; . . . shall on or before the 20th day of June in each and every year, make to the Auditor General a report in writing . . . setting forth the full number of shares of the capital stock subscribed for or issued by such company, and the actual value thereof, which shall be ascertained as hereinafter provided; and thereupon it shall be the duty of the Auditor General to assess such shares for taxation at the rate of 5 mills upon each dollar of the actual value thereof, the actual value of each share of stock to be ascertained and fixed by adding together the amount of capital stock paid in, the surplus and undivided profits and dividing this amount by the number of shares . . ."

[2] Opinion Attorney General: 20 Dauphin 211 (1917).
[3] Penna. Co. for Ins. on Lives, etc. v. Com. 2 Mona 694 (1889).
[4] Com. v. Mortgage Trust Co., 227 Pa. 163 (1910).
[5] Com. App. v. Union Trust Co. of Pittsburgh, 237 Pa. 353 (1912).

It was further provided by this act that if the company should collect such tax from

> "the shareholders thereof, or from the general fund of said company, said tax of 5 mills on the dollar upon the value of all the shares of stock of said company, the value of each share of stock to be ascertained and fixed by adding together so much of the capital stock paid in, the surplus, and undivided profits, as is not invested in shares of stock of corporations liable to pay to the Commonwealth a capital stock tax or tax on shares, and dividing this amount by the number of shares of title insurance or trust company, and pay said tax into the State Treasury, on or before the first day of March in each year, the shares and so much of the capital stock, surplus, profits, and deposits of such company as shall not be invested in real estate, shall be exempt from all other taxation under the laws of this Commonwealth."

The method of arriving at the actual value of each share by adding together capital stock paid in, surplus and undivided profits and dividing by the number of shares was held constitutional.[6]

As to the rate of 5 mills compared to the rate of 4 mills imposed on banks and savings institutions it is suggested by Ruslander and Main in "Pennsylvania Corporation Taxes," 3d Edition, on page 171 that "The tax on shares of title and trust companies was framed at a time when the trust companies could engage in a variety of financial transactions which were withheld from the banks, and as a charge for their extra privileges they were taxed at a higher rate than banks." It is to be noted, however, that the rate of the capital stock tax, which the tax on shares replaced according to the provisions of the Act of 1907, was 5 mills.

The Act of July 11, 1923, P. L. 1071, changed the time for filing annual reports from the 20th day of June to the last day of February. It also changed the period after the date of settlement of the tax within which it was to be paid from 40 to 60 days. This act also changed the method of arriving at the actual value of the shares. It was now determined by adding together "so much of the capital . . . surplus, and undivided profits as is not invested in shares of stock of corporations liable to pay . . . a capital stock tax or tax on shares" regardless of whether the tax on shares was paid by March first as per the Act of 1907.

The Act of May 7, 1927, P. L. 853, enlarged the portion of the capital stock paid in, surplus and undivided profits exempt from the shares tax, which exemption had previously included only shares of stock of corporations liable to pay to the Commonwealth a capital stock tax, or a shares tax by adding the words "or relieved from the payment of capital stock tax."

The Act of April 25, 1929, P. L. 673, again changed the time for filing annual shares tax reports from the last day of February to the 15th day of March and provided that such reports should be filed with the newly created Department of Revenue instead of the Auditor General's Department as theretofore. Similar provisions were included in Section 712 of the New Fiscal Code, the Act of April 9, 1929, P. L. 343.

The Act of May 31, 1933, P. L. 1132 provided a slightly different method of arriving at the actual value of the shares of title insurance and trust companies for taxation. Prior legislation provided the actual value of the shares should be found by adding together so much of the capital stock paid in, the surplus and undivided profits "as is not invested in shares of stock of corporations liable to pay the Commonwealth a capital stock tax, or relieved from the payment of capital stock tax or tax on shares." The Act of 1933 changed the above quoted language to read "As is not invested in shares of stock of corporations liable to pay the Commonwealth a tax on shares; or as is not invested in such portion of the capital stock of corporations liable to pay to the Commonwealth a capital stock tax as the capital stock of such corporation employed in this Commonwealth and liable to a capital stock tax bears to the total capital stock of such corporation; or as is not invested in such portion of the capital stock of corporations specifically relieved under the laws of this Commonwealth from the payment of a capital stock tax as the capital stock of such corporation employed within this Commonwealth and relieved from the payment of a capital stock tax bears to the total capital stock of such corporation—" This change was to conform to the Act of June 22, 1931, P. L. 685 which provided for settlement of Capital Stock Tax by use of a statutory formula. It provided that so much of the value of the capital stock should be exempted as the value of the exempt assets bears to the value of total assets.

In practice no exemption was allowed by the taxing authorities of the Commonwealth for United States Securities and national bank stock owned. Upon an appeal to the United States Supreme Court from a decision of the Pennsylvania Supreme Court[7] approving this practice such court reversing the Pennsylvania Court held it to be discriminatory against such securities not to allow an exemption.[8]

The Act of July 28, 1936, P. L. 73 abolished the exemption just noted in the Act of May 31, 1933, P. L. 1132. In other words, the actual value of the shares for taxation was ascertained by adding together the amount of capital stock paid in, the surplus, and undivided profits. The act relieved from filing annual tax reports "any such corporations, all the shares of capital stock of which (other than shares necessary to qualify directors) are owned by a corporation which is liable to pay to the Commonwealth a tax on shares." This act increased the rate of the tax on shares of title insurance and trust companies for the calendar year 1936 from 5 to 8 mills. It also changed the last date for filing annual reports without penalty from March 15 to February 15.

This act was intended to remove the discrimination against U. S. Securities objected to by the United States Supreme Court in Schuylkill Trust Com. v. Com. of Pa. by denying exemption to shares of Pennsylvania corporations. In practice a deduction is allowed for shares of national banks owned.

The Act of July 28, 1936, P. L. 77 amended section 712 of the Act of April 9, 1929, P. L. 343, the Fiscal Code, to provide for the change in filing date from March 15 to February 15.

The Act of April 8, 1937, P. L. 251 continued the new

[8] Schuylkill Trust Co. v. Com. of Pa., 80 Law Ed. 15.

rate on shares tax of 8 mills for the calendar years 1937 and 1938 and made the rate thereafter 5 mills.

The Act of May 4, 1939, P. L. 48 continued such new rate of 8 mills for the calendar years 1939 and 1940 and thereafter the rate is reduced to 5 mills.

Municipal Loans Tax

A state tax analogous to the Corporate Loans Tax is that imposed on indebtedness of counties, cities, boroughs, townships, school districts or incorporated districts, sometimes called the "Municipal" Loans Tax or the "County and Municipal" Loans Tax. It was first imposed by Section 42 of the Act of April 29, 1844, P. L. 501, an act that provided according to its title, for the reduction of the debt of the Commonwealth and the incorporation of the Pennsylvania Canal and Railroad Company. This section provided ". . . It shall be the duty of the treasurer of each county, incorporated city, district, and borough of this Commonwealth, on the payment of any dividend or interest, to any holder or agent claiming the same, on any scrip, bond or certificate of indebtedness issued by said incorporated city, district, and borough aforesaid to assess the tax herein made and provided for state purposes, upon the nominal value of each and every said evidence of debt; said tax to be deducted by the said treasurer on the payment of any interest or dividend aforesaid, and the same shall be held by him until paid over to the state treasurer; . . ."

The next legislation relating to this tax was the 4th section of the Act of April 30, 1864, P. L. 218. Under the terms of the Act the burgess or other chief officer of each incorporated district or borough was required to report to the Auditor General the amount of scrip, bonds, etc. outstanding by said county, city, etc. together with rates of interest and other information. The Auditor General was then required to settle annually the accounts of each county, city, etc., fix the state tax due, and unpaid and send notice of the amount to the officers making such returns. It was made the duty of the treasurer of each county, city, etc., to deduct the state tax on payment of any interest or dividend on debts due by the county, city, etc. and pay the tax to the State Treasurer within 30 days after interest or dividend became due.

Section 4 of the Act of 1864 does not provide for any assessment of obligations for taxation. Its constitutionality was accordingly attacked.[1] The court, however, found its purpose to be the supplying of the provision, omitted by Section 42 of the Act of 1844, "requiring the treasurer of counties and cities to report to the Auditor General the amount of indebtedness on which interest was paid and tax became due, so that he might know whether all the tax had been deducted and paid over to the State Treasurer;" and the correction of the "failure to give him express authority to settle accounts for the tax unpaid." The court held further the last clause of Section 4 of the Act of 1864 reenacted Section 42 of the Act of 1844. Thus one act is made the supplement of the other. Not only did this opinion hold that the 42d section of the Act of 1844 was not repealed by the 4th section of the Act of 1864 but it was not repealed by the Act of April 2, 1846 or the Act of June 7, 1879, P. L. 112. (See Preliminary Legislative History of Corporate Loans Tax).

The tax on county and municipal loans was imposed by authority of the Acts of 1844 and 1864 until passage of the Act of May 11, 1911, P. L. 236 which amended the 4th section of the Act of 1864 by adding to the taxable subjects the indebtedness of school districts. It is to be noted school districts were not specifically included by the terms of the Act of 1844 or the Act of 1864. The accounting officers of the Commonwealth in practice did not regard school districts as included in the term "incorporated district." In 1908, however, the Attorney General ruled that the bonds of school districts should be returned by the treasurers of such districts to the Auditor General for taxation instead of being returned by the holders thereof to local assessors to be subject to the state tax on personal property.[2] In order to further clarify the matter the Act of May 11, 1911 was passed.

It is not clear what rate was used in imposing the Municipal Loans Tax from 1879 to 1913. The Act of April 30, 1864, P. L. 218, is silent as to the rate as is the Act of May 11, 1911, P. L. 236. It is believed, however, that in practice the same rate was applied as in the case of the Corporate Loans Tax, that is, 4 mills under the Act of June 7, 1879, P. L. 112, and June 10, 1881, P. L. 99; 3 mills under the Acts of June 30, 1885, P. L. 193 and June 1, 1889, P. L. 420; 4 mills under the Act of June 8, 1891, P. L. 229 and thereafter. In referring to the rate during the period from passage of the Act of 1891 to 1913, Eastman in "Taxation in Pennsylvania," Vol. 2, page 709, says "The tax being that 'made and provided for state

[1] Com. v. Phila. City and County, 157 Pa. 558 (1893).
[2] School District Bonds, 35 Pa. CC. 606.

purposes' on bonds, mortgages and similar personal property, the rate thereof is 4 mills under the provisions of Section 1 of the Act of June 8, 1891, P. L. 229, as amended by the Act of May 1, 1909, P. L. 298 on the nominal value of loans."

The next legislation applicable to this tax is the 17th section of the Act of June 17, 1913, P. L. 507. This Act which also provides for the imposition of the Personal Property Tax (first 16 sections) and the Corporate Loans Tax is not an amendment of any previous acts but a new independent act which expressly repeals prior acts relating to Personal Property Tax and Corporate Loans Tax. It does not, however, expressly repeal the Acts of 1844, (April 29, P. L. 501) 1864 (April 30, P. L. 218) or 1911 (May 11, P. L. 236) that formed up to this time the basis for the Municipal and County Loans tax.

Section 17 of the Act of 1913 after enumerating the classes of indebtedness subject to the Corporate Loans Tax sets forth identical classes of indebtedness issued by the political subdivisions as subject to the county and municipal loans tax, to wit; "and all scrip, bonds, or certificates of indebtedness." These classes of indebtedness were made taxable for the year 1914 and annually thereafter at the rate of 4 mills on each dollar of the nominal value. This act provided that none of the classes of property made taxable by this section for state purposes shall be taxed for county, school or other local purposes. The tax for state purposes imposed by Section 17 was, by the provisions of Section 18 to be collected in the same manner as the tax theretofore imposed for state purposes upon such obligations.

The Act of July 15, 1919, P. L. 954 provided that "whenever any public . . . corporation . . . required by existing laws to deduct or collect and pay over to the Commonwealth taxes upon scrip, bonds, certificates and evidences of indebtedness by such corporation issued or assumed, shall make payment of interest on any scrip, bonds, certificates and evidences of indebtedness, issued or assumed by them, which payment shall include interest due and payable for prior years it shall be the duty of the treasurers . . . paying such interest to forthwith report the same to the Auditor General, indicating the amount thereof, the years covered thereby . . .; and it shall be their further duty to deduct from such interest four mills on every dollar of the full amount of such obligations to the extent that such obligation might have been required to have been made under existing law had the interest actually been paid during such prior years when due . . ."

The Act of July 15, 1919, P. L. 955, amended the 17th Section of the Act of 1913 by adding to the list of taxable indebtedness of political subdivisions "all scrip, bonds, certificates and evidences of indebtedness assumed or on which interest shall be paid" by any county, city, borough, township, school district or incorporated district of the Commonwealth. The following provision was also added to this section "It is the intent of this act that all scrip, bonds, certificates and evidences of indebtedness made taxable under this section are not taxable under section one (1) of the act to which this is an amendment, and that only each scrip, bonds, certificates and evidences of indebtedness which cannot be made taxable under this section are to be taxed under section one (1) of said act."

The next legislation applicable to Municipal Loans tax was Section 709 of the Act of April 9, 1929, P. L. 343, the "Fiscal Code." This section provided for the filing of the annual report on or before the 15th day of March of each year with the Department of Revenue instead of the Auditor General's Department of the "amount of scrip, bonds or certificates of indebtedness, outstanding by such county, city, borough, school district or incorporated district, as the same existed on the first day of January . . ."

The rate of the Municipal Loans Tax was not increased in 1935 as was the Corporate Loans Tax but remained at 4 mills.

Legislative History—Corporate Loans Tax
Summary

Date of Act	Principal Changes from Prior Act	Rate
4-29-1944 P. L. 486		3 mills
5-1-54 P. L. 535	Bonds, etc. of railway corporations expressly taxable	3 mills
4-30-64 P. L. 218	Tax withheld from interest on taxable securities	3 mills
5-1-68 P. L. 108	Tax based on interest paid	5% (of interest)
3-21-73 P. L. 46	Tax imposed directly upon corporation	5% (of interest)
4-24-74 P. L. 68	Corporate Loans tax abolished	None
6-7-79 P. L. 112	Tax on principal of indebtedness through corporation as agent	4 mills
6-10-81 P. L. 99	Tax imposed on corporation but reimbursement permitted	4 mills
6-30-85 P. L. 193	Act provided for tax on interest; Rate	3 mills
6-1-89 P. L. 420	Tax is on value of indebtedness	3 mills
6-8-91 P. L. 229	Rate	4 mills
5-1-09 P. L. 298	Loans issued free and clear of tax taxable if held by Savings Institutions without Capital Stock	4 mills
6-17-13 P. L. 507	Clarifies separation of corporate loans tax from personal property tax	4 mills
7-15-19 P. L. 954	Loan taxable if interest is paid for prior period	4 mills
7-15-19 P. L. 955	Indebtedness "assumed" and "on which interest was paid" added to taxable subjects	4 mills
7-15-19 P. L. 958	Foreign corporations made subject to corporate loans tax even if Treasurer is non-resident	4 mills
7-21-19 P. L. 1067	Filing date for Reports Changed	4 mills
7-13-23 P. L. 1085	Provided corporation assuming a mortgage may be exempt if required notice is given	4 mills
5-4-27 P. L. 741	Exempted first class corporations from tax	4 mills
4-25-29 P. L. 669	Loans tax reports to be filed with Department of Revenue	4 mills
6-1-31 P. L. 318	Change in filing date of fiscal year corporations	4 mills
6-22-35 P. L. 414	New corporate loans tax on addition to prior acts	1 mill (5 mills for both taxes)
7-17-36 P. L. 51	rate	4 mills (8 mills for both taxes)
5-18-37 P. L. 633	Two Loans Taxes combined	8 mills
5-5-39 P. L. 76	First class or non-profit corporations exempt—Rate continued for 1939 and 1940	8 mills

Date of Act	Principal Changes from Prior Act	Rate
5-25-39 P. L. 202	Loans Reports showing interest paid for prior years filed with Revenue Dept.	8 mills

Corporate Loans Tax

Receipts—1928-1939

Years Ended May 31	Amount Collected	Rate
1939	$6,457,885	8 mills

* Extra 3 mills attacked in court appeal.
† Extra 1 mill held invalid for year 1935, that is, reports for 1935 filed in 1936. Com. v. Chester County Light and Power Co., 339 Pa. 97. Part of the tax above of $3,242,156 will be refunded to the corporation taxpayers under this decision.

Pennsylvania Corporate Loans Tax

The Pennsylvania Corporate Loans Tax is more or less closely linked with the Personal Property Tax, the latter, at least in the later acts, being intended to complement the former. It is not a tax laid on the company, nor on the bondholders thereof as a body, but on each resident bondholder as an individual; and the corporation or its treasurer is merely the agent of the Commonwealth or instrument of collection for the convenience of the State[1] but in the case of the failure of the corporation through its treasurer to collect the tax the corporation is liable therefor.[2]

The loans of private corporations were first made a separate subject of taxation by Section 3 of the Act of April 30, 1864, P. L. 218. It is to be noted, however, that the bonds of a railroad company chartered by the Commonwealth were held taxable by court decision under Section 32 of the Act of April 29, 1844, P. L. 486, an early personal property tax act,[3] although corporate bonds were not mentioned by name in the act. Also the Act of May 1, 1854, P. L. 535 taxed "all bonds or certificates of loans of any railroad company incorporated by this Commonwealth." Under the Act of April 30, 1864, P. L. 218, the officer of the corporation which paid interest to its depositors, bondholders, or other creditors, on loans upon which a state tax is imposed, is required to withhold from such depositors, bondholders or creditors the amount of the state tax and pay it over to the State Treasurer.

Section 3 of the Act of April 30, 1864, P. L. 218 was repealed by Section 11 of the Act of May 1, 1868, P. L. 108 which provided that the officers of every corporation doing business in Pennsylvania except domestic banks or savings institutions, which pays interest to its bondholders or other creditors, shall, before the payment of the same, retain a tax of 5% upon every dollar of interest paid. It should be noted that the tax is based on the interest paid and not on the principal of the indebtedness. In construing the Act of May 1, 1868, P. L. 108, the Pennsylvania Supreme Court held the tax must be collected from non-resident bondholders as well as individuals residing within Pennsylvania.[4] Upon appeal to the U. S. Supreme Court, however, the decision of the State Supreme Court was reversed.[5]

The fourth section of the Act of March 21, 1873, P. L. 46 repealed the 11th section of the Act of May 1, 1868, P. L. 108 and imposed the loans tax directly on the corporation. The tax was again 5% of the interest paid as in the case of the Act of 1868.

Approximately a year later Section 4 of the Act of 1873 was repealed by Section 11 of the Act of April 24, 1874, P. L. 68 and the corporate loans tax was entirely abolished. For the next five years there was no corporate loans tax imposed on either the holders of corporate indebtedness or the corporations themselves.

The corporate loans tax was re-established and imposed on the principal sum of the corporate indebtedness and not on the interest paid on said principal by the 17th section of the Act of June 7, 1879, P. L. 112 by providing that:

"All corporations paying interest on loans hereby taxed for state purposes only shall deduct the said tax from the said interest and pay the same into the state treasury." This Act avoids taxing nonresidents.

This 17th Section of the Act of June 7, 1879, P. L. 112 was reenacted by Sections 1 and 2 of the Act of June 10, 1881, P. L. 99. This latter act differed from the Act of 1879 in that the tax was imposed primarily on the corporation but the latter was allowed to withhold the tax from the interest paid on the corporae indebtedness, in which case the latter became exempt from other taxation in the hands of the holders. In the 1879 Act the tax was imposed on the holder of the corporate indebtedness through the corporation as agent for the Commonwealth.

In the case of Com. v. Lehigh Valley R. R. Co. 104 Pa. 89 (1883) Section 17 of the Act of 1879 and Section 2 of the Act of 1881 were held unconstitutional because they contained no provision for the assessment and valuation of the loans taxed and therefore did not constitute an independent scheme of taxation of corporate loans.

The Act of June 30, 1885, P. L. 193, corrected the defect of the Acts of 1879 and 1881 which was responsible for them being declared unconstitutional. This Act of 1885 reduced the corporate loans tax from 4 to 3 mills and expressly restricted the tax to obligations in the hands of residents of Pennsylvania. The Act of 1881 (June 10, P. L. 99) also contained such restriction. Although the Act of 1885 provided that the tax shall be deducted "on every dollar of the interest paid as aforesaid" as had been provided by the Act of May 1, 1868, P. L. 108, the tax was construed by court decision to be upon the principal sum of corporate obligations and not on the interest paid thereon, that is, the tax "is the state tax imposed and provided on mortgages, money owing by solvent debtors, etc."[6]

The next act applicable to the corporate loans tax was

[1] Com. v. Phila. & Reading R. R. Co., 150 Pa. 312 (1892); Com. v. Lehigh Valley R. R. Co., 104 Pa. 89 (1883).

[6] Delaware Div. Canal Co. v. Com. 123 Pa. 594 (1889). Com. v. Wilkes-Barre & Scranton Rwy., 162 Pa. (1894).

that of June 1, 1889, P. L. 420, supplementing the Act of 1879. It provided a complete system for taxation of personal property, tax on corporate loans and tax on capital stock and on gross receipts. It continued the rate of 3 mills on corporate loans.

The Act of June 8, 1891, P. L. 229 re-enacted many of the provisions of the Act of June 1, 1889, P. L. 420. It changed the rate of corporate loans tax from 3 to 4 mills at which it remained until 1935.

The Act of May 1, 1909 P. L. 298, Section 1, amended Section 17 of the Act of June 1, 1889, P. L. 420 by providing the act should not apply to savings institutions having no capital stock and also making loans owned by said savings institutions without capital stock taxable if issued clear of and free from the 4 mills tax.

The Act of June 17, 1913, P. L. 507 is the basis of the present-day corporate loans tax. Theretofore there was no distinct statutory separation of the tax on corporate indebtedness from the personal property tax on mortgages; moneys owing by solvent debtors; interest bearing accounts, etc. The prior acts had imposed for state purposes a four mill tax on the various kinds of personal property enumerated therein. This tax was collected locally and paid over to the Commonwealth which then remitted to the counties three-fourths of the tax collected. The first 16 sections of the Act of 1913 were concerned with the imposition and collection of the four mill tax as it related to all kinds of taxable personal property theretofore taxed except corporate indebtedness. By express provisions these enumerated subjects were made taxable for county purposes only and no part of the tax was paid over to the Commonwealth.

The reasons for the change in the personal property tax from a state tax with the counties sharing in it to the extent of three-fourths of the amount collected to a county tax are brought out in the discussion in the House just prior to the passage of the bill. The City of Philadelphia found itself greatly handicapped because of a lack of transit facilities. It was unable to extend such facilities because the amount of outstanding bonds approached the limit set by the Constitution at a definite percentage (7%) of assessed values for local taxation. The Act of 1913 would provide more taxes for the counties and incidentally the cities coextensive with the counties (Philadelphia) and also increase their borrowing capacity. In the discussion on the bill it was stated $40,000,000 of actual cash would be available for Philadelphia rapid transit improvements. In the original bill Section 18 provided that all moneys realized from the sale of bonds the issue of which was made possible by the increase in personal property taxable for county purposes, should be limited to leasing, locating, constructing and equipping transit facilities. Because of the possibility of the section being unconstitutional as a part of the Act it was stricken from the Act of 1913 and incorporated in a separate bill by the Senate.

Section 17 of the Act of 1913 provided that all scrip, bonds or certificates of indebtedness issued by private corporations incorporated under the laws of Pennsylvania or the laws of any other state or of the United States and doing business in Pennsylvania should be taxable for the year 1914 and annually thereafter at the rate of four mills on each dollar of the nominal value. It also provided that none of the classes of property made taxable by this section for state purposes shall be taxed for county, school or other local purposes. The tax for state purposes imposed by Section 17 was, by the provisions of Sec. 18, to be collected in the same manner as the tax theretofore impased for state purposes upon such obligations.

In the Cumulative Supplement (1909-1921) to "Taxation in Pennsylvania" (Eastman) it is stated "It was generally believed that the intention of the General Assembly was in enacting Section 17 of the Act of June 17, 1913, P. L. 516, to leave the obligations of corporations to be taxed for state purposes, as theretofore. It seems, however, that only such corporate obligations remain subject to state taxation as fall within the language scrip, bonds, or certificates as used in said 17th Section of the Act of 1913, and that if any corporate obligation comes more particularly within the enumeration of a clause of Section 1 of said act, it is then subject to taxation for county purposes. Thus, car trust certificates are subject to county taxation[7] and promissory notes discounted by unincorporated banks or private banks.[8] It was also held in a court decision interpreting the 1913 Act that corporate indebtedness not represented by an obligation given by it to the person to whom the indebtedness is due, but appearing only in the statement contained in the company's books, was not subject to the corporate loans tax.[9]

The decisions above noted as well as other questions raised in practice before the Fiscal Departments required further clarification of the law relating to the Corporate Loans Tax. Accordingly four Acts were passed by the Legislative Session of 1919 to accomplish this end. The Act of July 15, 1919, P. L. 955, amended Section 17 of the Act of 1913 by adding to the list of taxable corporate indebtedness "all scrip, bonds, certificates and evidences of indebtedness assumed or on which interest shall be paid." To this section was also added the following:

"It is the intent of this act that all scrip, bonds, certificates and evidences of indebtedness made taxable under this section are not taxable under section one (1) of the act to which this is an amendment, and that only such scrip, bonds, certificates, and evidences of indebtedness which cannot be made taxable under this section are to be taxed under section one (1) of said act." Thus the three Supreme Court decisions referred to above were overruled. Even book accounts of corporations were taxable corporate indebtedness if interest was paid thereon.[10]

The Act of July 15, 1919, P. L. 954, was an independent act in that it did not amend a previous act. It provided that corporate indebtedness on which interest was paid in a particular period for a prior year or years should be reported to the Auditor General together with certain prescribed information necessary for the correct settlement of the Corporate Loans Tax, and tax deducted from such interest and paid into the State Treasury.

[7] Com. v. Lehigh & N. E. R. R. Co., 268 Pa. 271 (1920).
[8] Com. v. Roxford Knitting Co., 268 Pa. 266 (1920).
[9] Com. v. Lancaster Light, Heat & Power Co., 268 Pa. 209.
[10] Com. v. Imperial Woolen Co., 290 Pa. 526.

The Act of July 21, 1919, P. L. 1067, amended the Act of June 30, 1885, P. L. 193, Section 4. It added to taxable corporate indebtedness any "evidence" of indebtedness to conform with the Act of July 15, 1919, P. L. 955. It also changed the filing date for Corporate Loans tax reports from the first Monday in November to the last day of February for the calendar year next preceding. It provided for a tax of four mills to be deducted on every dollar of the interest paid and returned into the State Treasury within 60 days from the date of settlement instead of 3 mills as in the Act of 1885. The words "on every dollar of the interest paid" were also included in Section 4 of the Act of 1885 but were held by court decision to mean "off every dollar of the interest paid".[11] In practice the tax was imposed under the Act of 1919 upon the nominal value of the indebtedness and not on the interest. The Act also provides by its own terms for the rate of compensation allowed the treasurer of a corporation for services in withholding the tax when paying interest. Paragraph 2 of Section 4 provides for the settling of estimated corporate loans taxes by the Auditor General when no reports are filed; paragraphs 3 and 4 for fiscal year reports and the final paragraph for extension of time in the filing of annual reports.

The act of July 15, 1919, P. L. 958 amending Section 18 of the Act of 1913, P. L. 507 contained the rather startling provision "That the provisions of this section shall apply to all foreign corporations, duly registered, and doing business in this State, without regard to whether the treasurers or other fiscal officers of such corporations whose duty it may be to pay the interest on obligations of the character aforesaid may be residents or non-residents of this Commonwealth." The Act was held unconstitutional by the Dauphin County Court in Com. v. American Ice Co. 24 Dauphin 453 (1921) and the decision was apparently not appealed by the Commonwealth.

The Act of July 13, 1923, P. L. 1085 amending Section 17 of the Act of 1913, P. L. 507, as amended by the Act of July 15, 1919, P. L. 955, provided whenever a corporation should assume a mortgage or other evidence of indebtedness or pay interest thereon it should give written notice within 10 days to any person who may be liable for the payment of the personal property tax upon such indebtedness, that the corporation had assumed such indebtedness and will deduct and impose the Corporate Loans Tax. Similar notice is required annually for the period the corporation is liable for the payment of such interest. When the corporation assumes the indebtedness or the payment of interest thereon prior to October first and gives the required notice, it is relieved from the duty of deducting and paying the Corporate Loans imposed for the balance of the year but is required to deduct the tax for the ensuing year. When the corporation assumes the indebtedness or payment of interest thereon on or subsequent to October first and gives the required notice, it is relieved from the duty of deducting and paying the tax for the balance of such year and for the ensuing year. The person to whom notice is given is required to pay the personal property tax for the period for which the corporation is relieved. Penalties are provided for failure to give the required notice.

The Act of May 4, 1927, P. L. 741, amending the 4th section of the Act of June 30, 1885, P. L. 193, provided for an exemption of "corporations of the first class and cooperative agricultural associations not having capital stock and not conducted for profit" from the filing of Corporate Loans Tax reports. This exemption has been construed by the Attorney General of the Commonwealth to relieve all first class corporations from filing the reports regardless of whether they have capital stock and are conducted for profit. In other words, the words "not having capital stock and not conducted for profit" apply only to agricultural associations.

The Act of April 25, 1929, P. L. 669, amending the Act of June 30, 1885 and its supplements, provided for the filing of annual Corporate Loans Tax reports with the newly created Department of Revenue instead of the Auditor General's Department in accordance with the new scheme of administering state taxes as prescribed by the Fiscal Code, the Act of April 9, 1929, P. L. 343. The filing date for calendar year corporations was changed from the last day of February of the year following that for which the report was due to March 15th of said year. It also added to the list of taxable corporate indebtedness that upon which the corporation is liable for the payment of the interest.

The Act of June 1, 1931, P. L. 318 amending Section 702 of the Fiscal Code of 1929, provided the filing date of Corporate Loans Tax reports of corporations on a fiscal year basis should be 75 days from the end of the fiscal year instead of 60 days as theretofore.

Section 19 of the Act of June 22, 1935, P. L. 414, known as the "State Personal Property Tax Act" imposed a tax of one mill for state purposes upon "all scrip, bonds, certificates, and evidences of indebtedness issued, and all scrip, bonds, certificates, and evidences of indebtedness assumed, or on which interest shall be paid by any and every private corporation." This tax was in addition to the 4 mill corporate loans tax. The Act of 1935 was not an amendment of prior acts but a new law imposing new personal property and corporate loans taxes which, however, were similar in every respect, except rate, to the existing personal property and corporate loans taxes. The terms of the Act are contradictory as to the first year of its operation. The Department of Revenue attempted to make the Act retroactive to January 1, 1935 but was overruled by the Supreme Court in Com. v. Chester County Light and Power Company 339 Pa. 97. For 1936, therefore, the Corporate Loans Tax amounted to a total of 5 mills on the nominal value of corporate indebtedness, 1 mill under the Act of 1935 and 4 mills under the Act of 1913 as amended.

In the 1936 Special Session of the Legislature the rate of the new Corporate Loans Tax was increased from 1 to 4 mills. Section 18 of the Act of July 17, 1936, P. L. 51 amended Section 19 of the Act of June 22, 1935, P. L. 414, and provided for the 3 mill increase in rate "during the calendar year 1937 on reports filed for the calendar year 1936 or the fiscal year beginning in the calendar year 1936." The Department of Revenue is attempting to make this law retroactive to January 1, 1936. It is believed since the Act contains the same unworkable provisions as that of the 1935 Act that it will upon appeal to the Supreme Court, meet a similar fate as the latter Act. If such event happens, the Act will become operative January 1, 1937, that is, for calendar year reports of 1937 filed in 1938.

[11] Com. v. Delaware Division Canal Co., 123 Pa. 594.

The Act of May 18, 1937, P. L. 633 amended the Act of June 22, 1935, P. L. 414, the Personal Property Tax Act. Section 17 amended Section 18 of the 1935 Act by using the word "State" in the title of the Section to designate the kind of tax and so further differentiate it from the County Personal Property tax. The law as to foreign corporations is further clarified by making the indebtedness on which interest is paid taxable if the foreign corporation has a "resident corporate treasurer." The rate of the tax is made 8 mills for the years 1937 and 1938 on reports for these years filed in 1938 and 1939 and four mills for 1939 and every year thereafter on reports filed for such year in 1940 and every year thereafter. The rate of 8 mills is the rate of 4 mills provided by the Act of June 17, 1913, P. L. 507, as amended combined with the rate of four mills provided by the Act of June 22, 1935, P. L. 414 as amended by the Act of July 17, 1936, P. L. 51. In other words there is now a single Corporate Loans Tax with a rate of 8 mills, provided for by a single Act, instead of 2 Corporate loans taxes of 4 mills each, provided by 2 separate series of legislative acts. Sections 17 and 18 of the Act of June 17, 1913, P. L. 507, and their amendments, all of which relate to the Corporate Loans tax of 4 mills, are repealed by Section 18 of the Act of 1937. "Employes thrift or savings associations, whether operated by employes or the employer" are added to the subjects to which the act does not apply.

The Act of May 5, 1939, P. L. 76 further amended the Act of June 22, 1935, P. L. 414, the "State Personal Property Tax Act," as amended. Section 17 of the 1939 Act again exempted from Corporate Loans Tax indebtedness of first class or non-profit corporations. In the Act of June 17, 1913, P. L. 507 and its amendments first class corporations and agricultural associations without capital stock and not conducted for profit were similarly exempt. In the Act of 1935 (State Personal Property Tax Act) the exemption was omitted as it was from the amending Act of May 18, 1937, P. L. 633 which combined the two "separate" Corporate Loans Taxes of 4 mills each into one tax of 8 mills and repealed Section 17 of the Act of 1913 and its amendments. This act continues for 1939 and 1940 the rate of 8 mills on reports filed for such years in 1940 and 1941 and reduces the rate to 4 mills for the year 1941 and every year thereafter on reports filed for such years in 1942 and every year thereafter. It also exempted from the Corporate Loans Tax corporate indebtedness held by a corporation as executor or administrator of the estate of a non-resident decedent, and as trustee for a "resident or non-resident religious, charitable, or educational organization, no part of the net earnings of which inures to the benefit of any private stockholder or individual."

The Act of May 25, 1939, P. L. 202 amends the Act of July 15, 1919, P. L. 954 by providing treasurers of corporations in paying interest on corporate indebtedness in a particular year for prior years should report to the Department of Revenue instead of the Auditor General. Instead of deducting from such interest 4 mills the act provides for the deduction of "the proper amount of tax."

Foreign Bonus

Although foreign corporations were required to register with the Secretary of the Commonwealth prior to 1901 they were not subject to a bonus charge until the Act of May 8, 1901, P. L. 150 required them to pay a bonus of one-third of one per cent upon the amount of capital actually employed or to be employed wholly within the Commonwealth and a similar bonus upon any increase in capital so employed. Foreign bonus is not an annual tax but the price paid upon actual capital invested therein (Pennsylvania) and upon subsequent increase of such capital.[1] It is the consideration exacted from a foreign corporation for the privilege of doing business in the State just as domestic bonus is the consideration paid for the right to exist as a Pennsylvania corporation.

Legislative History—Foreign Bonus

Summary

Date of Act	Principal Changes from Prior Act	Rate
5-8-01 P. L. 150	Bonus imposed on capital employed in Pa. or increase thereof	3⅓ mills
4-9-29 P. L. 343	Change in filing date of bonus reports	3⅓ mills
6-10-31 P. L. 490	Bonus paid credited on Domestic bonus when a corporation domesticates	3⅓ mills
6-20-39 P. L. 473	Act of June 10, 1931 re-enacted	3⅓ mills

Foreign Bonus

Receipts—1930-1939

Years Ended May 31	Amount Collected	Rate
1939	$294,198	3⅓ mills
1938	426,283	3⅓ "
1937	497,918	3⅓ "
1936	148,285	3⅓ "
1935	189,235	3⅓ "
1934	206,835	3⅓ "
1933	192,794	3⅓ "
1932	414,285	3⅓ "
1931	584,664	3⅓ "
1930	417,678	3⅓ "

The Act applies to corporations employing capital in Pennsylvania subsequent to the enactment of the Act of 1901. Capital employed prior thereto was not liable to bonus.[2] The decisions go even further. Foreign corporations whose capital was employed in Pennsylvania prior to the passage of the act are not liable to bonus even if they acquired new capital in the State subsequent to the passage of the Act of 1901.[3]

The rate of one-third of one per cent has remained the same from 1901 to the present time. The reduction in rate on bonus from one third to one-fifth of one per cent by the Act of April 20, 1927, P. L. 322 does not apply to foreign bonus.

The Act of May 8, 1901, P. L. 150 follows:

Section 1. Be it enacted, etc., That from and after the

[1] Opinion of Attorney General: 4 Dauphin 232 (1901).

[2] Com. v. Crucible Steel Co. of America, 207 Pa. 308; Com. v. Danville Bessmer Co., 207 Pa. 302.

[3] Com. v. American Steel Hoop Co., 226 Pa. 6; Com. v. Danville Bessmer Co., 207 Pa. 302.

passage of this act all corporations, limited partnerships or joint stock associations, except foreign insurance companies, chartered or created by or under the laws of any other State, or of the United States, or of any foreign country, whose principal office or chief place of business is located in this Commonwealth, or which have any part of their capital actually employed wholly within this State, in addition to complying with the laws now in force as to such corporations, limited partnership or joint-stock associations, shall pay to the State Treasurer, for the use of the Commonwealth, a bonus of one-third of one per centum upon the amount of their capital actually employed or to be employed wholly within the State of Pennsylvania, and a like bonus upon each subsequent increase of capital so employed.

Section 2. That in addition to the duty of complying with the other laws now in force, no corporation, limited partnership or joint-stock association liable to pay bonus under this act shall go into operation or transact any business in this Commonwealth without having first made a report under oath to the Auditor General[4] stating specifically:

First: The State or country in which incorporated or created.

Second. The date of incorporation or organization.

Third. The location of its chief office in this State.

Fourth. The name and address of its president and treasurer.

Fifth. The amount of its bonded indebtedness.

Sixth. The amount of its authorized capital stock.

Seventh. The amount of capital paid in.

Eighth. The amount of capital employed wholly in the State of Pennsylvania.

And each of said corporations, limited partnerships or joint stock associations, shall make a similar report annually thereafter, not later than the thirtieth day of November of each year.

Section 3. The Auditor General and State Treasurer are hereby authorized to settle, in the usual manner and have collected, an account against any corporation, limited partnership or joint-stock association violating the provisions of this act, with a penalty of fifty per centum for failure to make report and pay the said bonus.

In the early years of the act's existence there was a number of court decisions interpreting "capital actually employed within the State." It has been defined as "doing business" in Pennsylvania.[5] "Capital" has been construed as tangible property.[6] It does not include money due either upon a note or open account.[7]

The Act of May 8, 1901 has not been amended. It has, however, been directly affected by the amendments of a number of other acts. Section 706 of the Act of April 9, 1929, P. L. 343 required that Bonus Reports be filed within the time required for the filing of Capital Stock Tax instead of "not later than Nov. 30th" as provided by the Act of 1901. For calendar year corporations this meant by March 15th and for fiscal year companies not later than 75 days after the end of the fiscal year.

[4] See Com. v. Crucible Steel Co. of America, 7 Dau. 20 (1903) interpreting this section.
[5] Com. v. Lycoming Improvement Co., 6 Dauphin 103 (1903); Com. v. Tonopah Mining Co., 12 Dauphin 91 (1909).
[6] Com. v. Imperial Pneumatic Tool Co., 20 Dau. 1 (1916); Com. v. S. & S. Co. of America, 20 Dau. 7 (1916).
[7] Com. v. G. W. Ellis Co., 237 Pa. 328.

Section 202 of the Act of April 9, 1929, P. L. 343 provides for the filing of bonus reports with the Department of Revenue and the settlement by such department.

The Act of June 10, 1931, P. L. 490 amending the Act of June 9, 1881, P. L. 89 provided for credit of foreign bonus, paid by a corporation when it domesticates, on domestic Bonus imposed against it. This act was undoubtedly intended to over-rule the opinion of the lower court which held that a foreign corporation which domesticates itself under the Act of 1881 must pay bonus as a domestic corporation without credit for bonus paid as a foreign corporation.[8]

Following the passage of the Business Corporation Law of 1933 the Attorney General's Department in an opinion to the Secretary of the Commonwealth ruled that the operation of the Act of June 9, 1881, P. L. 89 and its amendment of June 10, 1931, P. L. 490 was so restricted by the repeal of the Act of 1874, upon which they depended, by such Business Corporation Law that a foreign corporation could no longer be domesticated under the Act of 1881, even if the latter were not repealed by the Business Corporation Law of 1933.[9] Although the same result could be arrived at by the officers or others interested in the foreign corporation forming a new domestic corporation under the Business Corporation Law of 1933 no credit may be allowed for bonus paid by the foreign Corporation as was permitted under the Act of 1931.

The Act of June 20, 1939, P. L. 473, amending the Act of April 20, 1927, P. L. 322, as amended, provided for the crediting of foreign bonus paid by a corporation which later becomes a Pennsylvania corporation by exempting from payment of bonus, capital stock equal to the capital upon which such foreign corporation has theretofore paid bonus. This act would seem to over-rule the opinion of the Attorney General's Department, supra. It provides that "any corporation, created by or under the laws of any other state and authorized by a certificate of authority to do business in this Commonwealth, becoming a corporation of this Commonwealth in the manner provided by law" is entitled to the credit mentioned. This provision would seem to impose only two conditions for bonus credit. 1. Possession of a certificate of authority to do business in Pennsylvania by the foreign corporation. 2. Formation of the new domestic corporation according to the Business Corporation Law of 1933.

Domestic Bonus

Bonus imposed on corporations organized under the laws of the Commonwealth, commonly called Domestic Bonus, is not a tax but the consideration paid for a charter,[1] although one of the earlier acts, that of April 21, 1854, P. L. 437 expressly refers to the bonus as a tax.

The payment of a bonus on the charter of a corporation at the time of a grant does not exempt the grantee of the franchise from all taxation, except such as the state has reserved in the charter itself the right to impose. All such grants are taken subject to the sovereign power of the grantor.[2]

Prior to the Constitution of 1874 corporations in Pennsylvania were organized pursuant to the provisions of special acts or those of a few general acts applying to certain kinds of corporations. These special acts usually provided for the payment of a certain amount of bonus. The earliest of such acts was that of February 18, 1936, P. L. 36, incorporating the Bank of the United States as a Pennsylvania corporation after the expiration of its charter from the Federal Government. By the terms of such act this corporation was required to pay $2,000,000.00 "in consideration of the privileges granted by this act and in lieu of all taxes on dividends."[3]

The first general act fixing the payment of bonus is that of April 7, 1849, P. L. 563. The second section of such act provided that corporations organized under the act to manufacture woolen, cotton, flax or silk goods, or iron, paper, lumber or salt should pay a bonus of one-half of one per cent upon the capital stock, in five annual installments, the first of which was to be paid in one year from the time of filing the Certificate of Incorporation. A supplement to this act, that of April 20, 1864, P. L. 191 extended its provisions to corporations manufacturing mineral oils. The General Corporations Act of April 29, 1874, P. L. 73, repealed the Act of 1849 and its supplements.

The next general act pertaining to domestic bonus is that of April 21, 1854, P. L. 437, called the "Joint Tenant Act." This act provided for the incorporation of companies for the purpose of developing mineral lands but limited such corporations to joint owners, tenants in common and joint tenants of such mineral lands. Bonus, called a "tax" as noted above, was imposed at the rate of one-half of one per cent upon the capital stock and also for the first time, upon any subsequent increase thereof. Bonus was payable in four equal annual installments. In construing this act it was held that a corporation formed thereunder was not relieved from full payment of bonus

[1] Com. v. Bailey, Banks & Biddle Co., 20 Pa. Super. 210; Com. v. Large Distilling Co., 39 Dauphin 414.
[2] Minot v. Phila. W. & B. R. R. Co., 7 Phila 555 (1870).

because it reduced its capital stock by one-half, under the Act of April 10, 1862, which authorized a reduction of its capital stock, two days before an installment fell due.[4]

The Act of May 1, 1868, P. L. 108, was the first one to provide generally for the payment of bonus by corporations. It applied to those formed under both general and special laws but "railroad, turnpike, bridge or cemetery companies and companies incorporated for literary, charitable or religious uses" were excepted. Bonus was imposed at the rate of one-fourth of one per cent upon authorized capital stock and was payable in two equal annual installments. Payment of the first installment was necessary before the charter could be issued. Bonus at the same rate and payable in the same manner was due on any subsequent increase of capital stock. This act repealed the Act of 1854, Section 6, so far as corporations created under it after May 1, 1868 were concerned and left it to apply only to those formed before such date.[5]

Railroads can not be incorporated under the Act of April 29, 1874, P. L. 73 but are formed under the Act of April 4, 1868, P. L. 62 which contained no provision for the payment of bonus. In later years the Attorney General's Department ruled that the exemption granted to railroad companies from the payment of bonus, both upon original capital stock and subsequent increases thereof applies only to companies constructing, owning or operating railroads not to those merely leasing or controlling them.[6]

The Act of March 21, 1873, P. L. 28, which provided for the incorporation of iron and steel manufacturing companies, exacted from such corporations a bonus of one-fourth of one percent payable in five equal installments. Companies manufacturing coke, glue, sand-paper, hair, kent, woolen goods and paper were made subject to this bonus by the Act of April 18, 1873, P. L. 76 amending the Act of March 21, 1873, P. L. 28 and the bonus was required to be paid in two installments instead of five.

The Act of April 18, 1874, P. L. 61 provided for the increase of capital stock of corporations and for the payment of bonus upon such increase at the rate of one-fourth of one per cent upon the authorized amounts, payable in two installments. This act was construed as imposing bonus upon actual increase and not authorized increase, which may never be executed.[7]

In 1874 the present constitution of the Commonwealth was adopted and the General Corporations Act, the Act of April 29, 1874, P. L. 73, was passed. This act applied to all corporations incorporated subsequent to its adoption and to all those previously chartered which accepted its provisions. Section 44 re-enacted the bonus provisions of the Act of 1868 (May 1, P. L. 108). It did not provide for bonus on railroad and canal companies as such corporations could not be incorporated under the Act of 1874 but were formed under the Act of April 4, 1868, P. L. 62 which included no provision for the payment of bonus by these two classes of corporations. Corporations of the first class (the present non-profit corporations) and building and loan associations were added to the list of exceptions contained in the Act of May 1, 1868, P. L. 108, that is, turnpike, bridge or cemetery companies and those organized for literary, charitable or religious purposes. A corporation incorporated under the Act of 1874 for a period of 20 years was held entitled to renew its charter for a similar period by paying bonus at the rate provided in the Act of 1874 and not at a higher rate.[8]

The Act of May 22, 1878, P. L. 97 amended section 44 of the Act of 1874, P. L. 73 by providing "when any corporation shall have reduced its capital stock in accordance with the provisions of the 23d section of this act, such corporation shall not be liable in the aggregate to a greater bonus than one-fourth of one per cent upon the capital stock as altered and reduced. Apparently this change was designed to apply to corporations which reduced their authorized capital stock before the second installment of bonus was due under previous acts.

Mutual saving fund and building and loan associations were exempt from payment of bonus by the Act of April 10, 1879, P. L. 16.

The Act of May 7, 1889, P. L. 115 provided for imposition of bonus upon the authorized amount of all increases of capital stock, instead of upon the actual amount of such increases, as had theretofore been the practice under court decisions.[9] Agricultural Societies were exempted from bonus under this Act.

Under the Act of June 15, 1897, P. L. 155 came the first change in bonus rate since 1868. This act provided that all corporations formed under the Act of April 29, 1874, or any of its supplements should pay a bonus of one-third of one per cent on the authorized amount of their capital stock, the full amount to be paid before the charters should issue, and a similar bonus on the authorized amount of all subsequent increases of capital stock, to be paid in full instead of in installments as theretofore, immediately after the authority for the increase had been given.

All corporations, except first class corporations and building and loan associations were made subject to bonus by the Act of May 3, 1899, P. L. 189. By its terms the Act applied to corporations created after its adoption and to all increases in capital stock authorized after its passage. Since the act omitted all mention of railway companies among the corporations exempt from bonus all domestic companies formed under the Act of April 4, 1868, P. L. 62, became liable. Prior to this act domestic railroad companies were exempt from bonus both on creation and on increase of capital stock up to the limit of $150,000 per mile as authorized by the Act of June 4, 1883, P. L. 67.[10]

The Act of February 9, 1901, P. L. 3, provided that in case of increases in capital stock bonus was to be imposed on actual increase instead of authorized increase, thus reinstating the practice that prevailed prior to the Act of May 7, 1889, P. L. 115. A return of actual increase in stock was required to be filed within 30 days from such increase and the bonus therein was required to be paid concurrently. It has been held, however, that failure to make this return and pay the bonus does not render the issue of shares void.[11] Increases in corporate indebtedness were also required to be reported but no bonus was imposed upon either corporate indebtedness or the increase thereof.

The Attorney General's Department in an opinion construing the Act of 1901 held in reference to a company

which had been incorporated with a capital of $400,000 on which bonus was paid and which later because of losses reduced the par value of its shares from $100 to $25 each and issued $300,000 worth of additional stock (the amount necessary to restore the original capital of $400,000) that there was no actual increase of capital or indebtedness and, therefore, no bonus due.[12]

A second act passed by the Session of 1901, that of May 8, 1901, P. L. 149, imposed bonus at one-third of one per cent upon the capital stock of partnership-associations formed under the Act of June 2, 1874, P. L. 271, and limited partnerships organized under the Act of May 9, 1899, P. L. 261. The Act expressly forbid Recorders of Deeds in the several counties of the Commonwealth from accepting for record an article of associations, forming a partnership association under either of the acts mentioned, or an amendment thereof "unless there be annexed thereto a receipt of the State Treasurer for the amount of bonus due." If such a partnership association failed to pay the required bonus the articles of association became void and the parties thereto became liable as general partners. Limited partnership associations formed under the Act of 1899 are subject to the payment of bonus under the Act of 1907.[13]

The Act of May 29, 1901, P. L. 349 imposed bonus at the rate of one-third of one per cent upon all of the capital stock of a corporation, formed by consolidation or merger of two or more companies, in excess of the capital stock of the several corporations so consolidating upon which the bonus required by law was previously paid. The newly formed corporation was not allowed to do business until bonus was paid. For similar bonus provisions see the Act of May 3, 1909, P. L. 408.

An act similar to that of May 29, 1901, P. L. 349, as far as bonus provisions were concerned, but limited to banks and trust companies was the Act of May 28, 1913, P. L. 357. It imposed bonus upon the authorized capital stock of the bank or trust company formed by merger or consolidation in excess of the total authorized stock of the corporations merged or consolidated.

The Act of July 12, 1919, P. L. 914, imposed bonus, in the case of corporations having stock with nominal or no-par value, upon an arbitrary value of $100 per share of the no-par stock. The Pennsylvania Supreme Court held that this act was constitutional.[14] No bonus is imposed under this act on conversion of par value stock into shares of no par value.[15] This provision for arbitrarily valuing no-par stock at $100 for bonus purposes, however, proved unsatisfactory and was finally changed by the Act of April 20, 1927, P. L. 322, as explained below.

The Act of May 17, 1921, P. L. 682, provides that insurance companies shall not have or exercise any powers nor have Letters Patent issued to them until bonus has been paid. Mutual companies, without capital stock are not subject to bonus.

The Act of April 20, 1927, P. L. 322, reduced the bonus rate to one-fifth of one per cent. It imposed bonus on par value stock as theretofore. As to no-par stock, however, the basis was changed being imposed on stated capital which was defined as the "capital with which the corporation begins business, as stated in the certificate of incorporation or reorganization or the joint agreement of merger or consolidation, or as stated or set forth in the proceedings under which such stock is issued."

According to the language of the Act bonus is imposed:

(a) Upon the amount of the capital stock which any corporation, hereafter incorporated, is authorized to have, and upon the amount of actual increase of the capital stock of any corporation heretofore or hereafter incorporated;

(b) Upon the amount of the capital stock which any corporation, other than a banking corporation, is authorized to have, upon the renewal or extension of its charter;

(c) In the case of the merger or consolidation of two or more corporations, upon the amount of the capital stock of the new or merged corporation in excess of the amount of the capital stock of the several corporations, so merging or consolidating, upon which the bonus required by law has been theretofore paid;

(d) In the case of a trust company, incorporated for the purchasing, taking over, merging, or consolidating with any other trust company, or purchasing, taking over, or consolidating with any bank, banking company, or savings institution, where such purpose is expressed in its charter, and in the case of a bank, or banking company, or savings institution, incorporated to similarly acquire a trust company, bank, banking company, or other savings institution, upon the amount of the capital stock authorized by its charter which is in excess of the amount of the capital stock of the corporation or corporations purchased, merged, or acquired, and upon which the bonus required by law has been theretofore paid;

(e) In the case of a trust company which, after its incorporation, purchases, merges, or consolidates with any other trust company, or purchases, or consolidates with, any bank, banking company, or savings institution, and, in the case of a bank, banking company or savings institution, which similarly purchases, merges, or consolidates with any other bank, banking company, trust company, or savings institution, upon the amount of the capital stock in excess of the combined capital stock of the several corporations thus acquired, merged or consolidated, and upon which the bonus required by law has been theretofore paid;

(f) Upon the amount of the capital which a partnership association, hereafter formed under the provisions of the act, approved the second day of June, one thousand eight hundred and seventy-four (P. L. 271), entitled "An act authorizing the formation of partnership associations, in which the capital subscribed shall alone be responsible for the debts of the association, except under certain circumstances," and a partnership hereafter formed under the provisions of the act, approved the ninth day of May, one thousand eight hundred and ninety-nine (P. L. 261), entitled "An act authorizing the formation of partnerships in which one or more, or all of the partners, may limit their liability for the debts of the partnership to the amount of capital subscribed by such partner, or partners, respectively and providing penalties for violation of its provisions," shall have, and upon the amount of any increase of the capital of any such partnership association or partnership heretofore or hereafter formed.

Building and Loan Associations are exempt from bonus under this act as are corporations of the first class provided

[12] In re: Franklin Fire Insurance Company, 45 C. C. 612 (1917).
[13] Limited Partnership Taxation, 28 C. C. 582 (1903).
[14] Com. v. Budd Wheel Co., 290 Pa. 380 (1927).
[15] Com. v. Wayne Sewerage Co., 287 Pa. 42 (1926).

they have no capital stock. According to an opinion of the Attorney General's Department first class corporations with capital stock were subject to bonus.[16] No-par shares may be increased in number without additional bonus provided there is no increase in stated capital. Additional bonus is imposed only on the amount of the increase of stated capital. Bonus on corporations and partnerships is payable to the Secretary of the Commonwealth as is bonus on increase of capital stock of a corporation but bonus on increase of capital stock of a partnership is paid to and return is filed with the Auditor General.

The Act of April 25, 1929, P. L. 671, amending the Act of April 20, 1927, P. L. 322 required partnerships upon increase of capital to file their returns with the Department of Revenue and pay bonus thereto also.

The Act of June 10, 1931, P. L. 490 grants a credit against Domestic Bonus for Foreign Bonus previously paid by the corporation, if and when it domesticates in Pennsylvania. It amended the Act of June 9, 1881, P. L. 89.

By the Act of April 21, 1937, P. L. 315, credit unions were excused from payment of Domestic Bonus. This act amended the Act of April 20, 1927, P. L. 322.

Under the Act of June 20, 1939, P. L. 473 a foreign corporation which domesticates in Pennsylvania is "entitled to a credit on bonus, by exempting, from the payment of bonus, capital stock equal to the capital upon which such foreign corporation has theretofore paid bonus under existing laws of this State." This Act, similar in some of its provisions to the Act of June 10, 1931, P. L. 490 referred to above, amended the Act of April 20, 1927, P. L. 322. It was apparently enacted to remove the confusion as to whether the Corporation Code of 1933, P. L. 364 had voided the Act of 1931.

The most recent change in Domestic Bonus Law was effected by the Act of June 21, 1939, P. L. 609. This Act which amended Sections 1, 2, 4 and 6 of the Act of April 20, 1927, P. L. 322, retained the bonus rate of one-fifth of one per cent but exacted a new requirement from all Pennsylvania corporations—an annual domestic bonus report. Theretofore corporations had been required to file a Treasurer's or President's return whenever an actual increase in capital stock was made. In practice some corporations inceased their capital stock but failed to file returns and since the Commonwealth had no way of checking such increases in capital stock substantial amounts of bonus remained unpaid. This Act was designed to correct this condition.

The Act also granted to a Pennsylvania corporation formed by the merger or consolidation of foreign corporations with Pennsylvania corporations a credit against the payment of domestic bonus for the foreign bonus previously paid. As mentioned above the Act of June 10, 1931, P. L. 490, provided for a credit of foreign bonus paid by a foreign corporation, when it domesticated but no recognition had been given to the situation where one or more foreign companies joined with one or more domestic corporations in a merger or consolidation. The Act put the two situations on a comparable basis.

Another major change of this Act was concerned with the definition of "stated capital." In the Act of 1927 this term as it applied to no-par shares on organization was defined as "the capital with which the corporation begins business as stated in the certificate of incorporation. . . ." This allowed a corporation to authorize the issue of a large number of no-par shares but to begin business with a small number of shares for which a nominal stated capital was fixed. When an additional number of the authorized no-par shares was issued, the increase of the stated capital could also be fixed at a nominal amount regardless of the consideration received from the sale of the newly issued stock. In the Act of 1939, however, such stated capital was defined as "the value expressed in dollars, of the entire consideration received by the corporation for or on account of its authorized shares with no par value set forth in the articles of incorporation or applicable thereto, irrespective of whether the consideration be allocated or applicable to stated capital, or to paid-in capital . . ." It is to be noted that stated capital does not include paid-in surplus and the Office of the Secretary of the Commonwealth takes the position that any part of the consideration received from the issue of no par shares which is allocated to paid-in surplus, is not subject to bonus. In both the Act of 1927 and that of 1939 stated capital as it applied to par value shares is the same, that is, "the number of shares of capital stock multiplied by the par value thereof."

[16] Opinion of Attorney General: 75 Pbgh. L. J. 824.

Corporate Net Income Tax

The corporate net income tax of 1935 was not the first tax of this kind in Pennsylvania. Although it has been operative only five years it seems to be firmly fixed in the tax system of the Commonwealth. The rate of the tax will undoubtedly be increased or decreased as the need for state revenue is more or less acute but the tax seems here to stay as it is based primarily on the "ability to pay."

The Act of May 16, 1935, P. L. 208 bears the title:

"An Act to provide Revenue for state purposes by imposing an excise tax . . . on the net incomes of certain corporations, joint stock associations and limited partnerships . . ."

The State Supreme Court in discussing the nature of the State Individual Net Income tax,[1] which was passed by the same Legislative Assembly, decided "an income tax is a property tax." This individual net income tax, which was graduated as to rate, was held to be unconstitutional as it violated the uniformity requirement of Article IX, Section 1, of the Pennsylvania Constitution.[2]

In an appeal from the settlement of the Corporate Net Income tax the Court did not discuss the nature of the tax but sustained it for the reason there could be no lack of uniformity as in the Individual Net Income Tax because the rate was uniform and not graduated. It is to be noted, as far as the nature of the Corporate Net Income Tax is concerned, that the language of the decision in the individual tax is applicable to the corporate tax also. The title of the Act of 1935 calls the tax an "excise tax", however, as does section 3 of the act.

The original State tax on net earnings or income was that of April 30, 1864, P. L. 218. This act imposed a tax of 3% upon the net earnings or income of "every incorporated or unincorporated banking and savings institution and deposit and trust company, every gas company, every express company, bridge company, insurance company, foreign insurance company, building and loan association, and manufacturing, mechanical, and mining and quarrying company and all other companies and corporations doing business in Pennsylvania, except those specified in the first section of this act, not paying a tax to the state on dividends" (exceptions: all transportation companies).

The Act of May 1, 1868, P. L. 108, section 6, imposed the tax upon "every unincorporated bank and savings institution and express company, and all corporations except those liable to the tax on tonnage, and foreign insurance companies."

All corporations subject to the payment of a capital stock tax were exempted from the tax by the Act of March 21, 1875, P. L. 46, section 2.

Under the Act of June 7, 1879, P. L. 112, section 10, all corporations "liable to a tax on capital stock or gross receipts . . . and the banks, trust companies and savings institutions having capital stock and foreign insurance companies" were exempted.

Section 27 of the Act of June 1, 1889, P. L. 420 provides for the imposition of the tax exempting (1) corporations paying a capital stock tax, (2) incorporated banks, (3) foreign insurance companies. The section was intended to apply to such corporations as, owing to their peculiar nature, might not be included among those taxed by other sections of the act. The only corporations subject to the tax under the act were those without capital stock, such as savings funds institutions.

In construing this act it was held the tax was a franchise tax and corporations subject to the tax were not subject to double taxation although the net income was derived from interest on bonds taxable under the 4th section of the Act of June 30, 1885, P. L. 193.[3]

The next Act to impose a corporate net income tax was the Emergency Profits Tax Act of 1923[4] which was in force for two years, 1923 and 1924. Tax at the rate of one-half of one per cent was imposed upon the net income of every corporation except building and loan associations and those companies required to pay a tax upon gross premiums. The net income subject to tax was based upon the net income as reported to the Federal Government except that it did not include that of corporations subject to the gross receipts tax and Anthracite coal tax. Nor did it include interest from United States and Commonwealth of Pennsylvania bonds, etc. and dividends from corporations subject to tax under this act. No allowance was made for taxes paid to the Federal Government.

In the case of corporations, the entire business of which was not transacted in Pennsylvania, the net income was allocated to this state by means of three fractions quite similar to those in the present act.

The act was held to be constitutional.[5] It was held to apply to trust companies liable to a tax on shares under the Act of June 13, 1907, P. L. 640.[6]

Subsequent to 1924 there was no state tax on corporate net income in effect except the tax on net earnings imposed by the Act of 1889 but so limited that it applied only to savings fund societies without capital stock, until the Act of May 16, 1935, P. L. 208 was passed. This act imposed a tax at the rate of 6% for the years 1935 and 1936 on the net income of both domestic corporations and foreign corporations doing business in Pennsylvania with certain corporations expressly exempt. It was doubted at the time the tax was proposed that it would be held constitutional. However, the Supreme Court held it constitutional.[7] It should be noted that no violation of the uniformity requirement of the State Constitution was alleged on the grounds that the net income of a corporation was taxed but that of a general partnership or an individual enterprise engaged in the same business was not so subject. It will be recalled in a gross receipts tax case the United States Supreme Court held such tax act was unconstitutional in so far as it imposed the tax on corporations operating taxicabs and failed to impose the tax on general partnerships and individuals engaged in the same business.[8]

The Act of 1935 provides for an allocation to Pennsylvania of income of corporations, the entire business of which was not transacted in Pennsylvania, by means of the same fractions used in the 1935 Franchise Tax formula. The first fraction has for its numerator tangible assets in Pennsylvania and for its denominator tangible

[8] Com. of Pa. v. Quaker City Cab Co., 277 U. S. 389.

assets everywhere. The second and third fractions have for their numerators wages, salaries or commissions and gross receipts respectively assigned to this Commonwealth and for their denominators total wages, etc. everywhere, and total gross receipts respectively. In determining the wages, etc. and the gross receipts assignable to Pennsylvania the act differs from the Emergency Profits Tax Act of 1923 in that the location of the office or offices "owned or rented" by the corporations is made the determining factor in the allocation while in the latter act the assignment of wages, etc. and gross receipts is made "under rulings of the Auditor General."

The Corporate Net Income Tax Act was amended in 1936 and the rate was increased from 6% to 10% and a credit granted in full against net income for dividends received from other corporations.[9]

The Act of April 8, 1937, P. L. 227 continued the tax for the years 1937 and 1938 but reduced the rate from 10% to 7%. It also limited the filing of consolidated reports to corporations permitted to file such reports with the Federal Government. Deduction for Federal taxes was limited to taxes paid for the preceding calendar year or accrued for the current year. Allocation of gross receipts to Pennsylvania was redefined so as to include expressly fees and commissions and dividends and interest received. A number of other changes were made by this act as to payment of the tax, rate of interest, fiscal year reports, etc.

Under the Act of May 5, 1939, P. L. 64, the tax was continued for the years 1939 and 1940 at the rate of 7%. Title insurance companies were expressly exempted from the tax. Corporations having capital or property employed in the Commonwealth were made subject to the tax in addition to those doing business in the State. The Dauphin County Court had held that a domestic corporation not doing business in Pennsylvania was not subject to the tax.[10]

The requirement that an office to which wages and salaries or gross receipts might be allocated must be "owned or rented" was changed by the substitution of the word "maintained" for "owned or rented" under this act. Likewise a special method of allocation of income was provided for insurance companies. Statutory authority was granted to the Department of Revenue to resettle the tax where a change by the Federal Authorities resulted in a reduction in the tax liability.

Alcoholic Beverage Taxes

The distribution of liquor in Pennsylvania is a state monopoly under the control of the Liquor Control Board. Thus the price of liquor is controlled by the Commonwealth and revenue is derived therefrom. In addition, excise taxes are imposed on liquor, wine and beer and all persons engaged in the handling of such products are subject to license and pay license fees.

The Constitution of Pennsylvania does not contain any provisions applicable to the taxation, licensing or regulation of the sale of alcoholic beverages. It was held that the 1935 act amending the Beverages License Act is not unconstitutional because of the incidental inclusion of criminal and revenue provisions in an act the main purpose of which is the exercise of police power or because the title covers more than one subject or because the title does not give sufficient notice that the act is regulatory of the business of a distributor by the Liquor Control Board.[1] Nor does Beverage License Act violate Act III, Section 7 of the Constitution by establishing a classification in liquor trade regulating only malt and brewed beverages and not applying to other liquor trades. The title of the act does not fail to give notice of its provisions as required by Act III, Sec. 3 of the Constitution because in Sec. 23 (1) amusement licenses are required of certain persons and in Sec. 23 (v) the sale of food below a fair value is prohibited.[2]

Prior to the repeal of the prohibition amendment to the Federal Constitution the Act of February 19, 1926, P. L. 16, provided for the issuing of permits by the State for the manufacture, etc., of any alcohol or alcoholic liquid. The fee for every permit issued under this Act was $100.

Following the repeal of the prohibition amendment the Beverage License Law, the Act of May 3, 1933, P. L. 252, was passed. Under this Act the county treasurers were authorized to issue distributors licenses and retailers licenses, etc. The license fees in case of distributors were graduated according to the population of the municipalities or townships and ranged from $37.50 in municipalities or townships with a population of less than 1500 to $150 in those having a population of 150,000 or more. In the case of retailers the license fees are also based on population and ranged in amount from $75 in the case of municipalities or townships with a population of less than 1,500 to $300 in the case of those having a population of 150,000 or more. License fees were also required from dining, club and buffet cars and boats or vessels. These latter fees were paid direct to the state treasurer through the Department of Revenue.

In 1933 in the regular session there was also passed the 1933 Beverage Tax Law, the Act of May 5, 1933, P. L. 284. This act provided for taxes on all beverages manufactured in the Commonwealth or imported into the Commonwealth. They were at the rate of ½ cent per pint. Manufacturers and distributors were made responsible for the payment of the tax to the Commonwealth. The payment of the tax was evidenced by affixing Beverage Tax Stamps or crowns to the original containers.

On November 22, 1933, there was passed the Spirituous and Vinous Liquor Floor Tax Law, P. L. 5 (1933-34). In this Act appears the notation that it was signed by the Governor at 5:35 p. m. on the 22d day of November, A. D. 1933. It provided for a state floor tax on spirituous and vinuous liquors lodged or stored within the Commonwealth at any time from the date of the Act to the date of the 21st Amendment to the Constitution of the United States, ratified by conventions in at least three-fourths of the several states. It was imposed at the rate of $2.00 on each proof gallon or wine gallon when below proof.

The Pennsylvania Liquor Control Board which manages the State Stores monopoly for the sale of liquor in Pennsylvania was established by the Act of November 29, 1933, P. L. 13, (1933-34).

The State stores system was established by the Pennsylvania Liquor Control Act, the Act of November 29, 1933, P. L. 15, (1933-34). It required all applications for hotel, restaurant or club liquor licenses to be made to the Board and the Board was given the authority to issue the license. License fees ranging from $150 in municipalities having a population of less than 1,500 to $600 in the case of those with a population of 140,000 and more were provided for in the case of hotels and restaurants. Club liquor license fees were set at $50 except clubs which cater to groups of non-members in which case the fees were the same as for hotels and restaurants located in the same municipality. Public Service Liquor Licenses were also issued by the Board to railroad or pullman companies at the rate of $20 for each car and to steamship companies for $100 for each vessel. Sacramental wine permits were also issued for a fee of $100 annually. The Board also had the authority to issue importers licenses which permitted the holders to bring or import from other states, foreign counties, etc., to be sold outside Pennsylvania and exclusively to the Pennsylvania Liquor Stores within the Commonwealth. The charge for such license was $100 per annum.

The Act of December 5, 1933, P. L. 1938 (1933-34), imposed the spirituous and vinous liquor tax. This tax was imposed on distilled spirits at the rate of $1.00 per proof gallon; on rectified spirits at the rate of 30 cents per proof gallon and on wines at the rate of ½ cent per unit of proof per wine gallon. In the case of importers the payment of taxes was evidenced by the affixing of "spirituous and vinous liquor tax stamps" to the containers.

A malt liquor tax was imposed under the provisions

[1] Bosnjak v. Grosscup, et al., 42 Dauphin 18 (1935).
[2] Com. v. Katz, 31 D. & C. 356 (1937).

of the Act of December 5, 1933, P. L. 50 (1933-34), amending the Act of May 5, 1933, P. L. 284. In this Act the word "beverage" was changed to "malt liquor" and the law is officially called the "Malt Liquor Tax Law." No changes were made in the rates of the tax.

The alcohol permit law of February 19, 1926, P. L. 16, was amended by the Act of December 8, 1933, P. L. 57 (1933-34). The permit fees were increased very substantially in the case of breweries and wineries being made $1,000 and $250, respectively, per annum. In the case of distilleries the fees were put on a graduated basis being $2,500 per annum if the authorized annual production was less than 500,000 proof gallons. Such fees increased to $25,000 per annum if the authorized annual production was 15,000,000 gallons or more. The fee for all other permits remained at $100.

The Act of December 20, 1933, P. L. 75 (1933-34), amended the Act of May 3, 1933, P. L. 252, and became known officially as "The Malt Liquor License Law" instead of the "Beverage License Law." The amounts of the license fees are not changed.

The original spirituous and vinous liquor tax law of December 5, 1933, P. L. 38 (1933-34) was amended by the Act of December 22, 1933, P. L. 91 (1933-34). No changes in tax rates were made. The Act, however, contained the following provision:

> "This act shall cease to be effective upon the effective date of any Act of Congress providing for participation by the states, or by those states which do not tax distilled spirits and the proceeds of the tax imposed and collected by the United States upon distilled spirits."

The Spirituous and Vinous Liquor Floor Tax Law, the Act of November 22, 1933, P. L. 5 (1933-34), was amended by the Act of December 22, 1933, P. L. 94 (1933-34), the rate of tax has not changed but the amendment provided "that upon written application by any person liable for the tax imposed by this Act filed with the Department, the Department may grant an extension of time for payment of such tax, in whole or in part, for a period not later than the 31st day of December, one thousand nine hundred and thirty-four." The tax, or portion thereof in respect to which the extension is granted, shall thereupon be due and payable on the date of the expiration for the period of the extension. This act several years later was held unconstitutional.[3]

The Beverage Tax Law first imposed by the Act of May 5, 1933, P. L. 284, and as amended by the Act of December 5, 1933-34, P. L. 50 (1933-34), was further amended by the Act of July 9, 1935, P. L. 628. The name of the act was again changed from "Malt Beverage Tax Law" as it appeared in the act of December 5, 1933-34, to the "Beverage Tax Law." Corresponding changes were made throughout the whole act. No changes were made in the rates of taxes.

The Act of July 18, 1935, P. L. 1217, amending the original Beverage License Law of May 3, 1933, P. L. 252, called by the first amending act that of December 20, 1933, P. L. 75 (1933-34), the "Malt Liquor License Law," again made the official name of the law the "Beverage License Law." The Act provided for the issuing of a master license to a railroad or a pullman company to cover the maximum number of cars which the company shall estimate that it will operate within the Commonwealth on any one day. The license fee for each car operated more than covered by the license was set at $10 for each extra car. The license year was changed in the case of distributors and importing distributors being made such as might be established by the Board for the particular district in which the license issued. The schedule of license fees was changed by this act. In the case of manufacture, it was set at $1,000 for each place of manufacture and in the case of a distributor the charge was $400 but in the case of an importing distributor the fee was $900. As to retailers the fees ranged from $100 in municipal units with less than 10,000 population to $300 in those with a population of 150,000 or more. Public Service license for cars was set at $10 per car for the maximum number of cars operated on any one day on which malt or brewed beverages are sold. The fee for a vessel or boat remained $50.

The alcohol permit law of 1926 as last amended by the Act of December 8, 1933, P. L. 57 (1933-34) was further amended by the Act of July 18, 1935, P. L. 1283. This act re-defined the term "distillery" and excluded therefrom wineries where alcohol is derived from by-products of wine production by distillation for the sole purpose of adding to the fermented products to fortify the same." Persons were allowed to manufacture wine in Pennsylvania by fermentation only and with no alcohol or alcoholic product added thereto by way of fortification and sell the same to a permit holding winery or to Pennsylvania State Stores upon the filing of a bond of $500 and the securing of a permit for a fee of $20 per annum.

An emergency tax of 10% of the net price of all liquors sold by the Liquor Control Board was imposed by the Act of June 9, 1936, P. L. 13. This tax was to be collected by the Board from the purchasers of the liquor at the State Stores.

By the Act of August 6, 1936, P. L. 92, an excise tax of 4% upon the purchase price of all distilled, rectified and blended spirits was enacted. The tax imposed was to be paid by persons delivering such spirits in the Commonwealth to the Board at the time of delivery. By its terms this act was to expire May 1, 1937.

The emergency tax of 10% upon liquors sold by the Board was continued until June 1, 1939 by the Act of April 8, 1937, P. L. 250.

The Malt Beverage Tax Law is further amended by the Act of April 29, 1937, P. L. 527. The rate of tax was not changed. This amendment provided for the imposition of an additional tax on beverages shipped from other states to Pennsylvania where such other states imposed a higher tax or fee upon malt or brewed beverages manufactured within or imported into such states than was imposed in Pennsylvania.

The Pennsylvania Liquor Control Act, the Act of November 29, 1933, P. L. 15 (1933-34), as amended is further amended by the Act of June 16, 1937, P. L. 1762. No change was made in the amount of the license fees however. The changes made in the amendment related chiefly to licenses, hearings, furnishing bond, etc.

The Beverage License Law is further amended by the Act of June 16, 1937, P. L. 1827. No changes were made in the amounts of fees required for licenses. Such changes in the Act were confined to requirements for transfers, applications for renewals, bonds, etc.

The emergency tax of 10% on all liquors sold by the

[3] Com. v. A. Overholt & Co., 331 Pa. 182.

State Liquor Control Board at the State Stores was continued for a further two year period expiring June 1, 1941, by the Act of May 4, 1939, P. L. 46.

The Liquor Control Act of 1933 as amended was further amended by the Act of June 24, 1939, P. L. 802. This act changed the requirement for the population of townships for which a fee of $200 is charged. Formerly townships having a population of 1500 or more but less than 10,000 were charged this fee. Under the amendment the population range for the $200 fee was from 1500 to 12,000. The fee of $300 was charged townships with a population of 12,000 or more but less than 50,000 instead of with a population of 10,000 or more but less than 50,000.

Mercantile License Tax

The mercantile license tax is a tax on the business of merchants, as measured by their gross receipts derived from their sales. It is imposed under the general power of taxation and not under the police power[1] The original tax as imposed by the Act of April 2, 1821, P. L. 241, was a license tax and not a tax on business, and remained so for some years.

It was held that the basic law under which the present tax is imposed, the Act of May 2, 1899, P. L. 184, is constitutional and is a general law within the meaning of Section 1 of Article IX of the Pennsylvania Constitution, although the mercantile appraisers who assess the mercantile tax were appointed differently in cities of the first class from those appointed in counties.[2]

[1] Com. v. Thomas Potter, Sons & Co., 159 Pa. 583 (1894).
[2] Knisley v. Cotterel, 196 Pa. 614 (1900).

As originally created by the Act of April 2, 1821, P. L. 241, the tax was applicable to dealers in foreign wares or merchandise only. It was a license tax and a dealer selling foreign goods without a license was subject to prosecution. Dealers in goods sold by the importers in the original package were not required to be licensed.

Dealers in foreign goods who conducted more than one store were required to have a license for each store under the Act of March 4, 1824, P. L. 32. City and County treasurers were required to publish lists of persons subject to license. This act repealed the exemption of the Act of 1821 as to dealers in goods imported in the original packages.

The Act of April 7, 1830, P. L. 387, classified dealers subject to the license in eight groups according to their annual sales. This act exempted from its operation feme sole traders whose annual sales amounted to less than $2500 and also restored the exemption as to dealers in goods imported in the original packages which had been removed by the Act of 1824.

Under the Act of May 4, 1841, P. L. 307, Section 10, all dealers became liable to the tax whether they handled foreign or domestic goods. The act exempted all dealers whose annual sales did not exceed $1000 and those selling goods of their own manufacture or growth. It also continued the exemption of feme sole traders whose annual sales did not exceed $2500 and importers of foreign goods sold by them in the original packages.

The Act of April 16, 1845, P. L. 533, Section 5, provided for the appointment of mercantile appraisers. The 11th section of this act provided that dealers keeping a store or warehouse for the sale of merchandise, where such persons are interested in the manufacture of such merchandise shall be taxable. It contained a proviso, however, "that mechanics, who keep a store or warehouse at their own shop or manufactory, for the purpose of vending their own manufactures exclusively shall not be required to take out any license."

It was said that many dealers evaded the tax imposed by the Act of 1841 by acquiring a small interest in some manufacturing enterprise and then dealing in its product, when their main business was the keeping of a store for the sale of general merchandise. According to this story the Act of 1845 was designed to prevent such evasions.

The Act of April 22, 1846, P. L. 489, Section 12, extended the provisions of the Act of 1845, as to appointment of mercantile appraisers, to all other counties but provided for the appointment of appraisers therein by the county commissioners instead of the courts of common pleas as in Philadelphia and Allegheny Counties (Act of 1845). The 11th section of this act re-enacted the 11th section of the Act of 1845.

The method of appointment of the appraiser in Allegheny County was changed by the Act of March 15, 1847, P. L. 496, which provided for his appointment by the county commissioners.

The 11th section of the Act of 1846 was construed by the Act of February 27, 1868, P. L. 43, as follows:

"The true intent and meaning of the 11th section of an act, . . . is hereby declared to be, that a manufacturer or mechanic not having a store or warehouse apart from his manufactory or workshop, for the purpose of vending goods, such manufacturer or mechanic shall not be classified or required to pay the annual tax and license as is now required in relation to foreign dealers . . ."

There are numerous cases which construe this act of 1868. Generally the act was construed to exempt sales at the factory or workshop and to tax those made at separate stores[3] If a dealer kept separate show rooms and took orders there but made sales only at the factory the business was exempt.[4] Even where the offices and sales rooms of a corporation were separated from the factory by a street the business was held not taxable.[5]

The Act of April 9, 1870, P. L. 59, provided "hereafter manufacturers and mechanics who shall sell goods, wares or merchandise, other than their own manufacture, not exceeding the sum or value of $500 per year . . . shall not be classified or required to pay annual tax or license fee . . ."

"Farmers selling their own produce or occupying a stall or stalls, or sidewalk or part thereof, in any of the markets of a city of the first class, shall not be subject to classification or taxation for mercantile purposes" according to the Act of April 18, 1878, P. L. 28, section 5. The second section of this act provided for the appointment of five appraisers in Philadelphia by the recorder of that city and the city treasurer.

The part of the Act of 1878 providing for the appointment of the five appraisers in Philadelphia by the recorder and city treasurer was repealed by the Act of April 19, 1883, P. L. 9.

By the Act of June 5, 1883, P. L. 87, "persons engaged in the business of manufacturing or vending nostrums or patent medicines . . . shall . . . be deemed . . . to be dealers in merchandise and shall be classed and rated for a yearly license in the same manner, . . . as other dealers . . ." Druggists were taxable as venders if patent medicines.[6]

The local Act of March 30, 1867, P. L. 630, was repealed by Section 3 of the Act of April 20, 1887.[7] Said Act of 1867 referred to the appointment of a mercantile appraiser by the councils of the city of Scranton.

The next legislation relative to the mercantile license tax was the Act of May 2, 1899, P. L. 184, the basis of the present tax. This act changed the arbitrary and unscientific classifications theretofore provided for by earlier acts and imposed the tax uniformly on the basis of the amounts of sales, at different rates on dealers who are retailers, wholesalers or dealers at exchanges and boards of trade.

Section 1 of this act imposed an annual license tax of $2.00 on each retail vender of or retail dealer in goods, wares and merchandise. In addition, "all persons so engaged shall pay one mill . . . on each dollar of the whole volume, gross, of business transacted annually." Each wholesale vender or dealer was required to pay an annual license tax of $3.00 and one-half mill additional on each dollar of the whole volume gross of business transacted annually. Each dealer in or vender of goods, etc., at any exchange or board of trade was required to pay a tax of twenty-five cents on each thousand dollars worth, gross, of goods so sold.

[4] Com. v. Gillinder, 12 Dist. 635.
[5] Com. v. Eynon-Evans Mfg. Co., 48 Super. 474.
[6] Liability of Druggists to Mercantile Tax, Atty. General's Reports 1895-96.
[7] Jadwin v. Hurley, 10 Pa. Super. 104 (1899).

It is an unsettled question as to whether the Act of 1899 repealed the manufacturing exemption of the Acts of 1846 and 1868. The act was amended by the Act of May 10, 1929, P. L. 1709, so as to exempt from the tax so much of the business transacted annually by wholesalers as pertained to processing and curing of meats, their products and by-products. This amendment overruled the decision of the Supreme Court that pickling and smoking meats and hides and skins was not manufacturing.[8] The Act of 1899 was further amended by the act of June 1, 1933, P. L. 1151, to exempt from the tax so much of the whole volume gross of business transacted annually by dealers as was realized from the compounding and dispensing of medicines on prescriptions of physicians.

These amendments were evidently made to the Act of 1899 under the assumption that the manufacturer's exemption of prior acts was still in force. In a case construing the Act of April 9, 1870, P. L. 59, which exempted sales by plumbers when under $500 it was held this act was repealed by the comprehensive mercantile license act of 1899 because the Legislature revised the mercantile license tax without exemptions of any kind.[9]

The question of manufacturer's exemption was not raised directly until 1939. Prior to this case the Commonwealth taxing authorities continued to grant the exemption in cases where it had been allowed by court decisions construing acts prior to 1899 or by amendments to the Act of 1899 as noted above in the case of the curing and processing of meats and druggists prescriptions. In the case of Com. v. Peerless Paper Specialty, Inc., the court directly held that this exemption for manufacturers and mechanics had been repealed.[10] A petition for reargument of this case has been granted but no re-argument has been made to date.

The next legislation relative to mercantile license tax subsequent to the basic act of 1889 was the Act of June 14, 1901, P. L. 565. It provided that every city and county treasurer shall sue for the recovery of all licenses returned by a mercantile appraiser if not paid on or before July 1st, within thirty days after such date instead of within ten days after that date as theretofore.

The Act of May 7, 1907, P. L. 175, provided for a graduated license tax on all stock brokers, bill brokers, note brokers, exchange brokers, merchandise brokers, factors and commission merchants, real estate brokers and agents and pawn brokers. The tax ranged from $10 on those whose gross annual receipts were less than $5,000 to $100 on those who had gross annual receipts of $20,000 and upwards.

Under the Act of May 25, 1907, P. L. 244 a license tax was imposed on keepers of all shooting galleries, shuffleboard rooms, billiard or pool rooms or any other place in which any game was played on a table with the use of balls and cues and bowling alleys, nine pin alleys and ten pin alleys, etc. The license fee was $20.00 annually for the first shooting gallery etc., and $10.00 for each additional one.

Under the Act of July 21, 1919, P. L. 1072, amending Section 7 of the Act of 1899, the Auditor General was required to investigate and ascertain the character and amount or volume of business transacted by any dealer or dealers, vender or venders who by fraud, accident or mishap failed to make a full, complete and accurate return and impose the correct amount of tax indicated by the facts in each case.

The Act of June 30, 1923, P. L. 986, amended Section 7 of the Act of 1899 by changing the last day for payment of mercantile tax from July 1st to September 1st in each and every year. Every mercantile appraiser was required to certify to the county treasurer the correct list of all venders or dealers on or before July 1st instead of May 1st.

Provision was made for dealers who commenced business after May 1st of any year to take out a license for the remainder of the license period and for computing the tax for such period by the Act of April 30, 1925, P. L. 372, supplementing the Act of 1899.

Under another Act passed in 1925, that of May 14, P. L. 700 a change was made in the date for payment of the mercantile tax in cities of the first class. This date was changed from September 1st to July 1st. The mercantile appraisers of cities of the first class were required to certify to the county treasurer a list of all venders and dealers on or before May 1st instead of July 1st.

The fiscal code, the Act of April 9, 1929, P. L. 343, in Section 1204 provided for the exercise of powers and performance of duties in connection with the collection of mercantile license taxes by the newly created Department of Revenue. Theretofore, these powers had been exercised and the duties performed by the Department of the Auditor General.

The Department of Revenue was substituted for the Auditor General's Department in connection with the collection of mercantile license tax by another Act passed in 1929, that of April 25, P. L. 681. This Act amended sections 4, 5 and 6 and sections 7 and 9, as amended, of the Act of 1899.

A third act was passed in 1929, that of April 25, P. L. 685 also provided for the substitution of the Department of Revenue for the Auditor General's Department in reference to collection of the mercantile tax. This act amended the act of April 30, 1925, P. L. 372 which referred to dealers commencing business after May 1st.

Keepers of restaurants, eating houses, cafes or quick lunch businesses were required to file annual returns on forms furnished by the Department of Revenue and pay mercantile license tax by section 729 of the Act of June 1, 1931, P. L. 318.

The Act of June 12, 1931, P. L. 555, changed the date upon which the city or county treasurer was required to sue for the recovery of mercantile license taxes returned to him by the mercantile appraiser and not paid. Such date was changed from September 1st to August 1st. The Act of June 2, 1933, P. L. 1418, however, repealed the Act of June 12, 1931, P. L. 555, restoring the date to September 1st.

By the Act of December 20, 1933, P. L. 75, 1933-34, Section 9, a licensee under the Malt Liquor License Law was exempted from obtaining a mercantile license and every licensee under such Malt Liquor License Law who was a holder of a mercantile license was allowed to deduct the gross income received from the sale of the malt liquors from his gross income from all sources in making his returns for mercantile license tax purposes.

The Act of May 7, 1937, P. L. 588, clarified the provis-

Gross Receipts Tax on Private Bankers

This tax was originally a tax on the net income of brokers and private bankers. It was first imposed by the Act of May 16, 1861, P. L. 708, which provided as follows:

> "Every stock broker, bill broker, exchange broker, real estate broker, and private banker in this Commonwealth shall . . . make a written return to the Auditor General, . . . in whcih he shall . . . set rorth the full amount of his receipts from commissions, discounts, abatements, allowances, and all other profits arising from his business, . . . and pay . . . 3% upon the aggregate amount contained in such return, for the use of the Commonwealth."

Although the Act of 1861 requires the report to include "the full amount of receipts" and the tax to be 3% of the "aggregate amount contained in such return" the State Supreme Court held the act "clearly intended to levy a tax of 3% on the profits or income of the business and was not meant to tax the capital."[1]

The Act of April 30, 1864, P. L. 218, imposed the tax on receipts of every private banker and broker" instead of "every stock broker, bill broker, exchange broker, real estate broker and private banker" as provided in the Act of 1861.

The Act of June 7, 1879, P. L. 112, Section 10, re-enacting the tax also imposed it upon the receipts of "every private banker and broker."

The Act of June 27, 1895, P. L. 396, amended the original Act of 1861 by omitting the words "real estate broker" from the taxable subjects enumerated therein.

Accordingly, following the court decision noted, under the Acts of 1864, 1879 and 1895 the tax was imposed upon the net earnings of private bankers and brokers and not upon the gross receipts.

However, the Act of 1895 was amended by the Act of June 13, 1901, P. L. 559, and the tax was expressly imposed upon the "gross receipts of private bankers and brokers." It provided:

> "Every stock broker, bill broker, exchange broker, merchandise broker and private banker in this Commonwealth shall on or before the first Monday of December next, and on or before the same day in each year thereafter make a written return, under oath or affirmation, to the Auditor General of this Commonwealth, in which return he shall exhibit and set forth the full amount of his gross receipts from commissions . . . arising from business during the year ending with the 30th day of November preceding . . . and shall pay . . . one per centum upon . . . such gross receipts."

Section 11 of the Act of May 7, 1907, P. L. 179, relieves brokers of all kinds from the tax imposing it only on private bankers.

The next change in the law was one of procedure made by the Fiscal Code, the Act of April 9, 1929, P. L. 343, which provided for the filing of reports by private bankers with the Department of Revenue instead of the Auditor General's Department.

The Act of April 25, 1929, P. L. 679, also made a similar procedural change in the law, requiring the returns to be filed with the Department of Revenue. This Act amended the Act of 1895 as last amended by the Act of June 13, 1901, P. L. 559.

Legislative History—Stock Transfer Tax

Summary

Date of Act	Principal Change from Prior Act	Rate

6-15-39 P. L. 403	Transfers to a broker for sale, etc., exempt	"

[1] Drexel & Co. v. Com., 46 Pa. 31 (1863).

Stock Transfer Tax

This tax of 2 cents on each $100 at the face value or fraction thereof was first imposed on "all sales or agreements to sell or memoranda of sales of stock and upon any and all deliveries or transfers of shares or certificates of stock in any domestic or foreign corporation, copartnership association, or joint stock company," by the Act of June 4, 1915, P. L. 828, "In cases where the shares or certificates of stock were issued without designed monetary value, the tax hereby imposed shall be at the rate of 2 cents for each and every share of such stock instead of being based upon the face value thereof." Agreements evidencing deposit of stock certificates as collateral security for money loaned if such stock certificates are not actually sold were exempt. The payment of the tax is evidenced by an adhesive stamp or stamps affixed either upon the books of the corporation, etc., where the evidence of the transaction is shown only by such books and upon a surrendered certificate where the transaction is effected by the delivery or transfer of a certificate.

Stock Transfer Tax

Receipts 1928-1940

Year Ended May 31st	Amount Collected	Rate
1940	$362,017	.02 on each $100 face value
1939	353,281	Same
1938	316,114	"
1937	545,036	"
1936	493,903	"
1935	245,503	"
1934	334,631	"
1933	299,168	"
1932	392,978	"
1931	479,825	"
1930	740,762	"
1929	630,537	"
1928	445,556	"

By the Act of July 11, 1917, P. L. 790, provision was made for the appointment of an agent or agents by the Auditor General for the sale of the stock transfer stamps. Such agent was allowed as compensation 2% of the par value of the stamps sold.

"The stock of building and loan associations, sales or agreements to sell or memoranda of sales of stock of said associations, and all deliveries or transfers of shares or certificates of stock thereof shall be exempt from the provisions of this Act," according to Section 1 of the Act of May 8, 1919, P. L. 120, amending the Act of June 4, 1915, P. L. 828, Section 1.

The Fiscal Code, the Act of April 9, 1929, P. L. 343, substitutes the Department of Revenue for the Department of the Auditor General in the collection of the stock transfer tax. The pertinent sections are 203 (f), 209, 722, 723, and 1709.

By the Act of May 4, 1933, P. L. 278, there were exempted from the provisions of the Stock Transfer Tax Act "transfers of certificates, otherwise taxable, from a trustee or trustees to a trustee or trustees substituted by court order or in accordance with the terms of the trust agreement, or to a surviving trustee or trustees provided, in either case, the same continue to be held by such transferee or transferees for the same purposes for which they were held prior to such transfer." Also exempt from the provisions of the law were "such transfers from a deceased person to his or her executor or administrator, from a ward to his or her guardian, from a guardian to the ward, where such transfer is made pursuant to the relationship of executor or administrator or guardian and ward."

The Act of June 15, 1939, P. L. 403, amending Section 2 of the Act of 1915 as amended, added to the exemptions from the stock transfer tax "deliveries or transfers to a broker or his registered nominee for sale, deliveries or transfers by a broker or his registered nominee to a customer for whom and upon whose order a broker has purchased the same, deliveries or transfers by a purchasing broker to his registered nominee, if the shares or certificates so delivered or transferred are to be held by such nominee for the same purpose as if held by the broker." It was provided, however, that such deliveries or transfers to or from a broker or his registered nominee shall be accompanied by a certificate setting forth the facts.

Legislative History—Cigarette Tax

Cigarette Tax

The first cigarette tax enacted by the Commonwealth of Pennsylvania was imposed by the Act of June 15, 1935, P. L. 341. As a part of the emergency revenue program of that year under this act the tax was effective for a two-year period ending May 31, 1937. The tax was imposed in lieu of the mercantile license tax theretofore imposed on the business of selling cigarettes.

The act provided that it should be unlawful for any person to engage in the sale of cigarettes at wholesale or retail within the Commonwealth unless a cigarette permit shall have been issued to him. Such permits were required annually from dealers who were also required to affix the stamps required to packages of cigarettes to be sold. The tax was imposed at the rate of one cent for each ten cigarettes or fraction thereof. It was provided that manufacturers of cigarettes located within or outside the Commonwealth and wholesale dealers in cigarettes located outside the Commonwealth might purchase stamps

from the Department and affix them to the packages of cigarettes to be sold within the Commonwealth in which case the dealer within the State receiving such stamped packages of cigarettes was not required to purchase and affix stamps on packages.

The Act makes no provision for filing reports and apparently they are unnecessary, since the tax is administered by means of the revenue stamps affixed to the packages of cigarettes. According to regulations of the Department of Revenue, the collection agency, sales of cigarettes made upon and within the confines of Federal territory, on property owned by the United States Government and to which the Commonwealth has relinquished its right of sovereignty are not taxable.[1] All sales made by the Post Exchange of Civilian Conservation Corp Camps and Army Camps to the members thereof are exempt from the tax and such Post Exchange do not need a cigarette permit. All sales of cigarettes to or by the State Emergency Relief Board for use by such Board or sale by such Board in the Transient Camps maintained and operated by such Board are not taxable.[2]

The Act of April 8, 1937, P. L. 220, amended the Act of 1935. Section 12 (a) made the punishment less severe for selling cigarettes without a permit. This Act also continued the tax for a two-year period ending May 31, 1939.

The tax was continued for a further two-year period ending May 31, 1941, by the Act of May 4, 1939, P. L. 57.

Liquid Fuels Tax

The first act to impose a state gasoline tax was that of May 20, 1921, P. L. 1021, which provided for a tax of one cent a gallon on all gasoline sold in the Commonwealth for any purpose except resale. The tax was collected by the retail dealers and returned to the Commonwealth monthly. One half of the tax collected under the act was credited to the county where it was collected to be used for construction and maintenance of roads and road bond interest.

[a] 2½ cent tax to Motor Fund.
[b] ½ cent tax refunded to counties.
[c] 1 cent tax in General Fund.

The one cent State Tax was re-enacted by the Act of June 15, 1923, P. L. 834, which imposed a tax of one cent per gallon upon all liquid fuels sold in Pennsylvania except for resale. In addition an emergency state tax of one cent a gallon was imposed by this act for the two years beginning July 1, 1923, and ending June 30, 1925. The tax was collected by the retail dealer from a purchaser for his own use and not for resale and paid to the Commonwealth quarterly when reports were required.

One-half of all tax collected under the act, except the additional emergency state tax, was credited to the county where the tax was collected to be used only for the purpose of the construction, etc., of roads and highways

[1] Regulation No. 6.
[2] Ibid.

and payment of interest on county road bonds. The balance of the one cent tax and all of the emergency tax were placed in the General Fund. The Act of 1921 was expressly repealed.

By the Act of June 29, 1923, P. L. 969, the term "liquid fuels" as used in the Act of June 15, 1923, P. L. 834, was construed to mean "all liquids ordinarily, practically and commercially usable in internal combustion engines for the generation of power, except kerosene, fuel and gas oil . . ."

The one cent state tax was re-enacted and the emergency one cent tax was continued for another two years, that is up to and including June 30, 1927, by the Act of May 13, 1925, P. L. 671. Instead of the remaining one half of the permanent tax and all of the emergency tax being placed in the General Fund as theretofore it was, under this act, paid into the Motor License Fund created by Section 12 of the Act of June 30, 1919, P. L. 678, and was "specifically appropriated for the same purposes as said Motor Vehicle Fund is appropriated by the provisions of existing or future laws."

The Act of May 14, 1925, P. L. 695, clarified the tax disposition feature of the Act of May 13, 1925, P. L. 671, by providing the remaining 50% of the permanent tax and all of the emergency tax should be paid into the General Fund prior to June 1, 1925, and thereafter into the Motor License Fund.

The rate of the permanent tax was increased by the Act of April 13, 1927, P. L. 201 from one to two cents per gallon and the emergency tax of one cent was continued for another two years, that is until June 30, 1929. This act also amended section 9 of the Act of June 15, 1923, by crediting one-fourth of the permanent two cent tax to the county where collected instead of one-half of the one cent tax as theretofore.

The Act of April 14, 1927, P. L. 287, re-enacted the previous permanent tax of 2 cents per gallon and the emergency tax of one cent and required all dealers to secure "Liquid Fuels Permits" before doing business. Provision was made for collection of delinquent liquid fuels tax by employing counsel through the Attorney General's Department.

The Act of April 14, 1927, P. L. 295, excepted kerosene, fuel oil and gas oil from the term "liquid fuels." When the Act of April 14, 1927, P. L. 287, was passed this exception which had existed in prior acts was apparently inadvertently omitted.

Section 727 of the Fiscal Code, the Act of April 9, 1929, P. L. 343 provided for collection of Liquid Fuels Tax by the newly created Department of Revenue instead of the Auditor General.

A new Liquid Fuels Tax law written under the date of May 1, 1929, P. L. 1037 provided for collection of the tax by the Department of Revenue. The rate of the tax was made four cents per gallon until July 1, 1930 and three cents thereafter. Liquid fuels purchased, received or consumed by the United States or any board, department, etc., thereof were expressly exempted from tax. A Federal employee, however, was not exempt from the tax bought for his own use.[1]

The Act of May 31, 1929, P. L. 1537, excepts kerosene, fuel oil and gas oil from the term "liquid fuels."

The Act of May 21, 1931, P. L. 149, enacted a new Liquid Fuels Tax. A tax of three cents per gallon was imposed upon the distributor who was allowed to add the amount of the tax to the price charged. Previously the tax was collected through each dealer. This method of collection was revoluntionary in the history of the State tax. Collection was made easier and more certain as well as more cheaply. Collection attorneys were no longer necessary. The Department of Revenue was authorized to use State Highway Patrolmen to aid in enforcing the Act. They were made peace officers with police power and authority throughout the Commonwealth to arrest on view, without writ, rule, order or process any person known to have violated any of the provisions of the act.

Under the Act of June 1, 1931, P. L. 298, kerosene, fuel oil and gas oil and naphtha, sold for a purpose other than for use in internal combustion engines for the generation of power, were excepted from the term "liquid fuels."

By the Act of June 1, 1931, P. L. 299, the tax rate was required to be stated separately from price of gas on display signs by retailers.

The Act of May 1, 1933, P. L. 206, gives the Department of Revenue the authority to revoke a liquid fuels permit after finding the holder has failed to comply with the act and a hearing has been had. An appeal may be taken to the Dauphin County Court of Common Pleas from a decision of the Department.

All fines collected under the act are required to be paid to the State Treasury and credited to the Motor License Fund by the Act of May 22, 1933, P. L. 837.

The Act of May 22, 1933, P. L. 917, provides for depositing United States Bonds or Commonwealth of Pennsylvania Bonds instead of surety bonds where required from distributors under the act.

The permanent tax of three cents per gallon was reenacted by Section 4 of the Act of June 21, 1935, P. L. 412 and an emergency tax of one cent per gallon was imposed for the period from the date of the act to May 31, 1937. The act provided for the payment of the entire emergency tax collected prior to June 1, 1936 into the State Treasury to be used only for unemployment relief purposes. All such tax collected after June 1, 1936 was to be credited to the General Fund.

The act does not violate Act III, Sec. 3 of the Constitution requiring the subject of an act to be clearly expressed in its title.[2]

The additional emergency tax of one cent per gallon was continued for another two year period ending May 31, 1939 by the Act of April 8, 1937, P. L. 248. This act also contained the provision "The tax imposed by this act though payable by the distributor, shall be borne by the consumer, and when paid by the distributor, shall be deemed to have been paid for the account of the consumer." This provision apparently had for its purpose the allowance of the tax as a deduction for Federal income tax purposes to the consumer, theretofore disallowed the consumer but allowed the distributor.

The Act of June 5, 1937, P. L. 1703, changed the flat 2% discount allowed distributors for filing of report and payment of tax on date required to a graduated rate ranging from 2% to ½%.

[1] Tax on Liquid Fuels, Opinion of Atty. Gen., 6 D. & C. 741.

[2] Gulf Refining Co. v. School District of Phila., 109 Super. 177.

The additional emergency tax of one cent per gallon was continued for anther two year period ending May 31, 1941 by the Act of May 4, 1939, P. L. 55.

By the Act of June 21, 1939, P. L. 634, the purposes for which the one half cent portion of the permanent tax returned to the counties might be used were broadened to include the payment of sinking fund charges as well as interest on road and bridge bonds and all such payments theretofore made were validated.

Gross Receipts Tax

Originally the Pennsylvania Gross Receipts Tax was regarded by United States Supreme Court as a tax upon the franchise of transportation companies which at that time alone were subject to it.[1] In a later case, however, the same court said:

Legislative History—Gross Receipts Tax

* For six months' period ended Dec. 31, 1936 rate—20 mills; For six months' period ended June 30, 1936 rate—14 mills.

"A review of the question convinces us that the first ground . . . is not tenable . . . It certainly could not have been intended as a tax on the corporate franchise, because by the terms of the act it was laid equally on the corporations of other states doing business in Pennsylvania. If intended as a tax on the franchise of doing business—which, in this case is the business of transportation in carrying on interstate and foreign commerce—it would clearly be unconstitutional."[2]

It is not a property tax, however, for receipts derived from traffic within Pennsylvania of foreign corporations doing business in the Commonwealth are taxable, although such receipts may not be within the state. It is probably a tax on the business of the companies subject thereto. The Dauphin County Court in a comparatively recent case calls the tax a privilege tax.[3] Quoting from an earlier opinion[4] of this Court the President Judge says of the Gross Receipts tax:

"We have in the same statute, a privilege tax which is a franchise tax, in so far as it is imposed not upon the franchise as such, granted by the State but upon their exercise in the state; a privilege tax in so far as it is imposed upon the business of foreign corporations done within the State; and an occupation tax or privilege tax in so far as it is imposed upon partnerships and individuals doing the taxable business in the state."

The tax is not imposed upon all of the gross receipts of a company but upon such as are from sources specified in the act. For instance a street railway corporation is not liable for tax upon its gross receipts received from the sale of electric current and rental of tracks;[5] a company

[2] Phila. & South M. S. S. Co. v. Pa. 122 U. S. 326 (1887).

[4] Com. v. Phila. Electric Co., 36 Dauphin 339 (1932).
[5] Com. v. Lehigh Valley Transit Co., 14 Dau. Co. 86.

incorporated to furnish light, heat and power by means of electricity which afterwards purchases the property and franchise of a steam heat company is not liable for tax on receipts derived from the steam heat business;[6] a railway company is not liable for tax on gross receipts derived from car mileage and per diem compensation received for the use of its cars upon other lines.[7]

The first legislation to impose a Gross Receipts Tax in Pennsylvania was the second section of the Act of Feb. 23, 1866, P. L. 82. An annual tax of seven and one-half mills was imposed upon the gross receipts of every domestic railroad, canal and transportation company "not liable to the tax on income under existing laws."

The second section of the Act of July 19, 1866, P. L. (1867) 1363 provided that the second section of the Act of February 23, 1866, "shall be construed to apply to all railroad, canal and transportation companies not liable to taxation on net income in pursuance of the second section of the Act of April 30, 1864." This was intended to clarify a provision of the Act of February 23, 1866, to wit, "not liable to the tax on income under existing laws."

The second section of the Act of February 23, 1866, was repealed by the 16th section of the Act of May 1, 1868, P. L. 108. Gross receipts tax was reimposed by section 8 of the latter act. The corporations liable to the tax were every railroad, canal and transportation company "liable to tax upon tonnage under the preceding section of this act." Companies so subject to the tonnage tax were "every railroad company, steamboat company, canal company and slack water transportation company and all other companies now or hereafter doing business in this state and upon whose works freight may be transported . . . except turnpike, plank road and bridge companies."

The Acts of March 21, 1873, P. L. 46, section 3 and April 24, 1874, P. L. 68, section 11 abolished the Gross Receipts Tax and the Commonwealth was without the tax for a period of three years.

The tax was re-established, however, by the Act of March 20, 1877, P. L. 6, section 5, which provided that every railroad or canal, steamboat, slack water navigation, transportation, street passenger railway and every other company incorporated in Pennsylvania or doing business in this state and owning, operating or leasing to or from another corporation or company any railroad, canal, slack water navigation, or street passenger railway or other device for the transportation of freight or passengers, and every telegraph company incorporated in Pennsylvania or doing business here and every express company and any palace car and sleeping car company, incorporated or unincorporated, doing business in Pennsylvania should pay to the Commonwealth a tax of 8 mills upon its gross receipts from tolls and transportation, telegraph business or express business.

By the 7th section of the Act of June 7, 1879, P. L. 112 pipe line and conduit companies and limited partnerships engaged in transportation were added to the corporations subject to the tax.

The Act of June 1, 1889, P. L. 420, section 36 repealed the 7th section of the Act of June 7, 1879, P. L. 112. The 23d section of the former act, however, re-enacted the provisions of the repealed section. Telephone and Electric Light corporations were made additional taxable subjects and joint stock associations were added to taxable subjects and joint stock associations were added to taxable transportation firms. Prior to the Act of 1889 it had been held by the Dauphin County Common Pleas Court that telephone companies were subject to the tax as "telegraph companies".[8] Tax was imposed upon gross receipts "received from passengers and freight transported wholly within the state and from telegraph, telephone or express business done wholly within this state or from the business of electric light companies and from transportation of oil done wholly within the state." The tax was required to be paid semi-annually on the last day of January and July.

This act provided for the apportionment of the gross receipts tax in cases where the works of one corporation, etc., were leased to and operated by another corporation, etc. The apportionment was to be made on the basis of the respective lease or agreements but the Commonwealth was permitted to first look to the corporation operating the works for the tax. This provision does not apply to express companies which employ railroad companies to do their transportation.[9]

Section 2 of the Act of April 28, 1899, P. L. 72 also imposes a gross receipts tax. This act amends the Act of June 7, 1879 but imposes the tax of 8 mills only on express business of "corporations limited partnerships, joint-stock associations, partnerships, firms, or associations of individuals incorporated or unincorporated."

In the Legislative Session of 1923, an attempt was made in the House of Representatives to amend the Act of 1889 supposedly at the instigation of the Auditor General to add to the list of taxable subjects taxicab companies, autobus line companies, truck transportation companies and every individual partnership, firm or unincorporated association engaged in or hereafter engaged in the transportation of freight or passengers or oil within the state. In the proposed amendment water-power and hydro-electric companies were also included as taxable subjects. The bill failed of passage although the vote was 90-89 in favor thereof. The vote was reconsidered, however, and the bill recommitted to the Ways and Means Committee, from which it had originally been unanimously reported, for the purpose of amendment.

After being re-reported it was again considered by the House. In the discussion the portion of the amendment which would tax water power and hydro-electric companies was stressed by the proponents of the bill. Attention was called to hydro-electric projects on the Susquehanna, Clarion and Allegheny rivers which were escaping the gross receipts tax. The new amendment still including as taxable subjects taxicab companies, autobus line companies and truck transportation companies, again failed of passage 48-107. In the discussion on the bill as an argument against its passage attention was called to the revenue of upwards of twenty million dollars expected from the proposed emergency profits tax, and either the newly proposed gasoline tax or the increase in the motor license fees—whichever tax bill was finally enacted.

[6] Com. v. Light and Power Co., 262 Pa. 238.
[7] Com. v. Buffalo & Susquehanna R. R. Co., 14 Dau. 117.
[8] Com. v. Penna. Telephone Co., 2 Dauphin Co. Rep. 57 (1885).
[9] Com. v. U. S. Express Company, 157 Pa. 579.

The Act of May 13, 1925, P. L. 702 contained this new provision:

"Nothing contained in this act shall be construed to impose any tax upon any municipality nor upon the gross receipts derived from any municipally owned and operated public utility or from any public utility service furnished by any Municipality.

"No tax shall be collected under the provisions of this act from any municipality upon the gross receipts derived from the ownership and operation of any public utility or from the furnishing by any municipality of any public utility service prior to the passage of this amendment."

Section 23 of the Act of June 1, 1889, P. L. 420 was also amended by the Act of May 14, 1925, P. L. 706. This act added to the list of taxable subjects, water-power companies and hydro-electric companies both incorporated and unincorporated as first proposed in the 1923 Legislative Session.

The amendment of 1925 which expressly imposed the tax on gross receipts of water-power companies and hydro-electric companies and the attempt in the 1923 session to pass a similar amendment followed court decisions holding that such companies were not liable to the tax under the Act of June 1, 1889, P. L. 420.[10] This class of corporations was originally created under IX clause, Section 2 of the general corporation act of April 29, 1874 for the purpose of supplying, storing and transporting water and water power and were not made taxable by the Act of June 1, 1889, P. L. 420. By the Act of July 2, 1895, P. L. 425, they were authorized to use this water power to generate electrical power and furnish electric current or power to the public. It was subsequent to this extension of powers that the attempt was made by the fiscal departments to tax the receipts of the companies on the grounds that they had become electric light companies. The court held, however, that in the Pa. Water and Power Co. case that the company was "not an electric light company within the Act of June 1, 1889." In the other case the court found the company was "not to be found among the companies which are specifically mentioned in the statute and which as (were) required to pay the tax." The amendment of May 14, 1925 made water power and hydro-electric power companies taxable regardless of their origin.

Section 23 of the Act of 1889 also provided the tax should become due 60 days after the date of approval of the settlement instead of on the last days of January and July as in prior acts. It is to be noted the change in the due date of the tax brought the language of the law into conformity with the practice of the fiscal departments which had regarded the tax as due 60 days after the date of approval of the settlement.

Also included in the bill to amend section 23 of the Act of June 1, 1889, P. L. 420, as it was passed by the House of Representatives in the 1925 Legislative Session was a provision to tax taxicab companies, auto bus companies and truck transportation companies. The Senate amended the bill and struck out such provision and sent the bill back to the House for concurrence. The House refused to concur, however, and the bill went to a conference committee. The Senate version of the bill was adopted by this committee and the law which was enacted omitted taxicab companies, auto bus companies and truck transportation companies as taxable subjects.

The next change in the gross receipts tax law was made by the Act of May 13, 1927, P. L. 1002 which expressly exempted from the operation of the tax gross receipts from taxicabs. Apparently this amendment of section 23 of the Act of June 1, 1889, P. L. 420 was the direct result of the decision of the Pennsylvania Supreme Court which held in an opinion dated June 26, 1926 that a taxicab company is a "transportation company" within the meaning of those words of the Act of 1889 and as such is subject to a tax on its gross receipts as provided by that act.[11] In passing it should be noted that the United States Supreme Court decided on appeal that the tax as it applied to taxicab companies was unconstitutional for the reason that it violated the requirement of the Pennsylvania Constitution on uniformity in taxing taxicab corporations but not taxing individuals and partnerships operating taxicabs.[12] This decision was not handed down until after the Act of 1927 had been passed.

The Act of April 25, 1929, P. L. 662 further changed section 23 of the Act of June 1, 1889, P. L. 420. "Baggage" was added to the articles transported formerly enumerated as freight, passengers and oil. Motor buses and motor omnibuses were added to the devices for the transportation of "freight, passengers, baggage or oil" the gross receipts from which are exempt from the tax. There were other changes in phraseology designed to clarify the meaning of the language of the law. The semi-annual reports were required to be filed with the newly created Department of Revenue.

The Act of June 22, 1931, P. L. 694 imposes an excise tax of 8 mills upon the gross receipts of companies (including corporations, individuals, co-partnerships, etc.,) engaged in the business of carrying passengers or property for hire over the highways of the Commonwealth in motor vehicles or trackless trolleys for the use of the highways of the Commonwealth. Such companies are allowed to deduct from such excise tax any registration fees paid to the Department of Revenue upon motor vehicles used in the business of carrying passengers or property for hire and also any excise taxes paid to any city of the Commonwealth for the use of its highways. If such taxable company operates within and outside the Commonwealth the gross receipts may be apportioned according to the ratio of mileage of routes operated in Pennsylvania to total mileage operated. This act is not an amendment of the Act of June 1, 1889, P. L. 420 and its supplements but an independent act.

The Act of May 16, 1935, P. L. 200 increased the rate of the Gross Receipts Tax imposed on transportation (other than motor carriers), power and transmission companies from 8 to 14 mills for the semi-annual periods of the years 1935 and 1936 but provided it should again become 8 mills for the semi-annual periods of 1937 and thereafter. The act also expressly provided that it should apply to municipalities and taxed gross receipts derived from any municipality owned and operated public utility or from

[10] Com. v. Pa. Water & Power Co., 23 Dau. 10 (1920); Com. v. York Haven Water & Power Co., 23 Dau. 13 (1920).

[11] Com. v. Quaker City Cab Co., 287 Pa. 161.

[12] Com. of Pa. v. Quaker City Cab Co. 277 U. S. 389.

any public utility service furnished by any municipality to the extent of such gross receipts as are derived from business done outside the limits of the municipality operating the public utility service. The act further provided that the proceeds from the years 1935 to the extent of $2,000,000 should be used only for unemployment relief. The balance of the proceeds for 1935 were to be credited to the General Fund.

The Act of August 6, 1936, P. L. 87 further increased the rate of the tax from 14 to 20 mills for the six month period ended December 31, 1936 but provided for the rate to be reduced again to 8 mills thereafter.

The Act of April 8, 1937, P. L. 245, continued the increased rate of 20 mills for the six months' periods ending June 30 and December 31, 1937 and June 30 and December 31, 1938 and reduced it to 8 mills thereafter.

The Act of May 4, 1939, P. L. 51, continued the increased rate of 20 mills for the 6 months' periods ending June 30 and December 31, 1939 and June 30 and December 31, 1940 and reduced it to 8 mills thereafter.

The gross receipts tax imposed on motor carriers by the Act of June 22, 1931, P. L. 694 still retains the original rate of 8 mills being unchanged by the Acts of 1935, 1937 and 1939 above-mentioned.

Gross Premiums Tax

The gross premiums tax was first imposed on gross receipts of foreign insurance companies by Section 10 of the Act of April 4, 1873, P. L. 26. Foreign insurance companies were expressly exempted from the capital stock tax.[1] Nor were they required to pay license fees for state purposes. Instead they were required by the Act of 1873 to pay a tax of three per cent upon the "entire amount of premiums of every character and description received . . . in this state during the year or fraction of a year ending with the 31st day of December preceding, whether said premiums were received in money, or in the form of notes, credits, or any other substitute for money." The act further provided that until an insurance company of another state or foreign government had granted to it by the State Commissioner of Insurance a certificate of authority showing it was authorized to do business in the Commonwealth no person should act as agent or solicitor for it in any manner whatever relating to risks. The annual report of gross premiums received was required to be made to the Insurance Commissioner in January.

[1] Act of June 1, 1889, P. L. 420, Section 20.

As to domestic insurance companies the gross premiums tax was first imposed by section six of the Act of March 20, 1877, P. L. 6. The tax was imposed at 8 mills on the "entire amount of premiums received" by such companies. Companies doing business on the mutual plan without capital stock or accumulated reserve and purely mutual beneficial associations whose funds for the benefit of members, their families or heirs are made up of weekly or monthly contributions and accumulated interest were expressly exempted from the tax. Reports were required to be filed with the Auditor General for the semi-annual periods ended June 30, and December 31 and a penalty of ten per cent was provided for failure to file reports and pay the tax within thirty days.

The Act of June 7, 1879, P. L. 112, Section eight reenacted Section six of the Act of March 20, 1877, P. L. 6.

Although the State Supreme Court held that domestic corporations could be taxed under the Act of 1877 on premiums received from business transacted without the State[2] the Act of June 10, 1881, P. L. 99, Section seven provided as follows:

"That all insurance companies which shall within thirty days after the approval of this act pay into the Treasury of the Commonwealth the amount of money claimed by the Commonwealth for taxes upon their gross premiums for the period of time between the 20th day of March 1877, and the first day of January, 1881, together with interest upon same, shall be liable from and after the first day of January, 1881, during the continuance of this act to no taxes on their premiums except upon such as were or shall be received from business transacted within this Commonwealth."

The Act of June 1, 1889, P. L. 420, section twenty-four, likewise limited the gross premiums tax of domestic companies to "business transacted within this Commonwealth." This section of the Act of 1889 also made the first change in the gross premiums tax imposed on foreign insurance companies since the Act of 1873 by providing:

"That hereafter the annual tax upon the premiums of insurance companies of other states or foreign governments shall be at the rate of 2% upon gross premiums of every character and description received from business done within this Commonwealth during the entire calendar year preceding."

The Act of June 28, 1895, P. L. 408, Section 1, re-enacted section twenty-four of the Act of June 1, 1889, P. L. 420, although it purported to amend it. Section 2 contained a new provision:

"On and after January 1, 1896, and annually thereafter the State Treasurer shall pay to the Treasurers of the several cities and boroughs within the Commonwealth one-half of the net amount received from the 2% tax paid upon premiums by foreign fire insurance companies, the amount to be paid to be based on the return of said 2% tax upon premiums, received from foreign fire insurance companies doing business within said cities and boroughs as shown by Insurance Commissioner's report."

Section 2 of the Act of June 28, 1895, was amended by the Act of April 20, 1905, P. L. 1905, so as to extend its provisions as to payments to townships of the first class.

[2] Ins. Co. of North America v. Com., 87 Pa. 173 (1878).

Section 16 of the Act of June 1, 1911, P. L. 607, provided that foreign insurance companies shall make a report to the Insurance Commissioner on or before March first showing the entire amount of premiums of every character received from business transacted in the Commonwealth for the year or fraction of the year ending December 31st preceding. It also allowed the foreign companies to "deduct from the gross premiums received all premiums returned on policies cancelled or not taken and all premiums actually paid for reinsurances, where the same are affected in companies duly licensed to do business in this Commonwealth." It is to be noted that deductions for the cost of reinsurance were not allowed by the Commissioner of Insurance upon advice of the Attorney General in construing the Act of 1889.[3]

The Act of July 6, 1917, P. L. 723, provided that any person, corporation, etc., entering into a contract of insurance or reinsurance with any foreign company not registered or entitled to do business in Pennsylvania should deduct, when making payment of premium, an amount equal to the tax imposed on premiums of insurance companies of other states and foreign countries that are registered to do business in Pennsylvania and pay such amount into the State Treasury. It also provided that any person, etc., failing to make such deduction and payment shall be liable for the amount of the tax and also that such person, etc., failing to comply with the act shall be guilty of a misdemeanor and upon conviction shall be sentenced to a fine not exceeding $500.

Section 319 of the Act of May 17, 1921, P. L. 682, provided:

"Any domestic or foreign stock or mutual insurance company, association, or exchange, authorized to transact business in this Commonwealth shall pay to this Commonwealth taxes required on all business taxable within this Commonwealth and reinsured, as provided in this section, with any foreign company, association, or exchange not authorized to transact business in this Commonwealth."

Section 321 of the Act of 1921 reenacted Section 16 of the Act of June 1, 1911, P. L. 607, and allowed as an additional deduction from gross premiums received by foreign life insurance companies "dividends declared and actually used by policyholders in payment of renewal premiums." The Insurance Commissioner had previously held on advice of the Attorney General in construing the Act of June 28, 1895, P. L. 408, that no deductions would be allowed on account of dividends paid to policyholders.[4] This section also provided that "mutual companies, associations and exchanges may deduct that proportion of the advance premium or deposit returned to members upon the expiration of their contracts."

Section 1009 of this act, referring to attorneys, authorized by Section 1001 of the Act, for exchange reciprocal and inter-insurance contracts provided that:

"Such attorney shall pay to the Commonwealth the same fees and taxes as are now required by law to be paid by stock and mutual companies transacting like kinds of business in this Commonwealth. In the payment of taxes, he may deduct, from gross premiums or deposits received during the calendar year, all amounts

[3] Insurance Companies Tax 3 D. R. 350 (1894); 14 Pa. CC 605.
[4] In re Northwestern Mutual Life Ins. Co. 18 D. R. 490 (1909).

returned to subscribers or credited to their accounts, other than for losses."

Section 212 of the Act of May 17, 1921, P. L. 789, included a retaliatory provision as follows:

"If, by the laws of any other state any taxes, fines, penalties, licenses, fees or other obligations or prohibitions, additional to or in excess of those imposed by the laws of this Commonwealth upon insurance companies, associations and exchanges, of other States and their agents, are imposed on insurance companies, associations and exchanges of this Commonwealth and their agents doing business in such state, like obligations and prohibitions shall be imposed upon all insurance companies, associations, and exchanges and their agents, of such State doing business in this Commonwealth so long as such laws remain in force."

Section 625 of this Act of 1921 provided for the taxation of Excess Insurance Brokers. They are required to pay annually in January to the Insurance Commissioner a tax of 3% of the gross premiums named in the policies delivered to the policy holders and upon all policies procured except policies of marine insurance on vessels and vessel property engaged in interstate or foreign commerce. Deduction was allowed for net premiums returned on policies cancelled.

The Act of May 6, 1925, P. L. 526, required instead of semi-annual reports as theretofore annual reports of gross premiums, premium deposits or assessments of domestic companies, associations or exchanges received for the year ending December 31st to be filed on or before March first, beginning in 1926, and the tax to be paid on or before March 31st. It also provides as additional deductions from gross premiums all amounts returned on policies cancelled or not taken and all premiums paid for reinsurance where such is effected in companies, etc., authorized to transact business in Pennsylvania. This change allowed domestic companies, except life, the same deductions allowed foreign companies by the Act of May 17, 1921, P. L. 682, and June 1, 1911, P. L. 607. Mutual companies required for any reason to file reports were allowed these same deductions and also the portion of advance premiums, premium deposits or assessments returned in cash or credited to members or policyholders, whether as dividends, earnings, savings or return deposits upon the expiration of their contracts.

By section 2 of the Act of May 13, 1927, P. L. 998, every insurer, organized, admitted or licensed to transact the business of marine insurance within this Commonwealth, shall pay a tax of 5% on that proportion of the total underwriting profit of such insurer, from such marine insurance written within the United States, which the gross premiums of the insurer from such marine insurance written within the Commonwealth bear to the gross premiums of the insurer from such marine insurance written within the United States. Annual reports are required to be filed with the Commissioner of Insurance on or before June 1st. A method of computing the tax is provided. A statement of the tax so computed is required to be mailed by the Insurance Commissioner to the insurer and the tax is paid into the State Treasury.

Sections 713-716 of the Act of April 9, 1929, P. L. 343, inclusive required annual reports of domestic and foreign insurance companies, etc., marine insurance companies and excess insurance brokers, respectively, to be filed with the newly created Department of Revenue. The Reports of both domestic and foreign companies are to be filed on or before March 15th and those of marine insurance companies as theretofore, June 1st, and those of excess insurance brokers on or before January 31st as previously required.

The Act of April 9, 1929, P. L. 441, required the tax on excess insurance brokers to be collected by Revenue Department instead of the Insurance Commissioner.

The Act of April 25, 1929, P. L. 665, amended the Act of May 6, 1925, P. L. 526, and changed the filing date of annual gross premium reports of domestic insurance companies to March 15th from March first. This is in accord with section 713 of the Act of April 9, 1929, P. L. 343, above noted.

Domestic life insurance companies were added to those companies from which reports of gross premiums and resulting tax thereon were not required by section 24 of the Act of June 26, 1931, P. L. 1408.

By the Act of May 31, 1933, P. L. 1093, the deductions by domestic companies for gross premiums paid for reinsurance were further restricted. By previous acts premiums for reinsurance could be deducted from gross premiums reported if such reinsurance was effected in companies, etc., authorized to transact business in the Commonwealth. According to the Act of 1933 in order for the deduction to be allowed the reinsurance contracts "must be entered into or executed by all parties thereto within this Commonwealth." Otherwise the only condition under which the deduction was allowed was when the tax on such premium for reinsurance was "paid when due by the company in which such reinsurance is effected."

A similar restriction was imposed by the Act of May 31, 1933, P. L. 1094, in reference to foreign insurance companies, etc., except in the case of marine insurance the contract or agreement of reinsurance need not be made within the Commonwealth.

The Act of May 25, 1939, P. L. 212, amended the Act of May 31, 1933, P. L. 1093, in reference to deduction of premiums for reinsurance. The word "paid" for reinsurance was changed to "received" for reinsurance and the words "where such reinsurances are effected in companies, associations, and exchanges authorized to do business in this Commonwealth by contracts or agreements entered into or executed by all parties thereto within this Commonwealth. If such contract or agreement is not entered into or executed by all parties thereto within this Commonwealth, such company, association or exchange, in reporting for taxation, may not deduct such premiums so paid unless the tax thereon is paid when due by the company in which such reinsurance is effected" were omitted. It would seem as if the Commonwealth intends to look to the company placing the reinsurance for the tax instead of to the reinsurer.

The Act of May 25, 1939, P. L. 213, makes a similar change as regards reinsurance premium reductions in reference to foreign companies, etc., by amending the Act of May 31, 1933, P. L. 1094.

Section II

Constitutional Limitations of the Taxing Power in Pennsylvania

By Sheldon C. Tanner

The Pennsylvania State College

A number of states have, at various times, imposed constitutional restrictions upon the taxing power. These are designed primarily to secure uniformity and equality in the imposition of the tax burden. Such requirements in Pennsylvania had their origin in the Constitution of 1873. Prior to that time the only limitation to the exercise of this power was the Bill of Rights, with its implication "against all unjust, unreasonable and palpably unequal exactions under any name or pretext."[1] Article IX of the Constitution of 1873 provides that all taxes shall be uniform and shall be levied and collected under general laws, subject to the following exemptions at the discretion of the legislature: public property used for public purposes, actual places of religious worship, places of burial not used or held for private or corporate profit, institutions of purely public charity, and as amended on November 6, 1923, real and personal property owned, occupied, and used by any branch, post, or camp of honorably discharged soldiers, sailors, and marines. These are other provisions dealing with this problem are set forth in the footnotes.[2]

The reasons leading up to the adoption of these provisions, and the social attitudes which prevailed at that time, may be gathered from various expressions of the courts. Speaking of the income tax in 1885, it was said by Mr. Justice PAXSON:

> "Of all forms of taxation this is the most odious to the American people. It was submitted to during the war from a feeling of patriotism in view of the great financial strain to which the country was subjected. But when no such cause exists there is little excuse for imposing such an obnoxious burden; still less ought it to be permitted without authority of law, and under the cloak of a tax upon occupations."[3]

During the following year we find a further explanation by this same Justice of the reason for this limitation in the taxing power, and of the attitude of the Court concerning it:

> "This portion of the constitution is too important and valuable to be overridden by the Legislature, or frittered away by judicial construction. It was intended to, and does, sweep away forever the power of the Legislature to impose unequal burdens upon the people under the form of taxation. The evils which led up to its incorporation into the organic law are well known. The burden of maintaining the state has been, in repeated instances, lifted from the shoulders of favored classes and thrown upon the remainder of the community. This was done by means of favoritism and class legislation. Article IX of the constitution was intended to cut up this system by the roots, and we shall have no more of it if the legislative and judicial departments of the government perform their full duty in giving effect to that instrument."[4]

The judicial philosophy reflected in these utterances, and the circumstances which provoked them, may or may not be important in the light of changing social and economic institutions. It is fairly certain, however, that such expressions have had some influence in the trend of judicial opinion.

It should be observed, upon a reading of Article IX, that "the power to classify" is "retained in clear language . . . This power was possessed under the constitution of 1790, had been exercised in numerous laws, and existed when the new constitution was framed and adopted."[5] The following views were expressed by Mr. Chief Justice KEPHART in 1926:

> "Article IX, section 1, relative to uniformity, does not prohibit classification for taxation purposes (Heisler v. Thomas Collieries Co., 274 Pa. 448, 463), and classification does not always lead to an exemption within the meaning of article III, section 7, and article IX, section 2: see Com. v. Germania Brewing Co., 145 Pa. 83, 84. An exemption contemplated by article III, section 7, and article IX, section 2, is in exemption from all taxation in any form . . . Mr. Justice ROBERTS stated in State Board v. Jackson, 283, U. S. 527, 539; 'A very wide discretion must be conceded to the legislative power of the state in the classification of trades, callings, businesses or occupations, which may be subjected to special forms of regulation or taxation through an excise or license tax. If the selection is neither capricious nor arbitrary, and rests upon some reasonable consideration of difference or policy, there is no denial of the equal protection of the law. Our duty is to sustain the classication adopted by the legislature if there are substantial differences between the occupations separately classified. Such differences need not be great.'"[6]

To the foregoing may be added two declarations by the Supreme Court of Pennsylvania during the past year, both of which are pertinent to the formulation of a tax program; first, "if an act which undoubtedly provides for classification is capable of two interpretations, one of which would provide for uniform taxes, and the other not, the former interpretation is to be preferred," and second, "classification for the purposes of taxation is generally for the legislature and the court can declare a statute void only when it clearly, palpably and plainly violates the constitution."[7]

It would be futile to attempt to reconcile all of the decisions of the Supreme Court of Pennsylvania subsequent to the adoption of the Constitution of 1873, and particularly the dictum expressed in many of the opinions. Certain methods of taxation were employed in a few tax laws which had been adopted many years before the Constitution of 1873 was confirmed, and which were in effect at that time. This is a matter which received judicial comment in each case, and which probably had some influence

[1] Washington Avenue, 69 Pa. 352 (1871).

[2] ARTICLE III, Section 7. "The General Assembly shall not pass any local or special law: . . . Exempting property from taxation:"

ARTICLE IX, Section 1. "All taxes shall be uniform, upon the same class of subjects, within the territorial limits of the authority levying the tax, and shall be levied and collected under general laws; but the General Assembly may, by general laws, exempt from taxation public property used for public purposes, actual places of religious worship, places of burial not used or held for private or corporate profit, insitutions of purely public charity, and real and personal property owned, occupied, and used by any branch, post, or camp of honorably discharged soldiers, sailors, and marines." (Amendment of November 6, 1923.)

ARTICLE IX, Section 18. "Taxation laws may grant exemptions or rebates to residents, or estates of residents, of other States which grant similar exemptions or rebates to residents, or estates of residents, of Pennsylvania." (Amendment of November 6, 1928.)

ARTICLE IX, Section 2. "All laws exempting property from taxation, other than the property above enumerated shall be void."

[3] Banger's Appeal, 109 Pa. 79 (1885).

[4] Fox's Appeal, 112 Pa. 337 (1886).

[7] American Stores Co. v. Boardman, 336 Pa. 36 (1939).

in the determination that such enactments were not repugnant to that instrument. And yet it was apparently felt that such or similar methods, when applied to new kinds of taxes, should be tested by the standards of uniformity and equality expressed in that instrument, without disturbing the status quo. Following, then, are some of the methods of taxation in effect prior to 1873 and thereafter, but which furnish no precedent otherwise, in so far as new and later subjects of taxation are concerned.

1. Mercantile License Tax. The Act of 1841[8] imposed a tax on wholesale and retail dealers on the basis of annual sales. The tax varied from $7 to $200 (one-half if the merchandise was the product of the United States), on annual sales ranging from sales of less than $5,000 to sale in excess of $300,000.

2. Occupation Tax. The Act of April 29, 1844[9] provided that "Salaries and emoluments of office, all offices, and posts of profit, professions, trades and occupations, except the occupation of farmers, together with all other things now taxable by the laws of this Commonwealth, shall be valued and assessed and subject to taxation for the purposes of this act mentioned, and for all State and county purposes whatsoever."

3. Capital Stock Tax. The Act of April 29, 1844[10] also imposed the following tax on capital stock: Whenever a corporation failed to declare a dividend of 6% or more, the tax was three mills on every dollar of the appraised value of the stock. Whenever a corporation declared a dividend of 6% or more, the tax was one-half mill on each one per centum of such dividend.

It will be conductive to a proper understanding of the meaning of uniformity and equality, as interpreted by the Supreme Court of Pennsylvania, to review briefly the principal tax laws which have been challenged since the adoption of the Constitution of 1873, and the conclusions reached by that Court on the specific issues involved. The following arrangement is based on the first appeal directed at each of the respective subjects.

1. Corporate Franchise Tax

Certain features of a corporate franchise tax were considered by the Supreme Court in 1875. The Act of April 27, 1874[11] imposed a franchise tax upon corporations authorized to mine, purchase, or sell coal, at the rate of three cents per ton of 2240 pounds. This statute was challenged on two grounds, first, because individuals and partnerships were not included; and second, on the theory that a property tax, "without any regard to values, is unconstitutional." In sustaining the classification, and deciding that the tax was upon the privilege of engaging in such business, rather than a tax on specific property, and consequently need not have ad valorem attributes, it was said by Mr. Chief Justice AGNEW:

> "We are of opinion that the tax imposed by the 7th section of the Act of April 24, 1874 is upon the corporate franchise of this company measured by its business, to wit: by the number of tons of coal mined or purchased and sold by it, and is not upon the coal itself. The tax thus imposed upon the franchise is uniform, it being at the rate of three cents upon every gross ton mined or purchased and sold. The argument against the tax must therefore deny the right of classification. The classification here is of incorporated coal mining, and purchasing and selling companies, and the subject of taxation, their franchise or privilege of pursuing this business. Now, what is there to prevent the legislature from making this class? It is not expressly forbidden in the first section of the ninth article of the constitution . . . We must conclude, therefore, that a classification of coal-mining and purchasing and selling companies, is not beyond the legislative power, and the tax being clearly uniform upon their business, measured by the extent of it, is not only within the meaning of the constitution, but is equal and just."[12]

2. Occupation Tax

An occupation tax was before the Supreme Court in 1885, and before the Superior Court in 1924.

First. Pursuant to the Act of March 18, 1875,[13] the city of Williamsport adopted an ordinance which directed that a certain tax should be imposed upon "all personal property, and all objects and things assessed as unclassified." The assessors were directed to "assess all offices and posts of profit, professions, trades, and occupations," according to the income derived from each. This was done with respect to laboring men, clerks, and professional men, while bankers and business men were assessed in proportion to the sum that it would cost to hire a clerk to perform their duties. As a result the assessments were crude and chaotic, and were characterized by various deductions and exemptions. The Supreme Court, on appeal, conceded the validity of an occupation tax, and a reasonable classification for that purpose, but found fault with the inequality which resulted from lack of any uniformity in the asssesments. As said by Mr. Justice PAXSON:

> "The tax we are considering is especially odious from the fact that it assumes to tax the income derived from labor and exempts the income derived from capital . . . Yet so crudely was the matter done, that there appears to have been no uniformity even in the want of uniformity."[14]

Second. The Act of April 29, 1844[15] authorized a tax on various occupations for state and county purposes, but excluded the occupation of farmers. The present statute contains the same exemption.[16] In disposing of the exclusion of farmers as a valid classification, rather than an outright exemption, it was said by Judge HENDERSON:

> "As will be observed the Act of 1844 makes six classifications of subjects which may properly come within the general denomination of occupations: They are, salaries, offices, posts of profit, professions, trades and occupations except farmers. That is, the class of persons known as farmers are not included within the subjects of taxation and there is reason for the distinction . . . The land on which they labor is taxed as is the increase of their herds and the legislature evidently had these conditions in view in excluding them from the class of subjects made liable to an occupation assess-

ment . . . The legislature had authority to select the classes of subjects of taxation and they did not select a class including farmers." [17]

3. Personal Property Tax

The tax on intangibles was considered by the Supreme Court in 1886. The Act of June 30, 1885 [18] imposed a tax of three mills on the value of mortgages, bills, notes, bonds, judgments, agreements and accounts bearing interest, etc., but excluded from its operation any such property owned by corporations and by building and loan associations. It was declared to be a supplement to an act which imposed a tax on capital stock. In sustaining this classification it was said by Mr. Justice PAXSON:

"The Act of 1885 being a supplement to the Act of 1879, the two acts must be read together, and thus read we have in the one a tax of three mills on mortgages, etc., in the hands of individual citizens, and what is practically and legally, although not in name, a similar tax upon the same class of subjects in the hands of corporations. Wherein then is the lack of uniformity, and wherein has the legislature made a discrimination in favor of corporations as against individual citizens . . . While a different mode of assessing taxation is adopted in dealing with the tax on corporations from that of taxing money in the hands of individuals, the result is substantially the same." [19]

This statute, however, excepted notes or bills for work or labor done. Here, then, is the first clear cut ruling on the validity of an exemption of property. On this point is was held:

"The exception of 'notes or bills for work or labor done' is clearly a violation of the IXth article of the Constitution. This belongs to a species of class legislation that has become very common, more common than commendable, the object of which is to favor a particular class at the expense of the rest of the community. So far as such legislation affects the question of taxation the constitution has put an end to it. There can be no more of it. Nor should there be. The constitution protects all classes alike; the poor and the rich equally enjoy its benefits, and all must share the burden which it imposes. However popular such legislation may be, it cannot be sustained under our present constitution." [20]

4. Mercantile License Tax

Certain features of a mercantile license tax have been challenged before the Supreme Court in 1890, 1896, and on two occasions in 1900.

First. On July 8, 1882, the City of Allentown adopted an ordinance which classified vendors of merchandise, and which imposed a tax based on gross annual sales, and a supplemental ordinance on August 27, 1886, which provided for the licensing of various occupations. The rates are not set forth in the report. Defendant, a proprietor of a restaurant and saloon, objected to these enactments as lacking uniformity. Both were upheld by the lower court as a valid classification of the subjects of taxation. This action was affirmed by the Supreme Court in a PER CURIAM order. [21]

Second. On April 3, 1893, the City of Williamsport adopted an ordinance which imposed an annual license tax upon various kinds of business. Merchants were classified into nine classes, on the basis of gross annual sales ranging from $25 to $75,000, and a tax was assessed against each class, respectively, ranging from $25 to $100. The decision of the lower court in favor of the constitutionality of this ordinance was sustained in a brief PER CURIAM opinion. The lower court had made the following observation:

"The power of classification is inherent in the power of taxation, and, in my judgment, the only limitation upon this power is that such classification be made in such manner as to produce as great uniformity and equality of taxation as possible . . . I will go further and affirm that, in my judgment, if the subjects named were taxed without regard to the amount of their sales that it would be most unjust and inequitable, and such assessment could not produce uniformity." [22]

Third. On June 25, 1888, the City of Titusville adopted an ordinance imposing an annual license tax upon various kinds of business. Retail and wholesale merchants were classified separately. The tax against retail merchants varied from $5 to $100, according to sales ranging from $1000 to $60,000 or more. The tax against wholesale merchants varied from $5 to $60, according to sales ranging from $2500 to $1000,000 or more. The opinion and decision of the lower court was affirmed by the Supreme Court in a brief PER CURIAM announcement. With respect to this part of the ordinance, it was said by the lower court:

"We see no objection to classifying wholesalers and retailers separately . . . Classification according to the amount of business done has been frequently recognized in this Commonwealth and by our federal courts . . . The right to make such classification seems to be settled by our courts . . . The right to make the classification being determined, we have no doubt as to the legislative authority to impose different 'rates' upon the several classes." [23]

This ordinance, however, exempted from its operation, contractors doing an annual business of less than $1000. Here, then, is the first clear cut ruling on the validity of an exemption of persons. On this point it was held:

"This exemption is class legislation, which is forbidden by the constitution, and not in any way or under any guise to be tolerated. This portion of the ordinance must fall, but this defect alone does not render the entire ordinance void." [24]

Fourth. The Act of May 2, 1899 [25] provided that retail dealers should pay an annual mercantile license tax of $2, and one mill on each dollar of business transacted annually; that wholesale dealers should pay an annual mercantile license tax of $3, and one-half mill on each dollar of business transacted annually; and that dealers at any exchange or board of trade should pay a mercantile license tax of 25c on each one thousand dollars of goods

sold. In approving the validity of this statute, it was said by Mr. Justice MITCHELL:

"This court, as thus appears, has not decided that a tax such as now before us is a tax upon property, requiring uniformity in the rate . . . As already said, even regarding it as a tax upon property directly, it could be sustained as a classification according to the use and purpose for which the property is held . . . For each of these classes a uniform rate is fixed per dollar of business transacted. Such a tax is 'uniform upon the same class of subjects' within the requirements of the constitution." [26]

5. Capital Stock Tax

The validity of a capital stock tax was decided by the Supreme Court in 1891. The Act of June 7, 1879 [27] provided that corporations which made or declared, during any year, dividends amounting to six per centum or more upon the par value of their capital stock, should be taxed at the rate of one-half mill for each one per centum of dividend; otherwise, at the rate of three mills for each dollar of the actual value of the stock. In sustaining this act it was said by Mr. Justice WILLIAMS:

"Why the net earnings were not adopted as the proper measure of value, instead of so much of them as may be divided or carried to the sinking fund, it is not material to inquire. The standard adopted is applied impartially. Whether it is the best one that could have been adopted or not, is more a legislative than a judicial question, and the learned judge was right in his conclusion that the provisions of the act of 1879, relating to this subject, are not objectionable on constitutional grounds.[28]

It should be noted at this point that the proponents of the various tax measures began to press more vigorously upon the Court what was contended to be a logical conclusion to be derived from the first and second sections of Article IX. It will be recalled that Section 1, which declares that all taxes shall be uniform, with certain specific exceptions, is followed by Section 2, which declares that all laws exempting property, other than the property so enumerated in Section 1, should be void. Was it not logical to assume that the injunction in Section 2, prohibiting all laws exempting property from taxation, applied only to a property tax, and that all other taxes—license, privilege, occupation, excise, succession, income, or such taxes by any other name—were not subject to that prohibition? This argument has been fairly met by the Supreme Court, on several occasions, with the reply that notwithstanding the injunction against property exemptions, as contained in Section 2, Section 1 still provides that "all taxes" shall be uniform, and that the phrase "all taxes" could not fairly be construed to mean "property taxes" alone. Furthermore, the Court has pointed out, as a secondary consideration, that it is by no means clear that certain of these taxes are not property taxes, including the tax upon income.

6. Inheritance Tax

Certain phases of an inheritance tax have been challenged before the Supreme Court on two principal occasions, first in 1899 and again in 1934.

[26] Knisley v. Cotterel, 196 Pa. 614 (1900).
[27] P. L. 112.
[28] Com. v. Brush Electric Light Co., 145 Pa. 147 (1891).

First. The Act of May 12, 1897 [29] imposed an inheritance tax of two dollars on every one hundred dollars of the clear value of personal property, with the proviso that personal property to the amount of five thousand dollars should be exempt. In rejecting the validity of this enactment, it was said by Mr. Chief Justice STERRETT:

'The language of section 1, as to what the rule of uniformity shall embrace, is as broad and comprehensive as it could possibly have been made. The words, 'all taxes,' must necessarily be construed to include property tax, inheritance tax, succession tax and all other kinds of tax the subjects of which are susceptible of just and proper classification: By necessary implication, the first clause of that section recognizes the authority of the legislature to justly and fairly, but never arbitrarily, classify those subjects of taxation with the view of affecting relative equality of burdens. A pretended classification that is based solely on a difference in quantity of precisely the same kind of property is necessarily unjust, arbitrary and illegal." [30]

Second. The United States Revenue Act of 1926 [31] permitted the states to appropriate 80% of the progressively graduated federal inheritance tax. In order to appropriate this credit, the Legislature of Pennsylvania, by Act of May 7, 1927,[32] added this differential to the existing state inheritance rates. As a consequence, the amounts payable into the state treasury were determined by the graduated federal tax schedules, with respect to those estates large enough to be taxable under the federal law. The Supreme Court of Pennsylvania observed, in an appeal challenging the state law, that if the State of Pennsylvania did not appropriate this differential, it would have to be paid into the federal treasury, consequently no prejudice resulted to beneficiaries who were called upon to pay the tax. Under these circumtances the Court applied the rule that a person not injured by the statute, has no standing to challenge its constitutionality.[33] There is dictum in this opinion to the effect that the constitutional requirement of uniformity does not apply to the taxation of privileges, but this was impliedly overruled in a subsequent decision.[34]

7. Personal Income Tax

The constitutionality of a personal income tax has been challenged before the Supreme Court on three occasions, 1935, 1938, and again in 1940.

First. The Act of July 12, 1935,[35] imposed an annual tax upon the entire net income of residents of Pennsylvania, and upon the net income received by non-residents from property owned or from any business or occupation carried on within this Commonwealth. Numerous exemptions were permitted for the computation of "gross income," as well as deductions for the determination of "net income." Taxpayers were allowed a deduction for living expenses in the amount of $1000 in the case of a single person, and $1500 for the head of a family or a

[35] P. L. 970, 72 Purd. Stat. sec. 3402.

married person. In addition a deduction of $400 was authorized for each dependent under eighteen years of age. The tax imposed at the rate of two per centum of the amount of incomes not exceeding $5000; two and one-half per centum of the amount over $5000 but not exceeding $10,000; three per centum of the amount over $10,000 but not in excess of $25,000. Higher rates were applied on incomes within higher brackets, with a provision taxing all income over $100,000 at the rate of eight per centum. The proponents of this measure vigorously contended that this was an excise, not a property tax, and that the constitutional requirements of uniformity applied only to property taxes. In disposing of this contention it was said by Mr. Chief Justice FRAZER:

"We are at liberty to determine the question along normal, natural lines. In so doing we are inevitably impelled to the conclusion that an income tax is a property tax. This result seems particularly clear in so far as a tax upon the income from real and personal property is concerned. On behalf of defendants the argument is made that excise taxes by their nature are not adapted to the rule of uniformity, since 'it is highly impracticable, if not impossible, to classify the subjects upon which a tax is levied according to value.' Be that as it may, the objection remains that the Constitution declares 'All taxes shall be uniform upon the same class of subjects' and we are not at liberty to disregard this plain mandate of the law upon the ground of inconvenience. Our conclusion is, then, that our previous cases do not justify defendants' assertion that excise taxes need not be uniform in application, and that the tax in question, even though considered an excise, may nevertheless be subject to the constitutional requirement. It is unnecessary to settle the question at this time, however. We find this tax to be, in part at least, a property tax which plainly and without question violates the constitutional rule regarding uniformity, and for that reason must be declared void. Even though the operation of the act might possibly be valid in some instances, the good and the bad are so inseparably interwoven that we are obliged to reject the levy in its entirety." [36]

The Court was also urged to sustain the tax because of the excessive share of taxation borne by real estate, and on the ground that the tax burden should be more equitably distributed. On this point it was said: "Obviously, we need not dwell on this proposition. The Constitution is the fundamental law of the Commonwealth and cannot be flagrantly violated even for the reasons just stated. If such were not the case, there would be no stability in our law, and under the guise of necessity every mandate of the Constitution would in time be infringed. We will not lend our assistance to such a scheme." [37]

Second. On November 26, 1938, the City of Philadelphia adopted an ordinance imposing an annual tax at the rate of 1½% on salaries, wages, and other compensation earned by residents of Philadelphia and on the net profits of business or other activities conducted by such residents; and upon salaries, wages, and other compensation earned by non-residents of Philadelphia for work done or services performed in the city and on the net profits of business or other activities conducted in the city by non-residents. It further provided that domestic servants in private homes, farm laborers or farmers selling their own products should not be included within the meaning of "taxpayer" as used in the ordinance; that each taxpayer should receive a credit of $15 upon making and filing the return required under the ordinance; and that the amount of taxes paid to the city on the taxpayers' residence, whether paid by the taxpayer or another, or a proportionate part of such taxes if the taxpayer occupied but a part of the premises, could be deducted as a credit from the total amount of the tax imposed by the ordinance. The constitutionality of this ordinance was disposed of by the Supreme Court in the following PER CURIAM opinion:

"Under the severability clause in the income tax ordinance (cited), the majority, one Justice disagreeing, hold that the income tax ordinance is constitutional, with all exemptions stricken out, including the credit for making and filing the return, and the ordnance must be read as though such exemptions and credit for making and filing the return were not included." [38]

Third. On December 13, 1939, the City of Philadelphia adopted a second ordinance (the first was repealed on January 7, 1939), imposing a tax, without exemptions, on salaries and wages earned by residents; on the net profits of businesses or other activities conducted by residents; on salaries and wages earned in the city by non-residents; and on the net profits of businesses or other activities conducted in the city by non-residents. The constitutionality of this ordinance was upheld by the lower court on the authority of the decision noted above. The opinion of the lower court was affirmed by the Supreme Court in a PER CURIAM order. [39]

8. Corporate Net Income Tax [40]

A tax on corporate net income was before the Supreme Court in 1936. The Act of May 16, 1935, [41] imposed an income tax designed to constitute a levy on business associations, foreign and domestic, for the privilege of doing business in the State. It was intended to reach corporations doing business wholly within the State and those doing business partly within and partly without the State. The Act did not impose a tax on income, as such, but was intended as a tax on a privilege measured by net income. The tax was measured by 6% of the net earnings or profits gained within the State during the year, at the rate of 6% upon each dollar of net income. Where the corporation's entire business was transacted within the State, net income was defined as that returned

[36] Kelley v. Kalodner, 320 Pa. 180 (1935).
[37] Ibid.

[38] Butcher v. Philadelphia, 333 Pa. 497, (1938).
[39] Dole v. Philadelphia, 337 Pa. 375 (1940).
[40] The Act of June 28, 1923, P. L. 876, imposed an emergency profits tax of one-half of one per centum per annum, for two years, upon each dollar of net income of every corporation during the years 1923 and 1924. The term "net income" was defined to mean the net income as returned to the federal government, together with all interest and dividends. On Appeal to the Supreme Court, the substantive question involved was whether the same deductions provided in the federal law, i. e., losses sustained in previous years, were applicable. In deciding this in the negative, it was said by Mr. Justice SCHAFFER: "If the legislature had intended to allow all deductions which were allowed by the federal government, it would have been easy to say so, but the legislature has not used that language." Com. v. Chambersburg Engineering Co., 287 Pa. 54 (1926).
[41] P. L. 208, 72 Purd. Stat. sec. 3420a.

to the federal government, less federal tax. Where the corporation's business was not entirely transacted in the State, the tax was imposed on such portion of net income as was attributable to operations within Pennsylvania for the fiscal year. The determination of this income was through a method of apportionment calculated upon three factors, namely, tangible assets, gross receipts and payroll. In sustaining this levy it was said by Mr. Chief Justice KEPHART:

"Where different rates are legislatively imposed on varying amounts or quantities of the same tax base, then you have a graded tax that lacks uniformity under our Constitution. See Kelley v. Kalodner, 320 Pa. 180. To create a graded tax it is generally necessary that the rate itself be a variable factor even though the base may remain constant, or it may be that in particular cases such a tax may result of intangible differentiations in subject-matter with the imposition of a different rate upon each of them. The impost which varies in levels of the tax base thus defined becomes graded and lacks uniformity under our Constitution. This is not a graduated income tax." [42]

9. Sales Tax

A sales tax was challenged before the Supreme Court in 1938. On February 24, 1938, the City of Philadelphia passed an amended ordinance, known as the City Sales Tax Ordnance, under which a tax of two per centum was levied upon all retail sales within the city limits from March 1, 1938 to December 31, 1938, with the exception of certain sales of food, drugs, newspapers and periodicals. Included within the act, however, were sales of "Food, drink (other than alcoholic beverages) and entertainment in restaurants, cafes and similar establishments, including in the amount of such receipts any cover or minimum or other charges made to patrons where the charge to the patron (was) one ($1) dollar or more, in which event the tax (was) imposed on the full amount of the charge to each such patron." With respect to this exemption, it was said by Mr. Justice DREW:

"The intention of the council seems to have been to exempt cover charges under one dollar and tax those over one dollar. The necessity for uniformity and the invalidity of any graduated tax made such exemption void; consequently 'food, drink . . . and entertainment in restaurants, cafes and similar establishments, including in the amount of such receipts any cover or minimum or other charge . . .' are liable to taxation at the uniform rate." [43]

10. Specific Property Tax

The requirements of a tax on specific property were reviewed by the Supreme Court in 1938. The Act of November 22, 1933, [44] as amended by the Act of December 22, 1933, [45] imposed a state floor tax upon spirituous and vinous liquors lodged or stored in the Commonwealth, until such time as the Twenty-first Amendment to the Constitution of the United States was ratified. The tax was at the rate of $2 on each proof gallon, regardless of value. As a consequence, the ratio of the tax to the value of the property varied from 12½% on whiskey at $16 a gallon, to 500% on alcohol valued at forty cents a gallon. The Commonwealth conceded that this was a property tax, but contended that it need not have any ad valorem attributes. In overruling this contention, it was said by Mr. Justice MAXEY:

"The burden of a property tax rests upon the property on which it is imposed and if the same tax is laid on two properties of unequal supporting economic power, the burdens are unequal. A two dollar tax on a unit of liquid property of the value of two dollars while the same tax is laid on the same unit of liquid property of the value of four dollars is just as much an offense against the constitutional prescription of uniformity as in the more extreme examples presented by this record. Uniformity of taxation means equality of tax burden. A tax to be uniform must operate alike on the classes of things or property subject to it. The tax herein challenged presents an outstanding example of a legislatively imposed inequality of burden, and to protect the citizen against it is a judicial duty . . . We also hold that the severability clause of the Floor Tax Statute cannot save it. After excising the parts of this statute which trench upon the Constitution, nothing remains that can effectively function." [46]

11. Chain Store and Theatre Tax

The validity of a graduated store and theatre tax was before the Supreme Court in 1939. The Act of June 5, 1937 [47] imposed an annual license tax upon every person opening, establishing, operating, maintaining or controlling one or more stores or theatres within the Commonwealth. The tax increased progressively with the number of stores or theatres in each chain. For one unit the tax was $1; from 2 to 5 units, $5; from 6 to 10 units, $10; from 11 to 15 units, $20; from 16 to 20 units, $30; from 21 to 30 units, $50; from 31 to 50 units, $100; from 51 to 75 units, $200; from 76 to 100 units, $250; from 101 to 200 units, $350; from 201 to 500 units, $450; and for more than 500 units, $500. In disposing of the constitutionality of this tax, it was said by Mr. Justice DREW:

"This court has long held and it is now well established in this Commonwealth that a progressively graduated tax is lacking in uniformity and violates article IX, section 1, of our Constitution . . . Whether the statute imposes a progressively graduated tax on income or, as does the act here before us, on the operation of stores or theatres within the Commonwealth, it lacks uniformity and hence is unconstitutional . . . Whether the tax attempted to be imposed by the act in question be termed a property or excise tax makes no difference in determining its uniformity under article IX, section 1, of the Pennsylvania Constitution, for there it is clearly provided that 'all taxes shall be uniform.' . . . Since the principles of equality and uniformity are so firmly imbedded in the Constitution of this Commonwealth and in our decisions, we have no alternative but to declare the 'Store and Theatre Tax Act' to be in violation of article IX, section 1, of the Constitution of Pennsylvania." [48]

[42] Turco Paint & Varnish Co. v. Kalodner, 320 Pa. 421 (1936).
[43] Blauner's Inc. v. Philadelphia, 330 Pa. 342 (1938).
[44] P. L. 5, 47 Purd. Stat. sec. 780.
[45] P. L. 94, 47 Purd. Stat. sec. 782.
[46] Com. v. A. Overholt & Co., Inc., 331 Pa. 182 (1938).
[47] P. L. 1656, 72 Purd. Stat. sec. 3420-1-11.
[48] American Stores Co. v. Boardman, 336 Pa. 36 (1939).

Conclusions

The conclusion is obvious, from a review of these decisions, that the constitutional requirements of uniformity in taxation was not adopted for an idle purpose, and was intended to mean something, although there has been some lack of uniformity of judicial expression as to what uniformity of taxation does actually mean. Terminology may be in part responsible. It is said that a tax based upon property values does not require the same ad valorem attributes as a tax in rem, if the former is a license tax and the latter is a tax on the property itself. This distinction is somewhat illogical. "Equality of burden," as a theoretical concept, is not inconsistent with "ability to pay", in so far as the latter is implied in a progressively graduated income levy. As observed by the Chief Justice on one occasion, "Persons pay taxes, not property." [49]

Aside from theoretical considerations, however, certain fundamental principles appear in the decisions. The requirement of uniformity applies to all taxes, not merely to a property tax, although applied more stringently with regard to the latter. Classification must bear some reasonable relation to the subjects of the tax, and the same may be said of assessments. Aside from these incidents, the opinions fairly condemn progressively graduated schedules, and all manner of exemptions inconsistent with a reasonable classification of the subjects of taxation. It is clear, however, that uniformity is only a relative concept. According to the views most recently expressed, "There is no such thing as perfect uniformity and equality in taxation. The best that can be done, and all that is required, is that it should approximate uniformity and equality as nearly as possible. The requirement of uniformity does not demand mathematical precision." [50]

In 1913, 1928, and again in 1937, the electorate rejected proposed amendments to Article IX, which would have made possible the imposition of graduated schedules. Any such amendment, under the amending clause, [51] must be approved by the legislature at two consecutive sessions, and may not be submitted to the electorate "oftener than once in five years." [52] In 1939 the legislature authorized the following proposal: "Income inheritance and estate taxes shall be levied and collected under general laws, but such laws may grant exemptions and may impose graded or graduated rates; but no intangible personal property shall be subject to any other State or local tax either on income or capital values during any time that the income therefrom is taxed under any law imposing an income tax on individuals." [53] This proposal differs from the former by the express exclusion of intangibles during the continuance of a personal income levy. It is possible that this feature might overcome the antagonism of the electorate to exemptions and progressive rates. Some such amendment would appear to be imperative before the Commonwealth of Pennsylvania will be able to modernize its tax structure.

Statistical Estimations: Definitions and Techniques

Section I

Introductory

Throughout the various chapters of the preceding Report extensive use has been made of statistical estimations. The nature of some of these estimations is simple and does not require further explanation. Other estimations, however, involve the making of sets of assumptions and rather complex statistical manipulations. Appendix B [1] represents a general outline of the staitstical operations performed as well as a statement of the assumptions made in connection with these manipulations. In the main, Appendix B follows, as far as the nature of the subject matter permits, the topic sequence adhered to in the Report.

[1] Appendix B was prepared by Paul H. Wueller with the assistance of Mr. Morris Cohen and Dr. Clyde H. Graves, all of the staff of the Pennsylvania State College.

Section II of Appendix B is devoted to a discussion of the techniques used in connection with the estimation of business tax impact differentials, which are dealt with in Chapter IV of the Report. Coincidentally to the discussion of these estimation techniques such terms as e. g. 'presumably competitive state' and 'adjusted mean effective industrial realty tax rate,' which occur throughout the Report, are defined.

Section III is primarily concerned with statistical techniques used in connection with the 'tax-due-income' ratios presented and discussed in Chapter V of the Report.

Sections IV, V, and VI outline the statistical techniques used in conection with the estimation of the net yield of miscellaneous taxes which are discussed in Chapter VI of the Report.

Section II

Business Tax Impact Differentials: Estimation Techniques

A. The Necessity for Constructing Mean Effective Industrial Real Estate Tax Rates

The determination of the rates of the real estate taxes is left by all states to local discretion, such discretion being limited typically by provisos which specify the maximum realty tax rates which minor jurisdictions may impose upon taxable realty. Because of the latitude which state legislatures permit to their minor jurisdictions with regard to the determination of local real estate tax rates, these rates tend to vary widely. Though wide variations exist in local realty tax rates, an attempt must be made to select the typical or average rates which prevail in the industrial sectors of a given state if significant state tax impact differentials are to be computed.

B. Definition of the Phrase Mean Effective Industrial Realty Tax Rate

For the purpose in hand, a mean effective rate for a given locality is defined as the sum total of real estate tax levies over the sum total of the market values of real property subject to the tax. Similarly, the mean effective rate for a county is defined as the sum total of levies imposed in a given county over the sum total of market values of taxable properties within the county.

C. Definition of Industrial County

If the task in hand were the determination of typical differences in realty taxes imposed upon residential property, one would confine one's attention to realty levied against residential property. Inasmuch as the problem under consideration is the determination of typical state differences in real estate tax rates assessed against manufacturing properties, an attempt has been made to segregate the rates assessed against manufacturing properties from those assessed against other types of property. In view of the limited data, no completely satisfactory segregation was attainable. However, a first approximation of satisfactory segregation was attempted by selecting the industrial counties of different states and computing the mean effective realty tax rates prevailing in these counties. In justification of this approach, it may be pointed out that manufacturing enterprise tends to concentrate in certain counties. For purposes of the subsequently outlined computation a county in a given state was designated as industrial if it was found to account for more than one per cent of the total 'value added by manufacture' in that state.[1]

D. Estimation of Mean Effective Industrial County Tax Rates

The table below shows unweighted and weighted mean effective county tax rates for selected states.

Column 1, Table B-I, lists the states which may be presumed to compete with Pennsylvania on the basis of the 'value added' criterion in the manufacture of principal products.

The basic materials for Cols. 5, 6, and 7 have been obtained from:

1. Moody's Governments and Municipals, Moody's Investors' Service, New York, 1940.

2. Prentice-Hall State Tax Services, 1940, for the following states: Pennsylvania, New York, New Jersey, Massachusetts, Indiana and West Virginia.

3. National Municipal Review, December, 1938 and December, 1939.

4. Pennsylvania Department of Commerce, Pennsylvania Planning, Vol. 6, No. 5, Harrisburg, May-June, 1940.

The sources of the basic information as listed above differ in some important respects.

Moody's and Prentice-Hall furnish nominal tax rates[2] for numerous communities located in selected states. In addition, these sources present what, in the judgment of their compilers, appear to be adequate assessed value—market value ratios for taxable real estate.

The typical procedure in constructing Cols. 5 and 6 has been to multiply the nominal rates by the pertinent assessment ratios. Throughout, an attempt has been made to associate nominal tax rates and assessed value—market value ratios as given by a specific source.

In connection with the problem of associating assessed-market value ratios and nominal rates, it should be observed that Moody's at times furnishes but one assessed-market value ratio applicable to the nominal rate of but one levying jurisdiction. Whenever this case arose, it has been assumed that the one ratio furnished was typical for all levying jurisdictions, and the multiplication required has been made accordingly. In contradistinction to the Moody's practice, Prentice-Hall supplies what appear to be adjusted over-all assessed-market value ratios. To the extent that the Prentice-Hall ratios adequately reflect the assessment situation, the assumption implicit in treating the Moody's materials need not be made.

In addition, it should be noted that Prentice-Hall does not furnish assessed-market value ratios for Massachusetts. To compensate for this lack of source material, the model Moodys ratio for Massachusetts has been associated with the nominal Massachusetts rates as given by Prentice-Hall.

Similarly, in the case of Pennsylvania, nominal rates as furnished by Prentice-Hall have been associated with the assessed-market value ratios as estimated by the Superintendent of Public Instruction and reproduced by the Pennsylvania Planning Board.

---

[1] For the criteria underlying the selection of industrial states for which mean effective industrial county tax rates have been constructed, see, Appendix B, p. B-12 and following.

[2] The term nominal rates is defined as the ratio 'tax levy' over 'assessed value.'

TABLE B-1

Unweighted and Weighted Mean Effective Industrial County Real Property Tax Rates for Selected States

Name of State	Number of Items in Sample			Adjusted Average Rate		Average of NMR Rates	Weighted County Rate Based Upon Columns (5) and (6)

* No data given.
† Class III and Class IV Property.

In connection with the general problem of constructing the rates as shown in Col. 5, it should be further noted that at times the nominal rate of a specific jurisdiction, such as a school district for a given year has been combined with a nominal rate for another year of a different specific jurisdiction, such as a sanitation district. It should be noted, however, that in no case did the time period in question exceed three years. In the light of what is generally known about the stability of tax rates, this time interval would not seem sufficiently long to seriously distort the results.

As regards Col. 7, it should be observed that the above enumerated difficulties were not encountered because the National Municipal Review furnishes mean effective rates which call for no adjustment whatever.

In conclusion, it may be noted that the average rates listed in Cols. 5, 6, and 7 are the over-all rates imposed in communities which are located in industrial counties, as the term was defined above.[3]

Columns 2, 3, and 4 show the number of individual items (over-all local tax rates) which have entered into the computation of the averages shown in Cols. 5, 6, and 7.

Columns 8 and 9 present weighted industrial county rates based upon the adjusted average rates indicated in Cols. 5 and 6 respectively.

The weighted rates have been constructed as follows: 1—The items underlying Cols. 5 and 6, respectively, have been segregated according to county of locations; 2—the items for each county have been summed and averaged; 3—the county averages so obtained have been multiplied by 'value added' as credited by the Census of Manufactures to specific counties; 4—the sum of the products has been divided by the sum of frequencies represented by 'value added.'

[3] Moody's, in contradistinction to Prentice-Hall, differentiates between 'residential' and industrial communities. All communities designated as 'residential' by Moody's have been disregarded if not located in industrial counties.

E. The Limitations of Mean Effective (Weighted and Unweighted) Industrial Real Estate Tax Rates

Mean effective tax rates are average rates and hence suffer from the same types of limitations which characterize all measures of central tendency. These limitations should be fully realized before mean effective or average rates are made the basis of any generalization whatever.

From point of view of essence, a mean or average value associated with any measure—such as the average height of a United States army recruit—is the equivalent of the probable value or the value which occurs most frequently if a large number of units—such as e. g., United States army recruits—are measured. Illustrating the point under consideration by further reference to the army recruit example, it goes without saying that not all recruits are of the average height, but it goes likewise without saying that unless the greater percentage of recruits are of the average height or close to the average height, the phrase "average height of an army recruit" is devoid of meaning and the computation of the average in question is but an idle exercise in arithmetic.

To test the significance of averages, a measure known as the "coefficient of variation" has been developed. The coefficient of variation is a percentage figure and indicates within what range actual values deviate from the average value. For instance, a coefficient of variation for the average height of army recruits of, say, ten per cent indicates that the height of actual recruits ranges from a figure ten per cent below the average height to a figure ten per cent above the average height.

The table below shows average deviations of the mean effective industrial county tax rates for selected states.

Inspection of Cols. 10 and 11 of Table B-11 shows that

TABLE B-II

Coefficients of Variation of Effective Real Property Tax Rates for Selected States*

State	Coefficient of Variation	
	Moody's Tax Rates	Prentice-Hall Tax Rates
(1)	(2)	(3)
Pennsylvania	22.60%	23.90%
California	13.29	11.47
Connecticut	....†	18.00
Illinois	27.28	....†
Indiana	24.11	24.69
Massachusetts	11.88	17.62
Michigan	20.13	17.90
New Jersey	17.77	21.94
New York	16.60	10.88
North Carolina	16.89	13.15
Ohio	21.32	24.59
Tennessee	28.62	12.50
West Virginia	15.16	21.55
Wisconsin	14.81	12.14

* For underlying rates see Table B-1 columns (2), (3), (5), and (6).
† No data available.

the coefficients of variation range from 11.88% to 28.62% in the weighted Moody's series and from 11.4% to 24.65% in the weighted Prentice-Hall series.

F. Definition of Competing Industrial States

The states shown in Table B-1, Col. 1 are presumed to compete with the Commonwealth of Pennsylvania in connection with the manufacture of selected products. The selection of these states has been made as follows:

1. In order to determine the states whose products may be presumed to compete with Pennsylvania products, Pennsylvania industries[4] have been ranked in descending order on the basis of their percentage contribution to total value added by Pennsylvania manufacturing enterprise. All Pennsylvania industries contributing more than one per cent to total value added have been studied with a view of comparing the taxes which are imposed upon a typical firm in the industries in question when operating in Pennsylvania or in presumably competitive states.

2. In order to ascertain the presumably competitive states, that is, the states whose products are such as to be likely to compete with the products of Pennsylvania, the value added by different industry groups was ranked in descending order for all states and the value added contribution of each industry group in every state was expressed as a percentage of the total value added by manufacture in the respective states. These percentages for different states were converted into a cumulative frequency distribution, and a state other than Pennsylvania was designated as presumably competitive if the list of industries accounting for its first 75% of total value added contained an industry listed under principal industries.

3. The number of competitive states obtained by this method, however, proved too large to be manageable within the limits of the Report, and it was decided to consider only those states as presumably competitive which contained at least three of the principal industries.

4. On the basis of the operations performed under (2) and (3), the following states were found to be in competition with Pennsylvania:

a. California
b. Connecticut
c. Illinois
d. Indiana
e. Massachusetts
f. Michigan
g. New Jersey
h. New York
i. North Carolina
j. Ohio
k. Tennessee
l. West Virginia
m. Wisconsin

It goes without saying that the products of states other than those listed above do compete with the products of Pennsylvania. However, because of the number of products on the basis of which the above states compete with the Commonwealth, and because of the economic and social significance of the products listed, in the Pennsylvania economy comparison of estimated tax differentials between Pennsylvania and the above listed states seems particularly appropriate.

Section III

Estimation of Taxes Payable by Families in Different Income Groups

A. Composition, Income and Expenditure Patterns of the Average Urban Family

In connection with the study of the fiscally consequential characteristics of the average urban family, see Temporary National Resources Committee, "Who Pays the Taxes," Monograph No. 3, Washington, 1940.

B. Pennsylvania Taxes Payable by the Average Urban Family

In connection with the computation of Pennsylvania taxes payable by average urban families in different income groups, the following assumptions have been made: (1) the expenditures for housing of the different families have been capitalized at the rate of 10% and against the capital sum so obtained the mean effective urban real estate tax rate (see Appendix B, Table B-I, Col. 7) has been applied; (2) the investment income of those families receiving such income has been capitalized at the rate of 4% and against the capital sum so obtained Pennsylvania's intangibles or personal property taxes have been applied: (3) families having incomes below $3000 annually are assumed to have no investment income whatever.

C. The Relationship between the Pennsylvania Intangibles or Personal Property Tax and the Federal Income Tax: An Illustration

A given taxpayer may deduct state taxes paid when computing his net income for Federal tax purposes.

Table B-III shows how the tax burden of differently circumstanced taxpayers would be changed if the Pennsylvania intangibles taxes (state and county) sometimes referred to as personal property taxes were removed.

Table B-III indicates in Col. 1 selected income class intervals and in Col. 2 the average income accruing to taxpayers within the intervals. Column 3 shows the percentage in total tax obligation due to the Pennsylvania

[4] See, Chapter I, Table V, p. 6455.

intangibles tax. It will be observed that the index drops from 60% for an average income of $5,414 to 3% for an average income of $1,092,973. In other words, if the Pennsylvania intangibles tax were removed, the total tax obligation of a taxpayer having an income of $5,414 would be lessened by 60%; whereas in the case of the taxpayer having an average income of $1,092,973, the tax burden would be lessened by 3%. Or, to state the matter still differently, granting the presence of the Federal income tax, the Pennsylvania intangibles tax as a determinant of the total tax obligations decreases as the taxpayer's income increases.

TABLE B-III

Indifference Index for the Pennsylvania Intangibles or Personal Property Taxes

Net Income Classes	Average Net Income	Indifference Index of Intangibles Taxes
(1)	(2)	(3)
$ 5,000— 6,000	$ 5,414	60.12%
6,000— 7,000	6,465	56.20
7,000— 8,000	7,470	53.43
8,000— 9,000	8,465	50.18
9,000— 10,000	9,481	48.76
10,000— 11,000	10,478	46.18
11,000— 12,000	11,478	44.23
12,000— 13,000	12,484	43.08
13,000— 14,000	13,474	41.43
14,000— 15,000	14,490	39.98
15,000— 20,000	17,180	35.87
20,000— 25,000	22,229	28.44
25,000— 30,000	27,352	24.00
30,000— 40,000	34,408	20.51
40,000— 50,000	44,487	16.82
50,000— 60,000	54,638	14.29
60,000— 70,000	64,864	12.43
70,000— 80,000	74,595	12.06
80,000— 90,000	85,177	9.73
90,000—100,000	95,228	8.73
100,000—150,000	119,839	7.90
150,000—200,000	167,876	7.19
200,000—250,000	219,754	6.42
250,000—300,000	274,871	5.74
300,000—400,000	341,409	5.39
400,000—500,000	430,717	4.74
500,000—750,000	594,691	4.36
750,000 and over	1,092,973	3.05

Legend:
Col. (2) "Statistics of Income, 1937".
Col. (3) See, Appendix B, p. B-15 and following.

In order to construct the indifference index shown in Table B-III, Col. 3, the following data are required:

1. The income distribution of Pennsylvania.
2. The Federal personal income tax rate assessed against incomes of different magnitude,
3. The Pennsylvania intangibles tax rate,
4. The ratios of taxable investment income to total income.

The data listed in (1) were obtained from "Statistics of Income, 1937." The effective Federal income tax rates were calculated by assuming the exemption and credit pattern of the United States, as given in "Statistics of Income, 1937," and applying nominal rates from Taxes, August, 1940, pages 467-469. In (4) the ratios of investment income to total income for different income classes were calculated from "Statistics of Income, 1937," which presents the ratios for the United States as a whole.

The utilization of the above materials involves the making of two basic assumptions. In the first place, it is assumed that the national exemption and credit pattern is similar to the comparable Pennsylvania pattern. In the second place, the validity of the method is predicated upon the hypothesis that the national ratio 'taxable investment income' to 'total income' is similar to the corresponding Pennsylvania ratio. While these assumptions cannot be verified at this juncture, they are believed to be substantially correct.

With these materials in hand, the indifference index was defined and constructed as follows:

Let x=proportional part of net income derived from taxable investments
i=rate of interest used in capitalizing Q (i=.04)*
k=intangibles tax rate (k=.008)
S=intangibles tax (S=kQ)
F=Federal income tax on (x+S)
F′=Federal income tax on x.

Then the indifference Index I is defined as:

$$I=\frac{S+F'-F}{F'+S}$$

Section IV

Estimation of the Probable Net Yield of a Pennsylvania State 'Clear' Income Tax

The basic data for the estimation of the net yield of a three per cent clear income tax are currently made available by the Income Division of the United States Department of Commerce.[1]

Among other pertinent income data, the Department of Commerce estimates annually the 'income payments to individuals' resident in the different states of the union.

For 1939, the Department of Commerce estimates the 'total income payments' received by residents of Pennsylvania at $5,678,000,000.[2]

According to Commerce estimates, this grand total was derived from the following sources:

1. Net salaries and wages	$3,636,000,000
2. Other labor income	445,000,000
3. Entrepreneurial withdrawals ..	636,000,000
4. Dividends, interest, etc.	961,000,000
Total	$5,678,000,000

For purposes of estimating the net yield of a Pennsylvania personal 'clear' income tax, Item (2) may be disregarded.

Item (2), which consists of:

a. Workmen's compensation benefits
b. Payment from private pension or retirement plans
c. Work relief wages
d. Direct relief payments
e. Veterans' compensation
f. Social insurance benefits

is disregarded because, though labelled 'income' by the Department of Commerce, its components partake either of the nature of insurance benefits or public charity.

Deducting item (2), i. e., other labor income which amounts to $445,000,000 from total income of $5,678,000,000,

* Cf. Stewart, Charles, "Income Capitalization as a Method of Estimating the Distribution of Wealth by Size Groups," Studies in Income and Wealth, Vol. III, National Bureau of Economic Research, 1939, p. 108, note. Dr. Stewart uses 4.5% to capitalize equity securities. Inasmuch as we are considering bonds also, a reduction of 0.5% was in order.

[1] Martin, John L., "Income Payments to Individuals, by States," Survey of Current Business, Washington, October, 1940, pp. 8-12.

[2] Martin, op. cit., p. 12.

a potential clear income tax base of $5,233,000,000 is obtained.

However, for purposes of clear income tax estimation, this potential income tax base is too high because it contains entrepreneurial withdrawals amounting to $636,000,000.

As regards these 'intrepreneurial withdrawals' it should be noted that this item includes both positive and negative items. The positive items consist of individual proprietorship and partnership profits actually earned and the negative items consist of merchandise diverted for personal use, capital conversions, etc.

At the present time it is not possible to estimate with any degree of accuracy the relative importance of the negative items. In view of this lack of positive knowledge, it has been assumed that the negative items account for one-half of all 'entrepreneurial withdrawals.'

On the basis of this assumption, the gross base of the proposed Pennsylvania personal clear income tax becomes $4,915,000,000.

For purposes of estimating the probable net yield of the levy under construction, it is necessary to make certain assumptions with regard to the total dollar amount which will be claimed by taxpayers for necessary cost of living expenditures.

In order to make the estimation in question, it is useful to differentiate between 1) single individuals and 2) family units and to differentiate again in each one of these groups between a) taxpayers (single or family units) having less than $800 and b) taxpayers having an excess of $800 annual net income.

The total number of single individuals having less than $800 has been estimated on the basis of Census materials[3] and "Consumer Incomes in the United States."[4] The number of single taxpayers having less than $800 annual income, together with the total amount of income accruing to this group has been estimated on the basis of "Consumer Incomes."[5] Similar estimation procedures have been used for family units.[6] On the basis of these estimates, which must be regarded as tentative, it would appear that taxpayers (single and family units) with incomes less than $800 are likely to claim $433,000,000 for cost of necessary living expenses. Taxpayers (single and family units) with incomes above $800 are likely to claim $685,000,000 for cost of living expenditures. The total necessary living expenses probably claimed, therefore, amounts to $2,118,000,000. Deducting this total from $4,915,000,000, the base of the proposed personal clear income tax becomes $2,797,000,000.

In order to estimate the probable net yield of a Pennsylvania personal clear income tax, it is necessary to ascertain the sources of net salaries and wages by industrial division, because both collectibility as well as cost of collection tend to vary with the type of employment in which the taxable income has been earned.[7]

The following major industrial divisions account for the indicated percentages of total net salaries and wages:

a. Manufacturing	34%
b. Trade	14%
c. Government	12%
d. Service	11%
e. Transportation	8%
f. Mining	7%
g. Finance	4%
h. Construction	3%
i. Electricity and Gas	2%
j. Communication	1%
k. Agriculture	1%
l. Miscellaneous	3%

On the basis of past experience it seems safe to assume that the tax upon salaries and wages earned in industrial divisions (a), (c), (e), (g), (h), (i) and (j) can be conveniently stopped-at-source. These sources of salaries and wages account for 64% of the total, or $2,327,040,000.

Because of similarity of cost of collection and collectibility fractions it seems justifiable to add to this subtotal representing net salaries, and wages, interest, dividends, etc. of $961,000,000. The sum of the two-subtotals which equals $3,228,040,000 may be treated as a unit for yield estimation purposes.

Again, on the basis of past experience, it would seem justifiable to add net salaries and wages received in industrial divisions, (c), (d), (f), (k) and (l) to adjusted entrepreneurial withdrawals.[8]

The sum of salaries and wages derived from industrial divisions (b,) (d), (f), (k), and (l) plus adjusted entrepreneurial withdrawals amounts to $1,826,960,000.

Again on the basis of past experience[9] it would seem justifiable to assume that while both 1) net salaries plus wages accrued in industrial divisions (a), (c), (e), (g), (h), (i) plus interest, dividends, etc., as well as 2) net salaries and wages earned in industrial divisions (b), (d), (f), (k), (l) plus adjusted entrepreneurial withdrawals have collectibility fractions of .80, the first set of accruals is likely to involve a cost of collection of 3%, whereas the second set of accruals will probably involve a cost of collection of 25%.

With a view of determining what fraction of total clear income will involve a cost of collection of 25%, the ratio of accruals indicated under (2) above ($1,626,960,000) to the sum of the accruals (1) and (2) ($4,915,000,000) was calculated. Similarly the ratio of accruals listed under (1) above ($3,288,040,000) to the sum of accruals (1) and (2) ($4,915,000,000) represents the fraction of total clear income, the tax on which involves a cost of collection of 3%. These two fractions, respectively, are 33.1% and 66.9%. Multiplying the first fraction by $2,797,000,000, the figure obtained above, as the potential base, after due consideration of all cost of living expenses, the adjusted potential base of $925,807,000 is obtained. Assuming, as indicated above, a collectibility fraction of .80, the base of $740,645,600 is obtained. Multiplying the base by a rate of 3%, a probable gross yield of $22,219,368 is obtained. Subtracting

[9] Twentieth Century Fund, "Studies in Current Tax Problems," New York, 1937, p. 107 and following; and Strayer, op. cit., p. 128 and following.

from this gross yield a 25% cost of collection, the probable net yield becomes:

(1)	$16,664,526

Multiplying the second fraction (66.9%) by the potential base of $2,797,000,000, an adjusted potential base of $1,871,193,000 is obtained. Assuming once more a collectibility fraction of .80, the base becomes $1,496,954,000, taxed at the rate of 3% yields a gross of $44,908,632. Subtracting from this gross yield the 3% cost of collection the net yield under consideration becomes:

(2)	$43,561,373

Adding this subtotal to the partial total previously obtained, the grand total representing the probable yield of a Pennsylvania state 3% personal clear income tax at 1939 income levels becomes:

(3)	$60,225,899

It goes without saying that while the above computation is based upon the assumption that a "clear" income tax is imposed at the rate of three per cent, the probable net yield shown can easily be adjusted for other hypothetical rates.

Section V

Estimation of the Probable Net Yield of a Pennsylvania State Total Income Tax

Estimates of the yield of a state tax upon total income as shown in Chapter VI of the Report, are based upon the assumption outlined in Section IV of Appendix B. Manifestly, in calculating the probable net yield of a tax upon all income rather than upon "clear" income the taxpayer has not been allowed the deduction of "necessary" living expenses up to a legislatively stipulated maximum of $800.

Section VI

Estimation of the Probable Net Yield of a Pennsylvania State Earned Income Tax

The basic data for the estimation of the net yield of a one per cent earned income tax are currently made available by the Income Division of the United States Department of Commerce.[1]

Among other pertinent income data, the Department of Commerce estimates annually the 'income payments to individuals' resident in the different states of the union.

For 1939, the Department of Commerce estimates the 'total income payments' received by residents of Pennsylvania at $5,678,000,000.[2]

According to Commerce estimates, this grand total was derived from the following sources:

1. Net salaries and wages	$3,636,000,000
2. Other labor income	445,000,000
3. Entrepreneurial withdrawals ..	636,000,000
4. Dividends, interest, etc.	961,000,000
Total	$5,678,000,000

[1] Martin, John L., "Income Payments to Individuals, By States," Survey of Current Business, Washington, October, 1940, pp. 8-12.
[2] Martin, op. cit. p. 12.

For purposes of estimating the net yield of a Pennsylvania earned income tax, Items (2) and (4) may be disregarded.

Item (2), which consists of:

a. Workmen's compensation benefits
b. Payment from private pension or retirement plans
c. Work relief wages
d. Direct relief payments
e. Veterans' compensation
f. Social insurance benefits

is disregarded because, though labelled 'income' by the Department of Commerce, its components partake either of the nature of insurance or benefits or public charity.

Item (4) is disregarded because the tax studied deals with the taxation of 'earned' income only.[3]

In view of this elimination, the potential base of a Pennsylvania earned income tax consists of:

1. Net salaries plus wages	$3,636,000,000
2. Entrepreneurial withdrawals ..	636,000,000
Total	$4,372,000,000

As regards 'entrepreneurial withdrawals,' it should be noted that this item includes both positive and negative items. The positive items consist of individual proprietorship and partnership profits actually earned and the negative items consist of merchandise diverted for personal use, capital conversions, etc. It has been assumed that the negative items account for one-half of all 'entrepreneurial withdrawals.'

On the basis of this assumption, the base of a Pennsylvania earned income tax becomes:

1. Net salaries plus wages	$3,636,000,000
2. Positive entrepreneurial withdrawals	318,000,000
Total	$3,954,000,000

In order to estimate the probable net yield of a Pennsylvania earned income tax, it is necessary to ascertain the sources of net salaries and wages by industrial division, because both collectibility as well as cost of collection tend to vary with the type of employment in which the taxable income has been earned.[4]

The following major industrial divisions account for the indicated percentages of total net salaries and wages:

a. Manufacturing	34%
b. Trade	14%
c. Government	12%
d. Service	11%
e. Transportation	8%
f. Mining	7%
g. Finance	4%
h. Construction	3%
i. Electricity and Gas	2%
j. Communication	1%
k. Agriculture	1%
l. Miscellaneous	3%

[3] In Pennsylvania, investment income is taxed at present by means of the intangibles tax, the public loans tax, the corporate loans tax, the capital stock tax and the corporate income tax. The applicability of any one or two of these taxes depends upon the type of investment.
[4] Strayer, Paul J., The Taxation of Small Incomes, New York, 1939, Chapter VI.

On the basis of past experience it seems safe to assume that the tax upon salaries and wages earned in industrial divisions (a), (c), (e), (g), (h), (i) and (k) can be conveniently stopped-at-source. These sources of salaries and wages account for 64% of the total or $2,327,400,000. Assuming that 80% of the tax due on this base is collectible, the gross yield of a one per cent income tax is $18,616,320. Allowing 3%[5] for cost of collection, a net yield of:

(1) $18,057,830

may reasonably be expected from the segment of the base under consideration.

Again, on the basis of past experience, it would seem justifiable to add net salaries and wages received in industrial divisions, (b), (d), (f) and (l) to adjusted entrepreneurial withdrawals.[6]

The sum of salaries and wages derived from industrial divisions, (b), (d), (f), and (l) plus adjusted entrepreneurial withdrawals amounts to $1,626,960,000.

Assuming again that 80% of the tax due is collectible, the effectively taxable base becomes $1,301,568,000. Applying the proposed tax rate of one per cent to this base, a gross yield of $13,015,680 is obtained.

On the basis of past experience,[7] it would seem that it is likely that the collection of this gross will involve a cost of 25%. Multiplying the cost of collection fraction (.25) by the gross yield, the probable net yield from the segment of the base under consideration becomes:

(2) $9,761,760

Adding this subtotal to the partial total previously obtained, the grand total, representing the probable yield of a Pennsylvania state one per cent earned income tax, at 1939 income levels becomes:

(3) $27,819,590

It should be observed that whenever later basic data have become available the probable net yields of the various types of income taxes shown in Chapter VII of the Report, though made by reference to the techniques outlined above, have utilized such later basic data.

Section VII

The Estimation of the Probable Net Yield of a Pennsylvania State progressive Income Tax

A. Some General Aspects of the Problem

The construction of an estimated frequency distribution of taxable income of Pennsylvania residents presupposes the formulation of a concept of 'taxable income.'

Though a large variety of concepts of taxable income[1] are in existence it was decided to use a concept as closely akin to that underlying the Federal personal income tax statute as available data and statistical techniques permitted. This choice seemed logical in view of the fact that, following precedent, any practical Pennsylvania state personal income tax is most likely to be built around the Federal concept of taxable income.[2]

Granting the choice of the concept of taxable income the problem of estimating the frequency distribution of taxable income of Pennsylvania residents is reduced to 1) an evaluation of existing data and 2) the development of statistical techniques designed to compensate for the deficiencies of these data.

B. The Nature of the Available Data

The only data available which bear pertinently upon the problem in hand are published annually in "Statistics of Income."[3] "Statistics of Income" presents both 'number of income tax returns' and 'net income' by states. Unfortunately, however, the income as well as the number of returns data for recipients of income of less than $5,000 are inadequate, because of the exemption and reporting requirements of the Federal statutes. Inasmuch as a substantial percentage of total taxable income accrues to recipients having less than $5,000 annually, the problem of estimating the dollar amounts of income probably accruing to potential state income taxpayers in this class becomes acute.

The major statistical problems arising in this connection are 1) to find the characteristic of the distribution curve which can reasonably be expected to describe the distribution of Pennsylvania taxable incomes below $5,000 and 2) to estimate the probable amount of taxable income as well as the probable number of returns to be distributed in accordance with the characteristic of the distribution curve.

Upon examination of the available data that might prove helpful in connection with the construction of a distribution curve for income of Pennsylvania residents having annual incomes of less than $5,000, it was decided that the comprehensive statistics made available by the Wisconsin Tax Commission[4] might serve the purpose in hand. In other words, it was decided that the characteristic of the Wisconsin distribution curve could be utilized in determining the probable distribution of Pennsylvania taxable incomes below $5,000.

C. Some Necessary Adjustments of the Wisconsin Data[5]

Taxable income as reported by the Wisconsin Reports does not include 1) dividends received from Wisconsin corporations and 2) Federal income taxes paid. Inasmuch as it is not mandatory for any state to recognize these deductions when determining taxable income, it was decided to adjust the Wisconsin distribution by adding both items to the net income in the appropriate income classes.

The addition of dividends from Wisconsin corporations and Federal income taxes paid, to the income in the appropriate class interval necessitates some assumptions.

The basic assumptions underlying the addition was that the number of returns and the amount of income to be shifted from one income class interval to the succeed-

[1] Wueller, P. H., "Concepts of Taxable Income," I, II, and III, Political Science Quarterly, March 1938, p. 83; December 1938, p. 557 and December, 1939, p. 555.

[2] In passing it may be observed that both the present Pennsylvania corporate income tax as well as the Pennsylvania inheritance tax lean heavily upon Federal concepts and procedures. Cf. Commerce Clearing House, "Tax Systems," Chicago, 1940, 8th edition, p. 59.

[3] United States Treasury Department, Bureau of Internal Revenue, "Statistics of Income."

[4] Wisconsin Tax Commission, "Wisconsin Individual Income Tax Statistics, 1936 Incomes, Volume I, Tax Analysis."

[5] Wisconsin Tax Commission, op. cit., Table II, Cols. 3 and 5.

[5] Twentieth Century Fund, "Studies in Current Tax Problems," New York, 1937, p. 107 and following

[6] See, Appendix B, p. B-25.

[7] Strayer, op. cit., p. 128 and following.

ing and higher class interval was to be the greater of the two numbers (a) the number of returns reporting deductible dividends, or (b) the number of returns reporting Federal income taxes paid.

This assumption seems justified in view of the fact that there would seem to be a large amount of duplication in the number of returns reporting dividends and the number of returns reporting Federal income taxes paid.

With a view of clarifying the nature of the basic assumption under consideration and to illustrate the technique used in adding dividends and Federal income taxes paid to the appropriate class interval, the following notation is introduced:

b_i = lower boundary of the i^{th} income class
B_i = upper boundary of the i^{th} income class
$B_i^{(m)}$ = upper boundary of the $(i+m)^{th}$ income class
k = an integer
$k_i^{(m)}$ = the number of individuals that will shift from the i^{th} class to the $(i+m)^{th}$ class
f = the number of returns in the class (i) (Table I, Column 2) *
f_D = the number of returns in the class (i) reporting dividends deductible (Table II, Column 2) *
f_T = the number of returns in the class (i) reporting
D = Federal taxes paid (Table II, Column 4) * the amount of the dividend deductions (Table II, Column 3) *

T = the amount of the Federal taxes paid (Table II, Column 5) *
f' = f_D, or $f' = f_T$ whichever is greater
* Wisconsin Tax Commission, op. cit., Tables I & II

Assumptions:

1. The number of individuals in a class subject to shifting is f'.
2. The f' individuals are uniformly distributed within the class.
3. Each of the f' individuals is to have an increased net income equal to $\frac{D+T}{f'}$ (the average amount added to the aggregate income of the class).
4. An individual to be shifted has an income equal to the average of his class plus the increased income $\frac{D+T}{f'}$
5. An individual in the class with upper boundary B_i is to be shifted to the class with upper boundary $B_i^{(m)}$ if his income after adding $\frac{D+T}{f'}$ is between $B_i^{(m-1)}$ and $B_i^{(m)}$..

Procedure:

The Net Income of the k^{th} individual in the class with upper boundary B is

$$b' + \left(\frac{(k-\frac{1}{2})}{f'}\right)\frac{(B-b)}{} + \frac{D+T}{f'}.$$

Let $k^{(m)}$ be the largest integer such that

$$b + \left(k^{(m)} - \tfrac{1}{2}\right)\left(\frac{B-b}{F'}\right) + \frac{D+T}{i} = B^{(m)}.$$

Then $k^{(0)}$ is the number of individuals out of the f' that will remain in the class. The number that will shift from the B_i class to the $B_i^{(1)}$ is $k^{(1)} - {}^{(0)}$. In general the number that will shift to the $B_i^{(m)}$ class is $k^{(m)} - {}^{(m-1)}$. This procedure is continued until all f' individuals have been shifted.

The income to be shifted from class B to class $B^{(m)}$ is

$$\sum_{k^{(m-1)}+1}^{k^{(m)}}\left[b+(k-\tfrac{1}{2})\frac{(B-b)}{f'}\right] = \left[b-\tfrac{1}{2}\frac{(B-b)}{f'}\right]\left(k^{(m)}-k^{(m-1)}\right) + \left(\frac{B-b}{f'}\right)\left[\frac{k^{(m)}-k^{(m-1)}}{2}\right]\left[k^{(m-1)}+k^{(m)}+1\right]$$

After the necessary shifting of individuals and income, to each income class $B^{(m)}$ is added the income from dividends and taxes assumed to be associated with each individual shifting into the class $B^{(m)}$.

Application of the above technique to the Wisconsin data as reported produces what may be called an adjusted distribution curve and it is this adjusted Wisconsin distribution curve which is subsequently used to facilitate estimation of that segment of the Pennsylvania distribution of taxable incomes below $5,000.

D. Estimation of Frequency Distribution of Taxable Income of Pennsylvania Residents for 1936

The characteristic of the Pennsylvania distribution curve for incomes below $5,000 being assumed to be the same as the characteristic of the 'adjusted' distribution curve for Wisconsin,[6] it remains to estimate 1) the probable number of Pennsylvania returns and (2) the probable magnitude of the sum total of the taxable income of Pennsylvania residents. Both returns and income magnitude being given, an allocation in accordance with the characteristic of the 'adjusted' Wisconsin distribution curve can be made.

With a view of illustrating the procedure used in estimating both probable number of Pennsylvania returns and probable magnitude of the sum total of taxable income of Pennsylvania residents, the following notation is introduced:

x = midpoint of class interval
f = frequency of the class (number of returns)
F = cumulative f
N = total number of returns
$z = \frac{F}{N}\,100$

a = aggregate net income of the class
A = cumulative a
M = total income
$y = \frac{A}{M}\,100$

Further, let x, f, etc., represent Wisconsin data and x', f', etc., represent Pennsylvania data as reported by Statistics of Income" for the year 1936. Let N', M' be total

[6] This assumption is the equivalent of ascertaining that the Lorenz curve for Wisconsin income is an adequate description of the Pennsylvania distribution.

number of expected Pennsylvania returns and expected Pennsylvania total taxable income, respectively.

In terms of this notation, the following is the procedure used in estimating N′ and M′:

The Wisconsin data as given in "Statistics of Income" were arranged in order of decreasing size of income class. The Pennsylvania data as given by the same source, were arranged likewise.

For purposes of first approximation, N″ and M″ were determined by the equations:

$$\frac{N''}{N} = \frac{\text{cum } f'}{\text{cum } f}$$

$$\frac{M''}{M} = \frac{\text{cum } a'}{\text{cum } a}$$

where cum f and cum f′ are the total number of returns for the classes $5,000 and above, for Wisconsin and Pennsylvania respectively; and cum a and cum a′ are the total aggregate income for the classes $5,000 and above for Wisconsin and Pennsylvania. With these values of N″ and M″, values of z″, y″ were determined corresponding to the classes above $5,000. For each pair of values (z″, y″), two equations were obtained in the following manner.

For each z″ there corresponds a z, and z_2, such that $z_1 \leq z'' \leq z_2$. Assuming that the point (z′, y′) lies on the line joining (z_1, y_1) and (z_2, y_2), the equation

$$\frac{z_1 - \frac{F'}{N'}\,100}{z_2 - z_1} = \frac{y_1 - \frac{A'}{M'}\,100}{y_2 - y_1}$$

is obtained. This is a linear equation in the unknowns N′, M′ since the F′ and A′ are values obtained from the frequency distribution for the classes above $5,000, using the data in "Statistics of Income". Thus, for each class above $5,000 an equation in N′ and M′ is obtained. Let the average of this set of equations be denoted by

(1) $\quad AN' + BM' + C = O.$

Likewise for each y″, there corresponds a y_3 and y_4 such that $y_3 \leq y'' \leq y_4$. Assuming that the point z′, y′) lies on the line joining (z_3, y_3) and z_4, y_4), the equation

$$\frac{z_3 - \frac{F'}{N'}\,100}{z_4 - z_3} = \frac{y_3 - \frac{A'}{M'}\,100}{y_4 - y_3}$$

is obtained. This also is a linear equation in N′ and M′.

Therefore, for each class above $5,000, another equation in N′ and M′ is obtained. Denote the average of this set of equations by

(2) $\quad PN' + QM' + R = O.$

The values of N′ and M′, the estimated number of returns, and the estimated total income are found by solving the system of simultaneous equations (1) and (2). The values, determined as indicated are:

N′=1,457,000
M′=$3,619,000,000.

In other words, the above outlined procedure when applied to the previously cited data ("Statistics of Income for 1936") indicates that the probable taxable income of Pennsylvania in 1936 amounted to $3,619,000,000 and that the number of returns associated with the estimated amount of taxable income approximated 1,457,000.

Restating the procedures and findings so far outlined and indicated, it may be noted that the following three sets of data are now given: (a) the characteristic of the frequency distribution of the taxable income of Pennsylvania residents ($5,000.00 and below segment); (b) the probable magnitude of the sum total of personal taxable income, and (c) the probable number of returns (or number of income recipients) associated with the sum total of personal taxable incomes. Hence, it now merely remains to allocate both number of returns and sum total of taxable income in accordance with the previously determined distribution curve. The procedure employed for the purpose in hand is as follows: Form an immediate distribution:

x	f″	a″

having the property that

$$\frac{f''}{f} = \frac{a''}{a} = c$$

and that

$$\Sigma f'' = N',$$

where f″ is the frequency of the class in the intermediate distribution, a″ the aggregate income of the class, and c is a constant.

Since

$$f'' = cf,$$

then

$$\Sigma f'' = c\Sigma f,$$

$$N' = cN,$$

and

$$c = \frac{N'}{N}$$

Therefore,

$$f'' = \frac{N'f}{N}$$

and

$$a'' = \frac{N'a}{N}$$

From the property that $\frac{f''}{f} = \frac{a''}{a}$ = constant for each class, the Lorenz curve for the intermediate distribution is the same as the Lorenz curve for Wisconsin. For this distribution the total number of returns is N′ (the number of expected returns from Pennsylvania) but the total aggregate income is $\frac{N'}{N}$ M, which is less than M′ (the estimated total aggregate income for Pennsylvania).

The problem must now be faced as to how to inflate aggregate Pennsylvania taxable income until it equals M′ without changing the ascertainable degree of inequality which characterizes its distribution.

The inflation of Pennsylvania's aggregate income necessitates the shifting of both number of returns as well

as selected income fractions from one income class interval to another. In turn the shifting procedure necessitates a postulate with regard to the distribution of returns within a given income class interval.

For purposes of the computation it was assumed that the returns are linearly distributed within any one class interval.

To introduce a notation to indicate the shifting procedure employed, let:

$$y=mx+k$$

represent the distribution within a class, where m is the slope of the line and k the y-intecept. The values m and k will vary from class to class but for each class they are determined by the equations

$$(3) \qquad \int_b^B (mx+k)dx=f(B-b),$$

$$(4) \qquad \int_b^B (mx+k)x\,dx=a(B-b)$$

where b is the lower and B the upper boundary of each class. Integrating, the conditions determining m and k become

$$(5) \qquad k=f-\frac{m}{2}(B+b),$$

$$(6) \qquad m\frac{(B-b)^2}{12}=f\left(\frac{a}{f}-\frac{B+b}{2}\right)$$

The aggregate income of the intermediate distribution is $\frac{N'}{N}$ — M. Since, however, the total income for the Pennsylvania distribution is to be M', each individual income in the intermediate distribution must be multiplied by the constant $\frac{M'N}{MN'}$. This is equivalent to assuming that the Lorenz curve associated with the Pennsylvania distribution is the same as that associated with the Wisconsin distribution even though the average income has increased.

A modification could be made at this point if one knew the changes in inequality of distribution caused by or related to increased average income. A suggested modification is

$$x'=(x)\left(\frac{N}{N'}\right)\left(\frac{M'}{M}\right)(r)$$

where

r=income of individuals before the change in N and M,

N=total number of returns in the old distribution,

M=total amount in the old distribution,

x'=income of an individual after the change in N and M,

N'=total number of returns in the new distribution,

M'=total amount in the new distribution,

and r=a factor which is a function of x, N, M, N', and M'.

The effect of the factor r is to change the inequality in the distribution. More time and better data would be necessary before the form of the function could be determined. It might be possible to study the Wisconsin Tax reports and the Federal Tax reports and by a combination of empirical and theoretical procedures determine the factor r.

In this work as presented r is assumed to be 1, which means that the same degree of inequality of distribution in Wisconsin is assumed to be in the Pennsylvania distribution.

In order to determine the number that will shift from one class to another, it is first necessary to find the values of x which upon multiplication by $\frac{M'N}{MN'}$ become class boundaries of the intervals. These values are determined by the equation

$$(7) \qquad x\left(\frac{N}{N'}\right)\left(\frac{M'}{M}\right)=B^{(m)} \qquad (m=1, 2, \ldots)$$

where $B^{(1)}=500$, $B^{(2)}=600$, etc., (the upper boundaries of the classes).

Let the solutions of (7) be designated by $L^{(m)}$. The number of returns to be shifted from the class with upper boundary B_i to the class with upper boundary $B^{(m)}$ is f_{im} where f_{im} is determined by the equation

$$(8) \qquad \int_{L^{(m-1)}}^{L^{(m)}} y\,dx = f_{im} \qquad (B_i-(B_i-{}_1)$$

and the corresponding amount to be shifted is a_{im}. where a_{im} is determined by the equation

$$(9) \qquad \int_{L^{(m-1)}}^{L^{(m)}} \left(\frac{M'}{M}\right)\left(\frac{N}{N'}\right)xy\,dx = a_{im}\,(B_i-(B_i-{}_1)$$

where $y=m_ix+k_i$ for $B_i-{}_1 \leq x \leq B_i$

and $y=0$ for all other values of x.

It is in accordance with the above outlined procedures that an estimated frequency distribution for 1936 of taxable income of Pennsylvania residents has been construed, the distribution of incomes in excess of $5,000.00 having been transcribed from "Statistics of Income for 1936."

E. Estimation of Frequency Distribution of Taxable Income of Pennsylvania Residents for 1940

The problem of estimating a frequency distribution of taxable income of Pennsylvania residents for 1940 depends upon 1) an estimation of the aggregate taxable income, and 2) an estimation of the number of returns. The procedures used in estimating the aggregate income and the total number of returns for the 1936 distribution are not applicable to the 1940 estimate since "Statistics of Income for 1940" will not be published until 1942, or even later. However, the Department of Commerce has made an estimate of the National Income for 1940 and this estimate can be used in determining the aggregate taxable income for Pennsylvania.

The procedure is as follows: The table following gives the ratio of Pennsylvania Income to National Income.

It may be observed that the ratio of Pennsylvania Income to National Income has decreased in the decade 1929-1939. In order to estimate the Pennsylvania Income for 1940, the estimate of the ratio for 1940 was determined by fitting a straight line to the series in Table B-IV. The straight line was fitted by the method of least squares and the ratio for 1940 was determined using this line. This ratio (.08036) is considered too low since the National Defense Program has caused increased activity of the heavy industries in Pennsylvania. However, no adjustment of the ratio is attempted. In using this value, the taxable income in Pennsylvania for 1940 is underestimated. The total Income for the United States for 1940 has been estimated at $74,000,000,000.[7] Therefore, the estimate of the total income paid out for Pennsylvania is .0836 times $74,000,000,000, which is $5,940,000,000.

TABLE B-IV

Relationship Between Pennsylvania Income Payments and United States Income Payments

Year	Pennsylvania Income (000,000)	National Income (000,000)	Ratio of Pennsylvania Income to National Income
(1)	(2)	(3)	(4)
1929	$7,230	$82,068	.08810
1930	6,653	74,520	.08928
1931	5,631	63,456	.08873
1932	4,253	49,320	.08623
1933	4,002	46,836	.08544
1934	4,595	54,012	.08507
1935	4,947	58,812	.08412
1936	5,698	67,848	.08398
1937	6,038	71,784	.08411
1938	5,347	66,240	.08072
1939	5,678	70,092	.08101

In order to estimate the taxable income for 1940, it is assumed that the ratio of taxable income in 1940 to total income paid out in Pennsylvania in 1940 is equal to the ratio of taxable income in 1936 to total income paid out in Pennsylvania in 1936.

In symbols,

$$\frac{M'}{I'} = \frac{M}{I}$$

where

M' = Taxable income in 1940
M = Taxable income in 1936
I' = Income paid out in Pennsylvania in 1940
I = Income paid out in Pennsylvania in 1936

A better approximation to M' would be

$$M' = (I') \left(\frac{M}{I}\right) (p)$$

where p is a function of "Capital Conversion." With the present data available, no estimation of (p) is made. An arbitrary assumption is made that (p) = 1. The following table indicates the behavior of the function (p) in the relationship of the actual amount of taxable income as reported by the Wisconsin Tax Commission and the income paid out estimated by the Department of Commerce.

[7] New York Times, December 15, 1940.

TABLE B-V

Income Paid Out in Wisconsin as Estimated by the Department of Commerce and Actual Taxable Income as Reported by the Wisconsin Tax Commission

Year	I	M	$\frac{M}{I}$	p	p'	p''
(1)	(2)	(3)	(4)	(5)	(6)	(7)
1929	$1,906,000,000	$1,186,234,000	.6224	1.0		
1934	1,156,000,000	542,294,000	.4691	.7537	1.0	
1935	1,317,000,000	609,803,000	.4630	.7439	.98699	1.0
1936	1,545,000,000	723,984,000	.4686	.7529	.9989	1.0121

Column 5 gives the value of (p) which is the ratio of $\left(\frac{M'}{I'}\right)$ to $\left(\frac{M}{I}\right)$ using 1929 as the base year.

Column 6 gives the value of (p) using 1934 as the base year, and Column 7 is the value of (p) using 1935 as the base year. It is observed that the values of (p) given in Cols. 6 and 7 are near to 1.

Using the value of M previously estimated for 1936, the value of I for 1936 as reported by the Department of Commerce, and the value of I' for 1940 as previously estimated, and assuming (p) = 1, the value of M' is estimated to be $3,616,573,000.

The formation of a distribution of income depends upon the number of returns, the amount of taxable income, and assumptions as to the inequality in the distribution. The greatest difficulty arises with respect to the estimation of the number of returns. One might suppose that a reasonable estimate could be made on the assumption that the number of returns had grown in direct ratio to the rise in population. This assumption, however, ignores the important fact that the number of returns depends on the amount of taxable income as well as the population.

The following table exhibits the changes in the number of returns as related to changes in population and taxable income.

TABLE B-VI

The Number of Returns and Amount of Taxable Income from Wisconsin as Reported by the Wisconsin Tax Commission and the Population for Various Years as Interpolated from Census Data

Year	N	P	$\frac{N}{P}$	M	$\frac{N}{M}$
(1)	(2)	(3)	(4)	(5)	(6)
1929	476,173	2,908,312	.1637	$1,186,254,755	.4014
1934	417,831	3,018,438	.1384	542,294,227	.7705
1935	425,481	3,038,297	.1400	609,803,565	.6977
1936	443,350	3,058,155	.1450	723,984,690	.6124

The data available is insufficient to determine N empirically as a function of P and M. It is felt that to use the assumption that

$$\frac{N'}{N} = \frac{P}{P'}$$

where N' = the number of returns in 1940
P' = the population in 1940
N = the number of returns in 1936
N' = the population in 1936

is to underestimate too greatly the number of returns. To assume that $\frac{N'}{N} = \frac{M'}{M}$

is to overestimate the number of returns. The best estimate for $\frac{N'}{N}$ would be some value between $\frac{P'}{P}$ and $\frac{M'}{M}$

However, since the ratios are not so very far apart and because of the extremely simple procedure in estimating the distribution of income under the assumption that

$$\frac{N'}{N} = \frac{M'}{M},$$

this assumption is used in the estimation presented. The values of N, M, and M′ are:

$$N = 1,431,863$$
$$M' = 3,616,573,000 \quad \text{and the ratio } \frac{M'}{M} = 1.0424$$
$$M = 3,469,468,000$$

Operating with the assumption that the number of returns increased in the same ratio as the aggregate taxable income, Tables B-VII and B-VIII are constructed to show estimates of the number of returns and net taxable incomes for 1940 and Tables B-IX and B-X are constructed to show estimates of yields in 1940 of a Pennsylvania Income tax under various assumptions as to rates exemptions. These modified tables are shown on the following pages.

TABLE B-VII

Estimated Net Income * of Pennsylvania Residents and Estimated Number of Income Recipients by Income Classes (1940)

Net Income Classes	Estimated Number of Recipients	Estimated Amount of Income
(1)	(2)	(3)
$ 0— 500	81,856	$ 20,060,000
500— 1,000	119,147	94,160,000
1,000— 1,500	285,412	362,600,000
1,500— 2,000	297,553	515,850,000
2,000— 2,500	249,457	560,300,000
2,500— 3,000	184,799	504,910,000
3,000— 4,000	165,401	561,450,000
4,000— 6,000	65,819	305,605,000
6,000— 9,000	19,488	140,957,000
9,000— 12,000	7,961	82,311,000
12,000— 15,000	4,433	59,289,000
15,000— 25,000	6,041	114,648,000
25,000— 60,000	4,026	146,523,000
60,000—100,000	767	57,333,000
100,000 and over	415	90,538,000
Total	1,492,575	$3,616,534,000

* The concept of income underlying the above estimation closely approximates the concept underlying the Federal personal income tax.

TABLE B-VIII

Estimated Net Income of Pennsylvania Residents Subject to a Pennsylvania State Income Tax Under Alternate Assumptions * and Estimated Number of Returns (1940)

Net Income Class	Estimated Number of Returns	Estimated Income Subject to a Pennsylvania State Income Tax Under Alternative Assumptions Regarding Exemptions	
		Assumptions: A	Assumptions: B
(1)	(2)	(3)	(4)
$ 800— 1,000	70,056	$ 4,543,000	$ 3,857,000
1,000— 1,500	285,412	45,246,000	41,151,000
1,500— 2,000	297,553	60,399,000	44,717,000
2,000— 2,500	249,455	112,735,000	67,944,000
2,500— 3,000	184,800	154,783,000	106,849,001
3,000— 4,000	165,401	245,485,000	192,236,000
4,000— 6,000	65,819	180,606,000	158,447,000
6,000— 9,000	19,491	104,803,000	98,468,000
9,000— 12,000	7,961	68,442,000	66,039,000
12,000— 15,000	4,433	51,750,000	50,478,000
15,000— 25,000	6,041	104,930,000	103,307,000
25,000— 60,000	4,026	140,890,000	139,948,000
60,000—100,000	767	56,513,000	56,356,000
100,000 and over	416	90,034,000	89,958,000
Total	1,361,631	$1,421,159,000	$1,219,755,000

* Assumption: A. 1. Married persons not filing separate returns—$1,600 exemption. 2. Single person who are heads of families—$1,600 exemption. 3. Single persons not heads of families—$800 exemption. 4. Husbands filing separate returns—$800 exemption. 5. Wives filing separate returns—$800 exemption. 6. Each dependent—$400 exemption.
Assumptions: B. 1. Married persons not filing separate returns—$2,000 exemption. 2. Single persons who are heads of families—$2,000 exemption. 3. Single persons not heads of families—$800 exemption. 4. Husbands filing separate returns—$1,000 exemption. 5. Wives filing separate returns—$1,000 exemption. 6. Each dependent—$400 exemption.

Table B-IX

Estimated Gross Yield * of a Pennsylvania State Personal Income Tax Under Alternative Assumptions Regarding Both Means Effective Rates and Exemptions † (1940)

Mean Effective Tax Rate (in percent)	Estimated Gross Yield of a Pennsylvania State Personal Income Tax Under Alternative Assumptions Regarding Exemptions	
	Assumption: A	Assumption: B
(1)	(2)	(3)
1.0	$ 14,200,000	$ 12,300,000
1.5	21,400,000	18,300,000
2.0	28,500,000	24,400,000
2.5	35,500,000	30,500,000
3.0	42,600,000	36,600,000
3.5	49,700,000	42,700,000
4.0	56,800,000	48,800,000
4.5	64,000,000	54,900,000
5.0	71,100,000	61,000,000
5.5	78,200,000	67,100,000
6.0	85,300,000	73,200,000
6.5	92,400,000	79,300,000
7.0	99,400,000	85,400,000
7.5	106,600,000	91,500,000
8.0	113,700,000	97,600,000
8.5	120,800,000	103,700,000
9.0	127,900,000	109,800,000
9.5	135,000,000	115,900,000
10.0	142,100,000	122,000,000

Legend:
* 'Gross yield' is defined as 'means effective rate' multiplied by 'value of base.' No allowance has been made for administrative costs and probable degree of effectiveness of administration.
† For alternative assumptions regarding exemptions, see Table B-VIII, note 1.

Table B-X

Estimated Gross Yield of a Pennsylvania State Personal Income Tax If Levied at Rates Imposed in Selected States And Under Alternative Assumptions Regarding Exemptions * (1940)

State	Estimated Gross Yield of a Pennsylvania State Personal Income Tax Under Alternative Assumptions Regarding Exemptions	
	Assumption: A	Assumption: B
(1)	(2)	(3)
New York	$51,651,665	$46,352,927
Minnesota	51,832,139	48,178,913
Georgia	39,030,996	35,740,885
Kansas	27,142,831	24,570,070

Legend:
* For alternative assumptions regarding exemptions, see, Table B-VIII, note 1.

Appendix C

Supplementary Statistical Data

Appendix C contains supplementary statistical data which are believed to be useful in connection with an intensive study of Chapters I to VII, inclusive, of the Report.

Broadly speaking, the data contained in Appendix C may be conveniently divided into four groups. Group I comprises Tables C-I to C-XI, inclusive. These data relate in the main to tax yields for Pennsylvania and competing states. Group II comprising Tables C-XII to C-XXI, inclusive, presents balance sheet and income data upon

which the tax impact differentials presented and discussed in Chapter IV of the Report are based. Group III consists of Table C-XXII, which shows fourteen important series relating to distressed school districts. Perusal of Table C-XXII should prove useful in connection with a study of the materials presented in Chapters II and VII. Group IV consists of Tables C-XXIII to C-XXV, inclusive, which are believed to shed light upon certain matters relating to tax administration.

With a view of preventing misunderstandings regarding the limitation of the tax impact differentials shown and discussed in Chapter IV of the Report, the accountants[1] associated with the Joint State Government Commission who have assumed responsibility for the computation of these differentials wish to submit the statement quoted below. It is suggested that this statement be carefully read before Tables C-XII to C-XXI are used or interpreted.

"The accounts were assigned the task of making certain computations of state and local taxes with a view to showing

a. The effect of including local taxes and state taxes in the comparison by states, and
b. The variation between tax burden as computed for different industries in the same and in different states.

"In connection with carrying out this assignment it is desired to call attention to materials used, the sources of information used, and assumptions made.

Balance Sheets and Income Statements

"The statements for the various industrial groups were furnished by the Pennsylvania Department of Revenue which has stated that the samples were representative of the returns actually filed by leading Pennsylvania industries.

"The data obtained from the Department of Revenue were arranged in columnar form and consisted of anywhere from one to nine companies in various industrial groups. It was found that the companies vary widely in size and the character of the business conducted. It was thought desirable to eliminate very large companies, holding companies, and those showing losses, as well as certain companies in which data were incomplete on the returns. Accordingly the average balance sheet and income statement, as a general rule, is composed of from two to five or six companies, and in two instances is merely one sample company. Certain industries were omitted entirely because of the lack of data for computing sales taxes.

"The accountants are of the opinion that they are not in a position to form any judgment as to whether the samples used are typical or representative of the particular industries as a whole. To form such a judgment would require the consideration of a much larger sample and the consultation of persons thoroughly familiar with a particular industry. It is believed that several levels might be found, and it is also probable that even in the same company conditions may vary considerably from year to year. It is, accordingly, recommended that these financial statements be looked upon as samples taken from the various fields of industry represented in the study.

[1] The accountants associated with the Commission were Dr. S. K. Atkinson, and Professor Charles J. Rowland, C. P. A., assisted by Dr. R. H. Mack and Dr. R. W. Mayer.

Local Property Tax Computations

"The accountants desire to call attention to the following points:

1. The rates used are average mean effective rates for industrial county real property taxes for the selected states. These were compiled under the direction of Dr. Paul H. Wueller and the method used is fully explained elsewhere in the report.

2. The rates are applied to land and depreciated value of buildings as shown in the balance sheets submitted, unless a particular state calls for a special treatment.

3. In such states as tax general property—tangible and/or intangible property—the rates have been applied to the total of all taxable property according to the law of the State in question. Than a Computation was made for real property only. The difference is deemed to be the tax on property other than real property. In our judgment, to assume that general property is taxed at 100% efficiency even at mean effective rates would be grossly misleading and result in absurd comparisons. On the other hand, the accountants have no exact knowledge as to the efficiency of assessments of general property in the various states. Therefore the computations show state taxes and real property taxes in total. The other property taxes are then shown as computed on balance sheet values, on a 25% efficiency basis and a 50% efficiency basis. The reader can then form his own judgment as to the probable burden in comparison with other states.

"The situation with regard to assessment of general property taxes other than real estate is well described by Judge William R. Green in his book on "Theory and Practice of Modern Taxation," who states as follows:

'Direct taxes on tangible personal property are nowhere well administered and in most states very badly enforced. Part of this is owing to the inherent difficulties in enforcing the tax and part of it to the neglect, indifference, or partiality of the assessors. While tangible personal property is, of course, visible when found, it is not always easy to find it. For example: Cattle scattered over thousands of acres of mountains and valleys can not be seen except in part and their number is estimated with great difficulty. Lists are seldom, if ever, made up of property in private residences that is subject to taxation, and as a practical matter it is nearly impossible for the assessor to either list or value it completely. Animals on a farm, farm machinery, and factory machinery which is not affixed to the factory itself may easily be found but even then their value is usually carelessly appraised. On the whole the tax on tangible personal property may be said to be one of those taxes which in its practical application works with much inequality and injustice. But it is likely to remain on the statute books of many states for a long time, for the reason that it can not very well be abolished unless some other tax is substituted for it and the State legislatures are usually very reluctant to make radical changes of this nature. Its application and enforcement could be greatly improved but no very earnest effort has been made to improve its application. There is no doubt but that some of its worst features would be greatly mitigated if tax assessors and collectors were appointed by and made subject to some central authority. This matter also will be considered further on.'

State Tax Laws

"The data for the computation of local and state taxes has been obtained by consulting various tax services. Particular reference was made to the following:

State Tax Guide Service. Published by Commerce Clearing House, Inc., Chicago, Illinois.

Report on Comparative Study of Corporate Taxes in Fifteen Industrial States, by Clarence L. Turner. Published by the Pennsylvania State Chamber of Commerce.

State Tax Services, Commerce Clearing House, Massachusetts, Illinois, Indiana, Pennsylvania, New York New Jersey and Ohio.

Tax Systems of the World, Commerce Clearing House.

Moody's Investment Manual—Municipals.

Various State publications.

"Attention is called to the following matters which have been excluded from our calculations:

1. The fact that some states have a merit rating plan in fixing rates for the unemployment insurance tax. Pennsylvania does not have such a plan and its manufacturers and business men who may have stable employment pay more than they would in New Jersey, for example. No attempt has been made in our calculations to reflect this difference.

2. Sales taxes passed on to the consumer in the various states and cities have been ignored in our calculations.

3. The possible effect of making manufacturers subject to the Pennsylvania Mercantile Tax is not considered. If the Supreme Court after hearing the reargument of the case of Peerless Paper Speciality, Inc., holds manufacturers are liable for the mercantile tax, new regulations will be issued by the Department of Revenue.

Assumptions Made

"It is important that the readers of this chapter have in mind the following assumptions made in the calculations:

1. In each case the corporation is a domestic manufacturing corporation doing an intrastate business and having all assets within the state.

2. The income account is the same as reported for Federal income tax, except that it is assumed to be net income before any state taxes are computed, but after the Pennsylvania local property taxes have been deducted.

3. In making the computations, the accountants have exercised their judgment in supplying details lacking, allocating reserves for depreciation to particular assets, etc. This resulted in rather arbitrary decisions at times due to the lack of definite information.

4. In computing local taxes the mean effective rates developed from published rates are applied to book values, unless a particular state law prescribes a special procedure. This method, of course, does not take into consideration inefficiency of local assessors, local practices, failure to reach tangible and intangible personal property, etc.

5. In computing state income taxes where the State and Federal Income tax are interdependent, that is, where the state law permits both the deduction of the Federal and State income taxes in determining the net income upon which the tax is based, algebraic formulae were used. The Federal rates imposed by the Second Revenue Act of 1940 were used in these calculations. However, to avoid undue mathematical difficulties it was assumed that the corporations in question were not subject to the Declared Value Excess Profits Tax, nor to the new Excess Profits Tax imposed by the Second Revenue Act of 1940. In addition the information upon which to calculate such excess profits taxes was not available, requiring as it does information concerning invested capital and base period income, etc.

Conclusions

"The Accountants believe the results obtained in this investigation should be looked upon in the following manner:

1. It is an attempt to indicate the total state and local tax burden based upon published rates and book values. It is not a result that can be said to have a high degree of precision when applied to the affairs of a single company because of the great importance which special facts and circumstances have in individual cases.

2. The results, particularly with respect to taxes on property other than real estate, if 100 per cent assessment is made, are absurd. For example, if the rates are applied in some of the cases under review, the corporation would pay 50-70% of its net income for local taxes. This leads to the practical conclusion that the general property tax law is not very well enforced and to the extent that it is enforced the rates are applied to valuations much lower than the book values."

—STERLING K. ATKINSON.

CURRENT ASSETS			
(B) Cash		560,000.00	560,000.00
Notes Receivable		80,000.00	10,000.00
Accounts Receivable		3,750,000.00	3,650,000.00
(C) Inventories		2,100,000.00	1,675,000.00
DEFERRED CHARGES		60,000.00	
		$10,760,000.00	$ 9,780,000.00
	Liabilities		
CAPITAL AND SURPLUS			
(D) Capital Stock		$ 3,500,000.00	
Paid in Surplus		250,000.00	
Surplus and Undivided Profits		3,230,000.00	
CURRENT LIABILITIES			
Notes Payable		500,000.00	
Accounts Payable		2,550,000.00	
Accrued Taxes Payable		60,000.00	
RESERVES (Other than Depreciation)		670,000.00	
		$10,760,000.00	

Notes—Necessary Supplemental Data

(A)	Tangible property outside of state illustrated	$10,000.00
(B)	Cash outside of state illustrated	25,000.00
(C)	Inventories classified at actual values as follows:	
	Work in Process (Labor & Overhead)	$ 1,050,000.00
	Materials	625,000.00
		$ 1,675,000.00

(D) Authorized capital consists of 100,000 shares having a par value of $100.00 per share.

Turner's Manufacturing Corporation†
Statement of Profit and Loss

(1) Gross Sales		$18,000,000.00
Returns and Allowances		725,000.00
Net Sales		17,275,000.00
(2) Cost of Sales		14,225,000.00
Gross Profit		$ 3,050,000.00
Other Income		
(3) Rents	$ 60,000.00	
(3) (4) Interest	10,000.00	
(3) Dividends	115,000.00	
(5) Capital Losses	2,000.00	
Miscellaneous	53,000.00	236,000.00
		$ 3,286,000.00
Other Deductions		
(6) Interest Paid	$ 32,000.00	
Miscellaneous	2,422,000.00	2,454,000.00
Net Income before Federal Income and State Taxes		$ 832,000.00

Notes: Necessary Supplemental Data

(1) Allocation of gross sales in all states where required with exception of (Ohio)	$3,900,000.00
(Ohio) sales allocated to state on basis of origin of shipment.	
(2) Allocation of wages (Connecticut, Massachusetts and Pennsylvania):	
Total wages paid	2,720,000.00
Wages paid in the state illustrated	2,310,000.00
(3) Rents, interest and dividends are allocated to state illustrated.	
(4) Includes income from bonds of $3,000.00. (Ohio)	
(5) Gross proceeds from sale of capital assets, $30,000.00.	
(6) Includes rent paid of $30,000.00. (Conn.)

[1] Includes increases in domestic taxes of $1,423,000 for 1936 and $4,498,000 for 1937 because of temporary removal of exemptions on laundering, meat processing, and manufacturing. Increases in taxes in foreign corporations due to this cause and also to new formula of computation started in 1936. Temporary removal of exemptions were made ppermanent beginning in 1938. Unusual increase in tax returns for 1937 was result of change in the law making the tax self-assessing causing date of payment to be advanced.
[2] Revenues from this source insignificant.

JOINT REPORT TO THE GENERAL ASSEMBLY OF RECOMMENDATIONS FOR AMENDING THE PENNSYLVANIA UNEMPLOYMENT COMPENSATION LAW

PART 1

By the Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions

Commonwealth of Pennsylvania
Joint State Government Commission of the General Assembly

January, 1941

Capitol Building, Harrisburg, Pennsylvania

JOINT STATE GOVERNMENT COMMISSION OF THE GENERAL ASSEMBLY

(Created in 1937, P. L. 2460, as amended 1939 P. L. 1084)

"A continuing agency of the General Assembly to undertake studies and develop facts, information and data on all phases of government for the use of the General Assembly and Departments and Agencies of the State Governments."

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

In pursuance of House Resolution, Serial No. 136 and Senate Concurrent Resolution, Serial No. 127, of the Regular Session of 1939, and under the authority of the Act of July 1, 1937, P. L. 2460, as amended by the Act of June 26, 1939, P. L. 1084 (Act creating Joint State Government Commission), we submit herewith Report and Recommendations for amending the Pennsylvania Unemployment Compensation Law (Part One).

ELLWOOD J. TURNER, Chairman
Joint State Government Commission
WELDON B. HEYBURN, Chairman,
Joint Legislative Committee to Study Unemployment Compensation Provisions

January, 1941

FOREWORD

Unemployment compensation is a system devised for the payment of some compensation during all or part of the period a covered worker is unemployed.

The Federal Act levying a tax of three per cent on wages paid to all covered employes, grants credit up to 90% to those states which adopt some system of unemployment compensation, within certain restrictions and limitations. All of the 48 states have adopted unemployment compensation systems, but their provisions vary in many respects. Therefore, when comparing benefit payments or any other provisions in the laws of the several states, it is necessary to read the entire acts and make over-all comparisons. Experience in the operation

of the law and the amendments to the Federal Act in 1939 have made it necessary to revise and amend the several state laws. This need for change will continue.

The Regular Session of the General Assembly of 1939 charged the Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions to study certain provisions of the Pennsylvania Unemployment Compensation Law.

These two groups effected a cooperative working plan and undertook a study of the several provisions of the law, with the exception of the civil service system which was being investigated and considered by a special legislative committee.

The Joint Legislative Committee to Study Unemployment Compensation Provisions conducted hearings, held meetings, made surveys and submitted only unanimous findings, conclusions and recommendations to the full Joint State Government Commission, upon which unanimous affirmative action of all the members present at its meetings was taken.

This Report is Part One. Part Two will deal with the question of merit or experience rating.

Both agencies undertook their task without any thoughts of partisanship. Their objective was to bring the Pennsylvania Unemployment Compensation Act into conformity with the 1939 amendments to the Federal Act so as to avoid confusion; to liberalize, wherever possible, the benefits to covered employes; to simplify the administrative procedure; to improve administrative efficiency; to reduce the burden of the tax, which is entirely upon the employer, and yet to preserve the integrity of the fund.

The proposals made by the employers, employes, organized labor, and the public were carefully considered.

A. ALFRED WASSERMAN, Director,
Joint State Government Commission.

SUMMARY OF RECOMMENDATIONS FOR AMENDING THE PENNSYLVANIA UNEMPLOYMENT COMPENSATION LAW

SUMMARY

Section [1]

1. Modify definition of "employer" 4 (i)
   (a) To include a "successor in interest" clause
   (b) To include employers of non-resident employes by election
2. Bring the Pennsylvania Unemployment Compensation Law into conformity with amendments made in 1939 to the Federal Act 4 (j)
   (a) Further exclusions:
      (1) Domestic service in local college club, fraternity, or sorority
      (2) Casual labor
      (3) Service performed in any calendar quarter for organizations exempt from the Federal Income Tax, if—
         (i) the remuneration for such service does not exceed $45, or
         (ii) such service (under certain conditions) is for a fraternal beneficiary society, order, or association, or
         (iii) such service is performed by a student
      (4) Service for agricultural or horticultural organizations
      (5) Service for a voluntary employes' beneficiary association
      (6) Service by a student for his college or university
      (7) Service for a foreign government
      (8) Service for an instrumentality of a foreign government
      (9) Service by student nurses and internes
      (10) Service by insurance agents on a commission basis
      (11) Service by minors under 18 years of age delivering newspapers or shopping news
   (b) Further inclusions:
      (1) Service for charitable or religious organizations, when a substantial part of the activities is directed to influencing legislation
      (2) Service for instrumentalities of the U. S. not wholly owned by the U. S. Government and not exempt under Federal Income Tax laws
   (c) Included and excluded service clause. Where service is mixed, all service to be classified as that part which represents more than 50 per cent of the total.
3. Redefine "Total Unemployment" 4 (s)
   (a) Terminology to be "no work for which remuneration is payable"
   (b) "Reasonable earnings" to be allowed—$3.00 per week earnings to be allowed without causing ineligibility for unemployment compensation
4. Modify definition of "wages" 4 (u)
   (a) By adopting Federal Definition
   (b) By exempting allowances paid to draftees and volunteers
5. Provide a compulsory Advisory Council 204
   Council to include representatives of employers, employes, and the public appointed by the Governor
6. Authorize the Department, in cooperation with the Advisory Council, to Study "Experience Rating" 205
7. Provide for the destruction of obsolete reports and records 206
8. Increase the effectiveness of collecting contributions 301-302
   (a) By setting the contribution rate without relation to Federal credits (i. e. 2.7% of wages paid instead of 90% of Federal Tax)
   (b) By authorizing the Department to assess delinquent employers
9. Clarify "Termination of Employer Liability" 303
   By changing wording definitely to establish the period in which an employer was not subject to the Act, before he may terminate his liability
10. Simplify computation of interest 308
    By setting rate at 1% per month or any part thereof
11. Extend power in collection of contributions 309
    (a) By authorizing the Department to compromise delinquent contributions, penalties, and interest of bankrupt employers, and penalties and interest of delinquent employers
    (b) By authorizing the Department to establish liens against delinquent employers
12. Authorize the Commonwealth to enter interstate agreements to handle refunds and adjustments of contributions when employers pay such amounts to the wrong state and to further extend powers of interstate cooperation 311
13. Determine eligibility for benefits by establishing a minimum of $100 to be earned in the base year 401 (a)

[1] Sections indicated correspond to sections in the Pennsylvania Unemployment Compensation Law.

14. Clarify the waiting period and liberalize benefits 401 (e)
    (a) By clarifying the waiting period in case of industrial disputes
    (b) By reducing the waiting period from three to two weeks
15. Modify provisions for Ineligibility for Compensation 402
    (a) By denying benefits only to those leaving work "without good cause"
    (b) By denying benefits to those discharged because of "committing larceny" against the employer after conviction by a competent court of law and final disposition of the case
16. Provide a simplified system of payment of accrued benefits to the surviving spouse, children and parents of deceased claimants 403
17. Modify determination of amount of compensation 404
    (a) By eliminating benefit redetermination during the benefit year
    (b) By providing a schedule of benefits, showing amount and duration of unemployment compensation
    (c) By insuring to those entering military service the same benefit rights upon the termination of such service as they were entitled to before such service
18. Modify appeal procedure 501
    (a) By permitting use of after-discovered evidence within one year
    (b) By providing for payment of the uncontested amount of compensation during appeals
    (c) By permitting delivery of the "Notice of Decision" in person or by mail, replacing the present method of compulsory mailing
19. Authorize the Department to handle appeals on a mass basis instead of an individual basis 505
20. Permit the use of after-discovered evidence as applying to finality of decision 509
21. Permit the establishment of precedents in decisions regarding compensation so that a decision will be uniformly applicable to all similar cases 512
22. Provide additional powers to enforce repayment by claimants of compensation to which they were not entitled 804
    (a) By making repayment of over-payments mandatory
    (b) By granting the Department the power of surcharge against future benefit payments
    (c) By granting the Department the right of subrogation in NLRB awards
23. Memorialization to Congress to reduce contribution rate paid by employers

INTRODUCTION

A. Brief History of The Joint State Government Commission and The Joint Legislative Committee to Study Unemployment Compensation Provisions

The Joint State Government Commission, established by the Act of July 1, 1937, P. L. 2460, consisted of thirteen members, and its duties, inter alia, were to make studies for the use of the legislative branch of the Government seeking to inmprove administrative organization of the State government, to eliminate waste and to institute economies.

By the Act of June 26, 1939, P. L. 1084, the membership of the Joint State Government Commission was increased to nineteen members, consisting of the Speaker of the House of Representatives, the President Pro Tempore of the Senate, ten members appointed by the Speaker of the House, and seven members of the Senate appointed by the President Pro Tempore of the Senate; and the powers and duties of the Commission were enlarged and more clearly defined.

On August 16, 1939, The Commission elected Hon. Ellwood J. Turner, Chairman; Hon. Frederick T. Gelder, Vice-Chairman; Hon. Robert E. Woodside, Jr., Secretary; Hon. William E. Habbyshaw, Treasurer; and A. Alfred Wasserman, Esq., Director.

By House Resolution, Serial No. 136, adopted May 26, 1939, the Joint State Government Commission was charged with making a study of merit rating as applied to unemployment compensation and with making a report of its findings and recommendations to the next session of the General Assembly.

The Joint Legislative Committee to Study Unemployment Compensation Provisions was created by Senate Resolution, Serial No. 127, adopted by the Senate on May 26, 1939, and concurred in by the House of Representatives on May 27, 1939, to study provisions of the Pennsylvania Unemployment Compensation Law. It consisted of three members of the Senate appointed by the President Pro Tempore of the Senate and four members of the House of Representatives appointed by the Speaker of the House. The Committee was organized on September 27, 1939.

Inasmuch as the Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions were both charged with making studies of the provisions of the Unemployment Compensation Law in Pennsylvania, the Commission in order to avoid unnecessary duplication of work, requested the Joint Legislative Committee to make a study of the entire subject of unemployment compensation, including merit or experience rating for employers, and made the facilities and Research Staff of the Commission available to the Committee. A. Alfred Wasserman, Esq., Director of the Joint State Government Commission, was assigned by the Chairman of the Commission as Counsel and Director to the Committee.

There was no appropriation made to the Joint Legislative Committee to Study Unemployment Compensation Provisions to carry on its work. The Joint State Government Commission agreed to pay the necessary expenses of the Committee.

House Resolution Serial No. 136
(Adopted May 26, 1939)

JOINT STATE GOVERNMENT COMMISSION URGED TO STUDY "MERIT RATING"

Whereas, It is desirable and necessary to increase em-

ployment; and

Whereas, The present system of unemployment compensation does not offer any incentive to industry to increase employment; and

Whereas, "Merit Rating" provisions have been placed in the laws of other states as such an incentive; therefore, be it

Resolved, By the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania, that the Joint State Government Commission be urged to make a study of such system as applied to unemployment compensation taxes, including a study of systems prevailing in other states, and make a report of its findings and recommendations to the next session of the General Assembly.

Senate Resolution Serial No. 127

JOINT LEGISLATIVE COMMITTEE TO STUDY UNEMPLOYMENT COMPENSATION PROVISIONS

(Adopted by Senate, May 26, 1939)
(Concurred in by House, May 27, 1939)

Whereas, Pennsylvania is the only State which has in its Unemployment Compensation Law neither any provisions for relating the payroll tax to the regularity of employment achieved by an employer nor any provisions for studying the subject, and

Whereas, the public hearing held before the Senate Committee on Labor and Industry on May 11, 1939, evidenced a widespread public interest in and demand for the inclusion of provisions for experience rating in the Pennsylvania Law, and

Whereas, it is claimed that absence of such a provision places many Pennsylvania employers at competitive disadvantage with States having such provisions, Therefore, be it

Resolved, that a Special Joint Legislative Committee be appointed to study the subject and report with recommendations to the next regular or special session of the Legislature; that the Committee consist of four members of the House to be appointed by the Speaker of the House and three members of the Senate to be named by the President Pro Tem of the Senate, one of the Senators to be chairman; and that the records of the State Division of Unemployment Compensation and Employment Service be made freely accessible to the Committee for its work.

B. Brief History of Unemployment Compensation in Pennsylvania

A Committee was appointed in 1931 by Governor Pinchot to make a study of unemployment in Pennsylvania. The Committee filed a report entitled Alleviating Unemployment and a majority of the Committee recommended unemployment reserves as desirable. The Committee also drafted a bill providing for separate industry reserve funds, and during the 1931 Session of the Legislature a Bill[1] was introducel providing for unemployment reserve funds, but, aside from referring the bill to committee, no final action was taken.

In 1933 another Committee was appointed by Governor Pinchot to study the problem of unemployment in Pennsylvania. The Committee was divided in its recommendations and several reports were submitted by it. The Committee prepared a bill similar to the Wisconsin Unemployment Compensation Law which was introduced during the Regular Session of 1933.[2] Other Bills providing for Unemployment Reserve Commissions or Funds were also introduced during the Regular Session of 1933,[3] but no action was taken.

During the Regular Sessions of 1933 and 1935 and the First Special Session of 1936, a number of bills were introduced[4] providing for several types of unemployment compensation systems without any final action being taken by the General Assembly.

During the Second Special Session of 1936, a bill providing for a pooled fund was introduced and enacted into law.[5] This Act established the present unemployment compensation system in Pennsylvania.

The Unemployment Compensation Law was first amended on May 18, 1937. This Act:

(1) Amended the definition of the word "employer" as applied to contractors and subcontractors;

(2) Permitted employers subject to the Act to include:
  (a) Services performed entirely outside of the Commonwealth by employes domiciled within the Commonwealth;
  (b) The services of employes exempt under Subsection (j) of Section 4;

(3) Further defined "employment" by placing upon employers the burden of showing that certain employment is exempt from the Act;

(4) Amended the civil service provisions in the Act pertaining to qualifications of employes, holding of competitive examinations, allowing certain preference in examinations to applicants who are engaged in naval or military service of the United States, and filling of vacancies;

(5) Made more effective the collection of contributions and interest.

By the Act of July 2, 1937, P. L. 2823, the Sales in Bulk Act was amended to provide that unemployment compensation contributions due the Commonwealth shall be paid before any proposed transfer of property of any corporation, joint stock association, limited partnership or company shall be permitted.

During the 1939 Session of the Legislature, eleven bills were introduced dealing with the subject of unemployment compensation. Some of these dealt with the civil service provisions in the Act, while others dealt with experience rating and other provisions of the Unemployment Compensation Act.

Of the bills introduced in the 1939 Session of the General Assembly, two were passed by the Legislature. One bill[1] contained a number of amendments to the Unemployment Compensation Act, providing for redefining the benefit year; making employers who succeeded in interest liable for unemployment compensation contributions of their predecessor; amending the civil service provisions; making more effective the collection of contributions and interest; redefining "wages"; changing qualifications required to secure compensation, and other minor changes. This

measure, however, was vetoed by the Governor. His principal objection was to the change in the provision for eligibility for benefits in that it increased this eligibility from $97.50 to $200 before benefits could be paid.

The other bill[2] was enacted into law. This further amended the Unemployment Compensation Act by:

(1) Exempting from the definition of employment, services performed after June, 1939, for an employer determined to be subject to the Federal Railroad Unemployment Compensation Act, because railroad employes are now fully covered by this latter Act;

(2) Permitting the Department of Labor and Industry to enter into reciprocal arrangements and compacts with other States or the Federal Government;

(3) Refinements in language of causes making an employe ineligible for unemployment compensation.

During the Special Session of 1940, the Pennsylvania Unemployment Compensation Act was further amended[3] by exempting from the tax or contribution all remuneration above $3,000 per annum, as well as payments made to or on behalf of an employe for retirement, sickness, accident, allowances, insurance or annuity benefits, etc., thus bringing this definition into conformity with the 1939 amendments to the Federal Social Security Act.

C. Hearings and Meetings

The Joint Legislative Committee to Study Unemployment Compensation provisions held nine meetings and hearings since its organization on September 27, 1939.

Representatives of organized labor, business and industry, and persons generally interested in Social Security and Unemployment Compensation in Pennsylvania, of whom the Committee had knowledge, or who communicated with the Committee, were requested to present their views or proposals for change to the Committee.

The Committee thereafter held hearings in Harrisburg, dividing them into two classes: (1) Those at which all amendments to the Unemployment Compensation Law were considered, other than experience or merit rating; (2) those at which the subject of experience or merit rating alone was considered.

At the hearings held on December 12, 1939, February 27, 1940, April 16, 1940, and July 30, 1940, the Committee heard from representatives of organized labor, business and industry, and interested persons on amending the Pennsylvania Unemployment Compensation law to bring it into conformity with the 1939 amendments to the Federal Social Security Act and the Federal Internal Revenue Code relating to Unemployment Compensation.

At the last two hearings of the Committee held on August 13 and September 17, 1940, the Committee received oral arguments from the proponents and opponents of experience or merit rating. In addition, numerous briefs were filed with the Committee by various persons interested in this subject.

D. Acknowledgments

The Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions are grateful for the assistance and cooperation rendered by the following:

Department of Labor and Industry
Hon. Lewis G. Hines, Secretary
Ernest Kelly, Director Bureau of Employment and Unemployment Compensation
Harry Hoyle, Chief of Standards, Methods, and Planning, Bureau of Employment and Unemployment Compensation
Rolland S. Wallis, Chief of Research and Statistics, Bureau of Employment and Unemployment Compensation
William E. Orr, Jr., Advanced Statistician, Bureau of Employment and Unemployment Compensation
David R. Perry, Esq., Special Deputy Attorney General

Pennsylvania Economy League, University of Pennsylvania, University of Pittsburgh, Temple University, Lehigh University, Pennsylvania State College.

DISCUSSION OF RECOMMENDATIONS FOR AMENDING THE PENNSYLVANIA UNEMPLOYMENT COMPENSATION LAW

The Joint Legislative Committe to Study Unemployment Compensation Provisions, by unanimous vote, and the Joint State Government Commission jointly recommend the enactment, at the 1941 Regular Session of the General Assembly, of the following amendments to the Pennsylvania Unemployment Compensation Law (Act No. 1, General Assembly, December 6, 1936, as amended). These subjects have been brought to their attention by Pennsylvania employers subject to this Act, workers and labor organizations in the State, Chambers of Commerce, the Federal Social Security Board, and the Bureau of Employment and Unemployment Compensation of the Department of Labor and Industry.

Section 4 (i)[1] Modify Definition of "Employer"

(a) To include a "successor in interest" clause

The present law determines the liability of an employer on the number of weeks of employment which he provides during a calendar year. For this purpose, each employer, such as a partnership, corporation or individual, is considered as a separate entity. Thus, when a partnership changes into a corporation, the entity changes and liability, under the law, may be affected. This provision allows evasion of the law by encouraging changes of entity without changes of substance. Certain instances of this have been obvious.

A provision should be inserted requiring any employing entity which changes form without substantial change in ownership or membership to continue paying contributions. This would prohibit an evasion of the law and would provide the proper protection, under unemployment compensation, for the workers employed by those employing entities.

(b) To include employers of non-resident employes by election

The present Pennsylvania Law provides no method for a non-resident employe, who is not subject to any State law, to be covered by his Pennsylvania employer.

The Department of Labor and Industry should be allowed to accept voluntary elections from employers to

[2] 1939 P. L. 458.
[3] Act No. 9, Special Session, 1940.

[1] Sections indicated here and throughout correspond to sections in the Pennsylvania Unemployment Compensation Law as of June 1, 1940.

bring under coverage of the Pennsylvania Law, nonresident employes whose work, though not localized in Pennsylvania, is directed from this State, provided such work is not covered under any other state law. Such employes do not have unemployment compensation protection now. Their employers secure no advantage from the payment of their Federal taxes. The amendment would bring such workers under the Pennsylvania Act and their employers, located in Pennsylvania, will secure credit against their Federal taxes.

Section 4 (j) Bring the State Law into Conformity with the Recent Amendments of the Federal Act

Numerous changes in coverage of the Federal tax on employers were made in the Social Security Act amendments of 1939. Following are classes of employment now covered under the Pennsylvania Law which should be excluded by amendment, thereby conforming to the Federal amendments.[2]

(a) Further exclusions:

(1) Domestic service in local college club, fraternity or sorority. (Domestic service in private home is already excluded.)

(2) Casual labor, not in the course of the employer's business.

(3) Service performed in any calendar quarter in the employ of any organization exempt from the Federal Income Tax, if—

(i) the remuneration from such service does not exceed $45, or

(ii) such service is in connection with the collection of dues or premiums for a fraternal beneficiary society, order, or association, and is performed away from the home office, or is ritualistic in service in connection with any such society, order, or association, or

(iii) such service is performed by a student who is enrolled and is regularly attending classes at a school, college, or university

(4) Service performed in the employ of agricultural or horticultural organizations. (It is recommended that an exclusion under the Pennsylvania Law be made by Rules and Regulations of the Department, to conform to such Federal regulations as may be adopted on this subject).

(5) Service performed in the employ of a voluntary employes' beneficiary association providing for the payment of life, sick, accident, or other benefits to the members of such association of their dependents, if (1) no part of its net earnings inures (other than through such payments) to the benefit of any private shareholder or individual, and (2) 85 per cent or more of the income consists of amounts collected from members for the sole purpose of making such payments and meeting expenses, or if, (3) admission to membership in such association is limited to individuals who are officers or employes of the United States Government.

(6) Service performed by a student for his college or university, not exempt from income tax, if such service is for amounts less than $45 per calendar quarter.

[2] Compilation of Social Security Laws including amendments of the 76th Congress, 1st session; Section 1607 pp. 66-68. Social Security Act, Title IX, now superseded by Sub-chapter C of Chapter 9 of the Internal Revenue Code.

(7) Service performed for a foreign government. (Whether such services are covered under the Pennsylvania Law is not clear.)

(8) Service performed for an instrumentality of a foreign government (1) if the service is of a character similar to that performed in foreign countries by employes of the United States Government or of an instrumentality thereof, and (2) if the foreign government, with respect to whose instrumentality exemption is claimed, grants an equivalent exemption for employes of the United States Government and of instrumentalities thereof.

(9) Service performed as a student nurse in the employ of a hospital or a nurses' training school by an individual who is enrolled and is regularly attending classes in a nurses' training school chartered or approved pursuant to State Law; and service performed as an interne in the employ of a hospital by an individual who has completed a four years' course in a medical school chartered or approved pursuant to State law.

(10) Service performed by an individual for an employer as an insurance agent or as an insurance solicitor, if all such service performed by such individual for such employer is performed for remuneration solely by way of commission.

(11) Service performed by a minor under the age of 18, in the delivery of newspapers or shopping news.

The 1939 amendments to the Social Security Act increased the coverage of that law to include additional classes of employment. The Pennsylvania Law does not include these groups except such employers as have voluntarily elected to come within the Pennsylvania Law. Therefore, it is recommended that such services be included under the Pennsylvania Law by amendment.

(b) Further inclusions:

(1) Service performed in the employ of regilious, charitable, scientific, literary, or educational organizations when a substantial part of the activities is directed in carrying on propaganda or otherwise attempting to influence legislation.

(2) Service in the employ of an instrumentality of the United States Government which is not wholly owned by the United States and is not exempt under Federal Income Tax Laws.[1] Any such amendment should provide for coverage of any other instrumentalities which Congress may require to make payments into an unemployment compensation fund under a state unemployment compensation law.

(c) Included and Excluded Service.

If the services performed during one-half or more of any pay period by an employe for the person employing him constitute employment, all the services of such employe for such period shall be deemed employment; but if the services performed during more than one-half of any such pay period by an employe for the person employing him do not constitute employment, then none of the services of such employe for such period shall be deemed to be employment.

[1] A major class of coverage that this proposed amendment will affect is the national banks, which are instrumentalities of, but not wholly owned by, the United States. The Federal Government has invited the States to follow its lead and adopt such an amendment thereby covering employes of National Banks as well as other instrumentalities not wholly owned by the United States and not exempt under the Federal Income Tax Laws.

Section 4 (s) Re-define "Total Unemployment"

(a) "No work for which remuneration is payable"

Total unemployment is defined in the Pennsylvania Law in terms of "no work for which wages are payable." Since the word "wages" is further defined[1] to cover only employment covered by the Law, a claimant might be construed to be totally unemployed even though he earned substantial amounts of money for service in non-covered employment (for example, Government service).

Total unemployment should be defined in terms of "no work for which remuneration is payable." This will require that a person be entirely without source of money income from employment before he is considered as totally unemployed.

(b) "Reasonable Earnings" to be allowed

The present law considers a person as employed if he earns as little as 5c per week. Total unemployment must be complete lack of wages.

A person should be allowed a reasonable amount of money as earnings and still be eligible to receive unemployment compensation. This reasonable amount should be fixed at $3 per week. Those earning this amount or less will be considered as totally unemployed.

An administrative decision establishing this practice has received general approval and is working satisfactorily.

Section 4 (u) Modify Definition of "Wages"

(a) By adopting Federal definition

The 1940 amendments to the Pennsylvania Law attempt to bring into conformity the State definition of wages and the Federal definition of wages. The State amendment was confined to contributions. Since both contributions and benfits are based on "wages," it is important that the same definition be applied in both cases. Otherwise confusion results for the taxpayer if he reports contributions on one basis and wages of the employe, on which benefit payments are determined, on another basis. From an administrative point of view, it is desirable that the definition of wages as used in the computation of benefits should be in conformity with the Federal Act. This will simplify the reporting problem of the employer.

The Federal definition of wages should be included in all sections of the Pennsylvania Law.[2] The Social Security Board has indicated that it expects every state to have the identical definition of wages as the Federal Government by July 1, 1941.

(b) By exempting allowances paid to draftees and volunteers

Certain patriotic employers are adopting plans to pay partial wages to their employes who are drafted or volunteer for military service in the present crisis. Such payments will supplement the $21 to $30 per month pay provided by the War Department.[3] Such payments are in the nature of gratuitous additional allowances, similar to dismissal wages. Such allowances as dismissal wages are presently exempt from contributions and since such patriotic action on the part of the employer should not be penalized or discouraged, an amendment exempting such gratuities should be enacted.

Section 204 Provide a Compulsory Advisory Council

The present law permits the Department of Labor and Industry to establish an Advisory Council composed of employers, employes, and the public, to advise the Department in the administration of the Unemployment Compensation Law. Except for a brief period, no council has been in existence. It is desirable that the parties affected by this law should be fully informed of its administration and the Council should give advice to the administrators.

A compulsory Advisory Council should be provided by law and the Governor should appoint the members.

Section 205 Authorize the Department to Study "Experience Rating"

There is considerable interest in the stabilization of employment in Pennsylvania. One method of encouraging such stabilization is to reduce unemployment compensation contributions for these employers who have a stabilized employment record. This is known as Experience Rating. It is the contention of many industries, however, that such a system would not be advantageous because employment stabilization is not within the control of the employer. Throughout the country, many States have adopted this provision and many are studying the matter.

The Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions are preparing a report on this subject which will be contained in Part Two. This subject requires continuous study irrespective of any proposals which may be made in Part Two.

It is recommended, therefore, that the Department, in cooperation with the Advisory Council, shall make a study of the effect of Experience Rating in Pennsylvania.

Section 206 Provide for the Destruction of Obsolete Reports and Records

Each year several million reports and forms from employers and claimants are received and housed. Included in these reports are some twelve million Employes Wage Records, one million Summary Wage Records, 600,000 Contribution Reports, 100,000 Claims, 100,000 Registrations, etc. It is desirable that such of these records as become obsolete should be destroyed or disposed of. The administrative authorities should be permitted to decide when these records are obsolete and may be destroyed, taking such safeguards as will assure the retention of such records as will be required for proper auditing. These records are to include summaries or photographs of all obsolete records which are destroyed.

An amendment should be inserted, granting to the Department of Labor and Industry, with approval of the Executive Board, the right to destroy records accumulated in the administration of the Unemployment Compensation Law when such records become obsolete, provided that all records in pending cases shall not be destroyed. Contribution Reports of employers shall be retained for two years, the period within which claims for unemployment compensation must be filed.

Sections 301-302 Increase the Effectiveness of Collecting Contributions

[1] See Sections 4(u) and 4(j) for definition. Pennsylvania Unemployment Compensation Law.

[2] Federal definition of wages in Compilation of Social Security Laws. Sec. 1607, p. 65. Social Security Act Title IX, now superseded by sub-chapter C of Chapter 9 of the Internal Revenue Code.

[3] $21 for first four months. Selective Training and Service Act of 1940, Sec. 12, including amendments of the 76th Congress, 1st Session.

(a) By setting contribution rate without relation to Federal credits

Section 301, applying to employers of eight or more employes, limits the Pennsylvania contribution to a maximum credit allowance under the Federal Social Security Act (90 per cent), while, at the same time, specifying the contribution rate of 2.7 per cent for years subsequent to 1937. Since the Federal and State Laws are not in complete agreement as to coverage, these provisions of Section 301 are in conflict.

Because of this difference in coverage, 90 per cent of the Federal tax of 3 per cent may not be the same as the amount arrived at by computing 2.7 per cent of wages covered under the State law. The specified rate of contribution should be retained and the relation of the contribution to the Federal credits should be eliminated by amendment.

(b) By authorizing Department to assess delinquent employers

In administering Sections 301 and 302, the Department finds in certain cases that employers refuse or fail to file reports indicating the amount of contributions payable. It is difficult to make collections from such delinquent employers through Civil Suit Proceedings specified in Section 309, because the amount of contribution due is unknown.

The Department should be granted the authority to assess the estimated amount of contribution payable by such delinquent employers, with this assessment to constitute a judgment, when filed with the court, unless the employer appeals and contests the assessment. This power is equivalent to similar powers held by other State tax collecting agencies. When judgments are filed they should be filed with the Prothonotary in the county where the property of the delinquent is located. This is in conformity with the usual practice for other State taxes.

Section 303 (b) Clarify "Termination of Employer Liability"

This section specifies that an employer applying for a termination of his liability shall be granted such if he was not subject to the Act "during the previous or current calendar year." The interpretation of the word "or" is vague. It is suggested that the wording be changed so as to make clear that before termination of liability will be granted, an employer must have been subject to the Act neither in the preceding calendar year nor in the current calendar year up to the time application is made. Application may be made at any time during the year following the calendar year in which the employer was not subject to the Act.

Section 308 Simplify Computation of Interest

The present law requires an employer, who pays his contribution after the due date, to compute interest on the basis of the date paid. This means a computation based on the number of days of the months in which delinquency is paid. For example, an employer paying contributions on wages paid to his employes during the first calendar quarter is given up to the end of the following month, April 30th, to make payment. If he fails to pay, say until May 11th, he must pay interest charges of 11/31 of 1% of the amount due.

This complicated method should be replaced by a charge of interest amounting to one per cent for any month or part thereof. This will be easy to compute and will apply to all delinquent employers.

Another consideration is that many employers, knowing that a short delay in sending in their contributions and contribution records means only a fraction of one per cent interest charge, fail to send in their records and contributions by the last day of the month following the close of a calendar quarter.

Section 309 Extend Power in Collection of Contributions

(a) By authorizing Department to compromise delinquent contributions, penalties, and interest of bankrupt employers, and penalties and interest of delinquent employers

The present law requires the Department to collect the full amount of contribution by regular process or civil suit. The inability of certain bankrupt employers to meet their obligations in full, requires the Department to keep records of amounts which will never be collected and engage in civil suits which cannot be terminated favorably. This is generally true of small amounts under $200.

The Department should be authorized, with the approval of the Attorney General, to enter into agreements for reducing the amount of contributions, interest, and penalties due from bankrupt employers, and to accept payments which may be agreed upon in this manner, in full payment of the account. This power is similar to that enjoyed by other tax collecting agencies and is necessary in order to do proper accounting.

The Department should be further authorized to compromise penalties and interest upon delinquent contributions, with the approval of the Attorney General. This power, with the interests of the Commonwealth protected by requiring approval of the Attorney General, will provide the Department with a means of speeding up returns and reporting of wage records and also result in getting greater contributions in many cases.

(b) By authorizing Department to establish liens against delinquent employers

The present law provides for collection of delinquent contributions by means of Civil Suit. This process is time-consuming and expensive.

The Department should be granted authority to establish liens against employers who admit the amount of contribution but fail to pay such amount. These liens should be filed with the Prothonotary in the county wherein the property of the delinquent employer is located. This is in conformity with the usual practices for other State taxes.

In summary, the collection of contributions would be handled in the following manner:

1. By regular reports, or
2. By filing of a lien where the amount is known, or
3. By filing of an assessment where the exact amount is unknown, or
4. By instituting Civil Suit for collection.

Section 311 Authorize the Commonwealth To Enter Interstate Agreements to Handle Refunds and Adjustments

The present law does not specifically allow the Commonwealth to enter into interstate agreements to handle refunds and adjustments of contributions when employers pay such amounts to the wrong state. Certain Pennsylvania employers have paid contributions to Pennsylvania when they should have paid to Ohio, for example. Present practice requires the employer to secure a refund within one year from Pennsylvania and to pay the contributions, with interest added, to the State of Ohio. It is desirable to permit the transfer of such amounts from one state to another, without interest, at any time that the error is discovered. This may be accomplished by giving the Department the right to enter into interstate agreements with respect to adjustments of contributions.

There are certain other considerations which make further interstate cooperation desirable. These include, exchanging services, such as auditing employers' books by the state wherein an employer's records are kept, for another state to which he may pay certain contributions; making available facilities and information; and making employment service laws more effective. Provisions permitting such interestate cooperation should be enacted.

Section 401 (a) Simplify Determination of Eligibility for Benefits

The present law requires a claimant to have earned thirteen times his weekly compensation amount to become eligible. (The weekly compensation amount is one-half the full time weekly wage rate). This varies between $97.50 and $195 in accordance with the previous full time wage of the claimant. To simplify this formula and make the system more understandable, it is recommended that a flat eligibility amount of $100 to be earned in the base year be established by amendment. This amount would be approximately the same as the present minimum qualifying amount and it would grant eligibility to a slightly higher number of claimants, within the present law.

A better reflection of the effect of various eligibility amounts may be gotten from the analysis of a single sample taken in September-October 1938[1]. In this sample there were 4,191 cases and the following results were obtained.

TABLE I

ALTERNATIVE ELIGIBILITY REQUIREMENTS

Eligibility Requirements	Percent Ineligible
Present Law*	4.29
$100	4.06
150	6.20
200	9.02

* Present eligibility varies between $97.50 and $195 according to the weekly earnings of the claimant.

This special analysis shows that the earnings qualification of $100 would be slightly more liberal than the present law in regard to eligibility. The requirements of $150 and $200 would be more restrictive to the extent shown.

With respect to eligibility experience to date, the percentage of ineligible cases has declined from 7.2 per cent in 1938 to 1.2 per cent in the first nine months of 1939. (See Statistical Studies, Section I). This decline has been attributed to a better understanding of the law by benefit claimants, who in cases where they are obviously ineligible, do not or are discouraged from filing claims.

Recent experience shows that the present law is declaring ineligible about 1 per cent of the individuals who file claims. It is not going too far to say that, if a flat eligibility amount were to be adopted, claimants would determine their own eligibility and the percentage of ineligibles among claims filed would approach 0 per cent.[1]

Section 401 (e) Simplify and Liberalize Benefits

(a) By clarifying the waiting period in industrial disputes

The present Law prescribes a regular waiting period of three weeks before compensation may be payable, with a six weeks' waiting period in cases of voluntary suspension of work resulting from an industrial dispute. It is believed that the legislative intent was to require the serving of the additional three weeks, based on the industrial dispute, before the standard three weeks' waiting period. (It is proposed to reduce the standard waiting period to two weeks. See (b) following.)

Which waiting period is served first is important in determining when benefits should start in those cases where industrial disputes cease to be factor before six weeks of waiting have been completed. The Department, in practice, has been considering the waiting period because of industrial disputes as preceding the standard waiting period. It is proposed that this method be confirmed.

Upon the termination of a benefit year, the Department requires claimants, who are unemployed, to serve a waiting period of three weeks in the new benefit year before becoming eligible for benefits. The question has been raised whether or not those who are unemployed can serve their waiting period at the end of one benefit year so as to be eligible to receive benefits immediately for the first week following the close of that benefit year. Since the law is not clear on this point, it is proposed that the present practice be confirmed.

(b) By reducing the waiting period.

The present standard waiting period is three weeks. Certifications for benefits are taken at the end of the next and subsequent weeks. Thus, it is usually four and a half to five weeks, after his separation from employment, before the individual claimant may receive his first benefit check. While such practice may have been desirable at the inauguration of the system, it is now recognized as far too long. Many persons are required to apply for public assistance during this period, thus complicating the relations between public assistance and unemployment compensation.

The standard waiting period should be reduced to two weeks, thus providing the first benefit check in from three and a half to four weeks after a separation from employment. It is estimated that a reduction from three to two waiting weeks will cost an additional $2,000,000 in benefit payments. (See Section III of Statistical Studies, "Additional Benefit Costs of Shortening the Waiting Period.")

One of the larger issues in unemployment compensa-

[1] Unemployment Compensation Payments in Pennsylvania. Administrative Research Bulletin No. 2, January, 1940, p. 41. Bureau of Employment and Unemployment Compensation, Harrisburg, Penna.

[1] Ibid., p. 37.

tion policy is the relation between that system and the system of public assistance or relief. In Pennsylvania there are two separate agencies in these fields. While cooperation between these two agencies has been very close, it has been impossible to avoid the situation where cases are transferred from one agency to the other and perhaps back again over a short period of time. For example, an individual who filed a claim was unable to support his family during the three-week compensation waiting period, and received assistance payments during this time from the other agency. When his unemployment compensation payments start the assistance payments are terminated, but they may be resumed after his compensation payments end. Thus, it is of some importance that the changes that may be made in the unemployment compensation system do not unduly increase relief costs and contribute further to the overlapping of the functions of the two agencies. The extent to which this overlapping existed in the waitings period stage of unemployment compensation is shown by the following figures. During December 1938 the Bureau of Employment and Unemployment Compensation received 28,436 new claims. These claims matured for payment during January 1939 but before payments were made there were 2,453 claimants (8.6 per cent of the total) who filed applications for and received assistance or relief payments. When their unemployment compensation began, they were, of course, removed from the assistance rolls, but after they had received assistance grants for one or more weeks. This 8.6 per cent was thus handled twice by those agencies. It was estimated recently by the Pennsylvania Department of Public Assistance that if the waiting period was shortened by one week it would save $25,000 in relief costs annually.[1]

Thirty-nine of the fifty-one unemployment compensation laws now in effect in the United States provide for two initial weeks of waiting, ten for three weeks, and two for one week. However, detailed provisions in this respect vary, some states providing for two waiting weeks if accumulated within a short period of time, but a larger number of weeks if accumulated over an entire benefit period.

TABLE II

INITIAL WAITING PERIODS REQUIRED BY STATE UNEMPLOYMENT COMPENSATION LAWS[2]

1-Week Waiting Period	2-Week Waiting Period		3-Week Waiting Period
Rhode Island[3]	Alaska	Michigan	Alabama
Texas[3]	Arizona	Minnesota	Dist. of Columbia
	Arkansas	Mississippi	Missouri
	California	Montana	New York
	Colorado	Nebraska	Ohio
	Connecticut	Nevada	Oregon
	Delaware	New Hampshire	Pennsylvania
	Florida	New Jersey	South Dakota
	Georgia	New Mexico	Vermont
	Hawaii	North Carolina	West Virginia
	Idaho	North Dakota	
	Illinois	Oklahoma	
	Indiana	South Carolina	
	Iowa	Tennessee	
	Kansas	Utah	
	Kentucky	Virginia	
	Louisiana	Washington	
	Maine	Wisconsin	
	Maryland	Wyoming	
	Massachusetts		

[1] Ibid., pp. 59, 60.

[2] Additional Benefit Costs of Shortening Pennsylvania's Waiting Period. Administrative Bulletin 4, June, 1940. Bureau of Employment and Unemployment Compensation, Harrisburg, Penna., p. 2.

[3] Notes on: RHODE ISLAND; Employes contribute 1.5 per cent on wages up to $3,000. Covers only employers having 4 or more employes. TEXAS; Covers only employers of 8 or more employes.

Most of the state laws permit waiting weeks to be accumulated at any time during the benefit year, or within a 52-week period after the claimant first becomes unemployed and files an initial claim. A few states require waiting weeks to be accumulated within a 13-week or a 26-week period, or stipulate that they must be consecutive weeks of unemployment. Such provisions, however, have not been generally accepted with favor by state legislatures.

Section 402 Modify Provisions for Ineligibility for Compensation

(a) Those leaving work "without good cause"

The present law denies benefits, under Section 402(b), to persons who voluntarily leave their employment "except where as a condition of continuing in employment the employe would be required to join or remain a member of a company union or to resign from or refrain from joining any bonafide labor organization, or to accept wages, hours or conditions of employment not desired by a majority of the employes in the establishment or the occupation, or would be denied the right of collective bargaining under generally prevailing conditions." This provision does not allow persons to leave work with other good cause and to claim benefits. There are many conditions which may be imposed upon an employe requiring him to leave his work which may be considered good cause. Examples would be continuing injury to health or safety, unbearable working conditions, etc. Most state laws provide for this type of case.

An amendment should be inserted denying benefits only when a claimant leaves his work "without good cause." Decisions on this subject will be made by the Department, and reviewed by the Board of Review, as provided in Article V of the present law.

(b) Those discharged because of "committing larceny" against the employer

The same Section 402 permits the payment of benefits to any person who leaves his work involuntarily by reason of furlough, discharge, etc. Cases have arisen where persons have been discharged due to misconduct in connection with their employment, such as theft, dishonesty, etc., and have been paid benefits. It is desirable that persons discharged because of "committing larceny against the employer" should be denied benefits, however, only after conviction by a competent court of law and final disposition of the case. This provision supplements the amendment with respect to voluntarily leaving work without good cause.

It is recommended that these amendments be enacted to provide justice and fairness in the administration of unemployment compensation benefits.

Section 403 Provide a Simplified System of Payment of Accrued Benefits to the Surviving Spouse, Children or Parents of Deceased Claimants

The present law makes no provision for a system of payments to the surviving spouse, children or parents of deceased claimants. Thus, regular decedent estate methods must be used. These are expensive and time-consuming.

Payment of accrued benefits should be made to these persons, with or without letters of administration at the discretion of the Department.

Section 404 Modify Determination of Amount of Compensation

(a) By eliminating benefit redetermination

The present law requires redetermination of benefits at the end of each calendar quarter. This redetermination should be eliminated and the computation of benefits made at the time of the original claim should be fixed for a period of one year.

One of the criticisms leveled at the present law and its benefits formula was that benefit rights of claimants change with the beginning of every new calendar quarter. This change was due to the automatic redetermination of benefit rights whenever a new quarter's wage record became available.

The Bureau decided, by administrative rule, that quarterly redeterminations of benefit rights are not to be made. Should this rule be upheld, the criticism of the present system would be in part dissipated. Except for determination of old benefit rights and new computations for claimants beginning a benefit year, claimants are now placed on a stable basis for the duration of their own particular benefit year. However, should this rule be overturned, the confusion of wholesale redetermination would be a very serious administrative problem. It is not going too far to say that such a decision might jeopardize the prompt payment of benefits for a considerable time.[1]

(b) By providing a schedule of benefits

The present law provides for benefits 1/8 of the total wages during the first eight out of the last nine completed quarters, or thirteen times the weekly benefit amount, whichever is the lesser. This method is complex and difficult to understand.

A schedule of benefits (Table III), which might be used, provides for the payment of amounts in even dollars based upon the full-time weekly wage of a worker, or, in the absence of a full-time weekly wage, upon earnings in the highest quarter of the first eight of the last nine completed calendar quarters immediately preceding the first day of his benefit year.

By adopting such a schedule, the administrative problem of computing benefits could be practically eliminated. Also, such a simplification would remove, for the claimants, the mystery which exists for them because of the present complicated formula for computing the amount and number of benefit payments.

The suggested table raises the minimum wage rate from the $7.50 under the present law to $8.00. It is estimated that in 1940 if such a minimum had been applied, the additional costs in benefits would have been approximately $500,000 for the year. This is based on a sample

[1] Unemployment Compensation Payments in Pennsylvania, op. cit., pp. 65, 66.

TABLE III

SCHEDULE OF UNEMPLOYMENT COMPENSATION BENEFITS FOR TOTAL UNEMPLOYMENT

Method by Which a Worker May Determine His Unemployment Compensation Benefits:

A. Weekly Benefit Rate—

1. Select the interval in column (a) in which his full-time weekly wage appears. Opposite, on the same line under column (c) appears the weekly benefit rate.
   Proviso. If total earnings in the first eight of the last nine completed calendar quarters do not equal or exceed the minimum of the corresponding interval in column (b), or in the absence of a full-time weekly wage, then
2. Select the interval in column (b) in which his high-quarter earnings appear. Immediately opposite, on the same line, under column (c) appears the weekly benefit rate.

B. Maximum Number of Benefit Checks—

1. Upon determining the weekly benefit rate locate, on the same line to the right, the bracket in which total earnings in the first eight of the last nine completed quarters appear. The figure above that column shows the maximum number of weeks for receiving benefits.

Full-time Weekly Wages (a)	High-Quarter Earnings (b)	Weekly Benefit Rate (c)	WAGES AND NUMBER OF BENEFITS										
			3 Weeks	4 Weeks	5 Weeks	6 Weeks	7 Weeks	8 Weeks	9 Weeks	10 Weeks	11 Weeks	12 Weeks	13 Weeks
Less than $17.00	$100 to $221	$8	$100-223	$224-287	$288-351	$352-415	$416-479	$480- 543	$544- 607	$608- 671	$672- 735	$736- 799	$800 or more
17.00 to 19.00	221 to 247	9	221-251	252-323	324-395	396-467	468-539	540- 611	612- 683	684- 755	756- 827	828- 899	900 or more
19.00 to 21.00	247 to 273	10	247-279	280-359	360-439	440-519	520-599	600- 679	680- 759	760- 839	840- 919	920- 999	1000 or more
21.00 to 23.00	273 to 299	11	273-307	308-395	396-483	484-571	572-659	660- 747	748- 835	836- 923	924-1011	1012-1099	1100 or more
23.00 to 25.00	299 to 325	12	299-335	336-431	432-527	528-623	624-719	720- 815	816- 911	912-1007	1008-1103	1104-1199	1200 or more
25.00 to 27.00	325 to 351	13	325-363	364-467	468-571	572-675	676-779	780- 883	884- 987	988-1091	1092-1195	1196-1299	1300 or more

Prepared by:
JOINT STATE GOVERNMENT COMMISSION
AND
JOINT LEGISLATIVE COMMITTEE TO STUDY
UNEMPLOYMENT COMPENSATION PROVISIONS
JANUARY, 1941

study made by the Bureau of Employment and Unemployment Compensation.[2] (See Table IV)

Table IV

Additional Amount of Benefits Which Would Have Been Paid Under a Weekly Benefit Minimum of $8[3]

Year	Total Amount of Benefits Paid	Additional Amount of Benefits
Total	$168,282,000	$1,766,960
1938	71,545,000	751,226
1939	54,603,000	573,325
1940 (incomplete)	42,134,000	442,409

A summary of features of using a table to compute benefits is as follows:

1. Eliminates complex method of determining amount of benefits,
2. Provides a minimum weekly wage of $8;
3. Provides for payment of benefits to claimants who earn a minimum of $100 in their base year;
4. Provides for determining of unemployment compensation by the full-time weekly wage method or if no full-time weekly wage is available, then on the bases of earnings in the high quarter in the first eight of the last nine completed calendar quarters before the claimant applies for benefits.

Factors to be considered in using the proposed Schedule of Unemployment Compensation Benefits:

(1) Under the present method, benefits are computed by taking one-half of the full-time weekly wage. Workers earning full-time wages in the odd dollar amounts of $17, $19, $21, etc., (as very many do) would, under this method receive weekly benefits of $8.50, $9.50, $10.50, etc.

On the proposed schedule, weekly benefits are in even dollars, therefore these sums would be in betwen the full dollar benefit amounts. The more liberal policy is chosen of moving each of these cases to the next highest full dollar benefit wage rather than the next lower.

(2) The high-quarter earnings basis has a 13 to 1 relationship to the full-time weekly wage basis. The relationship is equal when a worker works full time. Those who do not work full time in any quarter will receive higher weekly benefits when they have a full-time weekly wage than when they do not. (e. g., a worker, without a full-time weekly-wage, earning, on the average, $25, and never working more than 10 weeks in any quarter, will receive $12 a week in benefits; whereas, if he had a full-time weekly wage of $25, he would receive $13 a week in benefits.) On the other hand, a worker who works overtime during a quarter may receive a large weekly benefit rate if he has no full-time weekly wage reported.

After the weekly wage rate is determined the maximum benefits depend on the total earnings in the first eight out of the last nine completed calendar quarters. There are certain differences which may result, depending on whether the full-time weekly wage rate or the high-quarter method determines the weekly benefit rate, (e. g., a worker receiving a full-time weekly wage of $25 and earning a total of $850 will receive a weekly benefit rate of $13 for eight weeks or a maximum of $104, while another worker earning $300 in his high quarter and also a total of $850 will receive a weekly benefit rate of $12 for nine weeks or $108. Should each have earned a total of only $800, then the former would receive a maximum of $104 and the latter $96).

(c) By insuring the benefit rights of those entering military service

Benefit rights of claimants are fixed when an individual files a claim. Those workers who are drafted or volunteer for military services will, during such service, lose benefit rights based on their previous employment.

The benefit rights of such persons should be safeguarded during the term of military service by granting them, upon the termination of such service, the same benefits to which they were entitled before such military service began.

Section 501 Simplify Appeal Procedure

(a) By permitting use of after-discovered evidence within one year

The decisions of the Department, with respect to benefits, become final unless appealed within ten days from the date of the decision. In some cases, after-discovered evidence reveals these decisions to be improper, but no method is available for correction.

The Department, on the basis of after-discovered evidence should be authorized to change this decision with respect to benefits within one year after determination.

(b) By providing for payment of the uncontested amount of benefits

The present law requires that payment of benefits be withheld during an appeal. Many of such appeals are for higher amounts of compensation.

In these cases, the Department should be authorized to pay the smaller amounts of compensation already agreed upon, during the conduct of the appeal for a larger amount.

(c) By permitting delivery of the "Notice of Decision" in person or by mail, replacing the present method of compulsory mailing

The present law requires the mailing of a "Notice of Decision" to the claimant. Administrative efficiency would be expedited if such decisions could be mailed or delivered to the claimant when he visits the local office.

The compulsory mailing of "Notices of Decision" should be removed and the Department should be authorized to transmit the "Notice of Decision" in writing in any manner that it may determine.

Section 505 Provide for Mass Appeals

Present appeals procedure, specified in Article V, requires each case to be handled individually. In cases of industrial dispute, this means, sometimes, thousands of cases.

The Department should be authorized to handle these appeals on a mass basis, as one case, and such authority should include the right to make a decision covering an entire group of claimants of one class by making a decision with respect to one individual in that class.

[2] A sample study made of 4,139 claimants.
[3] Estimate made by Bureau of Employment and Unemployment Compensation, Department of Labor and Industry, December 24, 1940.

Section 509 Permit the use of After-discovered Evidence as Applying to Finality of Decisions

The recommendation made with respect to point (a) under Section 501, allowing the use of after-discovered evidence when revealing decisions to be improper, should be placed as amendment to Section 509. This section states that decisions made by the Department, by reference, or by the board shall become final ten days after the date thereof. This is necessary for a complete handling of this matter.

Section 512 Establish Precedents on Decisions Regarding Compensation

Under the present Law the decisions of the Board of Review on individual cases of compensation apply only to such cases.

The decision established by such appeal should be made uniformly applicable to all claimants of a similar class, whether or not the other claimants file an appeal. This is in accord with regularly established legal precedents.

Section 804 Enforce Repayment of Compensation by Claimants

(a) By making return of overpayments mandatory

Under the present Law, a claimant is required to pay back unemployment compensation only when it is determined that he was ineligible to receive such payments. In certain cases, eligible cliamants are paid more than the proper amount, due to clerical error.

Repayments of such amounts should be made mandatory by judgment or surcharge against future payments.

(b) By granting to the department power of surcharge

It is recommended that the power of surcharge be granted to the Department to offset over-payments of benefits against future benefit payments of individual claimants.

(c) By granting the department the right of subrogation in NLRB awards

Under present Law, when back wages are paid under awards of the National Labor Relations Board, it is determined that certain employes have received unemployment compensation benefits for this same period. Under present Law, it is not possible to require that such compensation be paid back without civil suit.

The Department should be given the right of subrogation with respect to National Labor Relations Board awards in order to secure repayment of compensation already paid.

Amendments to Pennsylvania Unemployment Compensation Act of December 5, 1936, P. L. 2897 (1937 Pamphlet Laws) Recommended by The Joint State Government Commission and By The Joint Legislative Committee to Study Unemployment Compensation, Showing Section, Subject, Recommended Change, Federal Provision, Purpose of Change, and Comparison With H. B. 1384 of 1939 Session

Section	Subject	Recommended Change	Federal Provision	Purpose	Did H. B. 1384 of 1939 Session include this Recommendation?
4 (i)	Employers	Permit election of non-liable employer to cover non-localized service performed by non-resident employe, where direction is located in Pennsylvania and no liability exists under any State law.	No "elections" provided	To secure coverage of employes in these cases where liability exists under Federal Act but no coverage under any State Act	No
		Successor in Interest Clause	None	To extend coverage of Act and remove a situation which invites evasion of the law	Yes
4 (j)	Employment	Exclude from the term the following services:			
		Domestic service in local college club, fraternity, or sorority	I. R. C. 1607 (c) (2)	To conform with Federal	No
		Cassual labor not in course of business	I. R. C. 1607 (c) (3)	"	No
		Service performed in any calendar quarter for organizations exempt from the Federal Income Tax, if—(i) the remuneration for such services does not exceed $45, or (ii) such service (under certain conditions) is for a fraternal beneficiary society, order, or association, or (iii) such service is performed by a student	I. R. C. 1607 (c) (10)	"	No
		Service performed in employ of agricultural or horticultural association	I. R. C. 1607 (c) (10) (B)	"	No
		Services under certain circumstances in employ of employes' voluntary beneficial association	I. R. C. 1607 (c) (10) (C) 1607 (c) (10) (D)	"	No

Section	Subject	Recommended Change	Federal Provision	Purpose	Did H. B. 1384 of 1939 Session include this Recommendation?
		Services performed by student for his college for amounts under $45 a quarter	I. R. C. 1607 (c) (10) (E)	"	No
		Services performed for a foreign government	I. R. C. 1607 (c) (11)	"	No
		Services performed for an instrumentality of a foreign government under certain conditions	I. R. C. 1607 (c) (12)	"	No
		Services performed by student nurses and internes under certain conditions	I. R. C. 1607 (c) (13)	"	No
		Services performed as an insurance agent on commission basis	I. R. C. 1607 (c) (14)	"	No
		Services performed by minors under 18 in delivery of newspapers or shopping news	I. R. C. 1607 (c) (15)	"	No
		Include within the term the following services:			
		Services in employ of U. S. or of instrumentality of U. S. which is not wholly owned by U. S. and not exempt under Income Tax Law	I. R. C. 1607 (c) (6)	"	No
		Services performed in employ of charitable, religious, etc. corporation, when a substantial part of activities is used to influence legislation	I. R. C. 1607 (c) (8)	"	No
		Included and excluded service clause providing that where service is mixed, all service to be that part which represents more than fifty per cent of the total	No Provision	An administrative device to avoid confusion as to coverage of employes	No
4 (s)	Total Unemployment	The word "remuneration" to be substituted for the word "wages"	No Provision	"Wages" are defined elsewhere as remuneration for covered employment. Under the present definition a claimant might be construed to be totally unemployed even though earning unlimited amounts for non-covered services	No
4 (u)	Wages	Eliminate distinction between wages for contributions and benefits	No Provision	To extend to benefit side the 1940 amendment defining wages	No
		.....	.....	.....	.....
		Except from definition payments to draftees	Pending Legislation	To encourage such payments	No
204	Advisory Council	Make appointment compulsory	No Provision	No comment	No
205	Stabilization of Employment	Provides for experience rating studies	Permits the Plan	To lend official sanction to studies	No
206	Employer Reports	Provisions for Destruction	No Provision	Will solve big problem	No
301-2	Contribution	Rate to be set without fixed relation	No Provision	Will eliminate a feature that might cause complications	No
		.....	.....	.....	.....
		Power to assess amount against delinquent employer	No Provision	A needed "collection" instrument	No
303 (b)	Termination Employer Liability	Clarification of Provision	No Provision	To remove doubt as to meaning	No

Section	Subject	Recommended Change	Federal Provision	Purpose	Did H. B. 1384 of 1939 Session include this Recommendation?
308	Interest	Rate to be set at 1% per month "or fraction thereof"	No Provision	To simplify computations	No
309	Collection of contribution	Power to compromise delinquent amounts of principal, penalty, and interest from bankrupt employers and penalty and interest of delinquent employers, with approval of Attorney General.	Same Power	To facilitate collections	Partly
		Power to establish liens against delinquent employers	Same Provision	To facilitate collections	No
311	Refund & Adjustments	Power to enter into Inter-State agreements to provide for adjustments when contribution payments are made to wrong State	No Provision	To remove iniquities of present plan	No
401 (a)	Eligibility for Benefits	Change Qualifying Amount to flat amount of $100 instead of formula.	No Provision	To extend coverage and simplify procedure	$200 Qualifying Amount
401 (e)	Waiting period	Clarify "waiting period" to conform to present practice	No Provision	To remove ambiguities	Yes
		Reduce "waiting period" to two weeks	No Provision	To extend coverage; speed up payment of benefits	No
402	Ineligibility for Compensation	Add "without good cause" to voluntary quit provision	No Provision	To remove iniquities	No
		Add disqualification for "committing larceny against employer after conviction by a competent court of law"	No Provision	To remove from benefits those who are non-deserving	No
403	Payment of Compensation	Provision to pay the surviving spouse, children, and parents of deceased claimants without necessity of letters of administration	No Provision	To remove hardships which exist under present plan	Yes
404	Amount of Compensation	Elimination of redeterminations	No Provision	Administratively necessary	Yes
		Provision for payment according to schedule	No Provision	To simplify payments	Yes
		Freezing of benefit rights of claimants during service in armed forces of U. S. A.	Pending Legislation	To safeguard their benefit rights	No
501	Determination Appeals	Provision granting right to amend decisions after ten days with respect to further payments upon basis of after-discovered evidence	No Provision	To eliminate payment when admittedly not warranted	Yes
		Payment during appeals of uncontested amount of benefits	No Provision	To permit payment which will not be contested	Yes
		Remove compulsory mailing of decisions	No Provision	Allow any form of notice in writing	No
505	Appeal Procedure	Provisions for mass appeals	No Provision	To simplify administration	No
509	Finality of Decisions	Provision of use of after-discovered evidence	No Provision	To simplify administration	No
512	Establishing of Precedents	Decisions to be uniformly applicable to all claimants of a similar class	No Provision	Speeds procedure	No

Section	Subject	Recommended Change	Federal Provision	Purpose	Did H. B. 1384 of 1939 Session include this Recommendation?
804	Liability to repay compensation	Eliminate provision which restricts liability only when claimant fails to meet eligibility requirements	No Provision	To make repayment necessary when more than maximum compensation has been paid	No
		Power to surcharge future benefits with amount of overpayments	No Provision	To afford means of liquidating over-payments	No
		Right of subrogation under NLRB awards	No Provision	To provide means of obtaining over-payments	No

MEMORIALIZATION TO CONGRESS TO REDUCE CONTRIBUTION BY EMPLOYERS

It is recommended that the Legislature memorialize Congress to authorize the General Assembly to reduce the contributions by employers to two per cent when the fund is one and one-half times the average benefit payments for the last three preceding years.

In the House of Representatives, January, 1941.

Whereas experience of the past three years has demonstrated the fact that the present rate of contributions required of employers under the Unemployment Compensation Law is burdensome and materially in excess of that required for the purposes for which the Unemployment Compensation Fund is maintained, as shown by the following figures: Balance in fund, as of December 31, 1940, $132,393,969; benefits paid during the past three years, for 1938, $71,553,159; for 1939, $54,594,544; and for 1940, $44,260,799; showing an average annual payment of $56,802,834; and

Whereas the rate of such contributions is controlled by the maximum credit allowable to employers by section nine hundred two of the Federal Social Security Act against the Federal Excise Tax imposed by section nine hundred one of said act (said sections being now sections one thousand six hundred one and one thousand six hundred respectively of the Federal Internal Revenue Code, as amended); therefore, be it

Resolved (if the Senate concur), That the Congress of the United States be memorialized, by proper congressional action, to reduce the rate of the Federal Excise Tax imposed by section one thousand six hundred of the Internal Revenue Code with respect to employment, to two per centum of total wages paid by an employer during the calendar year with respect to employment after December 31, 1940, so as to enable the states, by appropriate legislation, to reduce their present rate contribution if and when their Unemployment Compensation Fund shall exceed one and one-half times the average annual amount expended for the payment of benefits during the three last preceding calendar years.

Resolved, That certified copies of the foregoing resolution be transmitted, by the Chief Clerk of the House of Representatives, to the President of the United States, to the presiding officers of the Senate and House of Representatives of Congress, and to each United States Senator and Congressman elected from this Commonwealth.

STATISTICAL STUDIES

In making the several sample studies of wage records and benefit payments, opportunity was afforded to secure significant data regarding the Pennsylvania system of Unemployment Compensation. These data throw additional light on some significant aspects of the administrative problems in Unemployment Compensation. The results of these special analyses are given in the following sections.

Section I

Eligibility [1]

a. Experience with Eligibility Provisions. One of the important factors in the benefit formula of the Pennsylvania Unemployment Compensation Law is the eligibility requirement. This requirement is designed to test the right of claimants to receive benefits by excluding those whose earnings are too small to consider them part of the labor market. Therefore, the extent to which the eligibility requirement screens out claimants is one factor in measuring its effectiveness.

Analysis of all claims filed between the beginning of the program in January 1938 and October 1939 reveals that 5.1 per cent of all claims have been declared ineligible (83,251 out of 1,618,216). However, during the year 1938 the proportion of ineligibility was 7.2 per cent (75,772 out of 1,058,080). During the year 1939, up to October, only 1.2 per cent of all claimants were declared ineligible (7,479 out of 560,136). This record shows that the percentage of ineligibility has dropped from 7.2 per cent to 1.2 per cent, with an average over the period of 5.1 per cent. This experience indicates that as the law becomes more understandable to claimants the ineligible claimant does not attempt to file a claim or the local office cancels the claim without referring it to the central office. It cannot be concluded, however, that this experience demonstrates that the eligibility requirements are too high or too low. To answer this important question, it is neces-

[1] Unemployment Compensation Benefits in Pennsylvania, Op. Cit., p. 47.

sary to study all wage records, not merely the wage records of claimants whose claims were determined.

b. Wage Rates of Ineligible Cases. In a sample taken during June-July 1939, there were twenty ineligible cases out of a total of 1,130 claims, or 1.8 per cent. Of this number of ineligible cases, twelve were full time weekly wage determinations and eight cases were one-thirteenth of the highest quarter determinations.

Table V in the Statistical Appendix shows a distribution by weekly wage groups of these ineligible cases. Among the ineligible cases were eleven, or 58 per cent, which fell within the minimum and maximum earning allowed under the law ($15 to $30). There was a tendency for the full time weekly wage cases to be declared ineligible even though they had substantially high weekly wages. This was due to the factor in Pennsylvania formula which figures eligibility as a product of the full time weekly wage times 6½. The tendency was for the one-thirteenth method to make it relatively easier for a claimant to qualify; the appendix table clearly brings out this point.

The full time weekly wage ineligible cases had average weekly wages of $28.79 and average total earnings of $1,176.85. The one-thirteenth of highest quarter ineligible cases had average weekly wages of $28.06 per case and average total earnings of $824.96.

TABLE V

Ineligible Cases from Group of Claims Filed June 12 to June 21, 1939, Incl., Distributed by Weekly Wage Groups [1]

	Full Time Weekly Wage Cases					
Weekly Wage	Total Claims Number	Total Claims Per cent	Total Wages Amount	Total Wages Average	Total Weekly Wages Amount	Total Weekly Wages Average
Less than $5	0	0	0	0	0	0
$5 to $10	0	0	0	0	0	0
$10 to $15	1	9.1	$ 414.44	$ 414.44	$ 11.45	$11.45
$15 to $20	3	27.2	1,997.10	665.70	52.50	17.50
$20 to $25	2	18.2	2,241.64	1,120,64	48.60	24.30
$25 to $30	1	9.1	1,470.45	1,470.45	27.65	27.65

SECTION II

Benefit Payments Using the High Quarter Plan Alone as Compared with the Present Plan

A plan for using high quarter earnings alone has been advanced by some as the method by which benefits should be determined. It is interesting to know that such a plan using the highest in eight quarters of earnings comes close to the present law in terms of weekly benefit rates. This is due to the fact that 60 per cent of the cases under the present law are already determined on this basis, and the 100 per cent determination of this type does not materially change the distribution of rates.[1]

Sample studies have been made by the Bureau of Employment and Unemployment Compensation which show that there is close agreement between the two plans on the following points: (See Unemployment Compensation Payments in Pennsylvania, Administrative Research Bulletin No. 2, January, 1940).

1. Distribution of weekly benefit or compensation rates. There is a concentration of cases at each of the maximum and minimum rates with a rather uniform distribution between the two limits.

2. Duration of Compensation. Under both plans almost 80 per cent of cases were eligible for the maximum number of weekly benefit checks, thirteen. Also noticeable was the fact that the number receiving only a few payments is small.

3. Weekly Compensation Rates. Here, too, a high degree of similarity appears. Approximately 60 per cent of the cases would have received the same amount within the dollar interval under both plans. If the high quarter plan were used exclusively almost 80 per cent would have received a higher amount, the same amount, or not more than fifty cents less than the present weekly compensation rate.

4. Number of payments. About 96 per cent of the cases under the high quarter plan would receive the same number of payments or one payment more or less than under the present plan.

5. Maximum Amount of Compensation. The study shows that under the high quarter plan about 91 per cent of the claimants would receive within $10 of the benefits which they now are paid. The number of cases falling outside the $10 zone is relatively insignificant.

SECTION III

Additional Benefit Costs of Shortening the Waiting Period[2]

Since it is not required that one be in need in order to receive unemployment benefits, additional costs to the Unemployment Compensation Fund due to shorter waiting periods promise to be more substantial than any possible savings in direct relief expenditures. From an examination of the benefit characteristics of a random sample of eligible claimants having a full benefit-year experience, it has been determined that a reduction from three waiting weeks to two waiting weeks for the year 1939 would have resulted in an increase of approximately $2,000,000 benefit payments, and that a reduction to one week would have resulted in an increase of more than $3,500,000.

Approximately 8 per cent of the additional cost that would result from a reduction of the waiting period to two weeks, would be due to the addition of persons who, because of the three-week waiting period, had not reached compensable status. The balance would have been ac-

[1] Ibid, p. 91

[1] Ibid., p. 43.

[2] Additional Benefit Costs of Shortening Pennsylvania's Waiting Period. Administrative Bulletin 4, June 1940, Bureau of Employment and Unemployment Compensation, Harrisburg, Pennsylvania, pp. 4-6.

counted for by the payment of an additional week of benefits to those claimants who had reached compensable status but had not exhausted their benefit rights. If, however, the waiting period were reduced to one week, the increased proportion of the cost due to new beneficiaries These claimants who had never reached compensable would have been about 13 per cent.

More than one out of ten eligible claimants received no benefits within the 52 weeks during which they had accumulated waiting-week credits. This was primarily because they had been called back to work or had found new employment before completing their waiting period. These claimants who had never reached compensable status may be classified into four groups—those who filed (1) no waiting weeks, (2) one waiting week, (3) two waiting weeks, and (4) three waiting weeks. No data are available adequate to show the exact distribution among these four groups, but such records as are at hand indicate that the group totals were approximately equal.

Claimants who now file their third waiting week claim, but who do not return to the employment office after that time, would receive one week of compensation during a two-week waiting period provision in the law. Under a one-week waiting provision, they would receive two weeks of compensation. Claimants who now file claims for no more than two waiting weeks, still would not be entitled to compensation under a two-week waiting period, but would be entitled to one check under a one-week waiting period.

The other group of claimants who would have contributed to the greater part of the increased cost had the waiting period been shorter are those who had become compensable but had ceased drawing benefits before they had exhausted their benefit rights. A sample study of claimants who had ended their benefit years indicates that 65 per cent of all eligible claimants exhausted their benefit rights before the ends of their benefit years. To those who returned to work prior to the drawing of all benefits possible, the reduction in the waiting period would have meant an additional one or two weeks of compensation.

The estimated increase in costs that the suggested changes would have involved may be summarized as follows:

If the waiting period had been reduced to Period	One Week	Two Weeks
Total	$9,273,000	$5,259,000
1938	4,793,000	2,714,000
1939	3,660,000	2,080,000
1940 (1st Quar.)	820,000	465,000

These cost figures are based on an estimated increase of 3.8 per cent in compensable weeks of unemployment due to a two-week waiting period, and a 6.7 per cent increase in compensable weeks due to a one-week waiting period.

A factor which had not been taken into consideration in making the foregoing estimates is that a number of workers who are regularly unemployed for two or three weeks each year do not file under the present provisions of the law, but presumably would do so if the waiting period were reduced.

In any attempt to apply the estimated percentages to future periods, it should be considered that the additional cost involved is largely dependent upon the proportion of claimants who exhaust their benefit rights. This proportion bears an inverse relationship to the duration of unemployment. Consequently, during period of severe economic depression, when it is unlikely that claimants will be able to obtain employment before they have exhausted their benefit rights, there will tend to be a proportionately smaller drain on the fund due to a one-week or a two-week waiting period, as compared with a three-week period. On the other hand, during periods of expanding employment, an increasingly large number of claimants will be re-employed prior to the exhaustion of their benefit rights, but they would receive one or two additional weeks of benefits under a shorter waiting period. Therefore, the cost of a shorter waiting period would be proportionately greater during a period when total benefit payments are at a relatively low level.

The following statement summarizes the results of the sample study of cases in which the benefit years had ended, on the basis of which the estimates contained in this report were derived:

Status of Claim at End of Year	Per cent
Total claimants with ended benefit year	100.00
Claimants Benefited	89.6
Drawing maximum	58.2
Drawing one week less than maximum	10.7
Drawing two or more weeks less than maximum	20.7
Claimants Not Reaching Compensable Status	10.4
Three weeks of waiting, but no claim	2.6
Two weeks of waiting	2.6
Less than two weeks of waiting	5.2

SIGNIFICANT PROVISIONS OF STATE UNEMPLOYMENT COMPENSATION LAWS, JUNE 1, 1940[1]

State and type of fund	Size of firms covered	Contribution rate for 1940 (percentage of wages)	Benefits						
			Month first payable	Weeks of initial waiting period	Weekly benefit rate	Maximum per week	Minimum per week	Duration in a given 52-week period[2]	
								Maximum number times weekly benefit amount payable	Total amount of benefits as a proportion of wages earned in prior period
ALABAMA: Pooled	Employer of 8 or more in 20 weeks; also all employers liable to Federal tax.	Employer, 2.7 percent on wages up to $3,000; employee, 1 percent on wages up to $3,000.	Jan. 1938.	3	1/26 of high quarter's wages established by table in law.	$15	$2	20	1/3 in 4 quarters.
ALASKA: Pooled, experience rating.	Employer of 8 or more in 20 weeks	Employer, 2.7 percent.	Jan. 1939.	2	1/20 of high quarter's wages.	16	$5	16	Do.
ARIZONA: Pooled, experience rating.	Employer of 3 or more in 20 weeks.	..... do	Jan. 1938.	2	50 percent of full-time weekly wage.	15	$5 or ¾ of full-time weekly wage.	14	1/6 in 8 to 11 quarters.
ARKANSAS: Pooled, experience rating.	Employer of 1 or more in 20 weeks.	Employer, 2.7 percent on wages up to $3,000.	Jan. 1939.	2	1/26 of high quarter's wages.	15	$3	16	1/3 in 4 quarters.
CALIFORNIA: Pooled, experience rating. Exempt unemployment benefit and guaranteed employment plans.	Employer of 4 or more in 20 weeks.	Employer, 2.7 percent on wages up to $3,000; employee, 1 percent on wages up to $3,000, not to exceed 50 percent of general employer rate.	Jan. 1938.	2	1/20 of high quarter's wages, established by table in law.	18	$10	.....	26 to 54 percent in 4 quarters, according to schedule of wage classes.
COLORADO: Pooled, experience rating.	Employer of 8 or more in 20 weeks; also all employers liable to Federal tax.	Employer, 2.7 percent.	Jan. 1939.	2	1/25 of high quarter's wages.	15	$5	16	1/3 in 4 quarters.
CONNECTICUT: Pooled, experience rating.	Employer of 5 or more in 20 weeks.	..... do	Jan. 1938.	2	Established by weighted table in law.	15	..do.....	13	15 1/3 to 23 percent in 4 quarters, according to schedule of wage classes.
DELAWARE: Pooled, experience rating.	Employer of 1 or more in 20 weeks; also all employers liable to Federal tax.	..... do	Jan. 1939.	2	1/25 of high quarter's wages.	15	..do.....	13	1/6 in 4 quarters.
DISTRICT OF COLUMBIA: Pooled, experience rating.	Employer of 1 or more.	Employer, 3 percent	Jan. 1938.	3	40 percent of average weekly wage, plus allowance for dependents up to maximum of 65 percent.	15	None	16 (plus additional benefits on basis of ratio provisions)	1 week's benefit to 3 weeks of employment in past 104 weeks, plus additional benefits at 1 to 20 in past 260 weeks.
FLORIDA: Pooled experience rating. Guaranteed employment plans.	Employer of 8 or more in 20 weeks.	Employer, 2.7 percent on wages up to $3,000.	Jan. 1939.	2	1/20 of high quarter's wages established by table in law.	15	$3	16	1/6 in 8 quarters.
GEORGIA: Pooled	..... do	Employer, 2.7 percent.	.. do ..	2	1/26 of high quarter's wage.	15	$5 or ¾ of full-time weekly wage.	16	1/6 in 8 to 11 quarters.

PENNSYLVANIA UNEMPLOYMENT COMPENSATION LAW

As approved December 5, 1936 (Act No. 1), and amended May 18, 1937 (Act No. 175), June 20, 1939 (Act No. 261), and May 16, 1940 (Act No. 9)

AN ACT

Establishing a system of unemployment compensation to be administered by the Department of Labor and Industry and its existing and newly created agencies with personnel (with certain exceptions) selected on a civil service basis; requiring employers to keep records and make reports, and certain employers to pay contributions based on payrolls to provide moneys for the payment of compensation to certain unemployed persons; providing procedure and administrative details for the determination, payment and collection of such contributions and the payment of such compensation; providing for cooperation with the Federal Government and its agencies; creating certain special funds in the custody of the State Treasurer; and prescribing penalties.

ARTICLE I

Preliminary Provisions

Unemployment Compensation Law.

Section 1. Enacting Clause.—Be it enacted, &c., That—

Short Title.

Section 2. Short Title.—This act shall be known, and may be cited, as the "Unemployment Compensation Law."

Public policy causing the passage of the act outlined.

Section 3. Declaration of Public Policy.—Economic insecurity due to unemployment is a serious menace to the health, morals, and welfare of the people of the Commonwealth. Involuntary unemployment and its resulting burden of indigency falls with crushing force upon the unemployed worker, and ultimately upon the Commonwealth and its political subdivisions in the form of poor relief assistance. Security against unemployment and the spread of indigency can best be provided by the systematic setting aside of financial reserves to be used as compensation for loss of wages by employes during periods when they become unemployed through no fault of their own. The principle of the accumulation of financial reserves, the sharing of risks, and the payment of compensation with respect to unemployment meets the need of protection against the hazards of unemployment and indigency. The legislature, therefore, declares that in its considered judgment the public good and the general welfare of the citizens of this Commonwealth require the exercise of the police powers of the Commonwealth in the enactment of this act for the compulsory setting aside of unemployment reserves to be used for the benefit of persons unemployed through no fault of their own.

Definitions.

Section 4. Definitions.—The following words and phrases, as used in this act, shall have the following meanings unless the context clearly requires otherwise.

(a) "Base year" means the first four of the last five completed calendar quarters immediately preceding the first day of an individual's benefit year, excluding, however, any completed calendar quarter which occurs prior to January first, one thousand nine hundred thirty-seven.

(b) "Benefit year," with respect to any individual, means the fifty-two consecutive weeks beginning with the first week occurring after January first, one thousand nine hundred thirty-eight, with respect to which compensation is payable to him, and thereafter, the fifty-two consecutive weeks beginning with the first week with respect to which compensation is next payable to him after the termination of his last preceding benefit year.

(c) "Board" means the Unemployment Compensation Board of Review established by this act.

(d) "Calendar quarter" means the period of three consecutive calendar months ending on March thirty-first, June thirtieth, September thirtieth or December thirty-first, or the equivalent thereof, as determined in accordance with general rules of the department.

(e) "Compensation" means money payments payable to individuals with respect to their unemployment as provided in this act.

(f) "Contributions" means the money payments required to be paid into the Unemployment Compensation Fund by employers, with respect to employment, which payments shall be used for the creation of financial reserves for the payment of compensation as provided in this act.

(g) "Department" means the Department of Labor and Industry of the Commonwealth of Pennsylvania.

(h) "Employe" means every individual, whether male, female, citizen, alien or minor who is performing or subsequent to January first, one thousand nine hundred thirty-six, has performed services for an employer in an employment subject to this act.

(i) "Employer" mean every—(1) individual, (2) copartnership, (3) association, (4) corporation (domestic or foreign), (5) the legal representative, trustee in bankruptcy, receiver or trustee of any individual, copartnership, association, or corporation, or (6) the legal representative of a deceased person (I) who or which employed or employs any employe (whether or not the same employe) in employment subject to this act for some portion of each of some twenty (20) days during the calendar year one

thousand nine hundred thirty-six, or any calendar year thereafter, each day being in a different week, or (II) who or which has elected to become fully subject to this act, and whose election remains in force.

Whenever any employer contracts with or has under him any contractor or subcontractor for any work which is part of his usual trade, occupation, profession or business, unless such employer, as well as each such contractor or subcontractor, is an employer (as defined in the first paragraph of this subsection), the employer shall, for all the purposes of this act, be deemed to employ each individual in the employ of each such contractor or subcontractor for each day during which said individual is engaged in performing such work, except that each such contractor or subcontractor who is an employer (as defined in the first paragraph of this subsection) shall alone be liable for the employer's contributions measured by the wages payable to individuals in his employ, and except that any employer who shall become liable for, and pay contributions with respect to individuals in the employ of any such contractor or subcontractor who is not an employer (as defined in the first paragraph of this subsection), may recover the same from such contractor or subcontractor. Each individual employed to perform or to assist in performing work of any agent or employe of an employer shall be deemed to be employed by such employer for all the purposes of this act, whether such individual was hired or paid directly by such employer or by such agent or employe, provided the employer had actual or constructive knowledge of the work.

Where an employer maintains more than one place of employment within this Commonwealth, all of the employes at the several places of employment shall be treated, for the purposes of this act, as if employed by a single employer.

Any individual, copartnership, association, or corporation who or which is not subject to this act may elect to become subject thereto by filing with the department his or its written application, and if such application is approved by the department, the election shall become binding for not less than two calendar years.

An employer subject to this act may elect to include within the term "employment," subject to this act, services performed by his or its employes entirely without this Commonwealth, with respect to which no contributions are required and paid under an unemployment compensation law of any other state, if the employe or employer, included in such election, maintain a domicile within this Commonwealth. Such election shall be subject to the approval of the department, and if such election is approved by the department, the election shall become binding for not less than two calendar years, or until the department, on its own motion, cancels the election.

An employer, subject to this act, may elect to include within the term "employment," subject to this act, services performed by his or its employes which are exempt under the provisions of subsection (j) of section four of this act. Such election shall be subject to the approval of the department, and if such election is approved by the department, the election shall become binding for not less than two calendar years.

Any services performed for an employer covered by an election, pursuant to this subsection, shall, during the effective period of such election, be deemed to be employment for all the purposes of this act. Any election approved by the department, pursuant to this subsection, shall cease to be effective only as of January first of any calendar year subsequent to the initial two calendar years thereof, and only if, at least thirty (30) days prior to such first day of January, the employer has filed with the department a notice of termination of his election.

(j) "Employment" means all service performed for remuneration or under any contract of hire, express of implied, written or oral, (1) which is localized within this Commonwealth, or (2) which is not localized in any state but some of the service is performed within this Commonwealth and (a) the base for operations or place from which such service is directed or controlled is in this Commonwealth, or (b) the base for operations or place from which such service is directed or controlled is not in any state in which some part of the service is performed, but the individual's residence is in this Commonwealth. Service shall be deemed to be localized within this Commonwealth if—(a) the service is performed entirely within this Commonwealth, or (b) the service is performed both within and without this Commonwealth, but the service performed without this Commonwealth is incidental to the individual's service within this Commonwealth as for example where it is temporary or transitory in nature or consists of isolated transactions. Services performed without this Com-

monwealth shall not be included within the term "Employment" if contributions are required and paid with respect to such services under an unemployment compensation law of any other state.

An individual performing services for remuneration in an employment subject to this act shall be deemed to be performing such services for wages, unless and until it is shown to the satisfaction of the department that—(a) such individual has been and will continue to be free from control or direction over the performance of such services both under his contract of service and in fact; and (b) that such service is either outside the usual course of the business for which such service is performed, or that such service is performed outside of all the places of business of the enterprise for which such service is performed; and (c) that such individual is customarily engaged in an independently established trade, occupation, profession or business.

Three-way conjunctive test.

The word "employment" shall not include—

(1) Agricultural labor;

(2) Domestic service in a private home;

Non-covered services.

(3) Service performed as an officer or member of the crew of a vessel on the navigable waters of the United States;

(4) Service performed by an individual in the employ of his son, daughter, or spouse, and service performed by a child under the age of twenty-one (21) in the employ of his father or mother;

(5) Service performed in the employ of the United States Government or of an instrumentality of the United States;

(6) Service performed in the employ of a state, a political subdivision thereof, or an instrumentality of one or more states or political subdivisions;

(7) Service performed in the employ of a corporation, community chest, fund, or foundation, organized and operated exclusively for religious, charitable, scientific, literary, or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private shareholders or individual;

(8) Service performed after June thirtieth, one thousand nine hundred and thirty-nine, either as an employe, representative, or service performed in the employ of an employer when such employe, representative, or employer is determined to be subject to the Act of Congress known as the Railroad Unemployment Insurance Act (52 U. S. Stat. 1094) or to an Act of Congress establishing an unemployment compensation system for maritime employes by the agency or agencies empowered to make such determinations.

(k) "Employment Office" means a public employment office or branch thereof, operated by the department.

(l) "Full time Weekly Wage" means the weekly wages that any individual would receive if he were employed at his most recent wage rate from employers during his base year and for the customary scheduled full-time week prevailing for his occupation in the enterprise in which he last earned wages from employers during his base year.

If the department finds that the full-time weekly wage as above defined, would be unreasonable or arbitrary or not readily determinable with respect to any individual, the full-time weekly wage of such individual shall be deemed to be one-thirteenth of his total wages from employers in that quarter in which such total wages from employers were highest during the first eight out of the last nine completed calendar quarters (excluding, however, any completed calendar quarter which occurs prior to January first, one thousand nine hundred thirty-seven) immediately preceding the first day of his benefit year.

(m) "Referee" means a referee appointed by the Governor to hear appeals under this act.

(n) "Secretary" means the Secretary of Labor and Industry of this Commonwealth, or his duly authorized representative.

(o) "Social Security Act" means the act enacted by the Congress of the United States, approved the fourteenth day of August, one thousand nine hundred thirty-five, entitled "An act to provide for the general welfare by establishing a system of Federal old-age benefits, and by enabling the several States to make more adequate provision for aged persons, blind persons, dependent and crippled children, maternal and child welfare, public health, and the administration of their unemployment compensation laws; to establish a Social Security Board; to raise revenue, and for other purposes," as amended.

(p) "Social Security Board," means the Social Security Board established by the Social Security Act.

(q) "State" includes Alaska, Hawaii and the District of Columbia.

(r) "Suitable Work" means all work which the employe is capable of performing, except work in which—(1) the position offered is vacant, due directly to a strike, lockout, or other labor dispute,

or (2) the remuneration, hours of other conditions of the work offered are substantially less favorable to the employe than those prevailing for similar work in the locality, or (3) as a condition of being employed, the employe would be required to join a company union, or to resign from or refrain from joining, any bona fide labor organization.

(s) "Total Unemployment" means that an employe during a particular week has had no work for which wages are payable to him.

(t) "Unemployment Trust Fund" means the Unemployment Trust Fund established by the Social Security Act.

"Wages" defined to exclude certain payments by employers.

(u) "Wages" means all remuneration for employment, including the cash value of all remuneration paid in any medium other than cash, except that the term "wages" as used in sections three hundred one and three hundred two of this act shall not include:

Annual compensation which exceeds $3,000 is excluded.

(1) That part of the remuneration which, after remuneration equal to three thousand dollars ($3,000) has been paid, or becomes payable, to an individual by an employer with respect to employment during or for any calendar year, is paid, or becomes payable, to such individual by such employer with respect to employment during the calendar year one thousand nine hundred forty and during each calendar year thereafter.

Payments by employer to or for an employe under any plan of retirement, sickness, accident, medical, hospitalization or death benefits excluded.

(2) The amount of any payment made to, or in behalf of, an employe under a plan or system established by an employer which makes provision for his employes generally, or for a class or classes of his employes, (including any amount paid by an employer for insurance or annuities or into a fund to provide for any such payment) on account of (A) retirement, or (B) sickness or accident disability, or (C) medical and hospitalization expenses in connection with sickness or accident disability, or (D) death, provided the employe (I) has not the option to receive, instead of provision for such death benefit, any part of such payment, or, if such death benefit is insured, any part of the premiums (or contributions to premiums) paid by his employer, and (II) has not the right, under the provisions of the plan or system or policy of insurance providing for such death benefit, to assign such benefit or to receive a cash consideration in lieu of such benefit, either upon his withdrawal from the plan or system providing for such benefit, or upon termination of such plan or system or policy of insurance or if his employment with such employer.

Proviso.

Certain tax payments by employer for employe excluded.

(3) The payment by an employer (without deduction from remuneration of the employe) of the tax imposed upon an employe under section one thousand four hundred (1400) of the Federal Internal Revenue Code.

Voluntary dismissal payments excluded.

(4) Dismissal payments which the employer is not legally required to make.

(v) "Week" means any calendar week ending at midnight Saturday, or the equivalent thereof, as determined in accordance with general rules adopted by the department.

Constitutional provision.

Section 5. Constitutional Construction.—The provisions of this act are severable, and if any provisions hereof are held unconstitutional, such decision shall not be construed to impair any other provision of this act. It is hereby declared as the legislative intent that this act would have been adopted had such unconstitutional provision not been included herein.

ARTICLE II

Administration of Act

Powers and duties of the Department of Labor and Industry.

Section 201. General Powers and Duties of Department.—It shall be the duty of the department to administer and enforce this act through such employment service and public employment offices as have been or may be constituted in accordance with the provisions of this act and existing laws.

Power to make rules and regulations.

It shall have power and authority to adopt, amend, and rescind such rules and regulations, require such reports from employers, employes, the board and from any other person deemed by the department to be affected by this act, make such investigations, and take such other action as it deems necessary or suitable. Such rules and regulations shall not be inconsistent with the provisions of this act, and shall be effective in the manner the department shall prescribe.

Department shall submit report to Governor

The department shall submit to the Governor a beinnial report covering the administration and operation of this act and shall make such recommendations for amendments to this act as it deems proper.

The secretary to have power to establish offices and fix compensation of employes.

Section 202. Personnel and Employment Offices.—The secretary shall have power to establish such offices and to appoint and fix the compensation of such employes in such offices and in the department as he may deem necessary to administer this act, subject to the provisions of section two hundred eight of this act.

Department to cooperate with other agencies to establish and maintain free employment service.

The department is authorized to cooperate with or to enter into agreements with the Railroad Retirement Board or any other agency of the United States charged with the administration of an

unemployment compensation law, with any political subdivision of this State, or with any private nonprofit organization, with respect to the establishment, maintenance, and use of free employment service facilities and free public employment offices, and, as a part of any such agreement, may accept moneys, services, or quarters as a contribution to the administration fund.

Unemployment Compensation Board of Review.

Section 203. Unemployment Compensation Board of Review.—(a) There is hereby created in the department an Unemployment Compensation Board of Review. The board shall consist of three members nominated and appointed by the Governor, by and with the advice and consent of two-thirds of all the members of the Senate, for terms of six years each, and until their successors shall have been appointed and qualified, except that the terms of the members first taking office shall expire on July first, one thousand nine hundred thirty-nine; July first, one thousand nine hundred forty-one; and July first, one thousand nine hundred forty-three, respectively as designated by the Governor at the time of appointment and until their successors shall have been appointed and qualified. The Governor shall designate one of the members as chairman. Vacancies in said board shall be filled for the unexpired terms. The chairman of the board shall receive a salary at the rate of nine thousand dollars per annum. The other members of the board shall receive salaries at the rate of eight thousand five hundred dollars per annum. Such salaries shall be paid from the Administration Fund. Two members of the board shall be a quorum, and no action of the board shall be valid unless it shall have the concurrence of at least two members. A vacancy on the board shall not impair the right of a quorum to exercise all the rights and perform all the duties of the board.

Board to consist of three members, appointed by Governor with the consent of the Senate.

Terms of the members.

Vacanacies.

Salaries of members.

Two members of board shall constitute a quorum.

Board may appoint a secretary and prescribe his duties.

(b) The board may appoint a secretary to hold office at its pleasure. Such secretary, if appointed, shall have such powers and shall perform such duties, not contrary to law, as the board shall prescribe, and shall receive such compensation as the board, with the approval of the Governor, shall determine.

Board to be governed by Administrative Code.

(c) The board shall be a departmental administrative board, and shall have all the powers and perform all the duties generally vested in, and imposed upon, departmental administrative boards and commissions by The Administrative Code of one thousand nine hundred twenty-nine and its amendments.

Duty of board to hear appeals.

(d) It shall be the duty of the board to hear appeals arising from claims for compensation, adopt, amend or rescind such rules of procedure, undertake such investigations, and take such action required for the hearing and disposition of appeals as it deems necessary and consistent with this act. Such rules of procedure shall be effective in such manner as the board shall prescribe and shall not be inconsistent with this act. Any investigation, hearing or appeal which the board has power to undertake, hold, hear or determine, may be undertaken, held or heard by or before any one or more of the members of the board, but any determination, ruling or order of a member or members upon any such investigation, hearing or appeal undertaken, held or heard by him or them, shall not become and be effective until approved and confirmed by at least a quorum of the board. The chairman of the board, or his representative, shall have the power as often as he may deem the work of the board requires to designate the time and place for the conducting of investigations, hearings and appeals, and to assign cases to a member or members for such purposes.

Any member may hold hearings, but rulings are not effective until approved by quorum.

Chairman of board to designate time and place of hearings.

Referees.

(e) The Governor shall appoint and fix the compensation of such referees as may be deemed necessary with power to take testimony in any appeals coming before the board.

Board to submit biennial report to department.

(f) The board shall submit to the department a biennial report concerning the performance of its powers and duties and shall make such recommendations for the improvement of its service and the amendment of this act as it deems proper.

Department has the power to create advisory councils.

Section 204. Advisory Councils.—The department shall have power to create and appoint members of State-wide and local advisory councils composed, in each case of an equal number of employer and employe representatives, who may fairly be regarded as representative because of their vocation, employment, or affiliations. On each such council there shall also be members representing the general public.

Duty of councils.

Such councils shall aid the department in formulating policies, in discussing problems related to the administration of this act, in assuring impartiality and freedom from political influence in the administration of this act, in taking steps to reduce and prevent unemployment, and in making studies relating to partial and seasonal unemployment.

Members of council to serve without compensation.

The members of such advisory councils shall serve without compensation but shall be entitled to be reimbursed out of

the Administration Fund for all necessary expenses incurred in the discharge of their duties.

Department to make study of employment so as to stabilize employment.

Section 205. Stabilization of Employment; Partial and Seasonal Unemployments.—The department shall take appropriate steps to—(a) reduce and prevent unemployment, (b) encourage and assist in the adoption of practical methods of vocational training and guidance, (c) investigate, recommend, advise and assist in the establishment, by political subdivisions, of reserves for public works to be used in times of business depression and unemployment, (d) promote the reemployment of unemployed workers, (e) make studies of partial unemployment and recommendations in respect to provisions for the payment of compensation for partial unemployment, and (f) make studies of seasonal unemployment and recommendations in respect to provisions for seasonal industries under this system of unemployment compensation.

Copies of all such studies and recommendations shall be transmitted to the Governor.

Employers to keep employment records for the inspection of department.

Section 206. Records of and Reports by Employers.—Each employer (whether or not liable for the payment of contributions under this act) shall keep accurate employment records, containing such information, as may be prescribed by the rules and regulations adopted by the department. Such records shall be open to inspection by the department and its agents at any reasonable time, and as often as may be deemed necessary. The department may require from such employers such reports as it deems necessary, which shall be sworn to, if required by the department.

Information not to be made public.

Information thus obtained shall not be made public or be open to public inspection, other than to the members of the board, and the officers and employes of the department and the Social Security Board in the performance of their public duties, but any claimant at a hearing of his claim shall, upon request, be supplied with information from such records to the extent necessary for the proper presentation of his claim.

Criminal provision.

Any officer or employe of the department or the board, or any other public employer, who shall violate any of the provisions of this section shall, upon conviction thereof in a summary proceeding, be sentenced to pay a fine of not less than twenty nor more than two hundred dollars, and in default of the payment of such fine and costs of prosecution shall be sentenced to imprisonment for not longer than thirty days.

Department to cooperate with the Social Security Board

Section 207. Cooperation with Social Security Board and Other Agencies.—(a) In the administration of this act, the department shall cooperate to the fullest extent, consistent with the provisions of this act, with the Social Security Board. It shall make such reports in such form and containing such information as the Social Security Board may, from time to time, require, and shall comply with such provisions as the Social Security Board may, from time to time, find necessary to assure the correctness and verification of such reports.

Department to furnish information concerning recipients of compensation to Federal agencies.

(b) Upon request therefore, the department shall furnish to any agency of the United States charged with the administration of public works or assistance through public employment the name, address, ordinary occupation and employment status of each recipient of compensation, and such recipient's rights as to further compensation under this act.

Department may enter into agreements with other authorities in order to carry out objectives of this act.

(e) The department is hereby authorized to enter into reciprocal arrangements and compacts with the proper authorities of other states and the Federal Government for the purpose of carrying out the objectives of the unemployment compensation acts of this and other states or adopted by the Congress of the United States. Pursuant to this subsection, the department may enter into arrangements with the appropriate agencies of other states or of the Federal Government; (1) whereby wages or services, upon the basis of which an individual may become entitled to unemployment compensation benefits under the unemployment compensation law of another state or of the Federal Government, shall be deemed to be wages for employment by employers for the purposes of sections four (1), four hundred one, and four hundred four of this act, provided such other state agency or agency of the Federal Government has agreed to reimburse the unemployment compensation fund for such portion of compensation paid under this act upon the basis of such wages or services as the department finds will be fair and reasonable as to all affected interests; and (2) whereby the department will reimburse other state or Federal agencies charged with the administration of unemployment compensation laws with such reasonable portion of unemployment benefits paid under the law of any such other states or of the Federal Government upon the basis of employment or wages for employment by employers, as the department finds will be fair and reasonable as to all af-

Reciprocal arrangements and compacts.

fected* interests. Reimbursements so payable shall be deemed to me compensation for the purposes of sections four hundred four and six hundred one of this act. The department is hereby authorized to make to other state or Federal agencies and receive from such other state or Federal agencies, reimbursements from or to the Unemployment Compensation Fund, in accordance with arrangements pursuant to this paragraph.

State's records available to Railroad Retirement Board.

(d) The department may make the state's records relating to the administration of this act available to the Railroad Retirement Board, and may furnish the Railroad Retirement Board, at the expense of such board, such copies thereof as the Railroad Retirement Board deems necessary for its purposes.

Cooperation with Federal agencies administering unemployment insurance law.

(e) The department may afford reasonable cooperation with every agency of the United States charged with the administration of any unemployment insurance law.

Civil Service.

Section 208. Civil Service; Selection of Personnel; Additional Duties of Secretary and Board.—(a) No individual shall be appointed or employed by the department for the purpose of administering this act except as provided in this section.

Employes not subject to civil service.

(b) The members and secretary of the board, referees and such attorneys and experts, as the Attorney General or the secretary, as the case may be, shall appoint and the Governor shall approve, shall be exempt from the provisions of this section.

Provisional appointments until lists of eligibles certified.

(c) Until such time as the board certifies lists of eligibles for any grade of employment, but in no even later than January first, one thousand nine hundred thirty-eight, the secretary is hereby authorized to make provisional appointments, without examinations, in such grades of employment for which no lists of eligibles have been certified, provided that a person so appointed shall cease to be so employed within thirty days after a list of eligibles have been certified by the board to the secretary for the grade of employment in which he or she is employed, unless reappointed from such list of eligibles as provided in this section.

The secretary to establish classes of employment.

(d) The secretary shall by rules and regulations establish classes of employment, composed of all of the various positions to be created, for the purpose of administering this act, and shall divide such classes into a reasonable number of grades, and shall specify a salary range for each grade. All appointments shall be made at the lowest salary for the grade in which the appointment is made. The secretary may increase the salary of any employe, who has served the probationary period hereinafter required by this act, to not more than the maximum provided for his grade of employment.

Appointments shall be made at minimum salary.

The secretary shall prescribe qualifications for employes.

(e) The secretary shall prescribe, by rules and regulations, the qualifications to be possessed by persons desiring employment in the various grades of employment in the administration of this act. The qualifications shall be such as will best promote the most efficient administration of this act, and shall provide that persons applying for positions in the offices designated by the secretary as central administrative offices (which shall include all those having jurisdiction throughout the State) shall be citizens of the United States and shall have been legal residents of Pennsylvania for a period of not less than one year before making application, and persons applying for positions in district offices (which shall include all those whose jurisdiction is limited to a particular district created under the provisions of this act) shall be citizens of the United States and shall have been legal residents of Pennsylvania for a period of not less than one year, and in the district in which such office is located for a period of not less than six months, before making application.

Every individual desiring employment shall file an application with the board.

(f) Every individual desiring employment under the provisions of this act shall file with the board an application, [under oath or affirmation] which shall be in a form prescribed by the board, provided that such application shall be the same for all individuals desiring the same grade of employment, and shall be so drawn as to reveal the qualifications as prescribed by the secretary. In no case shall the board require of the applicant any information pertaining to his race, creed, color, or political affiliations. Upon receiving such application the applicant shall be admitted to the next competitive examination in the grade of employment which he or she seeks. Such competitive examinations shall be practical in their character and, so far as may be possible, shall relate to those matters which will fairly test the relative capacity and fitness of persons examined to discharge the duties of the service into which they seek to be appointed, but no applicant shall be required to be possessed of any scholastic education or training in order to be permitted to take any competitive examination or to be appointed to any position. Such com-

Information concerning race, creed, etc., not permitted.

Examinations.

* "effected" in the original.

petitive examinations shall be in writing, but in arriving at a final rating of applicants for such administrative and professional grades of employment as are so designated by the board, the board may take into consideration such experience and personal qualifications as are related to the grades of employment for which applicants are being examined, provided that the same standards shall apply with respect to all applicants in the same grade of employment: Provided, however, That in the final rating of all applicants persons who were engaged in the military or naval service of the United States during any war in which the United States was engaged, and who have an honorable discharge from such service, shall receive, in addition to all other ratings, an additional five per centum, and any such person who shall have been disabled by wounds or in any other manner while engaged in such service (so long as he is able to perform the work of the employment for which he is examined), and who shall submit satisfactory evidence to the board that such disability was received while engaged in such service, shall be rated an additional five per centum over and above the five per centum hereinbefore set forth, and in either case, the total per centum mark or grade thus obtained shall determine the order of standing of such persons on any list of eligibles.

(g) The board shall conduct such examinations at such places in the Commonwealth as to make it reasonably convenient and inexpensive for applicants to attend them. Every candidate admitted to such examinations shall be given a number, so that, when his paper is marked and graded, it will be impossible for the person passing upon the examination papers to ascertain the candidate's identity until his written examination rating has been established.

Identity of candidate not to be disclosed.

School teachers to mark papers.

(h) Examination papers of such candidates shall be marked by a committee designated by the board, with the approval of the Governor, consisting of school teachers in this Commonwealth. All such examining committee members shall receive compensation at the rate of fifteen dollars per day for their services, and reimbursement for necessary expenses. The members of such examining committees may employ necessary clerks and assistants. Subject to the approval of the secretary, the number of clerks and assistants so employed and the amount of their compensation shall be determined by the board. All such examination papers shall be rated on a basis of one hundred per centum and less. Such examination papers shall immediately thereafter be filed with the board.

Method of marking papers.

List of eligibles.

(i) The board shall certify to the secretary for each administrative district, and for the State as a whole, lists of the names of persons receiving a passing mark, and shall rank such persons in the order of magnitude commencing with the highest rating for the specified grade of employment. Such list shall be known as a list of eligibles and shall be valid until the next examination is held for the same grade of employment, but in no event for a period of less than one year, unless no more than two names remain on a list of eligibles, in which case a new examination may be held; but those whose names remained on the list of eligibles shall be retained on the new list for a period of at least one year from the date of their original certification.

Eligibles to be classified.

In certifying lists of eligibles for the various grades in any class of employment, the board shall certify persons taking identical examinations on all lists of eligibles for all grades in such class of employment for which they are qualified.

Secretary must make the appointments from list of eligibles.

(j) The secretary shall make appointments to positions created under this act, and shall fill vacancies as they may occur from the lists of eligibles certified to him by the board, except with respect to positions filled by promotions as hereinafter provided, and by the appointment of persons exempted by subsection (b) of this section. In making appointments therefrom, the secretary shall select from the three persons, ranking highest on the list of eligibles for the grade of employment in the administrative district, or in the State as a whole, as the case may be, the applicant most suitable for the position in the grade of employment for which a vacancy exists, taking into consideration his experience and personal qualifications with sole reference to merit and fitness for the position to be filled. If, upon inquiry by the secretary, a person on the list of eligibles is found to be not available for employment or cannot be located, his name shall not for the time being be considered among the three names from which a choice is to be made. For the second vacancy, the secretary shall make selection from the highest three persons remaining on such list of eligibles who have not been within his reach for three separate vacancies. The third and any additional vacancies shall be filled in like manner.

Method of making selection.

Vacancies in positions subject to the provisions of this section, whether such

positions be newly created or vacated for any reason by any former incumbent, shall be filled, in so far as practical, by promotions from among employes holding positions in the lower grades. In all cases, an employe to be promoted shall possess the qualifications specified for the position, and shall have served not less than six months (including service during any probationary period, but not including service during any provisional employment) in a position under the provisions of this act. Promotions shall be based on merit and upon the superior qualifications of the employe to be promoted as shown by his or her previous service record under this act. The secretary may promote an employe to a higher position to which such employe has been certified as eligible by the board, provided that the board shall, in certifying such employe, satisfy itself that the employe possesses the qualifications prescribed by the secretary for the higher position. Before making such certification, the board may require any employe or employes to take such qualifying or competitive examinations as the board may prescribe.

Person appointed to be notified in writing.

(k) A person selected for appointment shall be duly notified by the secretary in writing and, upon accepting and reporting for duty, shall receive from the secretary a certificate of appointment.

First nine months of employment to be probationary period.

The first nine months under this appointment shall be a probationary period. If and when, after full and fair trial, during this period the conduct or capacity of the probationer be not satisfactory to the secretary, the probationer shall be so notified in writing with a full statement of reasons, and this notice shall terminate his services, provided that within ten days he may appeal his case to the board in the same manner as hereinafter provided for individuals receiving notice of dismissal.

Retention beyond period confirms permanent appointment.

The retention of such individual beyond the probationary period shall automatically confirm such individual as a permanent appointment.

Board may employ help to conduct examinations.

(l) The board shall employ from time to time, when necessary, experts and necessary clerical assistants to review applications, prepare and conduct such examinations, and to prepare lists of eligibles from the ratings of applicants taking such examinations. Subject to the approval of the secretary, the number of such experts and clerical assistants and their compensation shall be determined by the board.

Board to certify lists to secretary when requested.

(m) It shall be the duty of the board to certify to the secretary lists of eligibles for all grades of employment as such lists are requested by the secretary, as soon as practical, and to maintain a sufficient number of names on each of such lists to meet all reasonable requirements of the secretary in making necessary appointments under this act.

Where only two eligibles.

(n) When there are no more than two eligibles on a list of eligibles for any grade of employment in which a vacancy exists, the secretary may in his discretion make an appointment therefrom.

Secretary may dismiss employes.

(o) The secretary may, when in his judgment the public interest or the efficiency of the service requires, summarily dismiss any employe of the department engaged in the administration of this act, who has been finally convicted of an offense in connection with his duties in the administration of this act, or of any felony or any crime involving moral turpitude.

Secretary may suspend employes.

The secretary may suspend for a period not to exceed thirty days, or dismiss any employe of the department engaged in the administration of this act for delinquency or misconduct in his or her duties under this act.

Secretary may furlough employes.

The secretary may by reason of lack of funds, or curtailment of work, furlough any employes of the department engaged in the administration of this act, provided that such employes shall be reinstated to the lists of eligibles, and shall be given preference over all other persons on such lists of eligibles for future appointments to their own grade of employment, or a lower grade in the same class of employment in order of seniority. Such eligibility for reinstatement shall remain effective for a period equal in length to an employe's service under this act, but in no case shall it continue for a period longer than two years.

Employes may secure a leave of absence.

Employes may, upon application in writing to the secretary, and upon written approval by him, obtain a leave of absence without pay.

Dismissed, suspended, and furloughed employes may appeal.

(p) All employes of the department engaged in the administration of this act who are given notice of dismissal, suspension or furlough shall be entitled to a hearing before the board by an appeal made within ten days after such notice of dismissal, suspension or furlough becomes effective, and shall be furnished with copies of any charges preferred against them, and shall be allowed a reasonable time for personally answering the same in writing and submitting affidavits in support thereof. Any employe summarily dismissed or dismissed for delinquency or misconduct under a decision of the board, or upon the expiration of the date for an appeal, if no ap-

peal has been taken, shall be removed from all lists of eligibles for positions under this act. Any employe, after having been dismissed, suspended or furloughed, or having received notice of dismissal, suspension or furlough, and who has made appeal thereof to the board, shall be restored, upon being sustained on such appeal by the decision of the board, to the same grade of employment in which he had been employed and, in the discretion of the board, shall be fully reimbursed for any loss of salary caused by such dismissal, suspension or furlough. The board shall hear such appeals and render a final decision in all cases under this section in not more than thirty days after the date of such appeals, and shall keep records of such appeals, as provided for appeals for compensation under section five hundred four of this act. Appeals may be taken by the secretary, or the employe, from the board to the Superior Court within thirty days after the decision of the board in the same manner as provided in this act for appeals with respect to compensation.

Board to hear appeals.

Appeals may be taken from board to Superior Court.

(q) It shall be the duty of every officer and employe in the department, and of every applicant or eligible for a position therein, to give to the board all proper and pertinent information and testimony in regard to matters required or arising under this section, and under the rules and regulations of the department and the board pursuant thereto, and to subscribe such testimony and make oath or affirmation to the same.

Duty of officers and employes, etc., to give testimony.

In exercising its authority under this section, the board shall have the power to administer oaths and subpoenas as delegated to it under section five hundred six of this act.

Board to have power to administer oaths.

(r) The board shall have the power to make such rules and regulations as may be necessary for the execution of the provisions of this section, provided such rules are not inconsistent with the provisions thereof.

Board to have power to make rules for execution of this section.

(s) Whoever makes a false statement or representation knowing it to be false, or knowingly fails to disclose a material fact, or in any manner conceals any information in order to obtain employment, either for himself or any other person, under this section shall, upon conviction thereof in a summary proceeding, be sentenced to pay a fine of not less than twenty dollars nor more than two hundred dollars, and in the default of the payment of such fine and costs, shall be sentenced to imprisonment for not more than thirty days, and each such violation shall be deemed to be a separate offense, and his name shall be removed from all lists of eligibles, and if appointed, he shall be summarily dismissed.

Penal offenses.

(t) The secretary shall pay all necessary expenses in the administration of this section, including the compensation paid to such experts, members of examining committee, assistants and clerks, and shall cause such places to be rented as may be necessary for conducting examinations and correcting examination papers and pay the rent thereof and such other incidental expenses in the administration of this section, as may be necessary, from the Administration Fund.

Expenses.

ARTICLE III

Contributions by Employers

Section 301. Contributions by Employers of Eight or More Employes.—Each employer who has employed eight or more employes (whether or not the same employes) in employment for some portion of each of some twenty days (whether or not at the same moment of time) during a calendar year, each day being in a different week, shall pay for each such calendar year, beginning with the calendar year one thousand nine hundred thirty-six, contributions into the Unemployment Compensation Fund, which shall be equal to, but not more than, the amount of the maximum credit allowable to such employer for such calendar year by section nine hundred two of the Social Security Act against the Federal excise tax imposed by section nine hundred one of the Social Security Act with respect to employment. Such payments shall be made at such times and in such manner as the department shall prescribe. Such contributions, in order to be no more and no less than the maximum credit allowable under the Social Security Act against such Federal excise tax, shall be equal to the following percentages of total wages paid or payable by the employer for such calendar year:

Type of employer embraced by this act.

Payments.

(1) Nine-tenths of one per centum for the calendar year one thousand nine hundred thirty-six;

Percentages.

(2) One and eight-tenths per centum for the calendar year one thousand nine hundred thirty-seven; and

(3) Two and seven-tenths per centum for the calendar year one thousand nine hundred thirty-eight and each calendar year thereafter.

Section 302. Contributions by Employers not Subject to Section 301.—Each employer (as defined in this act), other than employers subject to section three

hundred one of this act, shall pay for each calendar year, beginning with the calendar year one thousand nine hundred thirty-six, contributions into the Unemployment Compensation Fund, which shall be equal to but not more than the following percentages of total wages paid or payable by the employer for such calendar year:

Percentages.

(1) Nine-tenths of one per centum for the calendar year one thousand nine hundred thirty-six;

(2) One and eight-tenths per centum for the calendar year one thousand nine hundred thirty-seven; and

(3) Two and seven-tenths per centum for the calendar year one thousand nine hundred thirty-eight and each calendar year thereafter.

If Title IX of the Social Security Act be amended or repealed or held unconstitutional, then employers under section 301 liable under section 302.

In the event that Title IX of the Social Security Act shall be amended or repealed by the Congress, or held unconstitutional by the Supreme Court of the United States, and for such reason, the provisions of Section 301 of this act cannot be administered, and the contributions imposed by said section cannot be collected from employers under said section, then such employers shall become subject to the payment of contributions under the provisions of this section at the rates herein specified.

Extent of liability.

Section 303. Period and Termination of Contributions.—(a) Any employer who or which becomes subject to this act during any calendar year shall be subject to and shall pay the contributions required by this act during the whole of such calendar year.

Liability may cease.

(b) Any employer subject to this act shall cease to be so subject and shall be relieved of the payment of contributions, only upon written application to the department and finding by the department that he has not employed any employe (whether or not the same employe) in employment subject to this act for some portion of each of some twenty days, each day being in a different week, during the previous or current calendar year, whether or not such weeks are consecutive.

Shall file reports when requested.

Section 304. Reports by Employers.—Each employer shall file with the department such reports, at such times, and containing such information, as the department shall require, for the purpose of ascertaining and paying the contributions required by this act.

Employer shall pay concurrently with each report.

Section 305. Payment of Contributions.—Concurrently with each report, the employer shall pay to the department the amount of contributions imposed by this act for the period covered by the report; but the department may, in proper cases, upon request made, permit an extension of time for the payment of contributions due. The amount of the contribution in respect of which an extension is granted shall be paid (with interest at the rate of one-half of one per centum per month) on or before the expiration of the period of extension.

Department may grant an extension.

Section 306. Fractions of a Cent.—In the payment of any contributions, a fractional part of a cent shall be disregarded unless it amounts to one-half cent or more, in which case it shall be increased to one cent.

Section 307. Interstate Commerce.—No employer required by this act to pay contributions shall be relieved from compliance therewith on the ground that he is engaged in interstate commerce, or that this act does not distinguish between employes engaged in interstate commerce and those engaged in intrastate commerce.

Employers engaged in interstate commerce not exempt.

Section 308. Interest on Past Due Contributions.—Contributions unpaid on the date on which they are due and payable, as prescribed by the department, shall bear interest at the rate of one per centum per month from the date they become due until paid.

Interstate at the rate of 1% per month on past due contributions.

Section 309. Collection of Contributions and interest.—If, after notice by the department, any employer fails, neglects, or refuses to pay any contributions due, or the interest due thereon, the amount due shall be collected by civil action in the name of the Commonwealth. Civil actions brought under this section to collect contributions, or interest thereon, from any employer shall be heard by the court at the earliest possible date, and shall be entitled to preference upon the calendar of the court over all other actions, except petitions for judicial review under this act and cases arising under the Workmen's Compensation Act of one thousand nine hundred fifteen, and its amendments and supplements. No court costs shall be imposed on the Commonwealth in any such civil actions. Judgments obtained in such civil actions to collect any of the contributions aforesaid shall include interest and penalties, as provided in this act.

Collection of contributions and interest may be enforced by legal action.

Section 310. Priorities Under Legal Dissolutions and Distributions.—In the event of any distribution of an employer's assets pursuant to an order of any court under the laws of this Commonwealth, including any receivership, assignment for benefit of creditors, adjudicated insolvency, composition, or

Priorities enumerated in case of dissolution.

similar proceeding, contributions or installments thereof, or interest thereon, then or thereafter due shall be paid in full prior to all other claims except taxes. claims arising under The Workmen's Compensation Act of one thousand nine hundred fifteen, and its amendments and supplements, and claims for wages of not more than two hundred and fifty dollars to each claimant earned within six months of the commencement of the proceeding. In the event of an employer's adjudication in bankruptcy, judicially confirmed extension, proposal, or composition under the Federal Bankruptcy Act of one thousand eight hundred ninety-eight, as amended, contributions and interest then or thereafter due shall be entitled to such priority as is provided in section sixty-four (b) of that act (United States Code Annotated Title XI, Section one hundred four (b) as amended).

In case of bankruptcy, priorities governed by section 64 of Federal Bankruptcy Act.

Department may make refunds and adjustments.

Section 311. Refunds and Adjustments. —If, not later than one year from the payment of any contribution, or interest thereon, an employer shall make application for an adjustment thereof in connection with subsequent contribution payments or, if such adjustment cannot be made, for a refund thereof and the department shall determine that such contribution or interest, or any portion thereof, was erroneously collected for any reason whatever, including the failure to employ one or more employes (whether or not the same employe or employes) for some portion of each of some twenty days during the calendar year, each day being in a different week, for which the contributions were made, the department shall allow such employer to make an adjustment thereof without interest in connection with subsequent contribution payments by him or, if such adjustment cannot be made, the department shall refund said amount without interest out of moneys to the credit of the Employers' Contribution Account in the Unemployment Compensation Fund. For like cause and within the same period, an adjustment or refund may be so made on the initiative of the department.

ARTICLE IV

Compensation

Compensation payable only to employes meeting enumerated qualifications.

Section 401. Qualifications Required to Secure Compensation. — Compensation shall be payable to any employe who is or becomes totally unemployed on or after January first, one thousand nine hundred thirty-eight, and who—

(a) Has, within his base year, earned wages from employers of not less than thirteen times his weekly compensation amount;

(b) Has registered for work at a designated employement office, at such times and in such manner as the department may prescribe;

(c) Has made a claim for compensation in the proper manner prescribed by the department;

(d) Is able to work and available for work; and

(e) Has been totally unemployed for a waiting period of at least three weeks (except as otherwise hereinafter provided in this clause), prior to any week for which he claims compensation, provided that such three weeks of total unemployment shall occur after compensation first becomes payable under this act. Such three weeks shall not include any week in which the employe was ineligible for compensation under section four hundred two of this act, or was ineligible for compensation under any provision of this section, excepting, however, paragraphs (a) and (c) of this section. The three weeks of total unemployment need not be consecutive, but may be accumulated over the period of fifty-two consecutive weeks preceding any week for which he claims compensation: Provided, That this requirement shall not interrupt the payment of compensation for consecutive weeks of unemployment. If the employe's total unemployment is due to a voluntary suspension of work resulting from an industrial dispute, then he shall be ineligible for compensation for a further waiting period of three weeks in addition to the waiting period hereinbefore prescribed in this clause.

Causes enumerated which will make an employe ineligible for compensation.

Section 402. Ineligibility for Compensation.—An employe shall be ineligible for compensation for any week—

(a) In which his unemployment is due to failure, without good cause, either to apply for suitable work when so directed by the employment office, or to accept suitable work when offered to him by the employment office. In determining whether or not any work is suitable for an individual, the department shall consider the degree of risk involved to his health, safety and morals, his physical fitness and prior training and experience, and the distance of the available work from his residence;

(b) In which his unemployment is due to voluntarily leaving work, except where as a condition of continuing in employment the employe would be required to join or remain a member of a company

union or to resign from or refrain from joining any bona fide labor organization, or to accept wages, hours or conditions of employment not desired by a majority of the employes in the establishment or the occupation, or would be denied the right of collective bargaining under generally prevailing conditions.

(c) With respect to which or a part of which he has received or is seeking unemployment benefits under an unemployment compensation law of any other state or of the United States: Provided, That if the appropriate agency of such other state or of the United States finally determines that he is not entitled to such unemployment benefits, the disqualification shall not apply.

Rate of compensation.

Section 403. Rate and Payment of Weekly Compensation. — Compensation shall be payable at the rate of fifty per centum of the employe's full-time weekly wage, but the amount shall not be more than fifteen dollars, nor less than seven dollars and fifty cents a week. An employe's weekly compensation amount, as determined for the first week of his benefit year, shall constitute his weekly compensation amount throughout such benefit year. Compensation shall be computed to the nearest multiple of five cents. Compensation shall be paid through employment offices at such times and in such manner as the department may prescribe.

Payment.

Maximum compensation.

Section 404. Amount of Compensation. —The maximum total amount of compensation payable to any eligible employe during any benefit year shall not exceed one-eighth of his total wages from employers during the first eight out of the last nine completed calendar quarters immediately preceding each week with respect to which compensation is payable (excluding, however, any completed calendar quarter which occurs prior to January first, one thousand nine hundred thirty-seven), or thirteen times his weekly compensation amount, whichever is the lesser.

Employe's account.

The department may maintain a separate account for each employe and in such event shall credit his account with all wages earned by him from employers subsequent to January first, one thousand nine hundred thirty-seven. Compensation paid to an eligible employe shall be charged against amounts credited to such account in the chronological order in which the wages of such individual were earned from employers.

Regulations of board to be posted by employer.

Section 405. Duties of Employers.—Each employer shall post in a conspicuous place, or places, in his establishment, or establishments, any printed statement or notice required by the rules and regulations of the department.

Commonwealth, department, and secretary not liable for compensation.

Section 406. Non-liability of Commonwealth. — Compensation shall be deemed to be due and payable under this act only to the extent provided in this act, and the extent that moneys are available therefor to the credit of the Unemployment Compensation Fund, and neither the Commonwealth, the department, nor the secretary shall be liable for any amount in excess of such moneys.

ARTICLE V

Determination of Compensation; Appeals; Reviews; Procedure

Department shall determine whether compensation should be paid, and extent of the payment.

Section 501. Initial Determination of Compensation; Appeals.—The department shall promptly examine any claim filed, and on the basis of the facts found by it, shall determine whether or not the claim for compensation is valid, and if valid, the week with respect to which compensation shall commence, the weekly compensation payable, and the maximum duration thereof. The claimant and other affected parties shall be promptly notified of the decision and the reasons therefor. Unless the claimant or other affected parties files an appeal from such decision with the board within ten calendar days after such notification was mailed to his last known post office address, and applies for a hearing, such decision of the department shall be final and compensation shall be paid or denied in accordance therewith. In the event that an appeal is filed with the board, the payment of compensation shall be withheld pending determination of the claim, but when a referee or the board affirms a decision of the department allowing compenation such compensation shall be paid notwithstanding any further appeal which may thereafter be taken.

Appeals must be taken within 10 days.

When appeal is filed, payment is to be withheld.

Appeals to be heard by referees.

Section 502. Decision of Referee; Further Appeals and Review.—Where an appeal from the decision of the department is taken, a refree shall after affording the parties reasonable opportunity for a fair hearing, affirm, modify, or reverse such findings of fact and the decision of the department as to him shall appear just and proper. The parties shall be duly notified of the referee's decision, and the reasons therefor, which shall be deemed the final decision of the board, unless within ten days after the date of such decision the board acts on its own motion, or upon application, permits any of the parties to institute a fur-

Further appeals.

ther appeal before the board. A memorandum of testimony of any hearing before any referee shall be made and be preserved for a period of two years.

Persons who may not participate in hearings.

Section 503. Disqualifications to Participate in Hearings.—No referee, member of the board, or employe of the department shall participate in the hearing of any case in which he himself is an interested party. The board may designate an alternate to serve in the absence or disqualification of any referee.

Board may remove appeals from referees.

Section 504. Powers of Board Over Claims.—The board shall have power, on its own motion, or on appeal, to remove, transfer, or review any claim pending before, or decided by, a referee, and in any such case and in cases where a further appeal is allowed by the board from the decision of a referee, may affirm, modify, or reverse the decision of the department or referee on the basis of the evidence previously submitted in the case, or direct the taking of additional evidence. When any claim pending before a referee is removed or transferred to the board, the board shall afford the parties reasonable opportunity for a fair hearing. The parties shall be duly notified of the board's final decision and the reasons therefor. A complete record shall be kept of each case heard before the board. All testimony at any hearing before the board, whether on appeal or otherwise, shall be taken by a reporter, but need not be transcribed unless the disputed claim is further appealed.

Board to prescribe rules of procedure.

Section 505. Rules of Procedure.—The manner in which appeals shall be taken, the reports thereon required from the department, the claimant and employers, and the conduct of hearings and appeals, shall be in accordance with rules of procedure prescribed by the board whether or not such rules conform to common law or statutory rules of evidence and other technical rules of procedure.

Oaths.

Section 506. Power to Administer Oaths; Subpoenas.—In the discharge of the duties imposed by this act, the secretary, the members of the board, any agent duly authorized in writing by the board, and any referee shall have power to administer oaths and affirmations, take depositions and certify to official acts.

Subpoenas.

The department and the board shall have power to issue summons or subpoenas to compel the attendance of witnesses and the production of books, papers, correspondence, memoranda, and other records deemed necessary as evidence in connection with a disputed claim or the administration of this act. Such summons or subpoenas shall be signed by the secretary or the chairman of the board, as the case may be, or some person duly authorized in writing by the secretary or the board. Witnesses subpoenaed pursuant to this act shall be allowed reasonable fees and expenses at a rate fixed by the department. Such fees and all expenses of proceedings involving disputed claims shall be deemed a part of the expense of administering this act and shall be paid from the Administration Fund.

Execution of subpoenas.

Where subpoenas disobeyed, board, department, or agent may petition court of common pleas.

Section 507. Procedure where Summons or Subpoenas Disobeyed.—In case any person refuses, fails, or neglects to obey a summons or subpoena issued under the authority of this act, or fails, refuses, or neglects to produce any books, papers, correspondence, memoranda, or record, the department or the board or its agent duly authorized in writing may petition the court of common pleas of the county in which the inquiry is being carried on, or within which the person summoned, or subpoenaed is found or resides or transacts business, setting forth the facts, whereupon the court shall have jurisdiction to direct such person to appear before the department or its agent, or before a referee or the board at a time and place fixed by the court, and give such testimony and produce such books, papers, correspondence, memoranda, and other records as may be required, or to issue to such person its subpoena requiring such person to appear before the court at a time fixed and there to give testimony touching the matter under investigation, or to produce such other evidence as may be required.

Failure to answer court subpoena subjects party to be held in contempt.

Any person who shall, without just cause, fail, neglect, or refuse to obey a subpoena or order of the court or who shall, without just cause, fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memoranda, and other records, if it is his power so to do, in obedience to a subpoena or an order of the court may be punished by said court for contempt.

Evidence, if self-incrimination claimed, cannot be used as a basis of criminal proceedings.

Section 508. Protection Against Self-Incrimination.—No person shall be excused from attending or testifying, or from producing books, papers, correspondence, memoranda, and other records before the department, the board, or any referee or court, in obedience to any summons or subpoena, on the ground that the testimony or evidence, documentary or otherwise, required of him may tend to incriminate him or subject

him to a penalty or forfeiture; but no individual shall be prosecuted or subjected to any penalty or forfeiture for or on account of any transaction, matter or thing concerning which he is compelled, after having claimed his privilege against self-incrimination, to testify or produce evidence, except that such individual shall not be exempt from prosecution and punishment for perjury committed in so testifying.

Decisions final after 10 days except where an appeal has been disallowed by board.

Section 509. Finality of Decisions.—Any decision made by the department or any referee or the board shall become final ten days after the date thereof, unless appealed from, as hereinbefore provided; but any decision of the board or of a referee, where an appeal has been disallowed by the board, shall nevertheless be subject to appeal to the Superior Court after the same has become final.

Must exhaust remedies before eligible to appeal to Superior Court.

Section 510. Appeals to Superior Court.—An appeal to the Superior Court may be taken by any party claiming to be aggrieved, but only after he has exhausted his remedies before the board. In any such appeal the board shall be made the party defendant. Every appeal to the Superior Court must be taken within thirty days after the decision of the referee or board becomes final. The appeal shall be by petition and shall state the grounds upon which a judicial review is sought. A copy of such appeal petition shall be served upon a member or agent of the board, and sufficient additional copies shall be left with the board to enable the board to furnish a copy to every party in interest in the proceeding who has not joined in the appeal. The board shall file an answer in the Superior Court within thirty days after the petition has been served on it, and shall at the same time file with the court certified copies of all documents and papers, a record of all testimony taken and all findings of facts and decisions thereon. The board may also, in its discretion, certify to such court questions of law involved in any decision by it.

Procedure to be followed in case of appeals.

Superior Court to decide questions of law only.

In any appeal to the Superior Court the findings of the board or referee, as the case may be, as to the facts, if supported by the evidence, and in the absence of fraud shall be conclusive, and in such cases the jurisdiction of the court shall be confined to questions of law, and such cases shall be given precedence over all other civil cases except cases arising under The Workmen's Compensation Act of one thousand nine hundred fifteen, and its amendments and supplements.

Bond not required on appeal to Superior Court.

Section 511. Exceptions and Bond Not Necessary; No Supersedeas to Be Granted.—In order to take an appeal to the Superior Court, it shall not be necessary to enter exceptions to the rulings of the board, and no bond shall be required for entering an appeal. No appeal to the Superior Court shall act as a supersedeas.

Appeal to Superior Court not to act as supersedeas.

Section 512. Final Order of Board.—Upon the final determination of any appeal, the board shall enter an order in accordance with the decree of the court.

ARTICLE VI

Unemployment Compensation Fund and Administration Fund

Unemployment compensation Fund created.

Section 601. Unemployment Compensation Fund.—There is hereby created a special fund separate and apart from all public moneys or funds of this Commonwealth to be konwn as the Unemployment Compensation Fund. All contributions, together with penalties and interest thereon, received or collected by the department from employers under the provisions of this act shall be paid into the Unemployment Compensation Fund, and shall be credited by the department to a ledger account to be known as the Employers' Contribution Account. All moneys from time to time received and credited to the Employers' Contribution Account (exclusive of refunds made under section three hundred eleven) shall be paid promptly by the department into the Unemployment Trust Fund, except as otherwise provided in section six hundred five of this act.

Department to pay compensation out of fund.

As often as may be necessary, the department shall requisition from the Unemployment Trust Fund such amounts as shall be necessary to provide adequate funds for the payment of compensation, as provided in this act. Upon receipt of such requisitioned funds, the department shall deposit them into the Unemployment Compensation Fund to the credit of a ledger account, to be known as the Compensation Account, and shall expend such moneys solely for the payment of compensation, as provided by this act. All moneys to the credit of the Compensation Account shall be mingled and undivided. The department shall pay all compensation authorized by this act out of moneys standing to the credit of the Compensation Account.

Administration Fund to be used to pay cost of the administering of this act.

Section 602. Administration Fund.—There is hereby created a special fund to be known as the Administration Fund, which shall consist of all moneys or other property received by the department from the United States of America, or

any agency thereof, including the Social Security Board, or from any other source whatsoever, to be used for the administration of this act. The department shall pay all costs required for the administration and operation of this act out of the Administration Fund.

State Treasurer to be the custodian of the fund, and is to bond for faithful performance of duties.

Section 603. State Treasurer as Custodian.—The State Treasurer shall be the custodian of the Unemployment Compensation Fund and the Administration Fund. He shall give a bond, or bonds, with corporate sureties, conditioned upon the faithful performance of his duties as custodian of such funds in such amount or amounts as shall be determined and fixed by the Executive Board of this Commonwealth. Premiums for such bond or bonds shall be paid by the department out of the moneys in the Administration Fund. All moneys belonging to such funds (exclusive of moneys on deposit in the Unemployment Trust Fund as provided in section six hundred one) shall be deposited by the State Treasurer in any banks or public depositories in which general funds of the Commonwealth may be deposited, but no public deposit insurance charge or premium shall be paid out of moneys in the Unemployment Compensation Fund. Any law to the contrary notwithstanding, all payments from such funds shall be made under such systems of requisitioning and accounting as the Governor, the State Treasurer, and Secretary shall determine.

Section 604. Budgetary Provisions Not Applicable.—The provisions of article six of The Administrative Code of one thousand nine hundred twenty-nine, as amended, shall not apply to the funds created under the provisions of this act.

Section 605. Management of Funds Upon Discontinuance of Unemployment Trust Fund.—If Title IX of the Social Security Act, or any amendment thereto, or any other Federal tax against which contributions under this act may be credited, shall be amended or repealed by Congress or held unconstitutional by the Supreme Court of the United States, with the result that no contributions under this act may be credited against such Federal tax, then the department shall requisition from the Unemployment Trust Fund all moneys, properties, or securities therein belonging to the Unemployment Compensation Fund of this Commonwealth, and shall credit the same to the Employers' Contribution Account in the Unemployment Compensation Fund. Thereafter all contributions received or collected under this act shall remain to the credit of the Employers' Contribution Account in the Unemployment Compensation Fund until required for the payment of compensation, in which event sufficient funds for this purpose, upon requisition of the department, shall be transferred to the credit of the Compensation Account in the aforesaid fund. All moneys standing to the credit of the Employers' Contribution Account in the Unemployment Compensation Fund shall be invested by the State Treasurer in such investments prescribed by the act of April twenty-fifth, one thousand nine hundred twenty-nine (Pamphlet Laws, seven hundred twenty-three), as are readily marketable, and the investment of such moneys shall at all times be so made that all the assets to the credit of the Employers' Contribution Account shall always be readily convertible into cash when needed for the payment of compensation.

Transfer of preliminary amount.

Section 606. Transfer of Funds to Railroad Unemployment Insurance Account.—Notwithstanding any requirements of the foregoing sections of this article, the department shall, prior to whichever is the later of (1) thirty days after the close of the session of the Legislature and (2) July first, one thousand nine hundred and thirty-nine, authorize and direct the Secretary of the Treasury of the United States to transfer from the account of the Unemployment Compensation Fund of the Commonwealth of Pennsylvania in the Unemployment Trust Fund, established and maintained pursuant to section nine hundred four of the Social Security Act, as amended, to the Railroad Unemployment Insurance Account, an amount hereinafter referred to as the preliminary amount; and shall, prior to whichever is the later of (1) thirty days after the close of this session of the Legislature and (2) January first, one thousand nine hundred and forty, authorize and direct the Secretary of the Treasury of the United States to transfer from this state's account in said Unemployment Trust Fund to said Railroad Unemployment Insurance Account an additional amount, hereinafter referred to as the liquidating amount. The preliminary amount shall consist of that proportion of the balance in the Unemployment Compensation Fund as of June thirtieth, one thousand nine hundred and thirty-nine, as the total amount of contributions collected from employers (as the term "employer" is defined in section 1 (a) of the Railroad Unemployment Insurance Act, approved June twenty-fifth, one thousand nine hundred thirty-eight (52 U. S. Stat. 1094), and credited to the Unemployment Compensation Fund bears

Transfer of liquidating amount.

Preliminary amount.

Liquidating amount.

to all contributions theretofore collected under this act and credited to the Unemployment Compensation Fund. The liquidating amount shall consist of the total amount of contributions collected from employers (as the term "employer" is defined in section 1 (a) of the Railroad Unemployment Insurance Act, approved June twenty-fifth, one thousand nine hundred thirty-eight (52 U. S. Stat. 1094), pursuant to the provisions of this act during the period of July first, one thousand nine hundred and thirty-nine to December thirty-first, one thousand nine hundred thirty-nine, inclusive.

ARTICLE VII

Protection of Rights and Compensation

Employe cannot release his right to compensation.

Section 701. Certain Agreements Void; Penalty.—No agreement by an employe to waive, release, or commute his rights to compensation, or any other rights under this act, shall be valid. No agreement by an employe or by employes to pay all or any portion of an employer's contributions, required under this act from such employer, shall be valid. No employer shall, directly or indirectly, make or require or accept any deduction from the remuneration of individuals in his employ to finance contributions required from him under his act, or require or accept any waiver by an employe of any right hereunder. Any employer or officer or agent of an employer who violates any provision of this section shall be guilty of a misdemeanor, and, upon conviction thereof, shall be sentenced for each offense to pay a fine of not less than one hundred dollars nor more than one thousand dollars, or be imprisoned for not more than six months, or both.

Employes cannot pay employer's contributions.

Employer cannot reduce employes' salaries for contributions.

Violation.

Employers not liable for fees.

Section 702. Limitation of Fees.—No employer or employe shall be charged fees of any kind in any proceeding under this act by the department, the board, or any of its officers or agents. Any individual claiming compensation in any proceeding before the department, the board, or referee may be represented by counsel or other duly authorized agent; but no such counsel or agent shall either charge or receive any greater fee for such services than is approved by the board. Any person who violates any provision of this section shall be guilty of a misdemeanor, and, upon conviction thereof, shall be sentenced to pay a fine of not less than fifty dollars nor more than five hundred dollars, or be imprisoned for not more than six months, or both.

Fees of counsel to be fixed by board.

Employe cannot assign or pledge his compensation.

Section 703. No Assignment of Compensation; Exemptions.—No assignment, pledge, or encumbrance of any right to compensation which is or may become due or payable under this act shall be valid, and such rights to compensation shall be exempt from levy, execution, attachment, or any other remedy whatsoever provided for the collection of debt. Compensation payments received by an employe, so long as they are not mingled with other funds of the employe, shall be exempt from any remedy whatsoever for the collection of all debts, except debts incurred for necessaries furnished to such individual or his spouse or dependents during the time when such individual was unemployed. No waiver of any exemption provided for in this section shall be valid.

ARTICLE VIII

Penalty Provisions

Section 801. False Statements and Representations to Obtain or Increase Compensation.—Whoever makes a false statement or representation knowing it to be false, or knowingly fails to disclose a material fact to obtain or increase any compensation or other payment under this act, either for himself or for any other person, shall, upon conviction thereof in a summary proceeding, be sentenced to pay a fine of not less than twenty nor more than fifty dollars, and in default of the payment of such fine and costs shall be sentenced to imprisonment for not longer than thirty days, and each such false statement or representation or failure to disclose a material fact shall constitute a separate offense.

Section 802. False Statements and Representations to Prevent or Reduce Compensation.—Any employer (whether or not liable for the payment of contributions under this act) or any officer or agent of such employer, or any other person who makes a false statement or representation knowing it to be false, or who knowingly fails to disclose a material fact to prevent or reduce the payment of compensation to any employe entitled thereto, or to avoid becoming or remaining subject hereto, or to avoid or reduce any contribution or other payment required from any employer under this act, or who wilfully fails to refuse to make any such contribution or other payment or to furnish any reports required hereunder, or who wilfully fails or refuses to produce or permit the inspection or copying of records as required hereunder, shall, upon conviction thereof in a summary proceeding, be sentenced to pay a fine of not less than twenty dollars nor more than two hundred dollars,

and in default of the payment of such fine and costs shall be sentenced to imprisonment for not longer than thirty days, and each such false statement or representation or failure to disclose a material fact, and each day of such failure or refusal shall constitute a separate offense.

Section 803. Violation of Act and Rules and Regulations.—Any person who shall wilfully violate any provision of this act or any rule or regulation thereunder, the violation of which is made unlawful, or the observance of which is required under the terms of this act, and for which a penalty is neither prescribed herein nor provided by any other applicable statute, shall, upon conviction thereof in a summary proceding, be sentenced to pay a fine of not less than twenty nor more than two hundred dollars, and in default of the payment of such fine and costs shall be sentenced to imprisonment for not longer than thirty days, and each day such violation continues shall be deemed to be a separate offense.

Section 804. Liability to Repay Compensation Unlawfully Received.—Any person who by reason of the nondisclosure or misrepresentation by him or by another of a material fact (irrespective of whether such nondisclosure or misrepresentation was known or fraudulent) has received any sum as compensation under this act, while any conditions for the receipt of compensation imposed by this act were not fulfilled in his case, or while he was disqualified from receiving compensation, shall be liable to repay to the Unemployment Compensation Fund to the credit of the Employers' Contribution Account a sum equal to the amount so received by him, and such sum shall be collectible in the manner provided in this act for the collection of past due contributions.

ARTICLE IX

Saving Clause; Repeals; Effective Date

Saving clause.

Section 901. Saving Clause.—The General Assembly reserves the right to amend or repeal all or any part of this act at any time, and there shall be no vested right of any kind against such amendment or repeal. All the rights, privileges, or immunities conferred by this act, or by acts done pursuant thereto, shall exist subject to the power of the General Assembly to amend or repeal this act at any time.

Inconsistent acts repealed.

Section 902. Repeals.—All acts or parts of acts inconsistent herewith are hereby repealed.

When effective.

Section 903. Effective Date.—This act shall become effective immediately upon its final enactment.

ARTICLE X

Termination of Compensation Rights

After June 30, 1939, employes subject thereto, receive unemployment compensation under Railroad Unemployment Insurance Act, etc.

Section 1001. Termination of Compensation Rights of Certain Employes.—No employe shall have or assert any right to unemployment compensation under the Unemployment Compensation Law of this Commonwealth with respect to unemployment occurring after June thirtieth, one thousand nine hundred and thirty-nine based upon wages earned for services performed either as an employe, representative, or in the employ of an employer when either such employe, representative, or employer has been determined by the agency or agencies empowered to make such determinations under the provisions of the Act of Congress known as the Railroad Unemployment Insurance Act (52 U. S. Stat. 1094), to be subject to the provisions of the aforesaid act or to an Act of Congress establishing an unemployment compensation system of maritime employes, irrespective of when performed; nor shall wages for such services be included for purposes of determining eligibility under section four hundred one, or rate of compensation under section four hundred three, with respect to any benefit year commencing on or after July first, one thousand nine hundred and thirty-nine.

JOINT REPORT TO THE GENERAL ASSEMBLY OF RECOMMENDATIONS FOR AMENDING THE PENNSYLVANIA UNEMPLOYMENT COMPENSATION LAW

PART 2

Facts and Arguments For and Against Employer Experience Rating in Unemployment Compensation

By the Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania:

In pursuance of House Resolution, Serial No. 136 and Senate Concurrent Resolution, Serial No. 127, of the Regular Session of 1939, and under the authority of the Act of July 1, 1937, P. L. 2460, as amended by the Act of June 26, 1939, P. L. 1084 (Act creating Joint State Government Commission), we submit herewith a Joint Report of Recommendations for Amending the Pennsylvania Unemployment Compensation Law, Part 2, Employer Experience or Merit Rating in Unemployment Compensation.

ELLWOOD J. TURNER, Chairman,
Joint State Government Commission

WELDON B. HEYBURN, Chairman,
Joint Legislative Committee to Study Unemployment Compensation Provisions.

January, 1941.

FOREWORD

This report is Part II of the study on Unemployment Compensation by the Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions. Part I did not consider the subject of experience rating but was confined to other proposals to amend the Pennsylvania Unemployment Compensation Law. This part contains the available facts, statistics, and data on the effect of experience rating in the States in which it is in operation and the arguments generally advanced for and against experience rating.

Hearings were conducted, meetings held, surveys made, and considerable statistics, data, and information were assembled by the Joint Legislative Committee to Study Unemployment Compensation Provisions and are included in this report. Representatives of employers of virtually hundreds of thousands of employes in industry and business manifested considerable interest in the subject and submitted their divergent views and oral and written briefs, statistics, and arguments in support of their respective positions.

The advocates contend that it will encourage industrial stabilization of employment, introduce equity in the payment of contributions, prevent unnecessary idle reserve surpluses, and bring about efficient and just administration. The opponents, on the other hand, disagree with the claim of the proponents and insist that stabilization will produce undesirable results, contribution rate differentials will be unfair to certain unstable industries, and if the reserves are to be reduced, a flat reduction should be adopted.

Every effort has been directed toward an impartial presentation of such facts and data as are available. The information gained at the hearings and through many reports on the subject from other states has been utilized in presenting the arguments of both sides.

The data and information as well as the arguments for and against experience rating contained in this report indicate definitely that the subject is a highly debatable one. Nevertheless, it must be pointed out that in four states experience rating is now in operation and will go into operation in thirteen additional states in 1941. Therefore, serious legislative consideration of this subject cannot be avoided.

The Joint State Government Commission and the Joint Legislative Committee, having been charged to make this study, recognized their responsibility and completed as much of the study as is possible. This report points out that the Joint Committee has been unable to complete that phase of the survey which would determine definitely what effect experience rating would have on different enterprises in Pennsylvania. In the Joint Report, Part I, a continuance of this study is recommended. This proposal is repeated in this report.

Special attention is directed to the valuable information and statistics contained in the tables beginning with page 6664 to the end of the report. In the supplement to this report, are contained additional valuable studies prepared by the Research and Statistics Section of the Bureau of Employment and Unemployment Compensation, showing the employment experience of Pennsylvania industries over a limited period of time and other information concerning the operation of the Unemployment Compensation Fund.

I desire to make acknowledgment to Honorable Lewis G. Hines, Secretary of Labor and Industry and Mr. Ernest Kelly, Director of the Bureau of Employment and Unemployment Compensation. Special thanks are due the following members of the bureau: Mr. Rolland S. Wallis, Chief of the Research and Statistics Section; Mr. William E. Orr, Jr., advanced statistician; and Mr. Harry Hoyle, Chief of Standards, Methods, and Planning, who have aided considerably in furnishing much of the information and statistics utilized in the preparation of this report. They have been generous with their time and effort.

A. ALFRED WASSERMAN, Director
Joint State Government Commission

TABLE OF CONTENTS

Foreword
Summary
Recommendation
Introduction

Section 1. The Objectives of Experience Rating and Arguments For and Against These Aims.

Four major arguments for experience rating

Arguments for and against these Claims of:

1. Stabilization of Employment
2. Equity in Assessing Social Costs
3. The Prevention of Excessive Reserves
4. Efficiency of Claim Administration

Section II. The Methods Used in Rating Experience of Employers.

1. General Observations
2. Reserve Ratio
3. The Texas Plan
4. Connecticut's Compensable Separation Plan and Minnesota's Beneficiary Wage Plan
5. The Benefit Ratio
6. Charging of Employer's Accounts

Section III. Experience Rating in Practice.

1. Present Status and General Observations of the Operation of Experience Rating in the States
2. Wisconsin's Law and Experience
3. The Laws of Kentucky and Nebraska, and Experience of Nebraska
4. The first year of rate reduction in Indiana and South Dakota
5. Experience Rating . . . States Reducing Rates in 1941
6. The Significance to Pennsylvania of the Experience of Other States

Table I. Contributions by Employers, Benefit Payments to the Unemployed, and Balance in the Unemployment Compensation Fund, For Pennsylvania, By Month—January 1937 to December 1940

Table II. Estimated Contributions Collected Compared with Estimated Unemployment Benefits paid, By Industry, For Specified Periods Through September 1940

Table III. Cumulative Collections and Interest, Cumulative Benefit Payments to the Unemployed and Balances in Unemployment Compensation Funds, By States and Territories, at the End of the Years 1937, 1938, 1939, and on June 30, 1940

Table IV. Employment Fluctuations in Major Pennsylvania Manufacturing Industries During the Past Seven Years

Table V. Employment Fluctuations in Major Pennsylvania Non-Manufacturing Industries During the Past Seven Years

Table VI. Wisconsin Experience Rating Accounts Classified By 1940 Contribution Rates and Industry

Table VII. Nebraska Experience Rating Accounts Classified By 1940 Contribution Rates and Industry

SUMMARY OF REPORT ON EMPLOYER EXPERIENCE RATING

Introduction

1. Definition—"A method of contribution adjustment based on the relative amount of unemployment for which the employer has been responsible in the immediate past."

2. Federal Social Act has provision allowing states to have "experience rating."

3. Any experience rating plan that Pennsylvania might adopt must provide:

   a. That the measure of experience that is applied to the individual must be with respect to unemployment or other factors bearing a direct relation on "unemployment risk."

   b. No reduced rate can apply to any individual account unless the agency has been able to measure the "experience" of the employer in question for a period of at least three years.

Section 1—THE OBJECTIVES OF EXPERIENCE RATING AND ARGUMENTS IN CRITICISM OF THESE AIMS

A. STABILIZED EMPLOYMENT

"Experience Rating," by Providing an Incentive of a Lower Contribution Rate, Results in More Stabilized Employment.

PRO

1. Greater stabilization can be achieved by better planning, scheduling production, inducing customers to buy more regularly, additional or specialized warehousing facilities, training employes to be versatile, manufacturing to stock, working repairs in with production, and adding complementary lines of goods.

2. Such a continuous incentive will center and intensify the attention given by employers to the problem of unemployment.

3. It creates a steadier income for workers and encourages industry to make its operations as efficient as possible by better utilizing the skills and energies of its workers.

CON

1. The individual employer can do something to stabilize his employment, but his ability is often limited.

2. The type of unemployment that can be reduced by the individual employer is mostly the "intermittent" or seasonal type.

3. In inducing employers to stabilize, the prospect of a financial saving through a reduced contribution rate is important.

4. Various efforts to avoid the payment of benefits, particularly extreme work spreading, also induced by the prospect of a reduced contribution rate.

5. Under the Wisconsin Act, only a small percentage (11%) were able to accomplish an "appreciable" amount of stabilization as a direct result of the act. But nearly two-thirds of the firms were encouraged to do something toward more regular employment, even though negligible in many cases.

6. It tends to stabilize under-employment. Partial benefit payment at a relatively high level would set a limit on work spreading.

7. In the desire to stabilize employment by filling in the slack season, some firms may engage in producing articles which are the chief source of revenue for other firms.

8. Stabilization reduces the flow from the ranks of the employed to the ranks of the unemployed, and vice versa.

B. EQUITY IN ASSESSING SOCIAL COSTS

Because of the whimsical buying habits on the part of the public, or the nature of the commodity produced, some industries have peaks and valleys of employment, and the consumers of such products should bear the extra social cost. Experience rating, it is claimed, would provide a just means of assessing these higher social costs equitably.

PRO

1. It is contrary to good public policy to provide hidden subsidies to industries which cannot operate without large labor reserves.

2. If Pennsylvania does not adopt experience rating, many industries will be at a disadvantage with their competitors in states that do.

3. The absence of experience rating is a deterring factor to new industries contemplating situating in Pennsylvania.

4. The maximum contribution rate would remain at its present level, 2.7 per cent. Those paying less than the maximum would still be partly paying for the benefits of the employes of those industries with poor experience ratings.

CON

1. Economic life is inter-related and the phenomena of unemployment is of a broad social character. Unemployment in one industry may have been partially caused by the decisions of another industry.

2. Marginal or declining enterprises, who because of competitive factors, technological change, or shifts in demand, may find that they must contract their employment. They would be forced to carry a tax rate greater than more fortunate competitors.

3. A three year experience is necessary before an employer can qualify for reduced rates. Therefore, a new employer entering an industry in which a majority of employers had qualified for lower rates, would face a slight tax disadvantage during a period which is generally the most difficult one.

4. It is doubtful if "compensable" unemployment is a fair measure to determine compensation rates.

C. THE PREVENTION OF EXCESSIVE RESERVES

Both proponents and opponents of experience rating agree that the reserves should not grow indefinitely, but should be kept at a reasonable level.

PRO

1. The large reserve fund which has been built up means millions of dollars of purchasing power tied up. It can best be released by adoption of experience rating.

2. Too great a liberalization will set a rigid schedule of benefits which in times of major depressions will endanger the solvency of the fund. Under experience rating, when the reserves fall, the contribution rates automatically rise.

CON

1. The 3 percent rate was assumed by actuaries to be a reasonable rate of contribution. The limits of protection given to covered workers were conservative and it appears now that they could have been made more liberal.

2. The reserve fund can also be reduced by a flat reduction in contribution rate provided the Federal Act is amended to authorize such action.

3. "Adequacy" of a fund difficult to determine.

D. EFFICIENCY OF CLAIM ADMINISTRATION

Experience rating will induce employers to cooperate more fully with the administrators.

PRO

1. If the employer has a definite stake in the payment or denial of benefits, he will cooperate more to make certain that unjustified claims are not honored.

CON

1. Investigations reveal that the percentage of fraudulent or doubtful claims are negligible.

2. Employers may be tempted to avoid outright layoff or dismissal, and may make efforts to construe terminations of employment as voluntary.

3. Since Pennsylvania does not have partial payments, an employer will be at liberty to reduce employment to one day out of seven, if he so desires, without affecting his experience rating account.

Section II—THE METHODS USED IN RATING EXPERIENCE OF EMPLOYERS.

A. RESERVE RATIO—

Benefits drawn by employes or former employes are charged against the contributions paid by an employer. These balances, expressed as a percentage of payroll, can then be used to measure the relative solvency or insolvency of an employer's reserve. Rates are then determined by comparison with statutory reserve limits.

1. Necessitates tremendous bookkeeping.

2. Can be used by states with pooled fund laws, if provision is made for experience rating accounts.

3. The higher the reserve ratio the lower the contribution rate which must be paid. In some states, if the reserve ratio falls below a certain point a penalty rate is added.

THE NEED FOR SIMPLER MEASURES

The Reserve ratio method, is too cumbersome and costly to administer in states having a large number of covered employers paying into a pooled fund because of the necessity of booking each benefit payment.

When workers move from employes to employer there is the additional problem of applying complicated charging rules to debit accounts.

Some plans have one charging operation for an entire benefit series instead of a charging operation for each check disbursed.

B. THE "TEXAS PLAN"

(Generally advocated for Pennsylvania)

Attempts to meet objections of:

1. Difficulty of administration.

2. Danger to solvency of Unemployment Compensation reserves.

PLAN BASED ON:

1. Offering each employer direct and continuous incentive to regularize employment and also securing a reasonable allocation, as between employers, of the cost of unemployment benefits.
(Contribution rates would range from a maximum of 2.7% to a minimum of 1.0%.)

2. Requiring adequate yet not excessive reserves.

3. Constantly replenishing the fund.

4. Providing for administrative simplicity.

The plan charges a claimant's base period wages at the time benefits are first paid to the accounts of employers from whom these wages were earned. The "benefit wages" of the last three completed calendar years is divided by the payroll for the same period and the resulting "benefit wage ratio" is multiplied by a "State Experience Factor" which takes into consideration the status of the fund.

SAFETY FACTOR. If the fund falls to a certain point in relation to benefits paid in previous years, then contribution rates are increased until the fund reaches a certain specified point.

C. OTHER PLANS. Connecticut and Minnesota have plans, the former using a technique of ranking employers and assigning to them contribution rates in inverse order of the magnitude of the merit rating index of employers. Minnesota uses an average contribution rate. It then assigns payroll categories ranged according to beneficiary wage ratios, to contribution rates on either side of the average.

Utah and Michigan also have ranking plans.

CHARGING OF EMPLOYER'S ACCOUNTS

The entire theory of experience rating must stand or fall on the justice with which charging is done. In attempting to allocate the responsibility of unemployment upon employers, the states have set up "charge-back" procedures that are frequently unjust and usually complex, especially when a claimant reports two or more employers.

Section III—EXPERIENCE RATING IN PRACTICE

A. GENERAL OBSERVATIONS OF THE OPERATION OF EXPERIENCE RATING IN THE STATES

Provisions in the several state laws vary so greatly that comparisons and analyses are difficult to make.

B. WISCONSIN'S EXPERIENCE

1. Wisconsin has the employer reserve accounts plan.

2. There were considerable differences in rate distribution between industries for both 1939 and 1940.

3. In 1940 all classes showed the majority receiving lower rates. The proportion of employers receiving rate reductions tended to increase with the size of payroll, and the proportion receiving rate increases tended to decrease with the size of payroll up to $20,000, and thereafter to increase, excepting the very highest payroll class. The proportion continuing to pay 2.7 percent tended to decrease with increasing payrolls.

C. THE LAWS OF KENTUCKY AND NEBRASKA AND THE EXPERIENCE OF NEBRASKA

1. Kentucky and Nebraska have employer-reserve laws closely related to Wisconsin's plan. Kentucky provides for rate reduction by means of an automatic statutory schedule while Nebraska uses a disbursement ratio."

2. For 1940, 31 percent of the employers in Wisconsin qualified for rate reduction of which 27 percent of the total paid at the lowest rate. Some were aided by a Federal refund. A greater proportion of the "large" employers received rate reductions than did the "small" employers. There seemed to be a direct relationship between opportunity for rate reduction and size of payroll.

D. STATES IN WHICH EXPERIENCE RATING GOES INTO EFFECT IN 1941

In 1941, experience rating is scheduled to begin operating in 14 states.

E. THE SIGNIFICANCE TO PENNSYLVANIA OF THE EXPERIENCE OF OTHER STATES

Pennsylvania differs decidedly from the states examined in its industrial composition, its size, in the number of employers covered and in its unemployment compensation law. Therefore the Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions made their recommendation for further study of experience rating.

RECOMMENDATION

The Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions undertook the study of Experience or Merit Rating for Employers. The Joint Legislative Committee conducted hearings, held meetings, made surveys, accumulated and assembled considerable data, information and statistics on the subject. It has been unable to complete one aspect of the study, namely, the effect that experience rating for employers would have on different enterprises in Pennsylvania. Although it has obtained some data showing the effect for a short period of time, it has not completed this study. The data, therefore, is preliminary and incomplete.

The Joint State Government Commission and the Joint Legislative Committee, therefore, do not make a negative or an affirmative recommendation as to the adoption of any plan of experience or merit rating for employers in Pennsylvania, but do recommend further inquiry to complete this study.

Attention is directed to Recommendations Nos. 5, 6 and 23 on pages 1 and 3 of the Joint Report and Recommendations Part I by the Commission and the Joint Committee to the General Assembly on amending the Pennsylvania Unemployment Compensation Law, dated January, 1941. These recommendations contain proposals which are related to the question of experience rating.

INTRODUCTION

Experience rating for employers in unemployment compensation systems may be defined as a method of contribution-rate adjustment based on the relative amount of unemployment for which the employer has been responsible in the immediate past. Viewed broadly, there would appear to be no disagreement with the concept on which it is based. Should not employers who maintain their working forces in bad times as well as good, and prevent, sometimes to their own loss, the individual suffering and economic maladjustment that comes with mass layoff and insecure tenure, be rewarded by a lower unemploy-

ment tax; and, conversely, should not employers whose personnel practices create long lines of claimants for unemployment benefits at the unemployment offices' windows be penalized by the necessity of paying for the unemployment they bring about? It is this "bad" and "good" attitude that was responsible for the term "merit rating," a term which within the past year has been replaced by "experience rating."

The first really serious thinking, on a large scale, about the problem of mass unemployment and the possibility of exercising social control to prevent it, as well as to aid its victims, occurred in the early years of the decade just past. To meet the emergency facing the American people, systems of aid were devised which proved after brief experience to be faulty. With a recognition of this came realistic attempts to meet the problem, and there came into being the methods of dispensing unemployment relief on the basis of need. These still form the nucleus of our systems of public assistance.

Along with this came a feeling that the millions of American unemployed were not responsible for their plight, that their hardships should be reduced to a minimum that that they should not be subjected to unnecessary investigation into the amount of their resources or need. It was felt, vaguely at first, that there was a substantial difference between those permanently—or for long periods—unable to win a livelihood and those who were left temporarily without means because of the caprices of the labor market. It was also felt that an employer who had irresponsibly thrown his employes on the public purse was far different from one who had shared the resources of his firm with his workers, weathering the storm of depression with them. In endeavoring to make these distinctions, American legislators and administrative experts cast about looking for whatever had been thought or done on the problem. Unemployment Compensation, as we know it, was the result.

Congress in setting up the broad outlines in the Social Security Act gave the States wide latitude as to the type of past experience and thinking from which they might draw, and the fact that there is not a greater diversity in the provisions of the various acts is due to the limitations prescribed by the provisions of the Social Security Act, interpretations made by the administrators of the Act, and a public opinion that drew hazy but perceptible limits as to what could and could not be done in regard to eligibility and benefit provisions. On two points, however, there was no unanimity of thinking or feeling because of differences between the theorists of unemployment compensation—type of fund and method of tax-rate determination. At the time, these differences were satisfied by including in the Act as possible fund types and contribution methods all that had commanded a respectively large following or—in the case of Wisconsin—had been actually placed in operation.

Three types of plans were recognized as acceptable to the Social Security Administrations. If a state adopted any one of the three or a combination of them, and met other stipulations, its employers of eight or more were entitled to charge off against the 3.0 percent Federal tax all amounts paid to the state up to 90 percent of the tax, however, the rifferential tax rate was of the very essence of two of the possible plans, the Act had to include some provision which would make it possible for the employer whose record entitled him to a state tax rate lower than 2.7 percent to retain the advantage he had gained. This was accomplished by means of the "additional credit" feature of the social Security Act and, subsequently, of the Internal Revenue Code.

While later amendments have modified these provisions, in detail the main outlines still exist. A state may pool its contributions in one fund; it may pool part and maintain the balance in individual employer reserve accounts; it may credit all of an employer's contributions against a reserve account from which his workers are paid, or it may, with or without contributions, allow employers to set up their own plans of guaranteed employment. The first of these plans, i.e., that of mingling contributions and paying workers from the pooled fund,[1] can exist with or without special provision for differential contribution rates.

These plans rest on etiher one of two entirely different concepts of unemployment compensation, or straddle across the concepts in the belief that a system can be created which will square with each viewpoint. Basically, both the pure guaranteed employment plan and the pure employer reserve system are premised on a belief that employment and unemployment are the results of the efforts or lack of efforts of individual employers; that they can, working individually and collectively, to a large degree stabilize operations, and that those who cannot, should by right pass along the extra social cost of their operations to the public in the form of higher prices; that the most effective way of accomplishing this is by taxation of employers, the proceeds of such taxes being held for the benefit of those of each employer's employes who lost his or her employment.

The pooled fund without provision for rate variation starts from a somewhat different notion. To its protagonists, unemployment is largely beyond the control of the individual employer; that the vagaries of the market, the change of seasons, and the competitive necessity of technical improvement are factors which employer efficiency and good will cannot control; that it is, nevertheless, the responsibility of the State (and good sense for business) to provide the short-time unemployed with the right to certain benefits; that employers should be taxed for these costs as a class each paying on the basis of the number of workers he may employ.

Between these viewpoints is the belief that these are but different facts of the same problem, and that by a proper control of tax rates the individual employer may be encouraged to stabilize at the same time that the unemployed worker retains full benefit rights regardless of the fate of his employer's reserve or guaranteed employment account. Depending on the initial plan of a particular State Legislature, and the degree to which its members were influenced by one philosophy or another, compromises have been effected which now range from the employer's reserve with a pooled account made up of the fund's earnings, through employer's reserve with a portion of the contribution going into a pool, and straight pooled funds with variable rates to the pure pooled fund into which covered employers pay at an equal rate. (As of March 1940 only four States made provision in their laws for "guaranteed employment" plans, and in one of

[1] The plan adopted in Pennsylvania.

these the plan cannot operate under the Federal Internal Revenue Code).

The formal recognition of these different types of systems in the Federal Statute is made necessary because of the possibility of reduced rates held out to employers under all but the straight pooled fund without experience rating. As revised in 1939 and appended to the Internal Revenue Code "Section 1602. Conditions of Additional Credit Allowance," it reads:

"(a) State Standards. A taxpayer shall be allowed an additional credit under section 1601 (b) with respect to any reduced rate of contributions permitted by a State law, only if the Board finds that under such law:

(1) No reduced rate of contributions to a pooled fund or to a partially pooled account, is permitted to a person (or group of persons) having individuals in his (or their) employ except on the basis of his (or their) experience with respect to unemployment or other factors bearing a direct relation to unemployment risk during not less than the three consecutive years immediately preceding the computation date;

(2) No reduced rate of contribution to a guaranteed employment account is permitted to a person (or a group of persons) having individuals in his (or their) employ unless (A) the guaranty or remuneration was fulfilled in the year preceding the computation date; and (B) the balance of such account amounts to not less than 2½ per centum of that part of the pay roll or payrolls for the three years preceding the computation date by which contributions to such account were measured; and (C) such contributions were payable to such account with respect to three years preceding the computation date;

(3) Such lower rate, with respect to contributions to a separate reserve account, is permitted only when (A) compensation has been payable from such account throughout the preceding calendar year, and (B) such account amounts to not less than five times the largest amount of compensation paid from such account within any one of the three preceding calendar years, and (C) such account amounts to not less than 7½ per centum of the total wages payable by him (plus the total wages payable by any other employers who may be contributing to such account) with respect to employment in such State in the preceding calendar year.

(4) Effective January 1, 1942, paragraph (3) of this subsection is amended to read as follows:

'No reduced rate of contributions to a reserve account is permitted to a person (or group of persons) having individuals in his (or their) employ unless (A) compensation has been payable from such account throughout the year preceding the computation date, and (B) the balance of such account amounts to not less than five times the largest amount of compensation paid from such account within any one of the three years preceding such date, and (C) the balance of such account amounts to not less than 2½ per centum of that part of the pay roll or pay rolls for the three years preceding such date by which contributions to such account were measured, and (D) such contributions were payable to such account with respect to the three years preceding the computation date.'

"(b) Certification by the Board with respect to Additional Credit Allowance—

(1) On December 31 in each taxable year, the Board shall certify to the Secretary of the Treasury the law of each State (certified with respect to such year by the Board as provided in section 1603) with respect to which it finds that reduced rates of contributions were allowable with respect to such taxable year only in accordance with the provisions of subsection (A) of this section.

(2) If the Board finds that under the law of a single State (certified by the Board as provided in section 1603) more than one type of fund or account is maintained, and reduced rates of contributions to more than one type of fund or account were allowable with respect to any taxable year, and one or more of such reduced rates were allowable under conditions not fulfilling the requirements of sub-section (a) of this section, the Board shall, on December 31 of such taxable year, certify to the Secretary of the Treasury only those provisions of the State law pursuant to which reduced rates of contributions were allowable with respect to such taxable year under conditions fulfilling the requirements of subsection (a) of this section, and shall, in connection therewith, designate the kind of fund or account, as defined in subsection (c) of this section, established by the provisions so certified. If the Board finds that a part of any reduced rate of contributions payable under such law or under such provisions is required to be paid in one fund or account and a part into another fund or account, the Board shall make such certification pursuant to this paragraph as it finds will assure the allowance of additional credits only with respect to that part of the reduced rate of contributions which is allowed under provisions which do fulfill the requirements of subsection (a) of this section.

(3) The Board shall, within thirty days after any State law is submitted to it for such purpose, certify to the State agency its findings with respect to reduced rates of contributions to a type of fund or account, as defined in subsection (c) of this section, which are allowable under such State law only in accordance with the provisions of subsection (a) of this section. After making such findings, the Board shall not withhold its certification to the Secretary of the Treasury of such State law, or of the provisions thereof with respect to which such findings were made, for any taxable year pursuant to paragraph (1) and (2) of this subsection unless, after reasonable notice and opportunity for hearing to the State agency, the Board finds the State law no longer contains the provisions specified in subsection (a) of this Section or the State has, with respect to such taxable year, failed to comply substantially with any such provision.

"(c) Definitions—As used in this section—

(1) Reserve Account—The term 'reserve account' means a separate account in an unemployment fund, maintained with respect to a person (or group of persons) having individuals in his (or their) employ, from which account, unless such account is exhausted, is paid all and only compensation payable on the basis of services performed for such person (or for one or more of the persons comprising the group).

(2) Pooled Fund—The term 'pooled fund' means an unemployment fund or any part thereof (other than a reserve account or a guaranteed employment account) into which the total contributions of persons contributing thereto are payable, in which all contributions are mingled and undivided, and from which compensation is payable to all individuals eligible for compensation from such fund.

(3) Partially Pooled Account—The term 'partially pooled account' means a part of an unemployment fund in which part of the fund all contributions thereto are mingled and undivided, and from which part of the fund compensation is payable only to individuals to whom compensation would be payable from a reserve account or from a guaranteed employment account but for the exhaustion or termination of such reserve account or of such guaranteed employment account. Payments for a reserve account or guaranteed employment account into a partially pooled account shall not be construed to be inconsistent with the provisions of paragraph (1) or (4) of this subsection.

(4) Guaranteed Employment Account—The term 'guaranteed employment account' means a separate account, in an unemployment fund, maintained with respect to a person (or group of persons) having individuals in his (or their) employ, who, in accordance with the provisions of the State law or of a plan thereunder approved by the State agency,

(A) guarantees in advance at least thirty hours of work, for which remuneration will be paid at not less than stated rates, for each of forty weeks (or if more, one weekly hour may be deducted for each added week guaranteed) in a year, to all the individuals who are in his (or their) employ in, and who continue to be available for suitable work in, one or more distinct establishments, except that any such individual's guaranty may commence after a probationary period (included within the eleven or less consecutive weeks immediately following the first week in which the individual renders services), and

(B) gives security or assurance, satisfactory to the State agency, for the fulfillment of such guaranties, from which account, unless such account is exhausted or terminated, is paid all and only compensation, payable on the basis of services performed for such person (or for one or more of the persons comprising the group), to any such individual whose guaranteed remuneration has not been paid (either pursuant to the guaranty or from the security or assurance provided for the fulfillment of the guaranty), or whose guaranty is not renewed and who is otherwise eligible for compensation under the State law.

(5) Year—The Term "year" means any twelve consecutive calendar months.

(6) Balance—The term "Balance," with respect to a reserve account or a guaranteed employment account, means the amount standing to the credit of the account as of the computation date; except that if subsequent to January 1, 1940, any moneys have been paid into or credited to such account other than payments thereto by persons having individuals in their employ, such term shall mean the amount in such account as of the computation date less the total of such other moneys paid into or credited to such account subsequent to January 1, 1940.

(7) Computation Date—The term "computation date" means the date, occurring at least once in each calendar year and within twenty-seven weeks prior to the effective date of new rates of contributions, as of which such rates are computed.

(8) Reduced Rate—The term "reduced rate" means a rate of contributions lower than the standard rate applicable under the State law, and the term "standard rate" means the rate on the basis of which variations therefrom are computed."

Pennsylvania is one of the 45 jurisdictions to adhere to the pooled fund, hence any experience-rating plan adopted, besides being consistent with the Commonwealth's constitution and with the other provisions of both the Federal Security Act and the Pennsylvania Unemployment Compensation Law, must square with Section 1602 (a) (1), quoted above, i.e.

1. The measure of experience that is applied to the

individual must be with respect to unemployment or other factors bearing a direct relation to "unemployment risk."

2. No reduced rate can apply to any individual account unless the Agency has been able to measure the "experience" of the employer in question for a period of at least three years.

It should be added that during the course of the hearings held by the Joint Legislative Committee to study Unemployment Compensation Provisions, the opponents claimed that any differential in the contribution rate established by experience rating would be unconstitutional because of the provision in the Constitution[2] that all taxes shall be uniform upon the same class of subjects. The proponents stated that they believe experience rating to be constitutional, and that "all of the courts which have ruled on the subject of unemployment compensation have upheld the constitutionality of the law fundamentally, including experience rating provisions wherever they existed."[3]

An examination of the unemployment compensation laws in the 51 jurisdictions (48 states, two territories and the District of Columbia), shows that no less than forty have adopted some form of statutory provision for experience rating and ten others have made statutory provision for study of the subject. With the exception of the resolutions setting up this particular study, no provisions have been made in Pennsylvania for studying or adopting experience rating. In Part 1 of this report the Joint State Government Commission and the Joint Legislative Committee to Study Unemployment Compensation Provisions have recommended that further study be made of experience rating especially as it would apply to Pennsylvania.[4]

SECTION I

THE OBJECTIVES OF EXPERIENCE RATING AND ARGUMENTS FOR AND AGAINST THESE AIMS

The arguments for experience rating may be summed up under four heads:

1. The past history of American business includes many examples of unstable organizations who, by means of more intelligent scheduling of their operations, the development of new products or lines of activity, the production for inventory during slack seasons, of by "spreading work" among employes, have been able to iron out the peaks and valleys of their employment curves to the mutual advantage of management and labor. It is believed that with the incentive of a lower contribution rate many firms now unstable would be led to reconsider their employment policies, and would find that they too could provide more regular work to their employes.

2. It is argued that the variation of contribution rates according to the employers' individual records in furnishing continuing employment to their employes provides a means of equitable assessing the cost of unemployment benefits. There can be, it is said, no sound reason why enterprises and industries whose workers count on continuous employment should be forced to pay unemployment benefits for establishments which, because of the nature of their business or the ineptitude of their managements, cannot or will not provide such regular employment.

3. Although experience rating necessarily need not be a device for the control of the size of the reserve, most systems that have been designed thus far have, in part, this purpose implied. It is pointed out that the enormous reserves accumulated under the law represent a withdrawal of valuable purchasing power that industry might well be using to advantage. Without questioning the wisdom of laying by a backlog of cash for the period of unusual decline, the proponents of experience rating claim that it provides a means of keeping funds at a reasonable level.

4. Finally, it is stated that experience rating gives the individual employer a stake in the system, and lays the problem of efficient claim administration squarely before him. If his employes or former employes now file claims for benefits to which they are not clearly entitled under the Law, it is no concern of the employer, individually, if the State does or does not honor them. He has paid his tax and beyond that he need not worry. If each such benefit or each such honored claim had a direct bearing on his future contribution rate, he might be inclined to cooperate more fully with the administrators of unemployment compensation in uncovering the facts.

These are arguments of weight. Encouragement of industrial stabilization, equity, prevention of idle governmental surpluses, and efficiency of claim administration are the objectives, and if action by government helps to achieve them, the proponents insist it should be taken and point out further that:

"This objective of such legislation was well enunciated by the President when, in recommending Social Security legislation to the Congress in 1935, he said 'an unemployment compensation system should be constructed in such a way as to afford every practicable aid and incentive toward the larger purpose of employment stabilization.' Recognizing the soundness of this principle, Congress incorporated into the original Social Act, Section 909, which grants to employers who reduce their contribution rates under an approved state experience rating plan the full 90% credit against the federal tax to which they would have been entitled had they paid the maximum rate provided by the state law."[5]

Opponents of such plans point out that when the subject of experience rating was recently considered in connection with unemployment compensation insurance in the District of Columbia, Congress took no action which, in their opinion, is an indication that Congress is not as much in favor of experience rating as was the case when the original unemployment insurance measures were enacted.

Arguments for and against these four claims

1. Stabilization of Employment

In considering these points it is well to choose first "En-

couragement of Employment Stabilization." As a goal this antedates Unemployment Compensation by many years. In the chapter on Management in the Report of the Committee on Recent Economic Changes, to President Hoover, Henry C. Dennison wrote: [6]

"To judge from the companies of this survey, the beginnings of substantial progress have been made, since the Unemployment Conference in 1921, in moderating the severities of seasonal irregularities. In about one-half of the companies it was found that definite measures had been put into effect; in 4 per cent especially trying conditions had increased irregularly; in 5 per cent nothing had been done to attempt to mitigate the effect of seasonal fluctuations; and in 40 per cent the problem had never been acute. Among the measures reported are increased standardization of products, better planning, scheduling production, inducing customers to buy more regularly, additional or specialized warehousing facilities, training employes to be versatile, manufacturing to stock, working repairs in with production, and aiding complementary lines of goods. The ladies' garment industry in Cleveland in 1921, and the men's clothing plants in Chicago in 1923, took steps toward regularization of employment through guaranteed employment and unemployment insurance plans. In 1928, the garment industry in Rochester and in New York City began the establishment of unemployment insurance funds. All of these arrangements have been worked out through the cooperation of employers and unions. A few individual companies in various lines of manufacturing have established unemployment compensation plans which have helped to regulate workers' income." [7]

For the most part the aim was to reduce seasonal fluctuations brought about by the buying habits of the public, the nature of their product, or the availability of the materials with which they worked. For example, the Sherwin-Williams Paint Company helped to change a spring demand to a round-the-year demand by a "Paint in the Fall" campaign. National Cloak and Suit Company and Sears-Roebuck and Company introduced January and June sales with special catalogues, to take up the slack that had always occurred after the Christmas and Easter Holidays. Repackaging of Mueller Macaroni reduced spoilage and made increased summer sales possible. The use of fireworks in the celebration of Christmas in the South was successfully exploited by Northern fireworks manufacturers, who always had suffered from slumps during the winter months. Within the past generation, ice cream has become a year-round food.

The opponents contend, however, that this type of stabilization is the result of new business created by sales promotion and is not applicable to industries engaged in manufacturing capital goods or in selling to a market that is more or less fixed. Such industries are faced with a far more difficult problem. The capacity of the buying public to consume more radiators or coal, or the ability of American business to invest in cash registers is limited. Here recourse to seasonal price differentials (anthracite as early as 1900, American Radiator Company) or planned production for inventory and future sale (Packard Motors, Proctor and Gamble, National Cash Register, Allis-Chalmers) has made it possible to avoid the feverish hire and fire policy that marks many seasonal industries. [8]

Another device that has become common is the development of "side lines" or "fillers." Douglas and Director cite among others. Dennison Paper Company, who progressively developed crepe paper, labels, tags, and a variety of other products to fill in gaps; Beechnut Packing Company, whose chewing gum and peanut butter keeps employment steady during the winter months; and A. C. Gilbert Company, who moved from a strictly Christmas toy trade to the development of all sorts of motor driven household appliances.

These few typical methods do not by any means exhaust the possibilities. Exchange of workers by employers having different seasonal peaks, training of workers to perform two or more different jobs at different periods, utilizing productive employes for maintenance during off-seasons, and other plans and combinations of plans have all been either tried or suggested. The National Association of Manufacturers prepared a monograph [9] that was published just a few months ago which lists more than 80 cases of stabilization and describes in some detail the plans utilized by each of the firms studied.

Advocates of experience rating insist that the surface has only been scratched, and that American management, given the proper encouragement, will show itself capable of providing much greater stability of employment.

They claim that experience rating will provide a continuous incentive for an employer to do the best job he can in furnishing regular work and "if you have 100,000 employers subject to the act, each doing their part in furnishing regular work, you will have gone a long way towards solving the problem of unemployment in the state. You will not have evolved the solution, but you will have made great progress." [10] They claim further that relatively few employers in the country have done much toward furnishing steady work; that there are many employers who do not do a good many things they should do until it is brought to their attention forcefully and the contribution rate saving is forceful for a great many employers and will direct attention to the job they ought to be doing anyhow, and site as an illustration the experience with this subject in the State of Wisconsin.

In that state, the proponents state, 60% of the employers have handled their employment in such a way as they are now paying (for the year 1940) less than the 2.7 percent standard rate of contribution, and that they have learned how to do a better job of managing their business; that the variable tax rate or contribution rates have served as a notice or signal lamp to employers to do things that many of them have been trying to do before and that many of them have completely neglected during the past years." [11]

As a study,[12] conducted by Dr. Charles Myers indicates something can be done, although it is significant that he finds the possibilities distinctly limited and some of the gains offset by an actual increase in total unemployment. The conclusions he reaches after a thorough study of 247 Wisconsin firms are of such importance that extensive quotation from his summary and conclusion is warranted.

"The principal findings of the study and the conclusions with respect to stabilization of employment are summarized as follows.

"1. The individual employer can do something to stabilize his employment, but his ability is often limited. Although the interviews

[11] Ibid.

[12] "Employment Stablization and the Wisconsin Act," by Charles A. Myers, Employment Security Memorandum No. 10, Social Security Board, 1940.

showed clearly that employers in many lines of business can reduce some types of employment irregularity, limitations are obvious. Factors making stabilization possible are not found in equal degrees between industries, or even between firms within the same industrial classification. This point needs emphasis because at times, proponents of the Act have talked in terms of certain employers doing a 'better job' of stablizing than others who are doing a 'worse job,' implying that the latter do 'better' if they only tried. In many cases this may be true, but in others the use of the terms confuses inability to stabilize with unwillingness or lack of sincere effort to stabilize.

"2. The type of unemployment that can be reduced by the individual employer is mostly the 'intermittent' or seasonal type. When employers attempted to stabilize employment as a result of the Act, they usually adopted certain devices, if they had not already done so before, and if such devices were practical in their particular businesses. Employment management was centralized, and the work force selected more carefully. There was greater effort to transfer employes between departments to avoid lay-offs, and some retraining was undertaken with that end in view. Sometimes employes were used for maintenance and repair jobs when there was not enough work to keep them busy in their regular departments. Where possible, the product or its parts were manufactured for stock during slack seasons, probably according to a production peak, so that it would be unnecessary to make so many lay-offs then or hire so many extras at a later peak. Other stabilization devices, such as diversification of products and markets, dovetailing, and booking business in advance of the season were used less frequently. The tendency to maintain a small, stable work force meant hiring fewer extras at the peaks, thus adding somewhat to the total volume of unemployment.

"Earlier advocates of the 'Wisconsin idea' argued that employers and bankers could control the business cycle, and that the unemployment compensation law would induce them to do so. This suggestion was never seriously supported by persons instrumental in the passage of the Groves bill. Instead they contended that 'chronic irregular' or 'intermittent' unemployment, and seasonal unemployment, would be reduced. Their prediction has in some measure been borne out.

"Where the Act has induced stabilization efforts, it has reduced that type of 'intermittent' unemployment which resulted when a man was hired for a temporary rush and then soon laid off, or when a new worker was being hired for one department while employes (who could have been transferred) were being laid off in another. In other words, the Act has forced more regularity in day-to-day employment matters in these firms. Furthermore, in many cases, particularly through manufacture for stock in the slack season, it has been instrumental in reducing the severity of seasonal unemployment. Except for work spreading, which cannot usually be regarded as stabilization, employers can do little or nothing to reduce cyclical unemployment. They admit that they are powerless in the face of general declines in business, and few will avoid the temptation of taking on extra employes as business seems to be rising. In no important case, furthermore, did an employer say that the Act had caused him to postpone a technological labor-displacing change. The anticipated profit from such a change was held to outweigh possible financial savings from contribution rate reductions.

"Experience rating, then, whether it be under the employer-reserve type of law or the 'automatic' type under a pooled fund, should not be expected to produce miracles in the prevention or reduction of unemployment. The purpose ought to be to give employers an incentive to reduce those types of instability of employment which they can reduce, and these are necessarily limited.

"3. In inducing employers to stabilize, the prospect of a financial saving through a reduced contribution rate was important. 'Keeping down benefits' in the hope of qualifying for the reduced tax rates was a concern of all the firms which attempted to stabilize in some measure under the Act. Although careful accounting might have indicated that the costs of irregular operation were sufficient incentive to stabilize, comparatively few employers know their own costs so well or act so wisely. A tangible financial charge against their accounts, such as benefit payments, assumed a psychological importance out of proportion to its relative financial significance. Foremen, in particular, appeared to be impressed by benefits when other, less tangible costs aroused little interest.

"But the incentive provided under the reserve-percentage formula of the present law may be considerably weakened after a short time because firms in naturally stable industries are able to qualify for the lower rates with very little effort on their part, whereas firms in relatively unstable industries may never be able to reach the necessary levels even though they make a more genuine effort to stabilize than do their competitors in the same industry.[13] This is a real objection to the reserve-percentage type of experience rating found in the Wisconsin law, as well as in most other State laws with provision for contribution rate variations. Some firms in Wisconsin despaired of ever being able to reach the necessary percentages because of the inherent instability of the industry. Others in more stable industries felt certain that without making an additional effort they could secure the reduced rate eventually. It should be pointed out, however, that although some Wisconsin employers thought that the reserve percentage method might work unfairly in their particular cases and thus discourage further attempts to stabilize employment, this was not the general belief, even among some employers in the unstable industries.

"4. Various efforts to avoid benefits, particularly extreme work spreading, were also induced by the prospect of a reduced contribution rate, About half of the firms interviewed had done more work spreading under the impetus of the Act, although only a minority had carried it to a point just above that at which benefits were payable. Not particularly common, but nevertheless significant, was benefit avoidance by means of other devices, such as probationary-period hiring and the hiring of ineligibles. The existence of these practices indicated that a law which rewarded the employer who had a low benefit record would encourage some attempts, within the legal framework of the statute, to avoid benefits directly as well as through bona fide stabilization.

"5. Only about 11 per cent of the 247 firms interviewed between July 1, 1937, and July 1, 1938, were regarded as having accomplished an 'appreciable' amount of stabilization as a direct result of the Act. But nearly two-thirds of the firms were encouraged to do something toward more regular employment, even though negligible in many cases. In addition to the 'appreciable' group, this included not only firms which had accomplished 'some' stabilization under the Act, either because their efforts began earlier for other reasons or because success was limited by difficulties, but also firms whose stabilization under the Act had been 'negligible' for similar reasons. The Act caused no change in only 39 per cent of the firms interviewed, and nearly half of these had stabilized before, or were in naturally stable business.

"6. Reduced contribution rates in effect in 1938 were not indicative of the future results of experience rating. Most of the 114 firms that received reduced rates qualified for them either bcause their 1937 payrolls were smaller than in previous years, thus automatically making their reserve percentage higher, or because they made a voluntary contribution before the end of the year to bring their reserve up to the necessary percentage of pay roll. Stabilization efforts were unimportant in qualifying for lower rates in this first year.

"7. Experience rating in 1939 may be more indicative of probable future developments than the 1938 experience. Over a third of the eligible employes qualified for the 1 per cnt rate and 5 per cent for the zero rate. Firms which had done little or nothing to stabilize under the Act because they had done so before or were in naturally stable business were rewarded along with those which made genuine efforts to stabilize as a result of the Act. Higher-than-standard rates on 'irregular' employers were also first effective in 1939. Nearly 10 per cent of the employers whose rates could be modified were required to pay 3.2 per cent on their payrolls because their accounts had been overdrawn or their benefits had exceeded contributions in 1938. Most of these were firms in which stabilization was difficult or impossible because of the nature of the business. It should be noted, however, that some increased rates were assessed against firms in naturally stable business, just as some rate reductions occurred in industries generally regarded as unstable.

"8. Against the stabilization accomplishments of the Wisconsin Act must be placed the fact that it has tended to stabilize under employment and has added somewhat to the volume of total unemployment. The results of this study indicated that there has been an increase in stability of employment in some Wisconsin firms. Partly offsetting this gain in improved industrial relations, however, is the fact that under-employment and total unemployment have been increased as a result of the Act.

"For the most part, the increased work spreading that occurred under the Act in about half of the firms interviewed must be regarded as benefit avoidance and stabilization of under-employment rather than as stablization of employment. To the extent that its use is widespread, extreme work spreading may enable employers to qualify for lower contribution rates just as much as if they had accomplished genuine stabilization, which approaches full-time employment. This is not an inherent defect in the Wisconsin law, however, since an amendment raising the level at which partial benefits are payable would set a higher limit on work spreading, and at the same time allow some sharing of the work which may be desirable to prevent temporary cessation in employment and income.

"There has also been a tendency for the total number of unemployed persons to increase insofar as stabilization efforts under the Act have meant that fewer workers were needed at peak periods, and insofar as the hiring of casual labor has been discouraged. This is a normal result of any successful stabilization of employment by individual firms, whether encouraged by experience rating under unemployment compensation or not. Although important, the seriousness of the tendency in Wisconsin can easily be exaggerated, since it was estimated that only about 2 percent of the workers employed by firms interviewed were adversely affected. Furthermore, those who condemn stabilization on this account must be willing to accept, as a lesser evil, continued irregular and haphazard employment for the rest of the workers.

* * * * *

[13] "Employment Stabilization and the Wisconsin Act," by Charles A. Myers: "In view of this, it is difficult to agree with the following statement, attached to the 1938 and 1939 Wisconsin statistical tables: 'A system of experience-rating based on individual employer accounts fully recognized both industrial and individual variations. (Such a system, while encouraging each employer to employ his workers as steadily as he can, makes his contribution rate depend on his actual unemployment benefit record—just as his premium rate for accident compensation varies with his accident hazard and experience.)' The analogy between accident compensation and unemployment compensation appears to the writer to be fallacious. Under the former, there are industry rates (known as 'manual' or 'average' rates) based upon the accident hazard, and then further variations from these based upon accident experience. There are no separate industry rates for unemployment hazard under the Wisconsin Act."

"Although many of the original claims concerning the Act have not been borne out in subsequent experience, it is an indication of progress in industrial relations that Wisconsin employers under the Act have been more concerned with employment problems than they were before. It is a positive gain that many employers have made genuine efforts under the impetus of the Act to reduce or eliminate intermittent and seasonal irregularity of employment where it is possible to do so. Many of the undersirable aspects of work spreading could be remedied by an amendment to the law, but some increase in total unemployment (at least in the short run) appears to be an inevitable accompaniment of thoroughgoing individual stabilization efforts.

"As long as something positive has been accomplished toward stabilization of employment among some Wisconsin firms, and inasmuch as no workers have yet been denied benefits because of exhaustion of their former employers' accounts, the Wisconsin Unemployment Compensation Act should be accepted as a significant contribution to social legislation. It may not be better than or even as good as experience rating under pooled-fund laws in encouraging employer efforts to stabilize employment, but the final answer must await further experience under the pooled-fund laws and under the Wisconsin Act."

While Dr. Myers found that the tax-saving did in fact operate as an incentive, his conclusion is a carefully qualified one. Where a large organization has built up its methods of production and marketing over a long period of time, and where its management has not found more stable operation profitable for other reasons opponents of experience rating hold that the prospect of a slight reduction in contribution is not likely to be sufficiently appealing to encourage any very important changes in policy (a reduction of the rate by one-third from 2.7 percent to 1.8 percent, represents a saving of nine thousand dollars to a company with a million dollar payroll).[14]

The opponents call attention to the fact that in some types of enterprise stability appears to be virtually impossible. A contractor cannot build houses or roads for inventory, and is seriously limited in the extent to which he can utilize the same trades in different operations. Where the chief products of a concern are of the "built-to-order" type of much heavy special-purpose industrial machinery, employment is dependent entirely on the orders received. A slight degree of stabilizing is possible in some industries engaged in the processing of perishable commodities, but there are well-marked limits; coal cannot be stored indefinitely without loss, and the processors of perishable food products are still dependent in a large measure on the growing season. Indeed, one of the accepted methods of filling in the seasonal valleys for certain of these types of enterprise, that of the "side-line," may in the long run cause more unemployment than it cures. If in their desire to fill their regular slack season, firms of industry A engage in the manufacturing of an article which is the chief source of revenue for firms of industry B, they may imperil the very existence of these other companies since their competitive position often enables them to produce the product at what seems to be a much lower cost.

This is not the only flaw that the critics of stabilization find in the arguments of the proponents. One that is fraught with far greater consequence is touched on in point 8 of Dr. Myers' conclusion. It does not deal with the efficacy of tax incentives as a means of inducing stabilization, but challenges the desirability of employment stabilization itself. Of all arguments the opponents advance this is the most serious, since it is not a criticism of the means but a rejecting of the goal.

[14] Under the "Texas Plan," which is the one most strongly advocated for Pennsylvania in the hearings held before the Joint Legislative Committee to Study Unemployment Compensation Provisions, Aug. 13, and Sept. 17, 1940, minimum rates were set at 1.0 per cent which would provide for correspondingly greater savings.

The proponents of experience rating state that the employers in this state, representing the state as a whole, have a very real community of interest in a sound unemployment compensation law. "We are aware," they say, "of special conditions affecting special industries. Granting there are special problems and special industries, the protagonists strongly question the wisdom of attempting to solve this problem by a payroll tax levied on the other employers of the state, which tax, in a competitive situation, if overloaded, only tends to increase the very unemployment which is sought to be reduced."[15]

Employment stabilization is generally construed to mean relative or regularity of employment for the same group of workers. Obviously, it is theoretically possible for a company to report the same volume of employment or payroll month after month, and yet exhibit a labor turnover that involves the constant dismissal and hire of workers. Under all experience rating plans now in effect[16] such a company would be "unstable" and probably would be penalized by a higher rate. If, however, industry can stabilize in the first sense and is encouraged to do so, one result is inevitable. Whereas some employment each year was provided for 1,000 men by Company A, more employment will be provided for 750. This may or may not be desirable but the conclusion seems inescapable. At present there tends to be a constant flow from the ranks of the employed to the ranks of the unemployed, and vice versa. Here the critics insist that insofar as industry stabilizes, this process is slowed down or stopped altogether, since it can be taken as axiomatic that an employer will stabilize at the point of lowest labor cost. One of the examples of what can be done by attempts on the part of industry is that of the "decasualization" of longshore work on the Pacific Coast. In discussing this experience Lester and Kidd Comment:[17]

"In support of experience rating it has been said that 'the miracle of longshore decasualization' in the port of Seattle indicates how a differentiation in tax rates under reserve-ration rating 'might serve national needs.' A plan of employment 'regulation' through central registration and dispatching was put into operation in Seattle in the middle of 1921. It involved strict limitation of entrance to the trade, so that the work available would be conserved for the registered men. The number of men registered under the scheme was gradually reduced from 722 to 664 in 1929, despite the fact 'work picked up' and that there was 'increased cargo to handle during the period. Because the labor supply had been deceased, the earnings of practically all Seattle longshoremen before the depression ranged from $1,300 to $2,500 a year. After 1929 no replacements were made when men quit or died, with the result that the number of registered workers declined from 664 in 1929 to 525 in 1933. Indeed, the plan proved to be such an extremely tight closed-shop arrangement that the sons of longshoremen were not able to register for longshore work during the four years prior to 1934, when the joint plan terminated. The plan was criticized on the ground that it did 'nothing to relieve the general problem of unemployment' but instead aggravated the problem. The operators of this closed-shop arrangement and the registered workers benefiting from it, however, adopted the attitude that what happened to the 'outsiders' as a result of the closed employment doors at the waterfront was not their responsibility."

Note: Quotations made by Lester and Kidd are from F. P. Foisie, "Decasualizing Longshore Labor and the Seattle Experience."

In regard to regularization, Feldman and Smith say: [18]

[15] Evans, T. L., Statement made in a hearing before the Joint Legislative Committee to Study Unemployment Compensation Provisions. Aug. 13, 1940. Harrisburg, Pa.

[16] See, however, "Merit Rating and Unemployment Compensation," by Karl Pribram and Philip Booth, Social Security Board 1937.

[17] "Case Against Experience Rating," by Richard A. Lester and Charles V. Kidd, Industrial Relations Counselors, Inc., 1939.

[18] Feldman, Herman and Smith, Donald M., The Case For Experience Rating in Unemployment Compensation and a Proposed Method, pp 8 and 9. Industrial Relations Counselors, Inc., New York, 1939.

"Regularization admittedly has certain limitations but there are misconceptions concerning its intended accomplishments. Experience rating would not immediately reduce unemployment. Indeed, there is good reason to believe that if it succeeded in increasing stability of employment all at once, it would increase the volume of unemployment at that time since it would concentrate a given volume of unemployment on certain persons. Superficially examined, this result appears to be objectionable, and one may ask: Why give further attention to a proposal that seems so contrary to public policy?

"Such criticism apparently assumes that irregular employment is a great asset and that the more inefficient and profligate in its use of labor an enterprise is, the more effectively it is providing employment. If a concern, in a seasonal industry in which all work irregularly, reduces fluctuations, 100 men may be employed regularly instead of, possibly, 130 who previously obtained intermittent employment in the same plant. Because the number of part-time employes may be larger than the number of full-time employes, should it be concluded that chronic irregularity is a desirable economic or industrial practice? If so, the objective would be to discourage concerns from providing steady work, and millions would be made insecure in their jobs in order to give occasional employment to the rest. Indeed, the reasoning of many persons appears to justify such a situation. But the aim of regularization is to build up industry to the point where an employe may have a reasonable sense of security on the job. Such security can more readily be achieved when good management technique and low costs of operation prevail than when management is poor and costs are high, from such productive industry the costs of taking care of the excess labor reserve may be met most effectively."

This criticism of stablization is closely allied in principle to another. Where technological changes in an industry have already been responsible for a growing army of unused labor, is it wise to accelerate the process by encouraging further rationalization and reduction in staff?

Thus, stablization of employment can be viewed as a worthwhile aim in that it creates a steadier income for those workers who are employed, in that it encourages industry to make its operations as efficient as possible by utilizing the skills and energies of its workers to the maximum. On the other hand, its critics point out that these are not unmixed blessings and question whether we are prepared to face all of the implications. On the second level of discussion, advocates of experience rating believe that this device is the one best calculated to secure stabilization, while opponents—even some who believe in the virtues of stablization—doubt if slight reductions in contributions to unemployment compensation are sufficient incentive to employers, many of whom cannot achieve real stability because of the nature of their businesses.

Before passing to a second point of debate, it is important to take note of one argument advanced by the advocates of experience rating and contested by its opponents. It is a reasonably well-known fact that rate differentials in Workmen's Accident Compensation Laws have led employers to the adoption of safety devices, to the conduct of safety campaigns among employes, and, in general, to the development of factories and shops that are far less hazardous for the workers than were the factories and shops of an earlier generation. Accident statistics are evidence of this. Would it not be possible that rate differentials might lead employers to throw similar safeguards around job tenure? The opponents hasten to claim that to the extent that the employer has it within his power to eliminate undesirable personnel practice the analogy is sound, but his control over his machinery and working conditions, and his control over the demand for his product and services, are not strictly comparable. While there is a point of diminishing returns, employers can and do make jobs safer and safer with each passing year, but the opponents insist, there is a point at which increased effort to solve problems of employment meets with factors outside of the control of the individual employer

2. Equity in Assessing Social Costs

There are admitted limits to the extent to which all industries can stabilize, and serious question as to the ability of some industries as now constituted to achieve any very apprecable results in this direction. Even the warmest advocates of experience rating do not expect it to achieve the impossible. The protagonists ask, however, whether it is not unsound and contrary to good public policy to provide hidden subsidies to industries that cannot operate without large labor reserves. If because of whimsical buying habits on the part of the public, or the nature of the commodity produced, peaks and valleys are a necessary feature of an industry's employment pattern, then the consumers of that industry's products should bear this extra social cost in the form of higher prices. Experience rating would, it is claimed, provide a just means of assessing these extra social costs equitably.

It was in recognition of these areas of business that the term "merit rating" was abandoned and "experience rating" substituted. For, as pointed out in dealing with enterprises of this type the argument for stabilization loses much of its force. It is not so much a question of encouraging stability as of distributing the benefit burden fairly. If you reside in a frame building in the neighborhood of a gasoline storage tank you realize that your fire insurance premium is bound to be higher, and while the installation of fire extinguishers will have some effect on your rate, there is a limit to what your efforts can accomplish.

A statement of this position is the following,[19] quoted and criticized by Herman Feldman and Donald M. Smith in "The Case for Experience Rating in Unemployment Compensation and a Proposed Method":

"The most probable result of merit rating in operation will be a rate structure which will impose low rates on all employers who participate in the production of goods for a relatively stable market, high rates on all employers who take part in the production of goods for a market subject to severe fluctuations. The rates paid by the producers of necessary consumers' goods and services will be cut. The rates paid by the producers of durable goods, capital goods, and luxury goods will be maintained or increased. The regard of rate reduction will go to employers who have done nothing to earn it. The penalty of high rates will be imposed upon employers who are not so much inefficient as unlucky. Thus merit ratings will bear little or no relation to merit. Their determination will depend less upon good management than upon good fortune."

It is pointed out that the chief flaws found in the argument of equity are those due to the inter-relatedness of economic life and the broad social character of the phenomena of unemployment. It would not always be the industry or the individual enterprise responsible for unemployment that would be forced to carry the burden of the higher rate. A large utility might cease deriving its power from coal by the substitution of water power. Its employment, however, might remain the same and it would qualify for a good rate. The industry that was affected, the mining industry, on the other hand, would find itself penalized and, following the logic of the equity argument, would be forced to raise the price of coal supplied to its other consumers.

The critics emphasized that the very process of "stabilization" on the part of those enterprises so situated that they can stabilize, in many instances would seriously up-

[19] "Merit Rating in State Unemployment Compensation Laws," by Clair Wilcox, American Economic Review, June 1937, quoted in "The Case for Experience Rating in Unemployment Compensation and a Proposed Method" by Herman Feldman and Donald M. Smith, Industrial Relations Counselors, Inc., 1939.

set the employment patterns of other industries and create unemployment. The possible dangers of "side lines" were alluded to above, but equally important is the advantage given to one of two competing industries when the one industry is dependent largely on labor, while the other is either more mechanized or does not have to process its product to the same extent. Of course they contend that this is not a statement that an inefficient industry should be encouraged at the expense of an efficient one, it is merely a question as to the wisdom of using incentive taxation in a way that might create inequities in competition while trying to assess costs more equitably.

Another question which opponents of experience rating ask is, ought the State by means of incentive taxation discourage the marginal or declining enterprise? If because of competitive factors, technological change, or shifts in demand, an employer finds he must contract his employment, should his business be forced to carry a tax rate greater than his more fortunate competitor who finds that he is able to continue or increase his total employment? Probably no employer wants to dismiss employes. If he has a way of employing more and showing a profit, he will do so. Experience rating might have the effect of administering the coup de grace to a number of businesses that are operating on the thinnest of margins, and of hastening the decline of industries that are already finding it difficult to operate profitably. The Majority Report of the Committee on Employer Experience Rating [20] points out:

"As new industries or inventions emerge, as consumption habits shift, and as natural resources are depleted, many manufacturing enterprises, many service enterprises, many of our wholesale and retail enterprises, will undoubtedly suffer severe declines. Many new occupations will arise, and many existing occupations will cease to exist. It is inevitable that these changes will produce immediate unemployment, even though the workers displaced are later absorbed in other enterprises.

"To reward an industry which is rapidly expanding and at the same time to penalize an industry in a state of gradual decline manifestly would be a discrimination and result in many inequities. Such situations, we are confident, were not contemplated by those who first advocated differential rates in unemployment compensation. To believe the stability or regularization of employment can be achieved in the face of new inventions, shifts in consumption habits, and depletion of resources, is, we believe, unrealistic."

An allied problem of interstate competition arises because of the nature of specific experience rating provisions required by Federal Law. A state having pooled fund cannot reduce an employer's contribution rate unless it has a record of at least three years of his experience while covered by its law. If all or the majority of employers within a given industry had so stabilized their employment as to qualify for lower rates, new employers would face a slight tax disadvantage during a period which is generally the most difficult one.

The opposite viewpoint on the question of competition, however, is pointed out by the proponents. An employer in Pennsylvania may be paying a contribution at the 2.7 per cent rate while his competitor in another state which has experience rating may enjoy a much lower rate even though the employment experience of both employers be the same. It is further stated that, although not a conclusive factor, the failure to adopt experience rating would be one more determent to industries contemplating coming to Pennsylvania.

The final criticism of the "equity" argument arises because of the nature of unemployment benefits. Assuming that the entire theory behind equitable assessment of costs be sound, it is doubtful if "compensable" unemployment is a fair measure. Not all of those who are unemployed apply for benefits, and not all of those who do apply and qualify experience the same duration of benefits. An employer who dismissed his employes at a time when other employers happened to need their services would not affect his experience rating account in the slightest degree, and yet could be guilty of the worst type of personnel practice. Another firm that after an excellent record of fair dealing had the misfortune to contract employment at a time when the dismissed workers could not be immediately reabsorbed by industry, would find its account chargd with the benefits or benefit wages of those compensated.

In summarizing, the opponents point out that unemployment can be controlled by the individual employer in only a very limited fashion. Secular declines in his industry due to changing techniques of production, changing demands for products, or other factors, cannot be arrested by him. He shares with all others the rises and falls of the business cycle, and unless he is fortunate beyond most of his class, he will have to adjust his payroll to the pattern of his sales. Efforts to reduce seasonal peaks and valleys may meet with some success, but it may be accomplished by adding to the total volume of unemployment. The only area in which he can operate effectively is in the very narrow one of sound personnel administration. He can avoid a ruthless hire-fire policy, spread his employment as far as this device is consistent with a living wage for the worker, intelligently plan his production, and in general manage his affairs to the best of his ability. It is hardly "equitable" to increase his taxes during lean years when secular or cyclical change forces contraction.

However, advocates of experience rating for Pennsylvania carefully point out that the plan advanced by them would not increase the tax above the present 2.7 per cent level. Those employers who, because of better employment experience, qualify for lower contribution rates, would, still be paying more in contribution than their employees received in benefits and this excess would help towards paying the benefits of employees in those industries.

3. The Prevention of Excessive Reserves

Experience rating is a device that could be used to increase or decrease reserves, depending on the base rate adopted and the scale of reductions and increases permitted. It has been, however, the rate reduction aspect that has been stressed from the very beginning of its history, and it is this phase that makes it possible for its advocates to present it as a means of reducing or stabilizing what seem to be extremely large fund balances.

Even those who oppose experience rating do not take the wholly untenable position that unemployment compensation reserves should be permitted to grow without limit. If the present rate of increase in many of the State funds continued year after year for a long period of time, the effect on American economic life might indeed be serious. The annual withdrawal of millions of dollars from the usual channels of trade in the form of unemployment compensation contributions is defensible only

[20] Volume II—Majority Report, Committee on Employer Experience Rating of the Interstate Conference of Employment Security Agencies, September, 1940.

if a substantial portion of these millions is permitted to flow back again as benefits to the unemployed. The problems arise, however, first, as to what constitutes a reasonable reserve against risks regarding which we know little and, second, if too much purchasing power is being dammed up in idle balances, as to the best method of releasing it.

In the current agitation for reduction of employer contribution rates one important fact is lost sight of. The benefit provisions that were written into the various State laws are premised, for the most part, on the estimates of the actuaries of the Committee on Economic Security. These actuaries assumed the 3 per cent contribution rate to be reasonable, and then estimated how adequate a policy the American people could buy against unemployment. Since there were many unknowns in the computations, the experts were conservative. As a result it was considered advisable to limit the amount and duration of benefits which were to be obtained only after a waiting period of several weeks. While sufficient experience is still lacking to form a final judgment, some believe that the actuaries were over-cautious and that the outlines sketched by the Federal Government and filled in by the states could have been more liberal to the claimant.

[21] "The real difficulty is that our unemployment compensation experience is too limited. To understand this experience we should reconsider the work of the Committee for Economic Security on which the present system was based. This committee, in search of a sound actuarial basis for an unemployment compensation scheme, was confronted with a distressing paucity of data. It is no criticism of the Committee to say it did not achieve the impossible and was, therefore, forced by practical consideration to adopt a conservative policy. It was realized that any unemployment insurance scheme worthy of the name had to compensate for a sufficient portion of the wage loss to protect the worker against exhausting personal resources or resorting to relief immediately upon the loss of employment. Long waiting periods and small weekly benefit amounts paid over relatively short periods were not considered because they were accepted as being socially desirable, but because it was thought that more liberal benefits were impossible within the financial limitations, the Committee, for reasons of expediency, was willing to accept. The Committee seems to have clearly erred, however, when it added a 30 percent safety factor to its original estimates and then readjusted the benefit formula accordingly. After readjustment it was concluded that with a 3 percent contribution rate, benefits equivalent to 50 percent of wage loss up to $30 a week could, after a 2-week waiting period, be paid for 10 weeks. One additional week of benefits might be paid if the waiting period were lengthened by a week. It was on the basis of such conservative advice that provisions for small benefit amounts and for relatively brief periods found their way into State laws. Many states failed to provide for any effective minimum benefit amount, and a maximum duration of 13 to 16 weeks in a year became a standard pattern."

Pennsylvania has a relatively higher wage scale and the provision of a $7.50 minimum prevents the payment of the fantastically meager benefits that are disbursed by some states. Pennsylvania is one of five[22] states that does not pay benefits for partial unemployment; at present it provides a three-week rather than a two-week waiting period for benefits, and while an analysis of the benefit provisions of the law are beyond the scope of this report, some liberalization in terms of duration and rate might be reasonably considered.[23] Studies of claimants whose benefit years ended during the first six months of 1940 revealed that over 50 percent had exhausted all their benefit rights. What proportion of this group later became the responsibility of the County Boards of Assistance is not known, although the Department of Public Assistance reported that it had opened 12,520 cases during the first six months of 1940 in which the immediate cause of need was the cessation of benefit payments.

On the other hand, the publication "Social Security,"[24] has taken the stand that the unemployment compensation reserve funds should be greatly reduced by lowering the unemployment insurance wage tax from 3 percent to 2 percent. The Board of Directors of the American Association for Social Security are unanimous in declaring for the reduction. They feel that "at this time, the immediate reduction of over $300,000,000 annually in unemployment insurance taxes is not only most socially desirable for the welfare of the nation as a whole but also warranted from every point of view." It should be remembered, however, that the Federal Act must be amended to permit the state to adopt such revision.

In answer to those who advocate greater liberalization the Board felt that "the type of liberalization generally demanded and actually possible under the present benefit structure can be achieved in practically all states even under a reduced tax."

As a warning to those who propose too extensive a liberalization of benefits as a solution to the large reserve funds, it is pointed out that when "the benefit level is raised at the time when business is good so that it soaks up all the money being currently collected, the administration is committed to a benefit level that cannot be continued when business drops because, then, collections drop off and the number of claimants increase rapidly.[25]

Beyond this problem of liberalization, however, is the more difficult one of fund adequacy. With the limited experience the states have had with Unemployment Compensation administration, it is impossible for anyone, regardless of how expert he may be, to state categorically that a fund of certain stated size is "adequate." Adequacy can be measured only in terms of probable drains, and the estimation of these must, in turn, depend on an estimation of the probable future of employment conditions. Certainly any catastrophic decline such as that experienced during the early 1930's would drag the fund balance with it, and it would be wishful thinking to indulge in the fancy that the Nation will not again experience a major depression. If the current era of expansion and activity due to defense preparations should be followed by a violent downward reaction, it seems safe to assume that only a comfortably large reserve will insure the payment of all benefits to all eligible claimants. Let us assume that one-third of a potential 2,400,000 covered Pennsylvania workers were to lose employment and were forced to apply for benefits. Assume an average weekly rate of $10 and a full thirteen weeks of benefits. The product is in excess $100,000,000.

4. Efficiency of Claim Administration

The statement is frequently made that experience rating would aid in the improvement of claim administration. If the employer has a definite stake in the payment or denial of benefits he will make certain that unjustified

claims are not honored. This point, of course, rests on the assumption that there is an appreciable number of fraudulent or, at least, doubtful claims filed, an assumption that does not seem warranted. Investigations made, in fact, reveal that the percentage is negligible.

One development, however, is bound to occur if experience rating is adopted. The employer, being in the position of one whose favorable contribution rate is placed in jeopardy by each claim for benefits, may be tempted to avoid outright layoff or dismissal, and may make every effort to construe terminations of employment as voluntary. The critics of merit rating point out further that since Pennsylvania does not pay benefits for partial unemployment, an employer will be at liberty to reduce employment to one day out of seven if he so desires without affecting his experience rating account. Benefit avoidance devices, such as the substitution of a contractual for wage relationship, may become more common and while employers will be encouraged to take an interest in the prevention of fraudulent claims, it is possible that some employers will attempt to stop legitimate ones. The proponents, on the other hand, contend that the employes are generally vigilant of their rights and welfare, are well organized, and can fully protect their interests against the small percentage of unfair employers.

Section II

THE METHODS USED IN RATING EXPERIENCE OF EMPLOYERS

1. General Observations

Much that is written on the subject of employer experience rating is kept safely in the realm of generalities. It is assumed by many persons that there is a well-defined method of measuring an employer's experience which has been generally agreed on and could be, with little difficulty, incorporated in a State law. Such is not the case. Section IV of the Majority Report of the New York Unemployment Insurance Advisory Council opens with a statement which describes the present situation with admirable brevity—"Existing experience rating provisions in other States show wide confusion."[26]

One reason for the somewhat bewildering complexity of some provisions is the necessity of designing the details of an experience rating clause so that it is consistent with all other provisions of the State law. Methods of charging employers' accounts, limits on the amounts chargeable, and other administrative processes cannot be independent of the balance of an unemployment compensation structure, but must be made an integral part of it.

This necessity for legal consistency, however, is not the chief reasons for the intricate provisions of many State experience rating clauses, and the diversity of design between States. Once the legislators had decided that the principle of basing the contribution rate on the employer's employment experience was a good one, it was necessary to decide how this measurement was to be made. Deciding this is no easy matter, because the actualities of economic life do not nearly conform to the realm of the stabilization theory.

2. Reserve Ratio

The oldest method in point of time and the most obvious one is derived from the Wisconsin Employer Reserve Law: debit the employers' accounts with the benefits drawn by their employes or former employes, and credit these accounts with the contributions paid. These balances, expressed as a percentage of payroll, can then be used to measure the relative solvency or insolvency of an employer's reserve. Rates are then determined automatically by comparison with statutory reserve limits. If the problem of the worker with a number of employers is ignored, this type of measurement has the advantage of being easily understood by both worker and employer. It is not easy to administer, however, since it necessitates a staggering amount of bookkeeping. Each benefit check paid must be charged against the proper account, and since the employer has a direct interest in the amount by which his reserve is being diminished, he must be notified of the charges made.

The reserve ratio formula (contributions less benefits divided by payroll) can also be used by States with pooled fund laws, if provision is made for experience rating accounts. It has, in fact, been adopted by many States with pooled funds, the impetus having been given by its inclusion in the Social Security draft bills. In these laws three variants of the formula are found, the chief difference being in the payroll figure that serves as the denominator of the fraction $\frac{C-B}{P}$. Ten States average the annual payrolls of the last three or five years and use whichever total is higher, three States average for three years only, and five States average payrolls for three years or five years adjust the contribution figure in the numerator, using only contributions in excess of 1 per cent.

The States' law generally specify that a reserve ratio of from 7.5 to 10.0 per cent entitles an employer to a contribution rate of 1.8 or 2.0 per cent, and that a reserve ratio in excess of 10.0 per cent carries with it a reduction to 0.9 per cent or 1.0 per cent. (There are, however, a number of variations in this schedule). On the other hand, penalty rates are applied by a number of States if the employer's ratio falls below a stipulated percentage or if benefits exceed contributions over a stated period of time.

While the majority of laws of the employer-reserve type or of the pooled fund type that makes provisions for computing an employer-reserve ratio, make rate determination automatic, a few merely set limits and leave rate variation to the administrative agency. For example, the Nebraska agency which operates under an employer-reserve law, first computed the reserve ratio to measure the employer's eligibility for rate change in 1940, and then computed a "disbursement ratio," (1939 benefits divided by 1939 contributions) and assigned 1940 rates according to the following schedule:

Disbursement Rates	Contribution Rate
Over 13½% to and including 16 2/3%	2.5%
Over 10½% to and including 13½%	2.0%
Over 7½% to and including 10½%	1.5%
7½% or less	1.0%

The Agency, however, points out in its statement to employers that this method "will be effective only for the year 1940 and will not necessarily be the method followed

[26] Report of the New York Unemployment Insurance State Advisory Council on the Subject of Experience Rating, Part One, Page 13—March 1, 1940.

in subsequent years in establishing contribution rates."[27]

The Need For Simpler Measures

It should be obvious that States with a large number of covered employers paying into a pooled fund will find the reserve ratio method, either automatic or non-automatic, cumbersome and costly to administer, because of the necessity of booking each benefit payment. If, in addition, the employment of the State is marked by any large amount of "mobility," i.e. movement of workers from employer to employer, the administrator is faced with the problem of applying complicated charging rules debiting accounts, for example, in "inverse chronological order" to the wages paid, all benefits up to a certain fraction of the wages payable by the employer during a stipulated period.

This administrative problem was a challenge to the ingenuity of economists, tax experts, and legislators, and it has led to a wide variety of suggestions as to better methods of measuring employer experience with respect to unemployment. As stated in the recent report of the Experience Rating Committee of the Interstate Conference of Employment Security Agencies:[28]

".... an entirely acceptable measure of an employer's experience with respect to unemployment should meet at least four standards:

1. It should give weight to the frequency with which unemployment occurs.
2. It should give weight to the duration of each occurrence of unemployment.
3. It should be as free as possible from the influence of chance factors resulting from the techniques employed in the measuring process.
4. It must be reasonably simple and economical of administration."

In exploring the possible types of measurement, a number of interesting and illuminating discoveries have been made. One of the most significant has been that the concept of employer stability itself had not been too clearly outlined. Is an employer stable if he provides employment for the same number of persons over a given period, even though they are not the same persons, and even though the volume of employment may vary from time to time? Is the absence of fluctuations in the volume of employment as measured in man-hours worked or steadiness in monthly payroll an indication of stability? These types of stability can be measured, and experience rating systems based on these measurements have been proposed, although no State has enacted such legislation. A periodic count of persons separated from the payroll also could become the basis of measurement, but this too has met with no legislative favor although the wording of the Federal Internal Revenue Code is broad enough to permit the adoption of laws based on any of these concepts.

All the new measurements finally adopted depend, as does the reserve-ratio formula, on the experience of the employer with respect to compensated unemployment. Two States (Michigan and Utah) use a ratio of benefits to payroll, seven States (Texas, Illinois, Delaware, Massachusetts, Virginia, Alabama, and Minnesota) a ratio of "benefit-wages" to payroll, and one State (Connecticut) an index based on weighted compensable separations.

The benefit-ratio method does not simplify the administration of the law, since the charging problem remains and will be discussed below as a fund protection device. The use of the "benefit-wage ratio" and the "index of compensable separations" are, however, administratively far simpler since there is but one charging operation for a benefit series instead of a charging operation for each check disbursed.

3. The Texas Plan

This plan is being proposed for Pennsylvania by the advocates of experience rating. This fact was brought out in hearings held by the Joint Legislative Committee to Study Unemployment Compensation Provisions.[29]

One of the outstanding advocates of simplified experience rating has been Mr. F. B. Cliffe, Assistant Comptroller of the General Electric Company. To a large extent, the development of the plan now adopted by Texas, Delaware, Illinois, Massachusetts, Virginia, and Alabama has been due to his efforts. With considerable ingenuity the "Texas" plan attempts to meet two of the objections raised by opponents of experience rating: 1—That it is difficult to administer; 2—That it endangers the solvency of Unemployment Compensation reserves.

The advocates of the "Texas Plan" submit that it is based on the following principles:[30]

(1) Offering each employer direct and continuous incentive, in the form of lower contributions, for regular employment of the largest possible proportion of his employes and at the same time securing a reasonable allocation, as between employers, of the cost of unemployment benefits.

(2) Requiring that the fund be adequate to assure the payment of benefits under all probable conditions, without withdrawing from industry an unnecessary amount of funds.

(3) Maintaining this fund by replenishing it, over a period of years, for the amount of withdrawals made.

(4) Meeting the foregoing objectives in a way that will have great administrative simplicity, and therefore very low cost to the state agency.

Briefly, the plan depends on the charging of a claimant's base period wages at the time benefits are first piad to the accounts of the employers from whom these wages were earned. At the end of the year the "benefit wages" charged for the three most recently completed calendar years are summed for each employer, and the total divided by the payroll for the three most recently completed calendar years. These "benefit wage ratios," however, do not take into consideration the status of the Fund, so each is multiplied by a "State Experience Factor" which is calculated by dividing all benefits paid dur-

[27] Letter dated December 27, 1939, from the Unemployment Compensation Division of Nebraska to Nebraska employers.

[28] "Experience Rating Under Unemployment Compensation Laws," Unanimous Report of the Committee on Employer Experience Rating of the Interstate Conference of Employment Security Agencies, Volume I, September 1940.

[29] Hearings held before the Joint Legislative Committee to Study Unemployment Compensation Provisions, Aug. 13 and Sept. 17, 1940, Harrisburg, Pa.

[30] The Experience Rating Plan being proposed for incorporation into Pennsylvania's "Unemployment Compensation Act and How It Would Work." Pennsylvania Employers' Conference, 3600 Chestnut Street, Philadelphia, Pa., October 28, 1940

ing the three most recently completed calendar years by all "benefit wages" of all claimants during the same period. Within limits stated in each law this product will give the employer's contribution rate for the ensuing year. In practice, a table is written into the law in which the products are rounded and adjustments are made to provide for the maximum and minimum rates.

Symbolically, if:

P = An employer's payroll for the period
bw = Employer's payroll benefit wages for the period
BW = Statewide benefit wages for the period
B = Statewide benefits for the period

Then:

$\frac{bw}{P}$ = Employer's benefit wage ratio

$\frac{B}{BW}$ = State experience factor

And,

$\frac{bw}{P} \times \frac{B}{BW}$ = Employer's rate

If we manipulate the above fractions, the theory underlying the Cliffe plan becomes clear:

$\frac{bw}{BW}$ = The individual employer's percentage of all "benefit wages"

$\frac{bw}{BW} \times B$ = The individual employer's proportionate share of benefits

$\frac{BW}{bw} \times \frac{P}{B}$ = That share expressed as a percent of payroll

Further explanation of the formula with an illustration was advanced by the Pennsylvania Employers' Conference.[31]

$$\frac{\text{Total Benefit Wages Charged Employer A}}{\text{Employer A's Taxable Payroll}} \times \frac{\text{State Total Benefits Paid}}{\text{State Total Benefit Wages}} = \text{Contribution Rate}$$

Illustration of Principle *—Assuming only three employers in state.

	Company A	Company B	Company C	State Total
(a) Payroll	$600,000	$2,000,000	$1,900,000	$4,500,000
(b) Benefit wages	300,000	400,000	200,000	900,000
(c) Benefits paid	.....	.....	.....	90,000
(d) "State experience factor" (c ÷ b)	.....	.....	.....	10%
(e) Employer's share of benefits (b × d)	30,000	40,000	20,000	
(f) Employer's tax rate (e ÷ a) — calculated	5%	2%	1.1%	
(g) Employer's tax rate as per table	2.7%	2.5%	1.5%	
(h) Amount of employer's tax (a × g)	16,200	50,000	28,500	94,700

[31] Ibid. PP. 5 and 6.

NOTES

* (1) The actual amount of tax collected would be $4,700 more than benefits paid, thus providing a safety margin.

(2) The principles are illustrated by the above figures; the actual operations would be still simpler. The employer's benefit wages (b) would be divided by his payroll (a). The resulting percentage (Company A, 50%; Company B, 20%; Company C, 10%), called his benefit wage ratio, would be located on a table in reference to the current "state experience factor" (10% illustrated); the table indicates the resulting tax rate—Company A, 2.7%; Company B, 2.5%; Company C, 1.5%. The table and explanation that would appear in the law would be as follows:

The tax rate for each employer shall be the percentage indicated at the head of the first column from the left in the following table (excluding Column 1, the "state experience factor") in which, on the same line as the current "state experience factor," there appears in any other column a percentage in excess of such employer's benefit wage ratio, or if no percentage in excess of such employer's benefit wage ratio appears on said line, then such employer's contribution rate shall be 2.7 percentum.

Col. 1 State Experience Factor	Col. 2 1.0%	Col. 3 1.5%	Col. 4 2.0%	Col. 5 2.5%	Col. 6 2.7%
1%	100%	150%	200%	250%	Equal to, or in excess of, benefit wage ratio in Col. 5
2	50	75	100	125	
3	33	50	66	83	
4	25	38	50	63	
5	20	30	40	50	
6	17	25	34	42	
7	14	21	29	36	
8	13	19	25	31	
9	11	16	22	28	
10	10 (Co. C)*	15	20 (Co. B)*	25	(Co. A)*
11	9	14	18	23	
12	8	13	17	21	
13	8	12	15	19	
14	7	11	14	18	
15	7	10	13	17	
16	6	9	12	16	
17	6	9	12	15	
18	6	8	11	14	
19	5	8	11	13	
20	5	8	10	13	
21	5	7	10	12	
22	5	7	9	11	
23	4	7	9	11	
24	4	6	8	10	

* These refer to foregoing illustration.

"In the construction of this table, all fractions have been rounded up against the employer. Thus, if the formula indicates a contribution rate of 1.3% the table calls for the employer paying 1.5%. Thus, all employers except those who are paying the maximum state rate are paying the cost of benefits to their own employes plus a contribution to the general fund. These contributions offset approximately, the losses to the fund by reason of the remaining employers whose payment at even the maximum rate is less than the benefits received by their employes. This wide distribution of part of the cost of the least stable employers corresponds to the contributions to a 'partial pool' or 'balancing account' which are provided in all of the employer-reserve laws."

The bulk of the debate on experience rating for the past two years has been on the merits of the Cliffe plan. The New York State Legislature has in two sessions passed bills embodying it, and has seen both bills vetoed. During 1939 Illinois and Massachusetts, and during 1940

Virginia and Alabama were added to Texas and Delaware, the two States originally accepting this method of rating.

Fundamentally, all of the criticisms that are directed at experience rating in general may be applied to the Cliffe plan in particular, but the special claims of administrative simplicity and "Fund Replenishment" makes it desirable to consider it apart from other plans.

Admittedly, if a State adopts a plan involving the charging of individual employer accounts, that plan is easiest to administer that involves the fewest charging operations. As Mr. Cliffe describes the method in the November 1940 issue of "Personnel," it does not seem to be extremely difficult.[32]

"When a claimant first applies for benefits, the agency must of necessity consult his wage history as reported by his various employers during the base period. Having determined that he is eligible for benefits, and having fixed his weekly benefit rate from such records, the first step taken under the experience rating provisions is a simple refiling of such records, after the first benefit check has been issued, according to the employer who paid the wages during the base period. As a part of such refiling, the employer may be notified immediately or periodically of the benefit wages that are being charged against his account, resulting from the claim of 'employe ....., Social, Security Account No. ....., base period wage .....' At the end of each year, the total amount of benefit wage records filed under the number of each employer (or a summary of the periodic reports rendered to the employer) will be determined. This total, plus the corresponding figures for the preceding two years, will be divided by the employer's total taxable payroll for the same three years, in order to determine the 'employer's experience factor.'"

This procedure, however, would have to be modified if the claimant had two or more different employers during his base period.

The Fund Replenishment argument is far more difficult for the opponents to accept, although the theory underlying the idea is absolutely sound. If, during a given period, it is desired to replace benefits paid out and each employer is required to replace his pro rata share, it obviously brings the Fund back to its initial size. However, the fact that this pro rata share is expressed as a percentage of a future payroll that may not be as great as the average payroll during the experience period, does not at all, the critics charge, mean Fund Replenishment. Furthermore, the imposition of an arbitrary maximum (2.7 per cent in the plans most recently adopted) may or may not be offset by the provision of a minimum. In fact, during a period of steady decline, this plan will result in depletion of reserves as certainly as any other.[33]

In recognition of this problem, the variants of the Cliffe Plan adopted by Illinois, Massachusetts, Virginia, and Alabama, contain so-called "safety factors" which are designed to provide a measure of protection to the reserves of the State. As Mr. Cliffe frankly states:[34]

"The original Texas plan has been modified in the laws adopted by Illinois, Massachusetts, Virginia, and Alabama. They contain what has been referred to as a 'safety factor,' that is, a special increase in the contribution rates if the fund falls below a predetermined point, and usually a corresponding special decrease in the contribution rates if the fund exceeds another and higher specified point. This provision seems desirable because contribution rates have had no relation to benefit disbursements for the first five years that the laws have operated in each state. It is also recognized that even thereafter the contribution rates provided in the Texas plan may not exactly replenish the fund. If there is a long trend or bias of the fund upward or downward, it will be corrected by this so-called safety factor, so that the fund will be kept within the predetermined limits."

[32] "The Texas Plan of Experience Rating," by F. B. Cliffe, Assistant Comptroller, General Electric Company, "Personnel," November 1940.

[33] See "Notes on the Cliffe Plan of Experience Rating," by Adolph Appleman, "Personnel," August 1940.

[34] "The Texas Plan of Experience Rating," by F. B. Cliffe, Assistant Comptroller, General Electric Company, "Personnel," November 1940.

The provision Massachusetts wrote into its statute may be taken as an example of such a safety factor. If the Fund falls below the highest annual amount of benefits paid during the last ten years, the lowest four rates are each increased by 0.5 per cent, and the 2.5 per cent rate becomes 2.7 per cent. If the Fund still remains below the minimum, all rates are automatically increased to 2.7 per cent until the reserve equals 150 per cent of the highest annual benefits.

The "Safety Factor"—How It Works

In the plan advocated for Pennsylvania,[35] the maximum contribution rate for any employer at any time would be set at the present 2.7%, thus protecting more irregular employers from paying higher contribution rates than they now pay.

"The minimum contribution rate would be set at 1.0%, thus providing a contribution from even the most stable employer toward paying the benefits to employes of the least stable employers.

"An individual employer's rate would annually be graded between these limits according to the regularity of his recent employment record, thus providing every employer with an incentive to better his performance and an opportunity to reduce his contributions. To lessen fluctuations and to provide for the collection of most of the necessary funds during periods of rising payrolls, the "state experience factor" and each "employer's benefit wage ratio" would both be based upon the three years' experience immediately preceding the calendar year for which the contribution rate is being established.

"A safety factor finally would be included to insure a safe and adequate balance in the reserve fund at all times. Subject always to the 1% minimum and 2.7% maximum, this would provide for an automatic proportionate increase in the contribution rates of employers contributing at less than the maximum rate if and whenever the fund balance falls below an amount equal to 1½ times the maximum amount disbursed in the worst year of the last ten. Similarly it would provide for a corresponding automatic decrease in such contribution rates if and whenever the fund balance exceeds an amount equal to two times the maximum annual disbursements."

When an employer has been subject to the experience rating provisions of the law for three consecutive calendar years immediately preceding the fixed computation date, his normal contribution rate shall be that established in accordance with the procedure and table explained above. At the end of each calendar year starting with 1941, if the balance in the fund is less than 150% of the largest amount of benefits expended in any one of the last ten years, employers contributing at less than the maximum rate of 2.7% will sacrifice some of their calculated saving. Their rates will be scaled proportionately upward according to the balance in the fund as shown in the following table:

[35] "The Experience Ruling Plan being proposed for incorporation into Pennsylvania's Unemployment Compensation Act and How It Would Work," pp. 3, 4, 6 and 7, Pennsylvania Employer's Conference, 3900 Chestnut Street, Philadelphia, Pa., Oct. 28, 1940.

Balance as a percentage of largest year of benefits				
Normal Rate	135-149% Adjusted Rate (Col. 1)	120-134% Adjusted Rate (Col. 2)	105-119% Adjusted Rate (Col. 3)	Under 105% Adjusted Rate (Col. 4)
2.7%	2.70%	2.70%	2.70%	2.70%
2.5	2.55	2.60	2.65	2.70
2.0	2.18	2.35	2.53	2.70
1.5	1.80	2.10	2.40	2.70
1.0	1.43	1.85	2.28	2.70

If the fund's balance computed as above is in excess of 200%, the contribution rates of employers paying less than the maximum shall be scaled down proportionately, increasing their savings, in accordance with the following table:

Balance as a percentage of largest year of benefits				
Normal Rate	201-215% (inclusive) Adjusted Rate (Col. 1)	216-230% (inclusive) Adjusted Rate (Col. 2)	231-245% (inclusive) Adjusted Rate (Col. 3)	246% and over Adjusted Rate (Col. 4)
2.7%	2.70%	2.70%	2.70%	2.70%
2.5	2.45	2.40	2.35	2.30
2.0	1.83	1.65	1.48	1.30
1.5	1.20	1.00	1.00	1.00
1.0	1.00	1.00	1.00	1.00

4. Connecticut's Compensable Separation Plan and Minnesota's Beneficiary Wage Plan

Allied to the Texas plan of experience rating, although superficially different, as those adopted by the States of Connecticut and Minnesota. The latter State insures that the average rate of contribution will not fall below certain statutory minima by ranking employers in order of their "beneficiary wage ratios" (similar to benefit wage ratio), and then taking equal payroll categories, to each of which a rate fractionally above or below the average is assigned. As described in a recent release[36] made by the State of Minnesota:

"After the average rate is determined, the law requires that a schedule of contribution rates for the year be prepared, the various rates in this schedule being graduated in equal number above and below the average with a difference of one-fourth of one percent between each of the various rates. The total state payroll must be applied to this schedule, assigning employers' payrolls in equal amounts to each rate, giving the employers with the most favorable employment experience the lowest rate available in the schedule and those with the least favorable employment experience the highest rate therein provided. For the purpose of illustration, there is shown hereafter a schedule using as the average rate 1.5 percent since that is the first rate shown in the schedule (above) provided by law for determining the average rate. This rate, however, would apply only if the State as a whole had an unusually favorable employment experience and the condition of the Fund were unusually good.

[36] Form MES-16, Division of Employment Security of Minnesota, dated September 5, 1940.

CHART SHOWING APPLICATION OF EXPERIENCE RATING PROVISIONS OF MINNESOTA UNEMPLOYMENT COMPENSATION LAW

	Rate Schedule	Divisions of State Payroll	Range of Beneficiary Wage Ratios	Amount of Contribution
Minimum	0.50%	$50,000,000	Lowest ratio group..	$ 250,000
Below Average	0.75	50,000,000	Second " " ..	375,000
	1.00	50,000,000	Third " " ..	500,000
	1.25	50,000,000	Fourth " " ..	625,000
Average	1.50	50,000,000	Fifth " " ..	750,000
Above Average	1.75	50,000,000	Sixth " " ..	875,000
	2.00	50,000,000	Seventh " " ..	1,000,000
	2.25	50,000,000	Eighth " " ..	1,125,000
Maximum	2.50	50,000,000	Highest " " ..	1,250,000
		$450,000,000		$6,750,000

Connecticut utilizes the ranking technique, although it has a 2.7 percent ceiling (no reductions, however, unless Fund's assets exceed benefits paid for last two calendar years). The charging operation, however, has been reduced to its simplest terms.[37]

Each employer is assigned a merit rating index which is determined by dividing total payrolls of the past three completed calendar years by the sum of the weekly benefit rates of compensated claimants. These are arranged in inverse order of magnitude, thirteen equal payroll parts taken and rates ranging from 1.5 to 2.7 per cent assigned at 0.1 intervals.

5. The Benefit Ratio

One other device for measuring employer experience which has found its way into the statute books is the benefit ratio. Since each benefit must be charged, there is no particular gain in administrative simplicity over the "reserve ratio." The two laws (Michigan and Utah) which use this type of measurement do, however, provide for Fund protection devices that are calculated to insure the maintenance of an average contribution rate that is consistent with a safe level of reserves.

Michigan's law establishes twelve categories of employer's experience indices, and assigns to each category a base rate which ranges from a low of 1.0 per cent to a high of 4.0 per cent through 0.3 per cent intervals. Each year, however, the Agency computes a State Experience Factor similar to that described under the Texas plan, and adjusts the base rates upward or downward by 0.1 per cent increments or decrements, according to the State Factor.

Utah, like Minnesota and Connecticut, resorts to ranking of employers, using the benefit ratio for that purpose. Commerce Clearing House in setting forth how 1941 rates will be determined, explains the procedure as follows:[38]

"After each subject employer's benefit ratio for a given calendar year has been computed, his contribution rate for the succeeding calendar year is determined in the following manner: the sum of each subject employer's annual payrolls for the two years preceding the calendar year for which his benefits ratio was computed, in the example above this was 1940, is listed in the order of the magnitude of his benefit ratio, beginning with the employer whose benefit ratio was lowest. The total of such payrolls is then computed and subtotals are taken at points nearest to 12%, 24% and 76% of the total. The employers are then classified into groups A, B, C, and D, according to whether their payrolls appear in the list immediately preceding the sub-total taken at 12%, 24%, 76% or the total, respectively. Each employer's contribution rate will be determined upon the basis of his group classification for the preceding calendar year, and his rate will be the percent which appears in the following table

[37] See, however, article by David Pinsky, Claims Examiner, entitled, "Merit Rating: Charging Separations," Monthly Bulletin of Placement and Unemployment Compensation Division, November 1940, Connecticut Department of Labor and Factory Inspection.

[38] Commerce Clearing House. Unemployment Insurance Service, P. 47031.

in Column II on the line in which in Column I appears his group classification with respect to the preceding calendar year:

Column I Group Classification	Column II Contribution Rate
A	1.7%
B	2.2%
C	2.7%
D	3.2%

"To illustrate, assume that there were only eight subject employers in Utah and that the sums of their annual payrolls for 1939 and 1940, and their benefit ratios for the year 1941 were as follows

Employer	Benefit Ratio for 1941	Sum of Annual Payrolls for 1939 and 1940
S	.003571	$ 98,000
T	.0073	110,000
U	.008255	200,000
V	.00902	50,000
W	.0352	10,000
X	.037083	168,000
Y	.115384	130,000
Z	.200616	146,000
	Total.....	$912,000

"The employers in the above example are listed in the order of the magnitude of their benefit ratios, with the employer having the lowest ratio at the top of the list. The total of the payrolls is $912,000. The sub-total nearest to 12% of such total, without dividing the sum of any employer's annual payroll, is $98,000, the amount of the payroll of employer S. According to the above table, S would be in group A, and would therefore have a contribution rate of 1.7% for 1942. The sub-total nearest to 24% of the total is $208,000, the sum of the payrolls of S and T. Therefore T would fall in group B and have a contribution rate for the year 1942 of 2.2%. The sub-total nearest to 76% of the total is $636,000, the sum of the payrolls of S, T, U, V, W, and X. The four employers last named, U, V, W, and X, would be classified in group C and have a contribution rate for 1942 of 2.7%. The remaining employers, Y and Z, would fall in Group D and have a contribution rate of 3.2% for 1942. However, if either Y or Z could show to the satisfaction of the Commission that his experience in the previous calendar year was due to fire or catastrophe or an act of civil or military authority, directly affecting the place in which the individuals were employed by him, this rate would not be more than 2.7%.

6. Charging of Employer's Accounts

So many references have been made to the problem of charging accounts that some discussion of the complexities of this phase of experience rating is warranted.

Since the charging of an experience rating account is the States' method of allocating the cost of unemployment, the entire theory of experience rating must stand or fall on the justice with which this charge is made, and in no other sections of the States' laws do we find such diversity.

The immediate cause of a claimant's unemployment is the employer who has just dismissed him. If the worker has had a record of many years with this employer no problems as to the justice of the benefit wage charges nor the method of making them can arise. Unfortunately not all cases are so simple and in attempting to allocate responsibility the States have set up "charge-back" procedures that are frequently unjust and usually complex.

A few of the questions that arise when a claimant reports two or more employers are:

1. Should the charges be made against the most recent employer when the employment has been of a temporary nature? Or if the employment has been of reasonably long duration is it just to charge benefits to the most recent employer based in wages paid by the base period employer or employers?

2. If, on the other hand, the account of the base period employer is charged, it is just to thus allocate the costs to a firm whose record of employment is a good one? In fact, the claimant in question may have resigned from the employment provided by the base-employer to accept a job with the employer who dismissed him.

3. If there have been a number of employers, in what order should the accounts be charged and what limits should be placed on total charges?

4. If the employer normally chargeable is not subject to the law, whose account can be charged?

5. In case of concurrent employment, how should charges be allocated if an employer bases both positions simultaneously?

Of the states with experience rating, 32 have systems involving the charging of benefits paid, 7 charge benefit wages and 1 charges compensable separations.

Only one State, New Hampshire, charges all benefits to the most recent employer, although it seems like the most reasonable method if experience rating is to be used to penalize the immediate cause of the worker's unemployment. This method, however, can be extremely unjust as some New Hampshire employers have learned. If for example, a firm offers temporary employment, even though it be for only a day, it will incur liability for all the benefits paid to those it has given the employment.

To remedy this situation five States (Arizona, New Mexico, North Dakota, Tennessee, and West Virginia) charge the most recent employer only if the claimant has earned from him during the lag and current quarters an amount equal to his possible benefits. Otherwise the next most recent employer's account is also liable. Nine States (Colorado, Florida, Kansas, Kentucky, Missouri, New Jersey, Ohio, Oklahoma, and South Carolina) charge all recent employers in inverse chronological order of the claimant's employment. Wisconsin also charges accounts in inverse chronological order but stops liability 68 weeks after the end of a workers employment.

Michigan has a unique plan. "One-third of the benefits paid to an individual during a benefit year shall be charged against the experience records of his last regular employer and the remainder of his benefits shall be charged against the employer in whose employ the claimant earned the largest amount of wages during his base period." In this instance a regular employer is one who has paid wages of at least $150 during or after the last quarter of the base period.

All of these States attempt to make recency of employment the method of determining liability for charges. An entirely different approach is taken by States who charge the accounts of those employers who provided employment during the base period. Six States (Arkansas, Indiana, Iowa, Nebraska, South Dakota, and Vermont) charge the most recent employers in the base period in inverse chronological order and three States, California, North Carolina and Utah, and the territory of Hawaii, charge the accounts of all base period employers simultaneously in proportion to the wages paid.

All of the States using the "Texas" plan, or a variant of it, charge the benefit wages to the accounts of all base

period employers, and Connecticut charges the weekly benefit rate to "all employers by whom the claimant was employed during 4 calendar weeks over an 8-week period preceding the first compensable week in each spell of unemployment."[39]

Five States omitted instructions as to charging methods from their Acts or specified that the agency was to provide a method. Curiously enough, Maine and Mississippi provided charging procedure but did not enact experience rating.

Section III

EXPERIENCE RATING IN PRACTICE

1. Present Status and General Observation of the Operation of Experience Rating in the States

Discussion of experience rating is generally kept on the plane of theory, because as yet there is an insufficient body of facts on the effects of its operations. Wisconsin began decreases in contribution rates in 1938, and increases in 1939; Indiana, Nebraska, and South Dakota made their provisions effective in January of 1940. While thirteen more states are using or intend to use the experience of prior years in setting the rates for 1941, and while other states have been charging benefits, benefit wages, or separations, there is so little information available on the results of these operations that adequate presentation is impossible at this time. The following table[1] gives the effective dates embodied in the various state laws, although in a few instances it is questionable whether the Social Security Board will find the dates or the provisions acceptable under the provisions of the Federal Internal Revenue Code.

January 1938 (1 law)	January 1940 (3 laws)	January 1941 (11 laws)	July 1941 (2 laws)	January 1942 (19 laws)	July 1942 (2 laws)	January 1943 (1 law)
Wisconsin	Indiana	Arizona	Connecticut	Alaska	Hawaii	Illinois
	Nebraska	California	Oregon	Arkansas	Dist. of Columbia	
	S. Dakota	Kentucky		Colorado		
		Minnesota		Delaware		
		N. Hampshire		Florida		
		Tennessee		Iowa		
		Texas		Kansas		
		Utah		Massachusetts		
		Vermont		Michigan		
		Virginia		Missouri		
		W. Virginia		Nevada		
				New Jersey		
				New Mexico		
				N. Carolina		
				N. Dakota		
				Ohio		
				Oklahoma		
				S. Carolina		
				Wyoming		

The difficulty does not end here. The majority of the states, with or without experience rating, operate on pooled-fund laws, while the four states in which rate reductions were effective during 1940 are all using either employer-reserve systems or modifications of it which permit partial pooling. Furthermore, other provisions in the law of these states and differences in their coverage and industrial structure so complicate analysis that the results are not only inconclusive but, unless carefully used, apt to be misleading.

Several general observations may be made on the comparison of data derived from the experiences of different states:

1. A favorable or unfavorable record of experience may be secured under any type of experience rating by the provision in the law of eligibility rules or a benefit structure designed to keep either a low or high average of benefits.
2. If a state law provides for special treatment of seasonal or casual labor, or permits the employer to give "learners" special status, the resulting rate distribution will be biased.
3. "Escape" clauses which exempt employers from charges under unusual circumstances (acts of God, civil or military authority, exhaustion of a mine or quarry, etc.) can result in the low rates of contribution even though a substantial amount of benefits have been paid.
4. Since the employer's payroll is the denominator used in the computation of the reserve ratios which measure the right to rate reduction in many states, under certain limited circumstances it is possible for an account to yield a lower contribution rate merely because a decline in payroll has not been compensated for by an increase in chargeable benefits.
5. Some of the employer-reserve laws permit voluntary contributions to accounts by employers. This device permits the employer to avoid the higher rate that he may have expected.
6. A narrow or broad coverage of a law will be reflected both in the distribution of rates and on the effect of experience rating on the state's Fund. Thus, a state covering firms having only eight or more employes may be expected to find experience rating easier to administer and somewhat more predictable than a state with a coverage of one or more. Business turn-

[39] Comparison of State Unemployment Compensation Laws, Employment Security Memo No. 8, Social Security Board.

[1] From "Comparison of State Unemployment Compensation Laws as of October 1, 1940," Employment Security Memorandum No. 8, Revised October 1940, published by the Social Security Board. (Alabama has passed a provision for experience rating, but must wait for a proclamation from the Governor to make it effective.)

over tends to be greater among small business, and while Federal law forbids rate reduction until one or three years' experience[2] with new employers, there is no way of protecting against the loss of expected income that is entailed because of employers going completely out of business, even though they have enjoyed rate reductions during earlier periods. (This, too, can have the effect of giving a fictitious appearance of stability to the employment provided by small employers.)

7. Experience rating for most states will be effective for the first time during a period of rapidly rising production and markets. In addition, the experience of 1939 and 1940 has been favorable. The latter will be reflected in the statistics in lower average rates, while the former will probably result in reserves that will remain high in spite of rate reduction. It must be remembered that exactly the reverse can be expected in periods of general economic decline.
8. Most important of all is the danger that lurks in industrial comparisons between states. Statistical compilation necessitates broad and uniform classification. Generally such classes are created by grouping all those who produce products of the same type or perform services that are roughly comparable. "Food Products," however, includes entirely different kinds of activity and runs the gamut from the small seasonal canning establishment to the giant industrialized brewery or sugar refinery; "Personal Service" includes barber shops, shoe repair shops, and power laundries; and the general class "Machinery (Except Electrical)" ranges from the manufacture of carbon paper and office equipment to the production of machine tools and steam turbines. Before attempting to compare or contrast data for the same major industrial class in different states, it is essential that the competent lines of business be known.

2. Wisconsin's Law and Experience

Only one state, Wisconsin, has had a long enough experience to permit any safe analysis, and the results of these analyses cannot be too safely used in interpreting the experience of other states.

More than three years before the passage of the Federal Social Security Act, Wisconsin concluded a decade of "Huber bills"[3] by passage of America's first Unemployment Compensation Act. Although its principles have been recognized in whole or in part in the laws of other states, and although the original Wisconsin Act has been amended repeatedly, it is still in some respect unique.

The claimant's weekly benefit rate is based on 50 per cent of an average wage computed from his actual earnings during a specified period. The period is generally the preceding calendar year, but may in some instances differ. Base year and benefit years are not mentioned as such, and the potential duration of a claimant's benefit period depends on the worker's accumulation of "credit weeks" of employment. Partial unemployment benefits are paid. Eligibility depends on prior employment of at least four weeks by an employer. (The employer's account remains liable to charges for 68 weeks after a worker becomes unemployed.) If the worker qualified in this respect, and has waited two weeks, he may receive between $6.00[4] and $15.00 per week until he has received benefits which account for a total of one-third of a week's benefit for each credit week of employment from previous liable employers. He may not, however, receive any benefits from the account of an employer from whom he has voluntarily quit, or who has dismissed him for cause, and any credit weeks he may have earned from earlier employers cannot be honored until an additional waiting period has been served. Salaried workers who have earned $200 or more per month for ten months of the year, students, and cannery workers, are disqualified; and those whose unemployment is the result of a labor dispute are disqualified for the duration of the dispute. If unemployment is caused by "act of God, fire, or other catastrophe, or act of civil or military authority," no benefits are paid or can be chargeable.

Benefits are paid from and charged against the individual employer's reserve account, although earnings of the Fund are pooled to provide for workers who are eligible for benefits from exhausted accounts. The employer's contribution rate is determined by the status of his account at the end of the last calendar year, the measure being the reserve percentage.[5] If the employer finds it to his advantage to make voluntary contributions to improve his balance he is permitted to do so. Rate determination is as follows:[6]

"An employer may pay contributions at a reduced rate only if (1) benefits have been payable from his account throughout the preceding calendar year, and (2) the net reserve of his account amounts to not less than five times the largest amount of benefits charged against the account in any one of the three preceding calendar years, and (3) the reserve percentage of his account at least equals 7½%. If these conditions are fulfilled, the employer's rate will be 1% if the reserve percentage is at least 7½% but less than 10%; if the percentage is 10% or more, no contributions will be required for the year. "If an employer's reserve percentage is 2½% or more, but less than 4%, his contribution rate for the next year is 3.2%; if his reserve percentage is less than 2½% his next year's contribution rate is 3.7%; if his account is overdrawn his rate is 4%. In no case, however, may an employer's rate exceed by more than 0.5% whichever is the higher of the standard rate of 2.7% and the rate which applied to him at the beginning of the previous year. Beginning December 31, 1939, if the fund's 'balancing account' at the close of any month has a net unencumbered balance of less than $500.000, each employer from whose account benefits have been potentially payable during the three previous calendar years will be liable for an additional contribution in an amount equal to 1% of the account's positive net reserve at the end of the previous calendar year."

The law permitted reduction of contribution rates for 1938, but few employers could qualify. This was because the lower contribution rates of the early years of Wisconsin's program made it impossible for most employers to accumulate a reserve equal to 7.5 per cent of their 1937 payroll. In fact, the agency notified employers late in 1937 that "reduced rates are not likely to apply to Wisconsin employers until 1939." Nevertheless 114 accounts were judged to be eligible for rate change; 84 for 1.0 per cent, and 30 for complete exemption. Dr. Myers comments on the reasons behind many of the reductions:[7]

[2] Depending on the type of unemployment-compensation fund.

[3] Designed in accordance with the beliefs of Professor John R. Commons. The "Groves Bill" which became law in 1932 differed somewhat from these bills.

[4] "An eligible employe whose weekly benefit rate from a given employer is less than $6.00 shall ..... be paid benefits from that employer's account for his weeks of total or part-total unemployment as if his weekly benefit rate with respect to such employer were $6.00 ....." Charges to the employer's account, however, are made at the lower rate. (Paragraphs 108.5 and 108.6, Wisconsin Unemployment Reserves and Compensation Act.)

[5] See Section II.

[6] Summarized from Wisconsin Law by Commerce Clearing House, Unemployment Insurance Service—p. 52,003. Edition of July 14, 1939. (Citations to Law included in summary have been omitted from the above quotation.)

[7] "Employment Stabilization and the Wisconsin Act," page 126 et seq. By Dr. Charles A. Myers, Social Security Board. See, however, Dr. Myers' qualifying footnote.

"Although employers were first eligible to qualify for reduced contribution rates in 1938, as a matter of fact relatively few could do so. This was because an employer with a constant annual payroll, and no benefit payments, would not secure a reserve percentage equal to 7.5 percent or more until the end of 1938. Most employers had a higher payroll in 1937 (a good year) than in preceding years, which made the reserve percentage (based upon the preceding year's payroll) even smaller. In view of this, the Unemployment Compensation Department announced in November 1937 that it would not compute the reserve percentage for any account as of December 31, 1937, unless an employer submitted figures to show a probable percentage of 7.5 or more.

"Subsequently, a number of employers offered evidence of the necessary percentages, and after careful audits by the department, 114 were eventually approved for reduced contribution rates in 1938. Thirty firms had reserve percentages of 10 percent or more, or enough to exempt them from contributions (the zero rate), while 84 others qualified for the 1 percent rate.

"Most of these firms, however, qualified for lower 1938 contribution rates because of unusual circumstances. Only one of the 30-zero rate firms had really stable employment, and even then it had to make a large voluntary contribution to attain a reserve percentage of 10 percent. The usual case in the group was one in which the company had a smaller payroll in 1937 than in 1934-1936, when the reserve fund was being built up This occurred when operations were curtailed in the second half of 1936 or in 1937 because of less work (as in the case of contractors) or because the company sold part of its business to another firm. In the latter cases, some of the company's employes were often hired by the succeeding firm, although the reserve fund accumulated during previous years was retained.

"For example, an ice cream company sold a plant to another firm, leaving only a small 1937 payroll. The reserve built up on the higher payrolls of earlier years than equalled or exceeded 10 percent of this small 1937 payroll. In another case, a bulk gasoline dealer with retail gas stations sold the stations to another company which hired many of the same employes. While the reserve fund remained intact, a smaller 1937 payroll and highest reserve percentage resulted. Again, a construction company had a large amount of work in 1934 and 1935, building up its reserve and having no benefits charged. In 1937, fewer contracts were secured, and the payroll was small enough to make the necessary reserve percentage possible."

The rate changes in 1939 and 1940 were more significant. Furthermore, amendments were provided which made rate changes less dependent on unusual payroll values. Instead of using the preceding year as had been done in computing 1938 rates, the average of two years was used for 1939 and the average of three years for 1940.[8]

During the first of these years, 2,431 accounts, approximately 34.2 per cent of the 7,113 which had been liable for benefits for one year, were eligible for a reduction to 1.0 per cent; 3,637, or 51.1 per cent, remained at 2.7 per cent, and 656, or 9.2 per cent were required to pay 3.2 per cent. There were 389, or 5.5 per cent, of the experience rating accounts exempt from any contribution whatsover. In 1940, there were 8,121 accounts that had the per cent rate, 32.1 per cent remained at the standard 2.7 per cent rate; while 4.7 per cent wer raised to a rate of 3.2 per cent, and 2.8 per cent to a rate of 3.7 per cent.

DISTRIBUTION OF WISCONSIN EXPERIENCE-RATING ACCOUNTS[a] BY 1939 AND 1940 CONTRIBUTION RATES

Contributions Rate (Per cent)	1940 Number of Accounts	1940 Per cent	1939 Number of Accounts	1939 Per cent
Total	7,113	100.0	8,121	100.0
0	389	5.5	903	11.1
1.0	2,431	34.2	4,009	49.4
2.7	3,637	51.1	2,603	32.0
3.2	656	9.2	381	4.7
3.7	...	...	225	2.8

[a] Does not include all covered employers. In 1940, for example, approximately 3,600 employers were not eligible for rate change and paid 2.7 percent.

In line with expectations, there are considerable differences in rate distribution between industries for both 1939 and 1940. During 1939, for example, 54.1 per cent of apparel enterprises, 45.0 per cent of firms manufacturing transportation equipment, and 61.3 per cent of the "automobile industry" paid 3.2 per cent of payroll, the maximum rate for that year. On the other hand no accounts in Printing and Publishing, Communications, Utilities, Finance or Insurance showed advances in rates, while substantial proportions showed reductions. In 1940 all industrial classes showed an improvement in the proportion obtaining lower rates, but again those industries which seemed blessed with a natural stability showed the greater number of accounts with rate reduction. Balancing this, to a degree, were records of the 381 firms whose rates were set at 3.2 per cent and the 335 firms whose rates were advanced to the 3.7 per cent limit permitted for 1940. Construction, Manufacturing, Trade, and Amusement Places contributed the bulk of the penalty contribution.[9]

Since there has been much discussion of the relative effect of experience rating on "large" and "small" business, some presentation of Wisconsin's experience may

DISTRIBUTION OF WISCONSIN EXPERIENCE-RATING ACCOUNTS BY MAJOR INDUSTRY CLASS AND 1940 CONTRIBUTION RATES[a]

[b] See note on preceding table.

year of benefit-paying experience required by law. Of this number, 11.1 per cent were exempt from contributions, 49.4 per cent were eligible for reduction to a 1.0 be of value. Wisconsin's Law provided for a gradual broadening of coverage by specifying that employers of eight or more were to be covered in 1937, employers of seven (during 1937 or thereafter) were added during 1938,

[8] Further providing that an amount equal to half of the employer's largest payroll for any year shall be used as the payroll for any one year in which the actual payroll was less than such amount.

[9] Detailed industry tables are appended to this section.

and employers of six (during 1938 or thereafter) were added during 1939. Since one year's experience is necessary before an account is eligible for rate reduction, 1940 is the first year in which a distribution can be made which is comparable with any similar distribution for the future.

Although a greater proporton of those employers with payrolls of less than $5000 were exempt from payment than was true for any other group, this was partly offset by the smaller proportion eligible for a reduction to 1.0 per cent and the larger proportion paying the penalty rates of 3.2 per cent and 3.7 per cent.

At the other extreme of the payroll distribution were those employers paying wages of $1,000,000 or more. Although they comprise but slightly more than one per cent of the total—only 96 employers—the distribution of their contribution rates is of substantial importance to the Wisconsin Fund. Not only did 68 employers qualify for rate reduction, but in addition they exhibited as a class relatively fewer penalty rates, only 4 employers being affected.

DISTRIBUTION OF WISCONSIN EXPERIENCE-RATING ACCOUNTS BY SIZE OF PAYROLL AND 1940 CONTRIBUTION RATES [a]

Size of Payroll	Exper.[b] Rating Accts.	Accounts Paying at Specified Rate									
		Zero		1.0%		2.7%		3.2%		3.7%

[a] Based on reports to Social Security Board.

[b] See note on preceding table.

Between these extremes lie the great majority of Wisconsin employers. The greatest concentration is in the three lower payroll classes—$5,000 to $9,999, $10,000 to $19,999, and $20,000 to $29,999—which include more than three-fifths of the total. For these three classes approximately the same proportions received the zero rate, although the percentage with a rate of either zero or 1.0 per cent of payroll increased with increases in payroll total. Employers paying between $30,000 and $39,999 and those paying $40,000 to $49,999 in payroll show larger proportions of rate reductions, larger proportions paying penalty interest, but smaller proportions with the zero rate.

For those large employers who pay more than $50,000 but less than $1,000,000 the significant items are that they exhibit the lowest proportions with zero rates and, with the exception of those paying less than $5,000, the highest proportions with penalty rates. In this class are 1,627 employers of whom 117 paid nothing, 919 paid 1.0 per cent, 436 paid the normal 2.7 per cent, 91 paid a penalty rate of 3.2 per cent, and 64 paid a penalty rate of 3.7 per cent.

Thus, while all classes showed the majority receiving lower rates, the proportion of employers receiving rate reductions tended to increase with the size of payroll, and the proportion receiving rate increases tended to decrease with size of payroll up to $20,000, and thereafter to increase, excepting the very highest payroll class. The proportion continuing to pay 2.7 per cent tended to decrease with increasing payrolls.

Wisconsin's experience, while longer than that of any other state, is still not long enough to warrant sweeping generalizations either as to the theoretical soundness or unsoundness of experience rating, or as to the probable long-run effect on employers of various industries and sizes. Two attitudes are expressed in the following. Paul Raushenbush, director of the Wisconsin Unemployment Compensation Department, speaking before the First Wisconsin Conference on "Steadier Jobs," on June 21, 1940,[10] said:

"Here in Wisconsin we have at least seen the beginnings of what experience rating can do to promote steadier jobs by recognizing the performance of individual employers. It is all very well for some of its critics to say, 'Most employers can't do anything much about steadier employment. Why bother with experience rating?' But the fact that 4,900 employers in this state are now paying reduced rates cannot be explained away merely by saying 'They just naturally operated steadily.' We know that isn't true of several thousand of them. Their industries are not just 'naturals.' They don't just have a rate reduction drop into their laps. True, not all Wisconsin employers have made the kind of successful efforts you have heard about today. Many of them, however are giving increasing attention to the problem."

In the December 1940 issue of "Social Security," Abraham Epstein and his Associates of the American Association for Social Security,[11] say:

"Thus, while Wisconsin cannot prove genuine stabilization of work even after almost three years of merit rating, there can no longer be any doubt of the anti-labor and anti-social effects of this scheme, effects which the American Association for Social Security has constantly predicted and warned against—avoidance of benefits, low benefits, reduced employment, increased underemployment, lowered wages, new threats to our social structure through the reduction of temporary jobs, and a myriad of other anti-labor practices. With these results becoming more evident every day the position of the Wisconsin organized labor forces, which have continued to stand by their state system in defiance of the strong opposition to merit rating by the American Federation of Labor and the C. I. O., is becoming more and more untenable. In view of the growing opposition on the part of industry and labor throughout the country, Wisconsin labor cannot much longer continue to support a program which, in the name of 'progressivism,' sacrifices the basic rights and welfare of the State's workers."

3. The Laws of Kentucky and Nebraska, and the Experience of Nebraska

The State of Wisconsin has the purest form of the employer-reserve type of law now on the statute books. While other states have (to a lesser degree) utilized the employer-reserve, none of them have been as consistent

[10] "The First Wisconsin Conference on Steadier Jobs," June 21, 1940, printed by the Industrial Commission of Wisconsin, 137 E. Wilson St., Madison, Wisconsin.

[11] "Social Security," December 1940—Vol. XIV No. 9.

in their adherence to the theory behind it. Most closely related are the laws of Kentucky and Nebraska, both of which credit contribution and debit benefits to the individual accounts of employers. In Nebraska, as in Wisconsin, the only monies pooled are the earnings of the Fund, but Kentucky supplements the "pool" with employe contributions. Both states provide for decreases in contribution rates when the individual's reserve ratio warrants it, Nebraska by means of a "disbursement ratio" devised by the Agency, and Kentucky by an automatic statutory schedule. Kentucky assesses a penalty rate when the employer's reserve falls below 3 per cent, while Nebraska's maximum is fixed at 2.7 per cent of payroll. Both States use a base period to define weekly benefit amount, qualification, and maximum potential benefits, and provide for an individual benefit year which runs for 52 weeks from the first valid claim; and, although definitions differ, both pay benefits for partial unemployment. Benefit rates are based on high-quarter earnings in Nebraska and on annual earnings in Kentucky. Disqualifications for varying periods can occur in both states because of voluntary leaving of employment, discharges for misconduct, and labor disputes; while Nebraska disqualifies students, women who have lost employment because of marriage, worker suspended because of misconduct, and salaried workers receiving $200 or more per month.

Since Kentucky amended its law during 1940 postponing rate reductions for six months, the rate distribution of Nebraska is the only available guide to the experience under this type of law. At the end of the first quarter of 1940 Nebraska had 3,333 experience-rating accounts. Of these, 69 per cent failed to qualify for rate reduction, continuing to pay 2.7 per cent of payroll, while 31 per cent obtained lower rates varying from 2.5 per cent to the minimum of 1.0 per cent Of those who did receive rate reductions, the great majority (27 per cent of the total) paid at the lowest rate.

An important factor in obtaining reductions for many Nebraska employers was the amount refunded by the Federal Government under the provisions of House of Representatives Bill No 8174 By legislative enactment this $1,330,836, representing 1936 contributions, was credited to the individual accounts of employers For many accounts these credits made rate reductions possible.[12] Commenting on this, a release of the Bureau of Employment Security[13] says:

"The only direction given to the Commissioner by the statute, in connection with the determination of individual rates, is that:

'contributions shall only be such a per centum, not exceeding 2.7 per cent, as the commissioner finds necessary to maintain such reserve account at 7½ per cent of his annual payroll during the ensuing calendar year.'

"Upon the basis of the statutory requirement that the employer's reserve balance must be equal to 7.5 per cent of his annual payroll, it would appear that very few employers would be able to qualify for rate reductions. This arises from the fact that only 1.8 per cent of taxable wages had been collected for 1937, and 2.7 per cent in each of the years 1938 and 1939, with the result that a total of 7.2 per cent of payrolls has been credited to employers' accounts for these 3 years (assuming that payrolls were uniform for the period). This reserve balance of 7.2 per cent necessarily fell short of meeting the minimum 7.5 per cent reserve requirement set forth in the statute. By enactment of legislation during 1939, which made it possible to credit to an employer's reserve account his contributions under the Federal act for the year 1936, this deficiency was overcome. If an employer's account could be credited with an additional .9 per cent of payroll, this would permit the possible accumulation of a reserve balance of 8.1 per cent of his annual payroll."

[a] Based on reports to Social Security Board.

[b] Does not include all covered employers. On January 1, 1940 there were 3,410 employers. Some of them, however, had not been covered long enough to qualify.

More than half of the experience-rating accounts were for employers engaged in wholesale or retail trade, the state's most important type of enterprise. Generally speaking, the experience of employers in these groups was favorable, more than one-third obtaining reductions. Nebraska's rate structure, however, partially obscures the record, since overdrawn accounts remain at 2.7 per cent and employers with perfect records can receive no reduction beyond 1.0 per cent. For example, 678 accounts in wholesale and retail trade had no benefits charged against them, only 9.1 per cent of the aggregate contributions for the group was paid out in benefits, and but 2.4 per cent of the accounts were overdrawn. "Finance, Insurance, and Real Estate" and "Transportation, Communication, and Utilities" were the only industrial groups with better records.

[12] Another provision of the Nebraska law that made reduced rates possible for 172 employers was that permitting voluntary contributions to accounts. This device was used more by employers with large payrolls than by the less substantial contributors.

[13] "Experience Rating in Nebraska—1940," Released by the Bureau of Employment Security in December 1940.

PERCENTAGE OF NEBRASKA ACCOUNTS OBTAINING REDUCED RATES FOR 1940, WITH NO BENEFITS CHARGED, WITH OVERDRAWN ACCOUNTS, AND RATIOS OF BENEFITS TO CONTRIBUTIONS, BY PRINCIPAL INDUSTRY DIVISIONS[14]

2.5 per cent rate. The balance, 225, paid 2.7 per cent. Included in the latter group were a large proportion of the state's overdrawn accounts, 11.5 per cent of all construction accounts being overdrawn.

In discussing Wisconsin it was noted that a relatively greater proportion of employers with "large" payrolls received rate reductions than did employers with "small" payrolls. This tendency is even more marked in Nebraska. Excepting the employers with average annual payrolls less than $5,000, 35 per cent of whom earned reduced rates,[15] there is a direct relationship between payroll size and percentage of accounts with reduced rates.

An inspection of the last column in the above table is evidence that opportunity for rate reduction seems to go hand and hand with magnitude of payroll, the highest percentages of rate decreases—with one exception—was exhibited by the group of employers having payrolls of $1,000,000 and more, the lowest by the group of employers meeting payrolls of from $5,000 to $10,000 a year. The one exception mentioned is the group labeled in the table as "Unclassified," which includes those accounts whose business history was less than the three years needed to compute the average annual payroll.

[a] Based on reports made to Social Security Board.
[b] Does not include all covered employers. On January 1, 1940 there were 3,410 employers. Some of them, however, had not been covered long enough to qualify.

Slightly more than one-quarter of Nebraska's manufacturers obtained the 1.0 per cent rate, better than two-thirds remained at 2.7 per cent, and the balance paid at one of the three intermediate rates. Nebraska's manufacturing is largely concentrated in food products industries, and includes highly seasonal canning as well as more stable enterprises such as baking and dairy products. Approximately one-fourth of the state's covered workers are employed in manufacturing enterprises. Other measures of significance are the proportion of accounts with no charges (22.7 per cent) and the proportion of accounts overdrawn (1.9 per cent).

As in Wisconsin, the seasonal and fluctuating employment provided by the construction industry is reflected in the low percentage of accounts receiving rate reductions. Of the 252 employers engaged in construction work only 20 qualified for the 1.0 per cent rate, 4 for the 1.5 per cent rate. 1 for the 2.0 per cent rate and 2 for the

[14] "Experience Rating in Nebraska—1940," Released by the Bureau of Employment Security in December, 1940.

4. The First Year of Rate Reduction in Indiana and South Dakota

Four states have effected compromises between the employer-reserve and the pooled fund by crediting part of the employer's contribution to individual accounts and part to a pool. North Carolina credits 75 percent to the employer, South Dakota 5/6 (83-1/3 percent), Vermont all amounts in excess of 0.54 percent of the average annual payroll, and Indiana all amounts in excess of 0.135 percent of the average annual payroll—the balance in each case being pooled. Two of these states provided for rate changes in 1940—South Dakota and Indiana—both states having automatic experience-rating provisions. Indiana rates can vary from a minimum of 0.135 percent to a penalty rate of 3.7 percent; South Dakota provides no rates greater than 2.7 percent, but still permit reductions to zero.

[15] This group will always tend to show a relatively better record, since it is generally the more stable small employers who stay in business. A larger enterprise will weather a bad year and will appear in the table with a high contribution rate; a small employer is apt to disappear altogether, leaving only the "better" accounts.

While benefit and eligibility provisions, disqualifying clauses, and methods of charging have just as important an influence on experience rating in these states as in those already discussed, the effect of the partial pooling of contributions has been to make qualifying for rate change more difficult during the early years. Indiana calculates reserves by crediting 5/6 (83-1/3 percent) of the contributions for 1936, 1937, and 1938, and all other past contributions in excess of 0.135 percent of annual payroll, minus all benefits, divided by payroll for preceding year. South Dakota subtracts benefits from 5/6 (83-1/3 percent) of past contributions, and divides by the preceding annual payroll. In both laws the reserve must be equal to at least five times the largest amount of benefits charged in any one of the three preceding years, while the reserve ratio must be at least 7.5 percent before rate reduction is possible.

[b] Does not include all covered employers. See notes on earlier tables.

Because of this, the industry and size classifications of accounts have little meaning as yet. In Indiana the accounts remaining at a rate of 2.7 percent of payroll were in excess of 95 percent for all industrial classes except for "Agriculture, Forestry, and Fishing," where the number of accounts is too small to give a percentage significance. Substantially the same thing is true for South Dakota.

One important provision of the Federal Internal Revenue Code was evidently overlooked by some of the legislators who drafted partial pool provisions. L. A. Pietz, chief accountant for the South Dakota Unemployment Compensation Commission, discusses its effect as follows:

"The Federal tax under Title IX is 3% of the payroll, but the law permits a credit to 90% of that tax for payments made to a state or for credits allowed by a state under an approved experience rating plan.

"It was supposed that when the contribution rate was reduced to 2% an additional credit of .7% would be granted on the Federal tax, and likewise when the contribution to the state was not required, a full credit of 2.7% would be allowed.

"However, Section 1602 (b) (2) of the Internal Revenue Code, as amended in 1940, provides: 'If the Board finds that under the law of a single state more than one type of fund or account is maintained and reduced rate of contributions to more than one type of fund or account were allowable with respect to any taxable year . . . the Board shall on December 31 of such taxable year certify to the Secretary of the Treasury only those provisions of the State law pursuant to which reduced rates of contributions were allowable . . . under conditions fulfilling the requirements of subsection (a) . . . .'

"Subsection (a) provides: 'A taxpayer shall be allowed an additional credit . . . with respect to any reduced rate of contributions permitted by a state law, only if the Board finds that under such law (1) No reduced rate of contributions to a pooled fund or to a partially pooled fund is permitted to a person . . . except on the basis of his experience with respect to unemployment or other factors bearing a direct relation to unemployment risk . . . .'

"Our law is classified as a partially pooled fund. The condition of the individual employer's reserve account under our present law is the sole basis for determining reduced contribution rates. No consideration is given to the contributions to, withdrawals from, or the condition of the pooled account of the Agency, in determining reduced rates. That portion of the reduced contributions which would have gone into the pooled fund (one-sixth) therefore fails to comply with the provisions of the Federal Act, and only five-sixths of the reduced rate will be allowed as additional credit.

"For each $1,000 of an employer's payroll, the result will be as follows:

Rate	State Contribution	Credit Allowed by State	Credit Allowed by Federal	Federal Tax
2.7%	$27.00	None	$27.00	$3.00
2%	20.00	$7.00	5.83	4.17
1%	10.00	17.00	14.17	5.83
None	None	27.00	22.50	7.50

"From this it would be seen that the Federal Tax increases from .3% to .75% for the reason that credit is allowed by the Federal Government only on the reduction in contributions to the reserve account." [16]

[16] "Unemployment Compensation Comments," December 1940, "Pooled-Reserve Account With Experience Rating versus Pooled Fund With Experience Rating," by L. A. Pietz, chief accountant, Unemployment Compensation Commission of South Dakota.

5. Experience Rating—States Reducing Rates in 1941

The year 1941 marks the addition of several more states to the list of those which have effective experience-rating provisions in their unemployment compensation laws. The unemployment laws of the following additional states provides for reduced contribution rates in 1941:

Alabama	Oregon
Arizona	Tennessee
California	**Texas
*Connecticut	**Utah
Kentucky	*Vermont
Minnesota	*Virginia
*New Hampshire	*West Virginia

Of these additional states, however, only those marked by an asterisk have had their merit-rating provisions definitely approved by the Social Security Board so as to enable the employers with reduced rates to obtain the additional credit provided by the Federal Act. The ex-

perience-rating provisions of Texas and Utah (marked by a double asterisk) have been held not to comply with the additional credit provisions of the Federal law because of failure, to require three years of individual benefit payment experience. Further amendment will be necessary in these states. The other jurisdictions either have not yet submitted their laws or are awaiting approval. In Alabama, the Legislature has passed a provision, but it cannot become effective until proclaimed by the Governor.

6. The Significance to Pennsylvania of the Experience of Other States

The experiences of those states included in the foregoing discussion, and the limited data received from other jurisdictions whether or not included in this report, raise the question whether a cautious approach to experience rating in unemployment compensation is desirable. Certainly many employers in those states in which rate changes have become effective must have been surprised to find that anticipated reductions did not materialize, while many others probably have fared better than they expected. In Wisconsin there is evidence to show that some stabilization of employment was actually effected, but there is also evidence to show that accidental factors or inclusion in a sheltered industry were just as effective in obtaining lower contribution rates. Larger enterprises seem to have a relatively better opportunity for rate reduction than smaller ones, although more must be known regarding the industries of the larger employers before generalization is conclusive. In the states studied the lower average rate has meant a reduction in income which has been compensated for in part by rigid eligibility and benefit provisions which operate to cut down state outgo. Construction, Heavy Manufacturing Industries, and Mining tend to have a larger percentage of employers subject to higher rates, while Finance, Insurance, Trade, and Utilities have uniformly higher percentages of employers subject to low rates.

Pennsylvania differs decidedly from the states examined in its industrial composition, its size, in the number of employers covered, and in its unemployment-compensation law. While its Fund has grown, the rate of growth has not been excessive.[18] Only recently has the balance between collections and payments been tipped heavily to the collection side.

If experience rating were adopted with a maximum rate of 2.7 percent, it should be done with full recognition that any large-scale industrial depression would hit Pennsylvania with even greater force than it would affect most other states, therefore adequate safety and protective measures should be adopted. Mining, steel manufacturing, construction, and other types of enterprise frequently marked by wide employment fluctuations comprise a more important place in Pennsylvania's economy than they do in the industrial structures of most other states.

The only available quantitive data on Pennsylvania that are directly relevant to the problem of experience rating take the form of comparisons for relatively short periods,[19] of benefits to contributions by industry and an analysis of the swings from high to low have marked the employment patterns of many lines of manufacturing enterprise. Tables are appended which present both types of information.

* Sample studies have yielded sufficient data to estimate the industrial distribution of benefits paid to workers during the six-month periods Jan.-June 1940 and April-Sept. 1940. In each case these estimates were related to estimated contributions made during the preceding six-month period. Because of the short periods covered the data should be used with caution. Comparison of these results is not advised due to the overlapping quarters.

† Benefit payments to employes in this industry comprised such a negligible percentage of the sample that reliable estimation is impossible.

TABLE III

CUMULATIVE COLLECTIONS AND INTEREST, CUMULATIVE BENEFIT PAYMENTS TO THE UNEMPLOYED AND BALANCES IN UNEMPLOYMENT COMPENSATION FUNDS, BY STATES AND TERRITORIES, AT THE END OF THE YEARS 1937, 1938, 1939, AND ON JUNE 30, 1940*

* Based on totals published by the Social Security Board. Fund balances for Connecticut on December 31, 1939 and June 30, 1940 do not include funds transferred to the Railroad Unemployment Compensation Account. Similar adjustments have been made for the June 30, 1940 balances reported for South Carolina and Vermont.

Table IV

EMPLOYMENT FLUCTUATIONS IN MAJOR PENNSYLVANIA MANUFACTURING INDUSTRIES DURING THE PAST SEVEN YEARS

1933 to December 1940 inclusive

(Base 1923-25 = 100)

Industry	Highest Monthly Index of Employment	Lowest Monthly Index of Employment	Percent Decrease from High to Low
All Manufacturing	92.3	58.1	34.2
Iron and Steel	92.6	41.0	50.7
Blast Furnaces	62.4	29.0	33.4
Steel Works and Rolling Mills	88.1	40.0	48.1
Iron and Steel Forgings	96.7	31.9	64.8
Structural Iron and Steel	119.9	54.5	65.4

ANNUAL REPORT OF THE DELAWARE RIVER JOINT COMMISSION OF PENNSYLVANIA AND NEW JERSEY

To the Honorable: The Legislatures of the Commonwealth of Pennsylvania and the State of New Jersey

The Delaware River Joint Commission respectfully reports that 1940 was the busiest in the fourteen-year history of the Delaware River Bridge.

A new record of 14,185,835 vehicles was set, a gain of 807,600 or 6.03 per cent over the total in 1939. Gross receipts were $3,340,113.26 and expenses, $562,054.96 leaving a net of $2,778,058.30. The bulk of the business was passenger automobiles and light trucks. Of these, 11,361,240 paid the straight twenty-cent toll and 1,405,595 commutation tickets on a fifteen-cent basis were collected. Compared with 1939 figures, the use of commutation ticket books increased by 13.43 per cent against 5.37 per cent for those paying the twenty-cent toll. The number of trucks using the bridge showed a gratifying gain. The rise in the number of buses was less than one-half per cent.

The rail transit line across the bridge was patronized by 4,655,937 passengers compared with 4,340,095 in 1939. This increase was 7.28 per cent.

Total cross-river traffic in the vicinity of Philadelphia divided among the Delaware River Bridge, the Tacony-Palmyra Bridge and the ferries at Market and South Streets, Philadelphia increased by 5.65 per cent. Of the total traffic, the Tacony-Palmyra Bridge received 11.88 per cent and the Delaware River Bridge, 76.23 per cent. One of the ferries showed a 2.35 per cent increase and the other, .94 per cent.

The traffic gain in 1940 again brought forcibly and painfully to the motoring public an acute consciousness of the inadequacy of the bridge approaches in both Philadelphia and Camden. During the year, a number of conferences were held for the purpose of trying to get some relief from the congestion. In the first full year of bridge operation, 1927, total bridge traffic was 8,593,207. Although this annual total has risen to more than 14,000,000 cars, facilities for distribution of traffic have not been improved with the exception of cutting off a portion of the sidewalk at Seventh and Penn Streets, Camden in June, 1940.

A resume of bridge operation since the opening on July 1, 1926 is as follows:

	Traffic	Gross Receipts	Expenses	Net Receipts
1940	14,185,835	$3,340,113.26	$562,054.96	$2,778,058.30
1939	13,378,235	3,155,259.05	526,546.73	2,628,712.32
1938	12,820,338	3,028,489.36	581,672.32	2,445,817.04
1937	12,293,129	2,969,423.52	452,810.03	2,516,613.49
1936	10,614,475	3,067,967.87	461,260.86	2,606,707.01
1935	10,156,929	2,899,563.25	441,146.59	2,458,416.66
1934	9,981,615	2,846,116.26	429,412.63	2,416,703.63
1933	9,886,705	2,820,018.71	418,516.46	2,401,502.25
1932	10,804,557	3,091,576.91	456,397.44	2,635,179.47
1931	12,308,225	3,479,337.93	430,856.72	3,048,981.21
1930	12,285,359	3,517,730.64	500,597.53	3,017,133.11
1929	11,615,609	3,331,754.46	398,496.20	2,933,258.26
1928	9,725,470	2,827,786.83	378,590.01	2,449,196.82
1927	8,593,201	2,435,784.40	346,678.59	2,093,921.89
1926 (½ year)	4,137,674	1,110,108.38	158,109.47	946,682.83

Despite the fact that 76,501 vehicles crossed on Sunday, July 21 creating a new record for 24-hour travel, the capacity of the bridge has not been seriously threatened. The Commission has plans to add two lanes to the roadway by paving the spaces originally set apart for trolleys but this improvement is not deemed necessary at this time. When access to the bridge in both Philadelphia and Camden is made easier, the widening of the bridge itself will be undertaken.

One of the problems which confronted the Commission at the end of 1940 was the continued operation of the rail transit line. Opening on June 6, 1936, this operates between Haddon Avenue and Carman Street, Camden and Eighth and Market Streets, Philadelphia. While the line was being built, the public expected that the subway from Eighth and Market Streets to Eighteenth and Locust Streets, Philadelphia would be immediately completed so that passengers from New Jersey might reach the business center of Philadelphia without interchange of cars. This has not yet been done. The public, so far, has shown an unmistakable preference to travel across the bridge by bus. Completion of the Locust Street subway, undoubtedly, would make the rail transit line more attractive.

The four-year lease of the line by the Philadelphia Transportation Company expires June 30, 1941. The Company reports a loss from operation and a decision not to renew the lease upon the present terms. The attitude of the Company was set forth on October 15, 1940 in the following letter:

CLASSIFICATION OF VEHICLES

PHILADELPHIA TRANSPORTATION COMPANY

Broad and Locust Streets

Philadelphia

October 15, 1940

Delaware River Joint Commission,
Administration Building,
Camden, New Jersey.

Dear Sirs:

I am sending you this letter at the direction of the Board of Directors of Philadelphia Transportation Company in order that there may be taken up for consideration, in ample time, the various aspects of the problem of continuing operation of the high speed electric rail transit line across the Delaware River Bridge after the expiration, on June 30, 1941, of the current term of the Bridge Line Lease entered into under date of February 15, 1935.

The operation as conducted under that lease involves the running of trains from the eastern terminus of this line at Carman Street and Haddon Avenue, Camden, across the bridge to a connection at 8th and Race Streets with the Broad Street Subway System of the City of Philadelphia, of which this Company is operating lessee, and thence over that system to a final station at 8th and Market Streets and an actual western terminus of operation at 8th and Ranstead Streets. We have more than four full years of experience of this operation as above described and in the course of this experience have incurred, after paying to your Commission 2½c per passenger carried, a loss averaging $144,790 per annum. While the most careful economies have been put into effect, the loss is currently running at a rate close to $100,000 per annum. The current four-year term of the present lease runs to June 30, 1941, and prior to the end of February 1941 it will be necessary for our Company to give the four months' notice of election to terminate operations under the present agreement at the end of the current term.

We are satisfied, as we are sure your Commission is, that the continued operation of the through line as at present constructed and under the terms of the present lease would entail continued money loss to our Company. We are conscious that the service afforded by the line is a convenience to those passengers who make use of it. However, those passengers represent less than 1% of the total passengers of our system.

With the industrial revival in Philadelphia incident to the progress of the defense program, we are facing presently and in the future a period of need for additional service on our system generally, which unfortunately coincides with a period of increasing costs of material and supplies. The $100,000 per year which we are losing in operating the Bridge Line for the benefit of the 1% of our passengers who use it could furnish upwards of 300,000 car miles of additional service for the 99% of our passengers using the balance of our system. If the problem be viewed from a capital rather than from an operating standpoint, the aggregate loss which we have thus far sustained in our operation of the Bridge Line, amounting as it does to nearly $600,000, would, if the money had been differently applied, have made possible the purchase for our system generally of thirty additional modern trolley cars or sixty full-sized modern buses and thus would have augmented to a marked degree the progress of our modernization program which is so essential for the welfare of the entire community which we serve.

There have been in past years unofficial discussions and independent studies of methods which might be adopted to make the Bridge Line pay, all of which, however, involve as essential components additional expenditures for increased facilities not only at the New Jersey end of the line but also for the completion and equipping by the City of Philadelphia of the Locust Street Subway at least as far west as 16th and Locust Streets. It is the conviction of our Company that these studies should be given a formal status and should be diligently pursued through joint action of all parties in interest, but it is obvious that the task of completing an agreed plan, the finding of public funds necessary to provide the additional facilities, and of thereafter completing the necessary construction work will require considerable time even with the utmost expedition and the fullest cooperation. Our Company would like to join in such studies and is ready and willing to lend its full cooperation to the final consummation of such a program. However, separate and apart from this obvious necessity for all interested parties to work toward a permanent solution of this problem, the Board of Directors of our Company is willing to try to find some way, even if only on a temporary basis, to preserve the operation of the Bridge Line as at present operated if such can be done without financial loss to our Company. Furthermore, it seems to us that this immediately pressing problem is one for which, if solution can be found, it will be found primarily through negotiations between your Commission and this Company, the parties to the present lease.

We will be glad to take this matter up with your Board at any convenient time and place you may indicate.

Very truly yours,

R. T. SENTER,
President.

The subject has been given serious consideration by the Transportation Committee of the Commission. At the close of the year, negotiations between the Company and the Transportation Committee were still in progress.

Operation of the bridge in 1940 was facilitated by the installation of two-way radio communication between the bridge police cars and the Administration Building. Motorcycles of the bridge police were equipped to receive messages. In addition, a receiving set was placed at the Philadelphia end of the bridge. The Federal Communications Commission approved our application and assigned a radio wave frequency of 35,900 kilocycles. The station is known as WAOM. In obtaining this radio system, the Commission is indebted to Colonel Mark O. Kimberling, Superintendent of the New Jersey State Police, for his invaluable cooperation. The Delaware River Bridge is the first in the country to be equipped with two-way radio service. One of the features of installation is the placing of antennae on the top of the Camden Tower, 384 feet above the Delaware River.

During the year, the bridge was kept under careful daily inspection. Numerous minor repairs were made by our Maintenance Bureau. The structure is in excellent condition.

Forty-six accidents on the bridge were reported in 1940; sixty-seven arrests were made; twenty-nine fires in vehicles were extinguished and two persons committed suicide by jumping from the structure.

At the end of 1940, Commission bonds outstanding totaled $36,745,000 callable on September 1, 1943 at 105 at which time refinancing at a lower coupon rate than the 4¼ per cent now prevailing should be obtainable. On April 15, 1940, the Commission renewed $10,000,000 All Risk and $500,000 Use and Occupancy insurance for a three-year period.

The financial history of the bridge is summarized as follows:

Cost of Bridge including Land and Approaches		$37,085,100.71
Expended for:		
High-Speed Rail Transit Line (net)	$ 8,209,487.90	
Maintenance Building (net)	73,331.15	
Improvements to Toll Houses	138,953.75	
		8,421,772.80
Total		$45,506,873.51
Total Interest Paid		22,440,905.30
Total Expenses Paid		6,870,544.19
Total Costs Paid		$74,818,323.30
Total Receipts	$44,376,446.28	
Bonds issued	$38,120,000.00	
Less: Bonds redeemed	1,375,000.00	
Bonds Outstanding	36,745,000.00	
Receipts and Borrowed Capital		81,121,446.28
Receipts and Borrowed Capital in Excess of Total Costs		$ 6,303,122.98
Invested as follow:		
Cash on hand	$ 750,283.18	
Bond funds	5,524,203.28	
Prepared insurance unexpired	28,636.52	
		$ 6,303,122.98

The Commission reports with regret the death, on June 26, 1940, of Ralph Modjeski who served as Chief Engineer and Chairman of the Board of Engineers during construction of the Delaware River Bridge.

On January 1, 1940, the Honorable Robert E. Lamberton took office as Mayor of Philadelphia succeeding the Honorable George Connell and thereby became a member, ex officio, of the Commission. This was the only change in Commission membership during the year.

A cordial invitation is extended the members of the Legislatures of the Commonwealth of Pennsylvania and the State of New Jersey to inspect the Delaware River Bridge at any time convenient to them.

Respectfully submitted,

Surplus:		
Non-Operating	$ 2,832,326.34	
Operating: Balance of Surplus accumulated in operations from 7/1/31 to 12/31/40	10,854,627.58	
Total Surplus		13,686,953.92
		$50,969,342.94

STATEMENT OF OPERATIONS FOR CALENDAR YEAR ENDED DECEMBER 31, 1940

Receipts:		
Tolls and Rentals		$3,220,976.87
High-Speed Line Fares		115,388.95
Interest received on bank balances		3,747.44
Gross Operating Receipts		$3,340,113.26
Expenses (Operating):		
Salaries	$414,377.74	
Equipment	13,869.24	
Supplies	11,970.97	
Repairs	24,747.67	
Miscellaneous (including Light and Heat)	74,040.72	
Insurance (All Risk, Income and Group)	23,048.52	562,054.96
Gross Operating Income		$2,778,058.30
Interest on Bonds Accrued: (1/1 to 12/31/40)		1,571,100.76
Net Operating Income		$1,206,957.54
Non-Operating Net Income:		
Sinking Fund—less net premium paid of $12,385.63	$ 13,483.71	
Surplus Fund—less net premium paid of $12,957.03	108,072.49	121,556.20
Net Income		$1,328,513.74

SOURCES OF FUNDS PROVIDED AND THEIR APPLICATION DURING CALENDAR YEAR ENDED DECEMBER 31, 1940

Funds were provided from the following sources:			
Net Income for year (per operating schedule)			$1,328,513.74
Elimination of Accruals:			
Add: decrease in Income Accruals at 12-31-40:			
Sinking Fund Income	$ 771.75		
Adjustment of Expense Accruals at 12-31-40	2,987.47		
Deduct: Increase in Income Accruals at 12-31-40:			
Surplus Fund Income	1,736.07		
Bonded Debt Interest accrued at 12-31-39 (payable 3-1-40)	$ 524,931.67		
Less: Bonded Debt Interest accrued at 12-31-40 (payable 3-1-41)	320,554.17	204,377.50	202,354.35
Total Funds Provided			$1,126,159.39
Which Were Applied and Accounted for as Follows:			
Funded Debt: Bonds redeemed	$ 309,000.00		
Sinking Fund: Investments Acquired (net)	25,000.00		
Net Sinking Fund	$ 334,000.00		
Bond Surplus Fund: Investments Acquired	675,000.00		
Total Bonded Debt Funds		$1,009,000.00	
All Risk and Income Insurance prepaid (net)		23,289.61	
Total Funds Applied			$1,032,289.61
Excess of Cash Receipts over Disbursements			$ 93,869.78
Cash Balance—Beginning of Year (1-1-40)			754,829.18
Cash Balance—End of Year (12-31-40)			$ 848,698.96

Composed of:

	Beginning	End
Operating Funds	$ 710,831.39	$ 750,283.18
Sinking Fund	43,997.79	50,909.53
Bond Surplus Fund		47,506.25
	$ 754,929.18	$ 848,698.96

SCHEDULE OF TOLL RATES

Passenger Automobile	$0.20
Motor Truck—7,000 pounds gross weight (pneumatic tires)	.20

(Commutation toll books containing 40 tickets for the passage of passenger automobiles and trucks of 7,000 pounds gross weight are sold for $6.00 for use within 30 days after purchase. Unused tickets will not be redeemed. Use of tickets will be limited to the vehicle identified by the license number recorded on the book cover.)

Motor Truck:	
7,000 pounds gross weight (solid rubber tires)	.35
7,001 to 18,000 pounds (pneumatic tires)	.40
(solid rubber tires)	.50
18,001 to 26,000 pounds (pneumatic tires)	.65
(solid rubber tires)	.75
26,001 to 28,000 pounds gross weight (pneumatic tires)	.90
(Solid rubber-tired vehicles in excess of 26,000 pounds by special permit only.)	
28,001 to 36,000 pounds gross weight (pneumatic tires)	1.00
Passenger Bus (single-deck)	.50
(double-deck)	.75
Horse-drawn vehicles (1 or 2 horses)	.30
(3 or more horses)	.40
Horse and Rider	.15
Led horse, mule, sow, hog or sheep	.20
Motorcycle	.10
One-wheel trailer	.10

"Gross Weight" is the combined weight of the vehicle and its maximum allowable load. Loads in excess of 26,000 pounds (gross weight) when permitted, shall be charged $0.25 per 2,000 pounds, or portion thereof, of such load in excess of 26,000 pounds in addition to the above tolls with the exception of pneumatic-tired vehicles of 28,001 to 36,000 pounds upon which a toll of $1.00 shall be charged.

No vehicle and load of a combined weight exceeding 80,000 pounds permitted to cross the bridge.

No motor truck or tractor with metal tires allowed on the bridge.

REPORT OF THE SPECIAL COMMISSION OF THE GENERAL ASSEMBLY TO INVESTIGATE REGULATION OF MILK IN PENNSYLVANIA

To the General Assembly of Pennsylvania:

During the Session of 1939 the General Assembly constituted the Attorney General, the Secretary of Agriculture and the Secretary of Health a Special Commission. In the words of the Resolution, this Commission was "authorized and requested to immediately undertake a thorough study and investigation of all the problems entering into the regulation of milk as affecting the producer, the distributor, and the consumer and make a report to the next Regular or Special Session of the General Assembly of the results of such study and investigation, which report shall be accompanied by drafts of any legislation they deem necessary and proper to be enacted in order to properly regulate said milk industry and properly protect the consumer."

Your Commission has devoted a great deal of time and effort to fulfill this request. It has held a number of hearings and has received numerous briefs offering many helpful suggestions. The problem of handling milk appears at first to be a comparatively simple one. Your Commission found, however, that the problem was not simple and the answer not easy to find. Some idea of the diversity of opinion as to the manner of "solving the milk problem" will be found in the fact that of the twenty-one briefs submitted by various groups of producers of milk, dealers in milk and consumers of milk no two briefs contained identical suggestions, and few of them agreed on many principles. The Commission found that in order to attempt to solve the problem before it, it was necessary to understand the history of milk regulation in Pennsylvania.

Throughout the United States the general health depends to a great extent upon an adequate supply of pure and wholesome milk. The production and distribution of milk is one of the great industries of the United States. In only a handful of states is more milk produced or consumed than in Pennsylvania. In 1938 there were only nineteen counties throughout the United States that produced more milk than Lancaster County, Pennsylvania. Milk is the chief source of the farmer's cash income in Pennsylvania, as well as generally throughout the country.

Your Commission found that the milk problem as it exists today, is essentially a farmer's problem. The inhabitants of Pennsylvania are today receiving a sufficient supply of pure and wholesome milk. Pennsylvania consumers have enjoyed uninterrupted service in receiving their daily milk and have received it at prices no higher, and in many instances lower, than the prices paid by consumers of milk in the states surrounding Pennsylvania. Indeed, to the consumer it must be hard to realize that there is a serious milk problem, for within recent years there has been no epidemic of milk-borne diseases, no interruption of service by reason of inadequate facilities of milk dealers, and no lack of milk because of milk strikes or insufficient production by milk producers.

With the milk dealer, there is a problem of complying with the laws relating to public health and milk control. Regulations of milk dealers must be strict enough to safeguard health and protect milk producers. Your Commission has found that public health is well guarded at the present time, but that certain additional measures are necessary to protect producers in their transactions with milk dealers. In many parts of Pennsylvania there is serious duplication of plants and equipment, which, if increased, will require further regulation at some future date.

When your Commission considered and inquired into the condition of the farmers of Pennsylvania, however, an acute milk problem became apparent. If the public is to enjoy uninterrupted service of this commodity that it needs, the producer must have some assurance that his time and effort and care do not go unrewarded. It is here that the history of the handling of milk shows a situation that is burdensome to some milk farmers and which requires some help on the part of the General Assembly.

A century ago, when our population was small and largely scattered, milk was obtained either directly from farmers or from small dealers who delivered the milk from the farmers. With the growth of our cities and the consequent necessity of obtaining milk from greater distances, sanitary precautions became increasingly necessary to protect the health of concentrated populations. Increased sanitary measures have meant greater protection of the public health. But as health requirements became more and more strict, the number of farmers who could comply with them became smaller and smaller. Increasingly the farmer has found himself relying upon the milk dealer to take the milk, pasteurize it, bottle it, and deliver it to the consumer.

Because the farmer was compelled to send his milk to dealers as fast as it was produced in order that a favorable market be found for it, it was inevitable that a certain amount of tension would exist between the farmers and the dealers. The dealers were business men whose aim was to buy as cheaply as possible, in order to sell reasonably and make a profit. The farmer found himself unable to keep his milk at the farm if he was to realize a fair price for it. If the milk dealer did not pay as much as the farmer needed to produce milk, the farmer was critical of the dealer and hard-pressed to meet his obligations.

At first milk was sold to the dealer by volume. Questions arose as to whether dealers were paying for all the milk that they received. These disputes gradually led to payment for milk by weight rather than by volume.

The richness of milk became increasingly important. Milk dealers insisted on having rich milk. Milk producers insisted that they be paid their extra costs for extra butterfat. While the butterfat contents of milk varies with breeds of cattle it also varies with individual cattle, and with individual cattle varies according to the manner in which they are cared for and fed. The problem of the richness of milk led to a system of paying for milk based upon weight and butterfat contents.

These matters all found their place in laws as they developed. In 1911 the Act of June 8 (P. L. 712) forbade the sale of milk containing added water or milk from which part of the butterfat had been removed, or milk that did not contain as much as 3¼% butterfat.

The Act of May 6, 1925, P. L. 541, as amended in 1927

and 1929, provided standard methods of testing the amount of butterfat in milk and required milk dealers to furnish producers with statements as to the butterfat contents of their milk. It is now incorporated in Article VI of the Milk Control Law.

The Act of May 2, 1929, P. L. 1229, provided regulations for milk dealers in the handling of milk at their plants. This Act was superseded by the Act of July 2, 1935, P. L. 589. It requires milk dealers to obtain a permit from the Secretary of Health before selling milk or milk products within this Commonwealth. Rigid health requirements are provided for the handling of milk at processing and bottling plants. Stringent requirements surround the production and handling of raw milk. The manner of preparing pasteurized milk and milk products is fully prescribed.

During the 1920's, the lot of the milk farmer became increasingly difficult, but he was able to meet his difficulties by improved production methods until the depression following 1929. During, 1930, 1931, and 1932, the milk producers' lot became so acute that it was apparent that legislative help would be required to prevent the destruction of milk farming. The classification system of paying for milk did not solve the producers' problem of meeting the depression. With the market for milk products a buyers' market, the farmer was forced to accept woefully inadequate prices for "surplus" milk, that is, milk used in manufacturing. Pennsylvania farmers were not alone in this experience. Milk producers throughout the country had similar experiences. Farmers who had previously disposed of their milk at manufacturing plants tried to turn their milk over to milk dealers serving milk to the public. As a result, farmers supplying the public with milk to be consumed as such also received inadequate returns.

On January 2, 1934, the Milk Control Board Law was passed as an emergency aid to milk producers. It was amended and continued in force on April 30, 1935. In 1937 it was embodied in the Milk Control Law, which continues in force at the present time and makes price-fixing and the licensing and bonding of milk dealers permanent legislation. Producers in many instances have not been satisfied with the results obtained under the Milk Control Law. Your Commission has therefore given special attention to determining what part of the Milk Control Law, if any, should be retained, or what part, if any, should be discarded. Your Commission has found that there are several conditions inherent in the handling of milk at the present time that make practical regulation difficult:

1. Minimum prices to be paid producers for milk used in manufacturing food products cannot be substantially higher than the amount paid for such milk in mid-western states where production costs are considerably lower for many producers. If minimum prices for this milk were raised considerably, consumers of milk products would buy milk products shipped in from other states or milk dealers would buy milk from other states to manufacture milk products. The result would be loss of all Pennsylvania markets for milk for manufacturing.

2. The amount of milk that the public will consume in fluid form remains almost constant, so that there is little hope of manufacturing milk finding its way into channels of fluid distribution.

3. In the parts of Pennsylvania near the borders of the State, Pennsylvania milk farmers often find their fluid milk markets upset by milk being obtained from neighboring states for fluid consumption. Lack of state control over these sources of supply as in the case of milk used for manufacturing makes the producers' situation precarious. Neighboring states probably experience similar difficulties.

4. If consumers of milk are required to pay enough for bottled milk to make up too great a loss on surplus milk used for manufacturing, consumers will be unduly burdened by a requirement to pay more than in fairness they should.

5. Milk producers cannot hold onto milk to await favorable markets. Milk is highly perishable and must be marketed immediately after production in order to receive a market in any way favorable. Once milk sours, its market is limited to that for butter-making. Milk used for making butter commands a price controlled by the market value of butter.

6. The milk producer is unable profitably to handle milk cattle and equipment otherwise than in producing milk. Once having established a herd of milk cattle, the producer is unable to cease being a milk producer without serious loss. Milk cattle have little value for butchering. Milk equipment is scarcely usable elsewhere.

7. Milk producers have been unnecessarily increasing their herds beyond the number of cattle required to supply fluid milk for the public, and have created a surplus of milk that can only be used in manufacturing milk products.

Certain groups of producers and certain groups of dealers before the advent of milk control legislation had formulated several plans for improving the lot of the milk farmer. They are useful in large measure in milk control legislation. One of these was a plan of equalization. It was used to a large extent by cooperative associations of milk producers. Under the plan of voluntary equalization the cooperative markets the milk of a large number of farmers to a number of milk dealers. When the cooperative receives payment from the dealers it equalizes the payments to the producers in such a way that each producer receives the same amount for the same quantity and quality of milk. Equalization is used under milk control laws to enable farmers supplying fluid milk during scarce periods of the year to enjoy the fluid milk market the remainder of the year.

Another idea that was used by producers and dealers was the base-rating plan. Under this plan a milk dealer estimated his future requirements of fluid milk and then pro-rated these requirements among his producers according to their past production. Producers received top price for an amount of milk equal to their base amount. If they produced more than their base amount they could only receive manufacturing milk prices for this extra milk. This plan is desirable today and if properly administered would go a long way towards solving some of the most difficult problems of the milk producers.

A third plan is the classification of milk according to the use to which it is put and payment for it accordingly. This plan was adopted by the milk industry in order that any producer who wished to sell milk could sell it and get for it the highest available price. This system has so pervaded the whole milk industry that today prices

of milk used in manufacturing food products are paid almost entirely according to this system. The fallacy of the system, however, is that there is no relationship between the use to which milk is put and the most of producing that milk unless it is all produced for one particular purpose. The farmer who meets today's high sanitary requirements for fluid milk finds little consolation in knowing that for the amount of milk that is not consumed in fluid form he will receive a price satisfactory for less carefully prepared milk.

Your Commission has prepared corrections that it deems essential to the workability of the Milk Control Law. To this report is appended a proposed draft of necessary amendments to that act.

Your Commission therefore respectfully submits the following recommendations:

1. That the "consignment" loophole be removed from the various sections of the Milk Control Law of April 28, 1937, P. L. 417, affected thereby.

2. That the bonding of milk dealers for the protection of producers be made more effective by providing for sufficient increase in the amounts of bonds where necessary.

3. That witnesses before the Milk Control Commission be required to testify fully, within constitutional limitations.

4. That protection be afforded milk producers who testify before the Milk Control Commission to prevent their losing their milk markets by the action of unscrupulous dealers.

5. That provisions be set forth in the Milk Control Law for equalizing minimum prices to be paid producers where equalization is necessary.

6. That the Milk Control Law be amended sufficiently to enable the Milk Control Commission to effectively aid milk producers, as specifically set forth in the proposed draft of amendments attached hereto.

7. That none of the powers of municipalities or of the state to require sanitary milk production be abrogated but that effort be made by the various municipalities, the State Department of Health and the State Department of Agriculture to work out uniform sanitary regulations that will adequately protect the public health without creating unnecessary burdens upon milk producers.

8. That the Milk Control Commission increase its inspection of milk dealers' plants, auditing of milk dealers' books and checking of payments by milk dealers to producers in order to guarantee producers that they are being paid fairly and according to the orders of the Milk Control Commission.

9. That the Milk Control Commission establish some base-rating method whereby milk producers can be assured of receiving a certain amount representing cost of production plus a reasonable return for a specific quantity of milk and under which the option to produce surplus milk, for which lower prices must necessarily be paid, shall rest entirely with the producers themselves.

10. That all milk producers be encouraged to unite through cooperative agricultural associations and corporations, for the purpose of improving their economic condition by developing favorable markets and profitably disposing of surplus milk.

Respectfully submitted,

THE SPECIAL COMMISSION OF THE GENERAL ASSEMBLY TO INVESTIGATE THE REGULATION OF MILK IN PENNSYLVANIA

JOHN H. LIGHT,
Secretary of Agriculture, Chairman.

JOHN J. SHAW,
Secretary of Health, Member.

CLAUDE T. RENO,
Attorney General, Member.

March 24, 1941.

An Act to amend the act, and to add sections one thousand and seven, one thousand and eight, and one thousand and nine to the act approved the twenty-eighth day of April, one thousand nine hundred thirty-seven (P. L. 417), entitled "An act relating to milk and the products thereof; creating a Milk Control Commission; establishing its jurisdiction, powers and duties; regulating the production, transportation, manufacturing, processing, storage, distribution, delivery and sale of milk and certain products thereof; providing for the licensing of milk dealers and the payment of fees therefor; requiring milk dealers to file bonds to secure payment for milk to producers and certain milk dealers; authorizing the holding of hearings and the issuance of subpoenas by the commission; conferring jurisdiction upon courts to punish contempts and to prohibit violations of this act and of rules, regulations and orders of the commission; authorizing the commission to adopt rules, regulations and orders, and to enter into interstate and Federal compacts; requiring persons who weigh, measure, sample or test milk to procure permits or certificates, to take examinations, to pay fees therefor, to furnish certain notices, records and statements, and to use certain methods of weighing, measuring, sampling and testing; authorizing the commission to examine the business, papers and premises of milk dealers and producers, requiring the keeping of records and the filing of reports by milk dealers, and permitting with limitations, the use of information obtained thereby; authorizing the commission to fix prices for milk and certain milk products subject to the approval of the Governor, and conferring certain powers upon the Governor with respect thereto; providing for appeals to the courts from decisions of the commission, and for the burden of proof upon such appeals; prescribing penalties, fines and imprisonment for violations of this act and rules, regulations and orders of the commission; defining perjury; defining remedies; repealing legislation supplied and superseded by this act, and saving rights, duties and proceedings thereunder; and making appropriations," by providing that milk delivered or made available or handled or received on consignment or otherwise shall be subject to all the provisions of said act including price-fixing and bonding; enabling the ratification of the act or order of one commissioner by another member of the commission; authorizing special agents or examiners to conduct hearings on behalf of the commission; requiring witnesses to testify fully at hearings; enabling certain officers, employes and agents to administer oaths; enabling commissioners to issue appropriate process beyond the Commonwealth, providing the method and effect of service of certain orders and the posting of rules, regulations and certain orders; enabling employes of the commission to mark or stamp for identification books and papers that they have inspected; providing for action with milk control agencies of other states and of the United States in holding hearings and promulgating and enforcing orders; requiring milk dealers to be licensed; stating grounds for refusal, sus-

pension, revocation or refusal or transfer of licenses; stating the effect of service by registered mail when the addressee refuses to accept or receive such mail; enlarging requirements of milk dealers to file bonds to secure payment to producers and certain milk dealers; prescribing the effective date and term of such bonds and providing for their release; providing for the increase or decrease of the amounts of bonds; prescribing the effect of orders of the commission relating to licenses in suits on bonds; providing for payment to those entitled thereto of moneys in the hands of the commission owing to milk dealers or producers; increasing the scope of regulation of subdealers; clarifying the requisites of orders fixing prices for milk providing that all provisions of price-fixing orders shall be presumed valid and placing the burden of proving invalidity on those asserting the same; prescribing the result of partial invalidity of any order; providing for the classification of prices to be paid producers for milk; authorizing the establishment of equalization pools for the equalizing, averaging or blending of minimum prices to be paid producers; requiring reports from dealers and producers for establishing equalized prices; providing for a reasonable check-off to cover the expense of administering equalization pools, for the establishing of basic averages, and providing a reserve to cover amounts owing by defaulting milk dealers; establishing "The Milk Equalization Fund;" prescribing the method of establishing equalization pools; providing for certain differentials from equalized prices; defining violations of orders of the commission fixing prices; making milk dealers responsible for acts of directors, officers, agents or other persons acting for or on behalf of them; prescribing procedure on appeal from orders of the commission; prescribing the method of handling moneys in the Milk Control Fund; further regulating milk dealers and cooperative agricultural associations; further defining and prescribing penalties, defenses and remedies; and authorizing the commission to establish a base-rating price system, a system of classified prices, a system of equalizing or pooling minimum prices to be paid producers or any combination thereof.

The General Assembly of the Commonwealth of Pennsylvania hereby enacts as follows:

Section 1. That Section 103 of the Act approved the twenty-eighth day of April, one thousand nine hundred thirty-seven (P. L. 417), entitled "An Act Relating to milk and the products thereof; creating a Milk Control Commission; establishing its jurisdiction, powers and duties, regulating the production, transportation, manufacturing, processing, storage, distribution, delivery and sale of milk and certain products thereof; providing for the licensing of milk dealers and the payment of fees therefor; requiring milk dealers to file bonds to secure payment for milk to producers and certain milk dealers; authorizing the holding of hearings and the issuance of subpoenas by the commission; conferring jurisdiction upon courts to punish contempts and to prohibit violations of this act and of rules, regulations and orders of the commission; authorizing the commission to adopt rules, regulations and orders, and to enter into interstate and Federal compacts; requiring persons who weigh, measure, sample or test milk to procure permits or certificates, to take examinations, to pay fees therefor, to furnish certain notices, records and statements, and to use certain methods of weighing, measuring, sampling and testing; authorizing the commission to examine the business, papers and premises of milk dealers and producers, requiring the keeping of records and the filing of reports by milk dealers, and permitting, with limitations, the use of information obtained thereby; authorizing the commission to fix prices for milk and certain milk products subject to the approval of the Governor, and conferring certain powers upon the Governor with respect thereto; providing for appeals to the courts from decisions of the commission, and for the burden of proof upon such appeals; prescribing penalties, fines and imprisonment for violations of this act and rules, regulations and orders of the commission; defining perjury; defining remedies; repealing legislation supplied and superseded by this act, and saving rights, duties and proceedings thereunder; and making appropriations," is hereby amended to read as follows:

Section 103. Definitions; Construction.—The following terms shall be construed in this act to have the following meanings, except in those instances where the context clearly indicates otherwise:

"Books and records," "books" or "records" shall include all pertinent books, ledgers, journals, records, papers, memoranda, correspondence, vouchers, bills, receipts, cancelled checks, accounts, exhibits, photographs and other documents.

"Commission" means the State agency created by this act, to be known as the "Milk Control Commission."

"Consumer" means any person, including the United States of America and any instrumentality, agency, institution or representative thereof, and the Commonwealth of Pennsylvania and any county, city, borough, incorporated town or township therein and any subdivision, agency, institution or representative thereof [other than a milk dealer] who purchases, acquires or receives milk for consumption or use by himself or others otherwise than as a milk dealer.

"Cooperative" means a cooperative agricultural association or corporation of producers organized under the laws of this Commonwealth or of any other state and engaged in making collective sales or in the marketing of milk for producers under contract with it.

"Licensee" means a licensed milk dealer.

"Market" includes any county, city, borough, incorporated town, or township in the Commonwealth, or any two or more such counties, cities, boroughs, incorporated towns, or townships, or any portions thereof or any other land within the territorial limits of the Commonwealth designated by the commission as a marketing area.

"Milk" includes fluid milk and cream, fresh, sour or storage, skimmed milk, flavored milk or milk drink, buttermilk, ice cream mix, and condensed or concentrated whole or skimmed milk, except when contained in hermetically sealed cans.

"Milk dealer" means any person, including any store or subdealer, as hereinafter defined, who purchases or receives or handles on consignment or otherwise, milk within the Commonwealth, for sale, shipment, storage, processing or manufacture, within or without the Commonwealth, whether on behalf of himself or others or both. A producer who delivers milk to a milk dealer only shall not be deemed a milk dealer. A cooperative [agricultural association or corporation of producers of milk, organized under the laws of this Commonwealth or of any other state, and engaged in making collective sales of milk for producers under contract with it] shall not be deemed a milk dealer, but shall be deemed a producer: Provided, however, That if such [association or corporation] cooperative distributes milk within this Commonwealth to stores, as defined in this act, or to consumers, as defined in this act, it shall be deemed to be a milk dealer as to that part of its business, and shall be governed by the provisions of this act applicable thereto: And provided further, That such cooperative [agricultural association or corporation] shall be governed by the applicable provisions of this act as to the prices at which it sells, markets, or bargains to sell milk within this Commonwealth to milk dealers and others.

"Person" includes an individual, corporation, association, partnership, limited partnership, or other unincorporated enterprise owned or conducted by or on behalf of two or more individuals, or other persons, the Commonwealth of Pennsylvania, and any county, city, borough, incorporated town or township therein and any subdivision, agency, institution or representative thereof. Except as a consumer the United States of America or any instrumentality, agency, institution or representative thereof shall be considered a person only when engaged in private business and not when engaged in

carrying out any constitutional function of the government of the United States.

"Producer" means a person producing milk.

"Price" includes the amount paid or to be paid and the proceeds returned or to be returned, whether the transaction be one of purchase, sale, consignment, sale or return, accounting or otherwise.

"Store" includes a grocery store, hotel, restaurant, soda fountain, dairy products, store, or any similar mercantile establishment which sells or distributes milk.

"Subdealer" means any milk dealer handling milk within the Commonwealth, who sells all such milk to consumers or stores in the same containers as those in which he purchased it from other milk dealers.

Any reference in this act to quantity of milk shall be construed to include its whole milk equivalent.

Article or Section headings shall not be construed to affect in any manner the scope or meaning of any article or section of this act.

The singular shall be construed to include the plural. The masculine shall be construed to include the feminine, and the neuter, and conversely, the neuter shall be construed to include the masculine and the feminine.

Section 2. Section 201 of the said act is hereby amended to read as follows:

Section 201. Appointment and Terms of Members; Quorum.—There is hereby created an independent administrative commission to be known as the Milk Control Commission. The commission shall consist of three members nominated and appointed by the Governor, by and with the advice and consent of two-thirds of all the members of the Senate, for terms of six (6) years each, and until their successors shall have been appointed and qualified; except that the terms of the members first taking office shall expire May first, one thousand nine hundred thirty-nine, May first, one thousand nine hundred forty-one, and May first, one thousand nine hundred forty-three, respectively, as designated by the Governor at the time of appointment, and until their successors shall have been appointed and qualified.

The Governor shall designate one of the members of the commission as chairman. The chairman shall, when present, preside at all meetings, and in his absence a member designated by the chairman shall preside.

Two members of the commission shall constitute a quorum, and any action or order of the commission shall require the approval of at least two members; Provided, however, That nothing herein contained shall be construed to prevent the ratification by another commissioner or other commissioners of any action taken or order made on behalf of the commission by one of its members.

The Governor may remove any commissioner for inefficiency, neglect of duty or misconduct in office; Provided, That he is given a copy of the charges against him and an opportunity to be publicly heard in person or by counsel in his own defense upon not less than ten days' notice, and that the Governor file with the Department of State a complete statement of all charges made against such commissioner.

Section 3. Section 301 of the said act is hereby amended to read as follows:

Section 301. Regulation of Milk Industry.—The commission is hereby declared to be the instrumentality of the Commonwealth for the purpose of administering the provisions of this act and to execute the legislative intent herein expressed, and it is hereby vested with power to supervise, investigate and regulate the entire milk industry of this Commonwealth, including the production, transportation, disposal, manufacture of food products made from or with milk, processing, storage, distribution, delivery, handling, bailment, brokerage, consignment, purchase and sale of milk and milk products in this Commonwealth, and including the establishment of reasonable trade practices, systems of production control and marketing area committees in connection therewith: Provided, however, That nothing contained in this act shall be construed to alter, amend or repeal any of the laws of this Commonwealth relating to the regulations of public utilities, or to the public health or to the prevention of fraud and deception, except as herein otherwise specifically provided.

Section 4. Section 304 of the said act is hereby amended to read as follows:

Section 304. Hearings; Witness Fees; Privilege and Immunity.—The commission [or] any member thereof, or any special agent or examiner designated by the commission [may] shall hold such hearings, at the Capitol or elsewhere, as [it] the commission deems necessary or appropriate to carry out the provisions of this act; Provided, however, That all hearings for the fixing of prices for milk shall be held before one or more members of the commission. Each witness required to attend before the commission [or] any member thereof or any such special agent or examiner, under the provisions of this section, shall be entitled to the fees and mileage customarily paid to witnesses in the courts of Dauphin County. All such hearings [of the commission] shall be governed by such rules, regulations and orders as shall be adopted and prescribed by the commission.

No person shall be excused from testifying or from producing any books and records at any hearing before the commission, a commissioner or any special agent or examiner designated by the commission, when ordered to do so, upon the ground that the testimony or evidence, books or records required may tend to incriminate him or subject him to penalty or forfeiture; but no person shall be prosecuted, punished, or subjected to any forfeiture or penalty for or on account of any act, transaction, matter or thing concerning which he shall have been compelled, under objection, to testify or produce documentary evidence; Provided, That no person so testifying shall be exempt from prosecution or punishment for any perjury committed by him in his testimony.

Section 5. Section 305 of the said act is hereby amended to read as follows:

Section 305. Subpoenas; Oaths.—In order to enable the commission to carry out the provisions of this act, it shall have the power to issue subpoenas requiring the attendance and testimony of, or the production of pertinent books and papers by milk dealers or their employes, producers or their employes, persons having business dealings with milk dealers or producers, or other persons whom the commission believes to have information, books or papers of importance to it in carrying out the purposes and intent of this act. [The commission] Each member of the commission and such officers, employes or others employed in the work of the commission designated by the Chairman of the commission also shall have the power to administer oaths and affirmations, to question witnesses thereunder, and to examine such books and papers. [The commission] Any commissioner may issue commissions, letters rogatory, or other appropriate processes outside the Commonwealth.

Section 6. Section 307 of the said act is hereby amended to read as follows:

Section 307. Adoption of Rules, Regulations and Orders.—Subject to the approval of the Governor, where such approval is hereinafter expressly required, the commission [may] shall adopt and enforce all rules, regulations and orders necessary or [desirable] appropriate to carry out the provisions of this act and not inconsistent with law.

Section 7. Section 308 of the said act is hereby amended to read as follows:

Section 308. Posting and Service of Rules, Regulations and Orders.—Every general rule, regulation or order of the commission shall be posted for public inspection in the main office of the commission at least six days before it shall become effective, where it shall remain conspicuously posted until twenty days after its effective date, and shall be given such further publicity, by advertisement or announcement, in a newspaper or otherwise, as the commission shall deem advisable. At least three days before it shall become effective copies of such

general rule, regulation or order shall be mailed to all licensees affected thereby: Provided, however, That such mailing shall not be construed as a condition upon which the validity of any such rule, regulation or order depends. A certified copy of an order applying only to the particular person or persons named therein shall be served on the person or persons affected.

An order, herein required to be served, shall be (1) served in the manner now or hereafter established by law for the service of writs of summons, except that such service need not be made by the sheriff; or (2) mailed, registered and charges prepaid, (a) in the case of an individual, to his last known residence or place of business, (b) in the case of an unincorporated association or a corporation formed under the laws of the Commonwealth, to its principal office, and (c) in the case of a corporation formed under the laws of any other state, to the office of its duly authorized agent in Pennsylvania, or, if there be no duly authorized agent in Pennsylvania, to its home office in the state of incorporation or in any other state.

The posting in the main office of the commission of any rule, regulation or order not herein required to be served, and the giving of such further publicity thereto as the commission deems advisable, or the proper service of any rule, regulation or order required to be served, shall constitute due and sufficient notice to all persons affected by such rule, regulation or order. A rule, regulation or order of the commission, when duly posted, and so publicized, or when properly served, as provided in this section, shall have the force and effect of law. The commission shall, upon request, mail to any person a copy of any general rule, regulation or order of the commission.

The mailing, or service by mail, herein required, shall be by deposit in a United States Post Office, or in any receptacle thereof. Service by registered mail as provided in this section shall be effective notwithstanding the refusal of the addressee to accept or receive an order so served.

Section 8. Section 310 of the said act is hereby amended to read as follows:

Section 310. Entry and Inspection.—Pursuant to the purposes of this act, any member of the commission, or any employe designated for the purpose, shall have access to, and may enter and inspect, at all reasonable hours, all places and equipment where milk or any product thereof is being produced, stored, bottled, processed, manufactured, sold, weighed, tested or otherwise handled. Any member of the commission or any designated employe thereof, also shall have power, at all reasonable hours, to inspect, mark or stamp for identification, audit and copy all books, papers, records or documents in any place within the Commonwealth, for the purpose of ascertaining facts to enable the commission to administer this act. The information obtained regarding any person by any such inspection auditing or copying, or by reports or statements required or authorized by this act, shall be for the confidential use of the commission and the various administrative departments, boards and commissions of the State government, and shall not be disclosed by any person except as may be required in the enforcement of law or by order of court; and any member or employe of the commission, or other person, disclosing such information, except as herein required, shall be subject to the penalties herein provided for a violation of this act. Nothing contained in this act shall prevent the use of any information by the commission in the compiling and dissemination by the commission of general statistical data.

Section 9. Section 311 of the said act is hereby amended to read as follows:

Section 311. Interstate and Federal Compacts.—The commission is hereby vested with authority to confer with legally constituted authorities of other states and of the United States with respect to uniform milk control within the states and as between states and with the United States in its control of prices of milk and the handling of milk that moves in interstate commerce. The commission is authorized to join with such authorities of other states and of the United States to conduct joint investigations, to exchange information, hold joint hearings and issue joint, complementary or concurrent orders [and] to enter into a compact or compacts for such uniform milk control, and to designate a joint or common agency or joint or common agencies to carry out and enforce such joint, complementary or concurrent orders [subject to such Federal approval as may be authorized or required by law].

Section 10. Section 401 of the said act is hereby amended to read as follows:

Section 401. Milk Dealers Required to be Licensed.—Except as herein otherwise specifically provided a milk dealer as defined in this act shall not buy or receive or handle on consignment or otherwise, milk [from producers or others] within this Commonwealth from producers or others regardless of where situated, for storage, manufacture, processing, distribution, handling or sale, whether on consignment or otherwise, within or without this Commonwealth, or store, manufacture, process, handle, sellor distribute milk within this Commonwealth, or advertise, represent or hold himself out to any other person to be a milk dealer, unless such dealer be duly licensed as herein provided; and it shall be unlawful for a milk dealer to buy, purchase, or receive or handle on consignment or otherwise, milk from, or sell, or deliver or make available, on consignment or otherwise, milk to a milk dealer who is not either licensed or exempted as herein provided, or, in any way, to receive deal in, distribute or handle, on consignment or otherwise, milk which he has reason to believe has previously been received, dealt in, distributed or handled in violation of the provisions of this act.

Section 11. Section 402 of the said act is hereby amended to read as follows:

Section 402. Milk Dealers Subject to Exemption.—The commission may, by official order, exempt from the license requirements provided by this act milk dealers who purchase or receive or handle, on consignment or otherwise, milk in a total quantity not exceeding one thousand five hundred pounds in any month, and milk dealers selling or delivering or making available, on consignment or otherwise, milk in any quantity only in markets of a population of one thousand, or less, for local consumption. The commission may, by official order, exempt stores, or any class thereof, from the license requirements provided by this act, and shall exempt stores selling milk, all of which has been purchased or received, on consignment or otherwise, from a licensed milk dealer. However, milk dealers exempted by this section from the license requirements of this act shall continue to be subject to all the other provisions of this act relating to milk dealers.

Section 12. Section 404 of the said act is hereby amended to read as follows:

Section 404. Grounds for refusal, Suspension or Revocation.—The commission shall grant a license to an applicant complying with the provisions of this act and the rules, regulations and orders issued by the commission pursuant thereto. The commission may decline to grant a license to an applicant or may suspend or revoke the right of a licensee or former licensee to apply for a license for a new license period, or may suspend. revoke or refuse to transfer a license already granted to a milk dealer, or may prohibit a milk dealer exempted from the license requirements of this act from continuing to operate as a milk dealer, after determination by the commission that the dealer:

(1) Has rejected, without reasonable cause, any milk purchased from a producer, or has rejected, without either reasonable cause or reasonable advance notice, milk delivered or made available by or on behalf of a producer in ordinary continuance of a previous course of dealing, except where the contract has been lawfully terminated: Provided, however, That in the absence of an express or

implied fixing of a longer period in the contract, "reasonable advance notice" shall not be construed by the commission or any court to mean notice of less than one [week] month nor more than [two weeks] three months;

(2) Has [without reasonable cause, failed to account and make payment for any milk purchased from a producer;] if a milk dealer other than a subdealer, failed to account and make payment for any milk purchased or received, on consignment or otherwise, from a producer or producers; or has, if a subdealer, failed to account and make payment for any milk purchased or received, on consignment or otherwise, from a milk dealer: Provided, however, That if it be shown that there was reasonable cause for any such failure to account and make payment and that such accounting and payment can and will be made promptly in addition to currently accounting and paying for milk purchased or received as aforesaid, the commission shall not refuse to grant or suspend, revoke or refuse to transfer a license solely for such failure to account and make payment until a reasonable opportunity has been afforded to make such accounting and payment;

(3) Has committed any act injurious to the public health or public welfare or has committed any act injurious to trade or commerce in demoralization of the price structure of milk to such an extent as to interfere with an ample supply thereof for the inhabitants of the Commonwealth affected by this act. It is hereby declared that such demoralization is injurious to the public health, public welfare, and to trade and commerce, and that evidence thereof shall include any course of conduct on the part of the milk dealer in violation of the terms of this act or any valid rules, regulations and orders of the commission;

(4) Has made a general assignment for the benefit of creditors, or has been adjudged a bankrupt, or there has been entered against him a judgment upon which an execution remains wholly or partly unsatisfied;

(5) Has been a party to a combination to fix prices contrary to law. A cooperative agricultural association organized under the laws of this Commonwealth, or a similar association or corporation organized under the laws of this or any other state, and engaged in making collective sales or marketing for its members or shareholders, shall not be deemed or construed to be a conspiracy or combination in restraint of trade or an illegal monopoly; nor shall the contracts, agreements, arrangements or combinations heretofore or hereafter made by such association or corporation, or the members, officers or directors thereof, in making such collective sales and marketing, and prescribing the terms and conditions thereof, be deemed or construed to be conspiracies or to be injurious to public welfare, trade or commerce;

(6) Has continued in a course of dealing of such nature as to [satisfy the commission of] show an intent of the milk dealer to deceive or defraud producers or consumers;

(7) Has failed either to keep records or to furnish accurately the statements or information required by the commission to be supplied to it or to producers or consumers;

(8) Has made any statement upon which the license was issued, which statement is found to have been false or misleading in any material particular;

(9) Is a partnership, association or corporation, and any individual holding any position, owning any substantial interest, or having any power of control therein, has previously been responsible, in whole or in part, for any act on account of which a license may be denied, suspended or revoked pursuant to the provisions of this act;

(10) Has violated any of the provisions of this act, or any of the rules, regulations or orders of the commission, or any stipulation entered into between the said dealer and the commission in the course of any proceeding before the commission;

(11) Has violated any provisions of acts repealed hereby, or of rules, regulations or orders issued thereunder;

(12) Has previously been refused a license or has previously held a license that the commission revoked or that the commission suspended and the event upon which the suspension of the license would terminate under the order has not occurred.

(13) Has rejected milk sold or delivered or made available on consignment or otherwise by or on behalf of a producer in ordinary continuance of a previous course of dealing because the producer or his employe, agent or representative testified in any proceeding before the commission or in any civil or criminal case in any court, whether or not of record, in which any provision of this act or any order of the commission was concerned; and it shall be no defense that reasonable advance notice was afforded the producer before the milk was rejected.

The burden of proving reasonable cause under any provisions of this section shall be upon the milk dealer.

The issuance or renewal by the commission of a license hereunder shall not preclude the commission from suspending or revoking such license for a violation committed by the licensee prior to the license period, [unless] except where the commission or its predecessor board had proceeded against the licensee for such violation, and any valid order thereon has been complied with by the licensee.

Section 13. Section 405 of the said act is hereby amended to read as follows:

Section 405. Hearings and Orders.—Before refusing to grant or to reissue, or before suspending, revoking, or refusing to transfer a license, the commission shall afford the applicant or the licensee, respectively, an opportunity to be heard. It shall direct a citation to such applicant or licensee by registered mail, sent to his last known address, giving therein at least five days' notice of such hearing, and a statement of the matters complained of. The direction of such citation by registered mail as aforesaid shall be sufficient notice of such hearing notwithstanding any refusal of the addressee to accept or receive said citation. The five days' notice shall be computed as from the time that the addressee accepts or receives or refuses to accept or receive said citation.

After such hearing, and upon entry of any order thereon, the commission shall serve a certified copy of such order upon the applicant or licensee, filing at its office the original and a statement in writing of the findings of fact in support thereof.

Section 14. Section 410 of the said act is hereby amended to read as follows:

Sction 410. Computation of License Fees.—Milk sold and distributed outside of this Commonwealth in any state which charges milk dealers a license fee may be deducted in the determination of the amount of the license fee required by this act: Provided, That such quantity of milk is actually computed in determining the amount of such license fee in such other state. In computing the license fee to be charged by the commission, the fluid milk equivalent of milk other than fluid milk shall be ascertained and fixed in such manner as the commission shall prescribe, except in the case of farm-separated sour cream used exclusively in making butter, in which case the daily average total quantity of such milk shall be computed according to pounds of sour cream rather than the fluid milk equivalent thereof. Nothing herein is to be construed as requiring, in the computation of the license fee, the inclusion of milk which is received by the applicant milk dealer from another milk dealer, subject to license hereunder, which milk has been included in the computation of such other dealer's fee; or milk which is produced by the applicant dealer and not sold by him to stores or consumers. Applicant milk dealers, other than subdealers, receiving their entire supply from milk dealers who have paid a license fee thereon to this commission, shall pay the license fee of ten dollars ($10.00).

Section 15. Section 501 of the said act is hereby amended to read as follows:

Section 501. Milk Dealers Required to File Bonds.—It

shall be unlawful for a milk dealer to purchase or receive or handle, on consignment or otherwise, milk from producers unless the milk dealer shall file with the commission a corporate surety, individual surety, or collateral bond, approved by the commission. Except as otherwise herein provided, the bond shall be in a sum equal to the value of the highest aggregate amount of milk purchased or received or handled, on consignment or otherwise, by the dealer from producers in any one month during the preceding calendar year, which value shall be computed according to lawful prices, and shall not in any event exceed one hundred thousand dollars ($100,000.00). The bond shall be upon a form prescribed by the commission, conditioned for the payment by the milk dealer of all amounts due, including amounts due under this act and the orders of the commission, for milk [sold by such producers to the milk dealer] purchased or received or handled, on consignment or otherwise, by the milk dealer from producers, during the license year, upon such terms and conditions as the commission may prescribe.

In the case of a milk dealer who pays producers in full each week for milk purchased or received or handled, on consignment or otherwise, by him from such producers, the bond shall be in a sum equal to fifty per centum of the value of the highest aggregate amount of milk purchased or received or handled, on consignment or otherwise, by the dealer from producers in any one month during the preceding calendar year, which value shall be computed according to lawful prices, and shall not in any event exceed fifty thousand dollars ($50,000.00).

Section 16. Section 502 of the said act is hereby amended to read as follows:

Section 502. Computation of Amount of Certain Bonds.—Milk purchased or received or handled, on consignment or otherwise, by a milk dealer from producers outside the Commonwealth, and sold or distributed by such dealers as fluid milk within the Commonwealth, shall be included in computing the amount of such dealer's bond, except where such dealer has filed a bond for the protection of such producers with the state wherein the milk is purchased or received, on consignment or otherwise, or with such producers. In such computation, the amount due for such milk shall be determined according to any applicable official prices or any lawful contract price.

A milk dealer purchasing or receiving or handling, on consignment or otherwise, or any person intending to purchase or receive or handle on consignment or otherwise, milk from producers, but not so engaged during any month of the preceding calendar year, shall file a bond in a reasonable sum to be fixed by the commission, and within the time for filing his application such dealer or person shall request the commission to fix such sum.

Section 17. Section 503 of the said act is hereby amended to read as follows:

Section 503. Time of Filing; Effective Period of Bond.—The bond herein required shall be filed with the dealer's application for a license and shall be filed within the time for filing such application. The bond shall become effective upon its being filed with the commission for the entire license year or for that part of the license year in which the milk dealer became engaged in the milk business. Any bond filed with the commission shall become effective upon being filed whether or not it is approved by the commission and shall no longer be of effect during the license year only when it has been replaced by a bond approved by the commission to be substituted therefor. The bond herein required shall be an obligation independent of the granting of a license and shall remain in full force and effect for and during the license year designated as long as the dealer purchases or receives milk from producers or is indebted to pay producers for any milk delivered during said license year, whether or not a license is granted the milk dealer or a license granted the milk dealer remains in force. The commission shall determine within a reasonable time after the close of a license year which milk dealers have paid all amounts protected by their bonds filed with the commission, and if the commission finds that all amounts protected by the bond of a milk dealer have been paid it shall thereafter return the bond for said past license year to each such milk dealer.

Section 18. Section 505 of the said act is hereby amended to read as follows:

Section 505. Financial Statement. A milk dealer shall, from time to time, when required by the commission, make and file with the commission a verified statement of his disbursements, or of any other facts in connection with his business, during a period to be prescribed by the commission, which financial statement shall contain the names of the producers from whom milk was purchased or received or handled, on consignment or otherwise, the amount due or paid to the producers, and any other relevant facts required by the commission pertinent to the dealer or the dealer's surety or sureties.

Section 19. Section 506 of the said act is hereby amended to read as follows:

Section 506. Increase or Decrease of Bond.—If it shall appear from the dealer's financial statement or from facts otherwise ascertained by the commission, that the bond afforded to producers selling, furnishing, delivering or making available, on consignment or otherwise, milk to such milk dealer does not adequately protect such producers, the commission may require such milk dealer to procure an additional surety, or to give an additional bond or additional security for the collateral bond, in a sum to be determined by the commission, which (1) shall not exceed more than fifty per centum of the value of the highest aggregate amount of milk purchased or received, or handled, on consignment or otherwise, by the dealer from producers in any one month during the preceding or current year, which value shall be computed according to the prices applicable, or which (2) shall be a sum not exceeding by more than fifty per centum the amount found to be due and owing producers by such dealer on a particular date determined by the commission, whichever sum is greater [and] but the total increase shall not in any event exceed fifty thousand dollars ($50,000.00). In the case of a milk dealer who pays producers in full each week for milk purchased or received or handled, on consignment or otherwise, by him from such producers, any increase required hereunder shall not exceed more than twenty-five percentum of such value or amount, [and] but the total increase in any event shall not exceed twenty-five thousand dollars ($25,000.00).

The commission may grant a reduction of the bond or the collateral, or release an additional surety, if it shall appear that owing to a decrease in the [milk] purchases or receipts of milk on consignment or otherwise of the milk dealer, or to other causes, a bond in a lesser amount or with fewer sureties will protect producers selling milk to such milk dealer.

Section 20. Section 508 of the said act is hereby amended to read as follows:

Section 508. Interest or Dividends upon Securities.—The milk dealer shall be entitled to all moneys received by the State Treasurer as interest or dividends upon any security or securities deposited by such milk dealer with the commission and transmitted by the commission to the State Treasurer for safekeeping, in accordance with the provisions of this act: Provided, however, That the milk dealer shall not be entitled to interest or dividends if there is on file with the commission a valid unpaid claim of a producer against the milk dealer, based on milk sold or delivered or made available, on consignment or otherwise, by such producer to the milk dealer.

Section 21. Section 510 of the said act is hereby amended to read as follows:

Section 510. Effect of Order by Commission.—If, by valid formal order refusing suspending or revoking a license, after hearing with due notice to all those liable

on the bond, the commission has found a milk dealer to be indebted thereunder, such order and the findings of fact in support thereof shall be conclusive evidence of the amount due under such bond in a suit thereon by the commission, unless an appeal therefrom is pending and a supersedeas granted.

Section 22. Section 511 of the said act is hereby amended to read as follows:

Section 511. Procedure for Disbursing proceeds.—The commission [may] shall prescribe the procedure for the payment of the amounts found due to the persons entitled thereto out of the proceeds of any bond or collateral required by this Article or out of the proceeds of any underpayment, delinquent payment or out of any other amount paid by or on behalf of a milk dealer to the commission as owing to any producer or producers or dealer or dealers [of the amounts found due to producers, based on sales of milk by them to a milk dealer who has posted a bond or collateral]: Provided, however, That if the proceeds of a bond or of collateral which has been posted by a milk dealer or other amount paid to the commisison shall be insufficient to pay in full the amounts due to producers or dealers who have sold or delivered, or made available, on consignment or otherwise, milk to such milk dealer, the moneys available shall be divided pro rata among such producers or dealers.

Section 23. Section 513 of the said act is hereby amended to read as follows:

Section 513. Subdealers' Bonds.—It shall be unlawful for a subdealer to buy or acquire, receive, or handle, on consignment or otherwise, milk from a milk dealer who purchases or acquires, receives, or handles, on consignment or otherwise, milk from producers, unless the subdealer shall file with the commission a corporate surety, individual surety, or collateral bond, approved by the commission. Such bond shall be executed to the Commonwealth in a sum equal to three hundred dollars ($300.00) for each route owned or operated by the subdealer, and shall be conditioned for the payment by the subdealer of all amounts due under this act and the orders of the commission for milk purchased or acquired, received or handled, on consignment or otherwise, from such milk dealer or dealers during the license year; subject, however, to the further condition that if at time of default, such milk dealer or dealers are indebted or in arrears in their payments to producers, the proceeds thereof shall be held on the account of such dealer or dealers for the benefit of such producers. Such bond shall be filed annually with the subdealer's application for a license, and shall, in all applicable particulars not herein specifically mentioned, be subject to terms and conditions such as provided in the other sections of this article for the bonds of other milk dealers and for suits thereon, except where the protection of such milk dealers selling or delivering or making available, on consignment or otherwise, to the subdealer, or of producers selling or delivering or making available, on consignment, or otherwise, to such milk dealers, requires the substitution of such dealers and producers in applying such terms and conditions to the bonds of subdealers.

Section 24. Section 703 of the said act is hereby amended to read as follows:

Section 703. Dissemination of Information; Conferences.—Licensees under this act, and associations or corporations thereof, producers of milk, and cooperative agricultural associations or corporations engaged in collectively processing, preparing for market, handling or marketing milk, may acquire, exchange, interpret and disseminate past, present and future market, statistical, economic and educational information pertaining to milk by direct exchange between such persons or such associations or corporations, or by and through a common agent created or selected by them, which agent may be the commission if it consents to be such. Any such licensees, producers and associations or corporations may confer and discuss the cost of production, marketing, market conditions and prices [for the sale] of milk.

Section 25. Section 801 of the said act is hereby amended to read as follows:

Section 801. Requisites of Orders Fixing Price of Milk.—The commission shall ascertain, after a hearing in which all interested [parties] persons shall be given reasonable opportunity to be heard, the logical and reasonable milk marketing areas within the Commonwealth, shall describe the territorial extent thereof, shall designate such areas by name or number, and shall ascertain and maintain such prices for milk in the respective milk marketing areas as will be most beneficial to the public interest, best protect the milk industry of the Commonwealth and insure a sufficient quantity of pure and wholesome milk to inhabitants of the Commonwealth, having special regard to the health and welfare of children residing therein.

The commission shall base all prices upon all conditions affecting the milk industry in each milk marketing area, including the amount necessary to yield a reasonable return to the producer and to the milk dealer.

The commission shall file at its office, with each order issued, a general statement in writing of the findings of fact in support of, and the reasons for, such order.

The commission may, upon its own motion or upon application in writing, from time to time, alter, revise or amend an official order defining milk marketing areas or fixing prices to be charged or paid for milk. Before making, revising or amending any order defining milk marketing areas or fixing prices to be charged or paid for milk, the commission shall hold a hearing, after giving reasonable [notice thereof] opportunity to be heard to interested persons, of whom the commission has notice, and, in the case of any order affecting the public, after giving reasonable notice thereof to the public in such newspaper or newspapers as, in the judgment of the commission, shall afford sufficient notice and publicity; Provided, however, That upon application in writing from a person aggrieved by an order of the commission hereunder, filed within fifteen (15) days after the issuance of the order complained of, or upon its own motion, the commission may, within twenty (20) days after the effective date of such order, issue an order revising or amending such order without a further hearing, if such revision or amendment is based on the record of the hearing held prior to the issuance of such order.

"Interested persons," as used in this section, means all persons who may be affected by an order of the commission fixing prices and who have signified to the commission in writing their desire to be notified of such hearings concerning a particular milk marketing area or areas within the Commonwealth. "Reasonable opportunity to be heard" may be afforded by written notice addressed to the last known address of an interested party by mail, postage prepaid, by deposit in a United States Post Office or any receptacle thereof. Nothing contained in this section shall be construed to limit or modify the provisions of section 308 of this act relating to the posting and publicizing of orders of the commission, including orders made under this Article, and the force and effect thereof.

At any hearing provided for herein, the commission may receive as evidence on any subject material and relevant to fixing any price or prices under this Article, any printed, typewritten, duplicated, mimeographed or other written treatise, report or statistical data by an expert not present as a witness if, and to the extent that, the treatise, report or statistical data is approved and read aloud or the contents thereof made known by an expert witness at the hearing.

All provisions of all price-fixing orders of the commission shall be presumed to be valid, and the burden of proving any invalidity of any provision thereof shall be upon the person asserting the same. Any determination by the commission or a court to which an appeal has been taken that the wholesale or retail prices provided are invalid shall not prevent the enforcement of prices to producers, but any determination that prices to producers are unreasonable shall require the redetermination by the commission of wholesale and retail prices as well as prices to producers.

Every order made pursuant to this article, and any revision or amendment thereof, in which the commission

fixes or changes the price of milk to producers or to consumers, or both, shall be subject to the approval of the Governor.

Section 26. Section 802 of the said act is hereby amended to read as follows:

Section 802. Wholesale and Retail Prices.—The commission shall fix, by official order (except as hereinafter provided in this section) the minimum wholesale and retail prices, and may fix, by official order, the maximum wholesale and retail prices, to be charged or received for milk sold or delivered or made available on consignment or otherwise, within any milk marketing area of the Commonwealth, wheresoever produced, including milk sold, or delivered or made available on consignment or otherwise, by:

(1) Milk dealers to other milk dealers;

(2) Milk dealers to consumers;

(3) Milk dealers to stores, either for consumption [on] at the [premises] store or sale [resale] to consumers:

(4) Stores to consumers, except for consumption [on] at the [premises] store where sold.

Nothing herein contained shall be construed to empower the commission to fix the price at which milk may be sold by any milk dealer or producer to consumers for consumption on the premises of such milk dealer or producer.

The fixing of minimum wholesale or retail prices for skimmed milk, condensed or concentrated whole or skimmed milk, bulk cream handled between milk dealers other than stores, and ice cream mix, shall be discretionary with the commission.

Section 27. Section 803 of the said act is hereby amended to read as follows:

Section 803. Prices to Producers.—The commission shall fix, by official order, the minimum prices to be paid by milk dealers to producers for milk sold or delivered or made available, on consignment or otherwise, by producers to milk dealers. [Provided, however, That the fixing of prices to be paid by milk dealers to producers for milk to be used solely in manufacturing shall be discretionary with the commission.]

In any order of the commission fixing minimum prices to be paid producers, or by separate order, the commission may establish a base-rating price system, a system of classified prices, a system of equalizing or pooling minimum prices to be paid producers or any combination thereof for any market where the commission finds the same appropriate to accomplish the purposes of this act.

Section 28. Section 804 of the said act is hereby amended to read as follows:

Section 804. Classification; Equalization of Prices.—A When pursuant to any statute or regulations or orders adopted thereunder or any ordinance or reasonable trade practice various grades of milk are specified orders of the commission fixing minimum or maximum prices may be applicable to each grade. Orders of the commission fixing minimum or maximum prices may vary in different markets and shall designate the markets to which applicable. Such orders may likewise classify milk and milk dealers in any reasonable manner which the commission deems advisable and may vary according to the classes to which they are applicable. The orders of the commission with respect to the minimum prices to be paid to producers and others shall apply to the area in which the milk is produced or to the area in which the milk so produced is sold, or distributed by milk dealers in the form of milk, other than ice cream mix, and to the area in which food products, including ice cream mix, made from or with milk are manufactured or are sold or distributed by milk dealers, and may vary in different areas according to varying uses, grade and condition. Each such order may classify such milk by forms, classes, grade or uses as the commission may deem advisable and may specify the minimum prices therefor. Other reasonable methods of classification may be prescribed by the commission.

B. The commission may, in any order fixing minimum prices to be paid producers for milk, or any amendment thereto, provide for the equalization (averaging or blending) of minimum prices to be paid producers of a production area or producers furnishing, supplying or making available milk required for ultimate sale or delivery as fluid or household milk or cream to consumers in a marketing area, so that each such producer shall receive the same average, blended or equalized minimum price for all the milk delivered or made available to milk dealers by such producers or sold, used or distributed by the producer as a milk dealer. Any such equalized minimum price may be made subject to any reasonable differentials for quality, location, volume, market and uniformity of production or average supply of milk for human consumption in fluid form.

C. In order to effect such equalization of prices to producers the commission shall require a monthly report from each milk dealer receiving milk from producers for such market and from each producer handling milk as a milk dealer in such market, showing the disposition of all milk handled by the reporting dealer or producer in such market. The commission shall thereafter require payment by each such dealer to the commission of any amount by which the sum otherwise due by such dealer to a producer or producers in accordance with the prices fixed by such order exceeds the equalized minimum price as determined and announced by the commission from such reports. The commission shall direct that the amounts so paid to it shall be paid to those dealers whose reports show that the minimum prices they will pay their producers in accordance with such order are less than the equalized minimum price as so determined by the commission, for repayment in turn by such dealers to their producers so as to bring all lower rates of payment up to the equalized minimum price. In the case of a producer who handles milk as a milk dealer the commission shall require payment by such producer to it of any amount by which the sum that would be due by such producer-dealer to producers if all the milk so handled by him were obtained from producers would exceed the equalized minimum price determined by the commission.

D. If it shall appear that the purposes of this act will not be accomplished by requiring milk dealers who produce part or all of the milk handled by them to be subject to such equalization plan, the commission shall exclude any such group or groups of producers from the equalization of minimum prices.

E. In order to determine differentials to be allowed for uniformity or production or average supply of milk for human consumption in fluid form the commission may require of producers and dealers reports covering a stated period of time showing quantities of milk produced, quantities of milk handled by dealers and the quantities of milk distributed to consumers as fluid or household milk or cream by dealers and producers.

F. In the equalization of minimum prices to be paid producers the commission may also provide for the payment by milk dealers of a reasonable check-off not exceeding two (2) cents per hundredweight of milk to the commission to cover the expenses of administering the equalization pool, for the establishment of averages or for a combination of these methods as well as to provide a reserve to cover amounts owing to said fund by defaulting dealers.

G. The commission shall appoint an employe or other person engaged in the work of the commission to administer the provisions of any order providing for the equalization of minimum prices to be paid producers.

H. For the purpose of carrying out the provisions for equalizing minimum prices to be paid producers for milk there is hereby created a fund to be known as 'The Milk Equalization Fund'. Such fund shall be applicable to the payment of amounts owing producers whose classified prices would otherwise be lower than the average or blended minimum price. Expenses of administration also shall be paid from the fund as herein provided. Such

fund shall consist of all amounts received and paid into the fund by milk dealers under any order for the equalization of minimum prices to be paid producers. The fund shall be administered by the commission in accordance with the provisions of this act.

I. Of said fund only the moneys reserved to cover amounts owing by defaulting milk dealers may be invested by the commission and shall be invested exclusively in bonds and securities which are the direct obligations of or which are guaranteed as to principal and interest by the United States or this Commonwealth. The commission may sell any of the securities in which the fund is invested if advisable for its proper administration or in the best interests of such fund, and all earnings from investment of such securities shall be credited to such fund. Amounts determined by the administrator of any equalization pool to be due any producer or producers shall be paid from this fund in the manner prescribed by the commission. Payments to producers from this fund in accordance with the provisions of this act need not be certified to the State Treasurer.

J. The commission shall be entitled to recover the sum of all liabilities of a solvent or an insolvent or bankrupt milk handler, or his receiver, liquidator, rehabilitator, conservator or trustee in bankruptcy to the fund and may prescribe any action or other proceeding therefor.

K. The expenses of administering the fund shall be reimbursed to the commission out of the check-offs received in said fund for that purpose. The compensation of persons employed by the commission for the carrying out of any such plan of equalization and auditing, investigating and other services incidental thereto shall be deemed administration expenses payable out of said check-offs.

L. The milk equalization fund shall be deposited in and paid from such depositary or depositaries as the commission shall designate.

Section 29. Section 807 of the said act is hereby amended to read as follows:

Section 807. Violations.—After the commission shall have fixed prices to be charged or paid for milk, whether by class, grade, use or otherwise, it shall be unlawful for a milk dealer or producer knowingly or unknowingly or any other person knowingly, by himself or through another, to sell or deliver or make available, on consignment or otherwise, or buy, or receive or handle, on consignment or otherwise or offer to sell or deliver or make available, on consignment or otherwise, or buy or receive or handle, on consignment or otherwise, or advertise for sale, delivery, purchase or recipt, or hold oneself out as willing to sell, deliver, buy or receive milk at any price below the minimum price or above the maximum price applicable to the particular transaction.

No method or device shall be lawful whereby milk is bought, or received or handled, on consignment or otherwise or sold or delivered or made available, on consignment or otherwise, or offered to be bought or received or handled, on consignment or otherwise, or sold, or delivered or made available, on consignment or otherwise, at a price less than the minimum price applicable to the particular transaction, whether by any discount, premium, rebate, free service, trading stamps, advertising allowance, or extension of credit, or by a combined price for such milk, together with another commodity or a service which is less, or is represented to be less, than the aggregate of the price of milk and the price or value of such commodity or service when bought, or received or handled, on consignment or otherwise, or sold or delievered or made available, on consignment or otherwise, or offered for sale, delivery, purchase, handling, or receiving, separately or otherwise.

It shall be unlawful for any milk dealer to store, manufacture, process, sell or deliver or make available, on consignment or otherwise, any milk for which he has paid, or agreed to pay, a price lower than that fixed by the commission for milk of that class or grade.

It shall be unlawful for a milk dealer knowingly or unknowingly or any other person knowingly, by himself or through another, to store, manufacture, process, sell or deliver or make available on consignment or otherwise, or buy, or receive or handle, on consignment or otherwise, or offer to sell, or deliver or make available, on consignment or otherwise, or buy or receive or handle, on consignment or otherwise, milk at a price computed upon false or erroneous weight, butterfat test, grade or classification; or at a price from which have been made deductions not authorized by law or in excess of any deductions so authorized, whether such illegal deductions be in the form of excessive transportation charges or otherwise.

The act of a director, officer, agent or other person acting for or employed by a milk dealer shall be deemed the act of such milk dealer.

Section 30. Section 808 of said act is hereby amended to read as follows:

Section 808. Prices of Certain Milk.—It is hereby declared to be the legislative intent that the instant (whenever that may be) that the handling by a milk dealer of milk produced outside of the Commonwealth becomes a subject of regulation by the Commonwealth in the exercise of its police powers, the restrictions set forth in this act respecting such milk so produced shall apply, and the powers conferred on the commission by this act, and particularly by this article, shall attach; but such restrictions shall not apply to condensed or concentrated whole milk contained in hermetically sealed cans.

It is also hereby declared to be the legislative intent that the prices prescribed by the commission for milk produced in this Commonwealth and sold or delivered or made available, on consignment or otherwise, in this Commonwealth for shipment into and ultimate sale in another state shall not be destructive of the price structure of producers in such other state.

Section 31. Section 309 of the said act is hereby amended to read as follows:

Section 809. Cooperatives.—It is hereby declared to be the legislative intent that no provision of this act shall prevent, and no provision contained herein shall be deemed or construed to prevent, any cooperative [agricultural association or corporation organized under the laws of this Commonwealth, or a similar association or corporation organized under the laws of this or any other state, and engaged in making collective sales or in the marketing of milk for the producers thereof] from blending the net proceeds of its sales or deliveries in all its markets or of its sales or deliveries within any particular market in various classes and whether in fluid form or as manufactured products, both within and without the Commonwealth, and paying its producers such blended price, with such deductions and differentials as may be authorized under contract between such [association or corporation] cooperative and its producers, or from making collective sales or deliveries of the milk of its members and other producers represented by it, or from making such sales or deliveries at a blended price based upon sales or deliveries thereof in the various classes, and whether in fluid form or as manufactured products, both within and without the Commonwealth, which price is to be paid either directly to the producers or to the cooperative [agricultural association or corporation.] Nothing herein contained shall prevent any milk dealer from contracting for his milk with such cooperative [agricultural association or corporation,] upon such basis; but all such contracts shall be upon the basis of the prices fixed by the commission, with the result that the net price received for milk by such cooperative [association or corporation] shall be commensurate with such prices. No milk dealers, or agents thereof, shall receive from any producer or from such cooperative [association or corporation,] directly or indirectly, any discounts, rebates, free service, or compensation through rentals, extension of credit, or otherwise for the purpose, or with the effect of reducing the net cost to the dealer for milk purchased by or through such cooperative [association or corporation.]

No provision of this act shall be deemed or construed to affect the contracts of such cooperative [agricultural association or corporation] with its produers, except as hereinafter specifically provided, nor to affect or abridge the rights and powers of such [an association] cooperative or any of its operations: Provided, however, That the powers of subpoena, entry, and inspection, vested in the commission under this act, shall apply for the purpose of examining and auditing books and records of any such cooperative [agricultural association or corporation] at reasonable intervals, for the purpose of administering this act. This section shall not, however, be construed to exempt such [association or corporation] cooperative from the jurisdiction of the commission over the prices at which it may sell milk to milk dealers, stores or consumers.

Any cooperative [agricultural association or corporation] organized after [the effective date of this act] April 28, 1937, or within ninety (90) days prior [to the effective date hereof] thereto, or which, if organized over ninety (90) days prior [to the effective date of this act] thereto, was not marketing milk for producers upon [the effective date of this act] April 28, 1937 or ninety (90) consecutive days prior thereto, shall not be entitled to avail itself of the benefits of this section if it pays or distributes to its producers a price which is more than one and one-half per centum (1½%) lower than the prices prescribed by the commission, unless such [association or corporation] cooperative shall furnish reasonable proof to the commission that such one and one-half per centum (1½%) is insufficient to pay such lawful expenses and charges for its operations and maintenance as may be authorized under the contracts between the [association or corporation] cooperative and its producers

Every cooperative [agricultural association or corporation] operating under the provisions of this section shall file with the commission a copy of its certificate of incorporation and by-laws, and a copy of each form of contract employed in its relations with producers, within sixty (60) days after the effective date of this act.

Where by written contract or agreement between a cooperative and a producer or producers the cooperative is authorized to collect the price of milk handled for the cooperative or purchased from it or is authorized to have the milk dealer make a deduction from such price for the cooperative and pay the same to it, the cooperative may, after notice of such contract or agreements to the milk dealer, demand on the dealer for payment and refusal thereof, maintain an action, suit or claim for such price or deduction or both, in its own name, and payment to such producer after such action or suit has been commenced or such claim presented shall not be a defense to such action, suit or claim. A cooperative may join in a single suit, action or claim any number of claims for such payment that it has against a particular milk dealer.

It shall be unlawful for a milk dealer to dominate control or influence the operation or administration of a cooperative or to discourage, hinder, obstruct or prevent producers from becoming members of or shareholders in a cooperative or from entering into contractural relations with a cooperative. It shall be unlawful for a milk dealer to refuse or threaten to refuse to purchase or handle or receive, on consignment or otherwise, milk from a producer because of his being or intending to become a member or shareholder in a cooperative or active in the operation or administration of a cooperative or in contractual relationship with a cooperative.

Section 32. Section 904 of the said act is hereby amended to read as follows:

Section 904. Pleading and Service.—The appeal provided by this article from action of the commission shall be by petition against the commission, officially as defendant, alleging therein in brief detail the action and decision complained of, and praying for a reversal thereof. Such petition shall specify the petitioner's objections to the action and decision of the commission, and shall state facts in support of such objections sufficient to constitute a prima facie case; and any objection not so specified and supported by facts shall not be considered by the court. Every such petition reciting facts shall be supported by oath or affirmation; and the petition shall include as part thereof, under oath or affirmation, an averment that the appeal is not filed merely for purposes of delay.

Upon service of a summons upon the commission, returnable at least ten (10) days from the date of service, the commission may, on or before the return day, file a motion to dismiss the appeal, raising questions of law or attacking the form or sufficiency of the petition. If such motion is not sustained, the commission shall be given leave to file an answer within not less than ten (10) days after the order of the court overruling the motion.

On or before the return day of such summons served upon the commission, or within the time allowed in an order of the court denying a motion to dismiss an appeal, the commission [shall] may file an answer which shall deny or admit the allegations of fact in the petition, and which may also allege by way of defense the grounds for its action or decision. If no answer is filed by the commission the case shall be at issue without further pleading as though an answer had been filed denying all the allegations of fact in the petition.

Upon the filing of an answer by the commission, or no answer is filed, then on the return day, or at the expiration of the time allowed for answer by an order of court, the case shall be at issue without further pleadings, and upon application of either party the case [shall] may be advanced and heard without further delay.

Section 33. Section 1101 of the said act is hereby amended to read as follows:

Section 1101. Milk Control Fund.—All moneys collected or received by the commission, arising from license fees, penalties, permits or any other source, except moneys collected or received under the provisions of section 804 of this act, shall be paid by the commission into the State Treasury through the Department of Revenue, and shall, by the State Treasurer be placed in a separate fund to be known as the "Milk Control Fund". Fines imposed under this act shall be payable to, and collected by, the commission, and similarly placed in the Milk Control Fund. Moneys collected or received by the commission that are not funds of the Commonwealth but are due to producers or dealers for or on account of milk purchased or received by dealers from producers or other milk dealers and placed in the Milk Control Fund shall be paid to the persons entitled thereto by the State Treasurer as directed by the Milk Control Commission.

Section 34. Said act is hereby amended by adding thereto, after section one thousand and six, three new sections to read as follows:

Section 1007. Defense to Action for Retail or Wholesale Price of Milk.—In any action or suit brought or claim presented by, through or under a milk dealer in any court of this Commonwealth for any amount claimed to be due from a consumer for milk sold, delivered or made available to the consumer, the person against whom the suit or action is brought or claim presented may allege as a partial defense to such action, suit or claim that said milk dealer, at the time of the transaction concerned, did not hold a license from the commission, although required by law to do so, or sold, delivered or made available such milk to the consumer at a price or prices in violation of this Act or any order of the commission fixing prices, or both, as the case may be, and upon proof of any such fact, the recovery of said milk dealer shall be limited to the amount shown by the milk dealer actually to have been paid to producers for the milk so sold, delivered or made available.

Section 1008. Civil Penalties.—If any milk dealer shall knowingly or unknowingly violate any of the provisions of this Act or any order of the commission, such milk dealer for such violation, shall forfeit and pay to the

Commonwealth of Pennsylvania the sum of twenty-five ($25) dollars, to be recovered by an action of assumpsit instituted in the name of the Commonwealth of Pennsylvania, in the court of common pleas of Dauphin County, which court is hereby clothed with jurisdiction throughout the Commonwealth to hear and determine any such action, or the court of common pleas of the county or judicial district in which the milk dealer has his residence or principal place of business.

Each and every day's continuance in the violation of this Act or any order of the commission, shall be a separate and distinct offense: Provided, however, That if any interlocutory order of supersedeas or preliminary injunction be granted, no penalties shall be incurred or collected for or on account of any act, matter or thing done in violation of such order so superseded or enjoined for the period of time such order of supersedeas or injunction remains in force.

Section 1009. Remedies and Penalties to be Cumulative..—All proceedings before the commission, suits, actions. prosecutions, penalties and forfeitures provided for or accruing under this Act shall be cumulative.

Section 35. This act shall become effective immediately upon final enactment.

Commonwealth of Pennsylvania

SECOND REPORT OF THE LOCAL GOVERNMENT COMMISSION TO THE GENERAL ASSEMBLY OF 1941

By authority of the Act of May 29, 1935

HARRISBURG 1941

LOCAL GOVERNMENT COMMISSION

CHARLES R. MALLERY, Chairman
GEORGE B. STEVENSON, Vice-Chairman

Members on the part of the Senate:

CHARLES R. MALLERY, Blair
GEORGE B. STEVENSON, Clinton
EDWARD J. COLEMAN, Lackawanna
HENRY E. LANIUS, York
HAROLD A. THOMSON, Delaware

Members on the part of the House:

DON E. WILKINSON, Luzerne
FRANKLIN H. LICHTENWALTER, Lehigh
REUBEN A. NAGEL, Beaver
PAUL C. MOOMAW, Franklin
WALTER E. GREENWOOD, Chester

A. BOYD HAMILTON, Secretary
JOHN H. FERTIG, Counsel

SECOND REPORT OF LOCAL GOVERNMENT COMMISSION

The Local Government Commission herewith submits to the General Assembly the following as its second report.

The Local Government Commission thus created as a continuing commission by act of assembly in 1935 (P. L. 244) has been active since its first meeting on January 14, 1936. The Commission's duties as set forth in the act creating it are:

An Act creating a Local Government Commission to study and report on functions of local government; their allocation and elimination; the cost of local government and means of reducing it; and the consolidation of local government; and making an appropriation.

Whereas, Local government of small areas was developed in the past principally because of the lack of adequate means of transportation and communication; and

Whereas, The development of local government has not kept step with the development of transportation and communication, and functions of government have been added, from time to time, without proper study or knowledge of the correct allocation of such functions; and

Whereas, The support of local government has become a financial problem, and ways and means should be devised to lessen the existing and ever-increasing cost of local government which is now mainly a burden on real property, and of creating a more scientific and simplified system; therefore

Section 1. Be it enacted, &c., That a commission is hereby created which shall consist of ten members, five of whom shall be appointed by the President pro tempore of the Senate, and five shall be appointed by the Speaker of the House. The commission shall be known as the "Local Government Commission." The commission shall organize, at the call of the President, pro tempore of the Senate, by electing a chairman, vice-chairman, and a secertary. The secretary need not be a member of the commission. The members of the commission shall serve without compensation, but shall be reimbursed for all necessary expense incurred in the discharge of their duties.

Section 2. It shall be the duty of the commission to study and investigate (a) the functions of local government, their proper allocation, and the possibility of eliminating unnecessary functions, and the duplication and overlapping of functions, (b) the cost of local government, and ways and means of reducing this cost and lessening the burden on local taxpayers, (c) the advisability and feasibility of increasing the areas or changing the boundaries of local governments; of establishing larger units for administration by consolidation of units by cooperative arrangements between them for the performance of certain functions, or by other means; and generally ways and means of organizing a simple system of local government, and to exercise such other functions as may be deemed necessary to carry into effect the spirit and intent of this act.

Section 3. The commission shall have power to recommend tentative plans for the consolidation or reorganization of any units of local government or changes in the boundaries thereof. The commission, after holding public hearings, shall prepare and recommend for adoption a plan or plans of local government consolidation, or changes of political boundaries for any or all units of local government.

Section 4. The commission shall make a first report to the Legislature of the session of one thousand nine hundred and thirty-seven, not later than February first of that year, said report to contain a statement of the progress of its work and such drafts of legislation and constitutional amendments, if any, as it deems necessary to carry into effect the provisions and objectives of this act, and as will, if enacted, enable the commission to complete its work.

Section 5. The commission shall have power to employ and fix the compensation of such experts, stenographers, and assistants as may be deemed necessary to carry out the work of the commission, but due diligence shall be exercised by the commission to enlist such voluntary assistance as may be available from citizens, research organizations, and other agencies in Pennsylvania or elsewhere, generally recognized as qualified to aid the commission with information as to existing conditions or advice as to possibilities in governmental economies or reorganizatoin. The Legislative Reference Bureau, The Bureau of Statistics of the Department of Internal Affairs, and other agencies of the Commonwealth, as well as all local governments within the Commonwealth, shall give the commission, on request, such information and assistance as may be reasonably accessible.

Section 6. The term "local government," as used in this act, shall be construed to include counties, cities, boroughs, towns, townships, school districts, and poor districts, except counties of the first and second class, and cities of the first, second, and second class A.

APPOINTMENTS

On October 19, 1939, the President Pro Tempore of the Senate appointed Captain Harold A. Thomson, Delaware County, and Senator George B. Stevenson, Clinton County, and the Speaker of the House appointed Walter E. Greenwood, Chester County, and Representative Don E. Wilkinson, Luzerne County, to fill vacancies occasioned by the resignation at the close of the 1939 session of four of the original members of the commission. These appointments restored the commission to its full membership of ten members, five appointed by the President Pro Tempore of the Senate and five by the Speaker of the House. The membership of the commission has been:

On the part of the Senate
SENATOR CHARLES R. MALLERY
SENATOR HENRY J. PIERSON
SENATOR JOHN S. RICE
SENATOR GEORGE B. STEVENSON
HAROLD A. THOMSON

On the part of the House
ROY E. FURMAN
PAUL C. MOOMAW
THOMAS WEIDEMANN
DON E. WILKINSON
WALTER E. GREENWOOD

On November 15, 1939, the commission met and reorganized by electing the following officers:
Chairman—CHARLES R. MALLERY
Vice-Chairman—GEORGE B. STEVENSON
Secretary—A. BOYD HAMILTON
Financial Secretary—MISS M. OLIVE BARNETT
Counsel—JOHN H. FERTIG

At this meeting the commission adopted a tentative outline of the problems to be studied and accepted the offer of the Pennsylvania Economy League to continue to serve as the research agents of the commission.

Since the beginning of the 1941 session of the legislature, the following resignations of members have occurred: Senators Henry J. Pierson and John S. Rice; Messrs. Roy E. Furman and Thomas Weidemann. In their places the following appointments have been made by the President Pro Tempore of the Senate: Senators Edward J. Coleman, Lackawanna County, and Henry E. Lanius, York County, and by the Speaker of the House: Representatives Franklin H. Lichtenwalter, Lehigh County, and Reuben A. Nagel, Beaver County.

On the 1st of February Miss M. Olive Barnett resigned as financial secretary.

ACTIVITIES OF THE COMMISSION

Since the reorganization the full commission has held meetings as follows:

1939: December 12
1940: January 23, February 27, April 9, May 14, July 10, August 27. September 27, November 26, December 3, December 18
1941: January 6, January 13, January 22, January 28, February 11, February 25, March 4, March 19, March 26 and April 2

In addition to the regular meetings of the commission, two days—December 18 and 19, 1940—were devoted to public hearings on bills proposed to be submitted by the commission at the 1941 session of the general assembly. At these public hearings taxpayers associations, civic associations, local officials organizations, municipal associations and interested attorneys and citizens presented views to the commission. The number of persons attending and the wide range of organizations they represent is evidenced by the following partial list of those who spoke at the hearings:

Senator Mallery, as Chairman of the Commission.
Mr. E. Raymond Ambler, Chairman of the Pennsylvania Committee for the First Class Townships Association.
Mr. Fertig, as counsel of the Commission.
Mr. John A. MacGuffie, Chairman, Legislative Committee of the Pennsylvania State Association of County Commissioners.
Mr. Walter E. Greenwood, as a member of the Commission.
Senator George B. Stevenson, as a member of the Commission.
Mr. Frank Hunter, City Hall, Altoona, Pa.
Mr. Thomas Stewart, Court House, Hollidaysburg, Pa.
Mr. Howard E. Kennedy, City Solicitor, Wilkes-Barre, Pa.
Mr. C. V. Shoup, Taxpayers' Lobby, 335 Fifth Avenue, Pittsburgh, Pa.
Mr. Robert Lloyd, Luzerne County, County Commissioners Association.
Mr. H. L. Shank, Lancaster, Pa., Tax Justice League of Pennsylvania, Inc.
Mr. Eugene M. Reed, Pennsylvania Economy League, Harrisburg, Pa.
Mr. John R. Bentley, Assistant City Solicitor, Pittsburgh, Pa.
Mr. Caspar W. B. Townsend, Attorney, Philadelphia, Pa.
Mr. Hill Burgwin, Attorney, Pittsburgh, Pa.
Mr. Francis H. Bohlen, Jr., Attorney, Philadelphia, Pa.
Mr. T. F. Chrostwaite, President of the Pennsylvania State Association of Boroughs, Hanover, Pa.
A. Lee Edwards, Deputy Attorney General, Department of Internal Affairs, Harrisburg, Pa. (Bond Attorney)
Representative Don E. Wilkinson, as a member of the Commission.
Mr. Dan D. Kline, Solicitor, Williamsport, Pa.
Mr. Preston O. Van Ness, The Pennsylvania State School Directors Association, Harrisburg, Pa.
Mr. H. Walter Weaver, Court House, Media, Pa., Secretary of the Tax Collectors Association of Pennsylvania.
Mr. Alvin E. Maurer, County Commissioner, Schuylkill ounty, Pottsville, Pa.
Mr. Paul C. Moomaw, as a member of the Commission.
Mr. John N. O'Neil, County Commissioner of Washington County, Washington, Pa.
Mr. John E. Brown, Executive Committee of the Pennsylvania Association of Assessing Officers, McDonald, Pa.
Mr. Elmer W. Osenbach, Chairman, Legislative Committee of the Third Class Cities, Allentown, Pa.
Mr. Lewis C. Street, Jr., Secretary-Treasurer of the Pennsylvania Association of Assessing Officers, Upper Darby, Pa.

During the interim between meetings, members of the commission have not been idle. The major problems coming before the Commission have been assigned to committees for more intensive study. These committees together with the counsel and research agents of the commission have met frequently and labored long in preparing detailed suggestions for the consideration of the commission.

Both the commission and its committees have had the full cooperation of and have received a great deal of valuable advice and technical assistance from state and local officials and may private citizens.

A notable example of the service gratuitously afforded to the commission was the cooperation of the leading municipal bond attorneys, the Department of Internal Affairs and representatives of local government with the committee preparing the proposed "Municipal Borrowing Act." The Department of Internal Affairs lent the services of its bond attorney in addition to providing a place for many of the committee's meetings. Representatives of local government attended all meetings of the committee and contributed much information on the practical problems of local government in connection with borrowing. The municipal bond attorneys in addition to coming to Harrisburg at their own expense to meet with the committee on a number of occasions devoted much time to a series of conferences with a representative of the committee and to the preparation of detailed memoranda on the technical legal and financial problems involved in municipal borrowing.

The commission created a committee to study the proper allocation of motor user revenues to political subdivisions and has secured for this committee the cooperation of the highway department, local officials, motor clubs, taxpayers and others interested in the allocation of motor user revenues.

The commission has not seen fit to attempt to create a research staff of its own preferring rather to rely on the voluntary assistance of those interested in improving local government. In this connection the commission wishes to acknowledge the service rendered by the Pennsylvania Economy League which has made available to the commission its research staff and to thank all those agencies whose cooperation has made it possible for the commission to produce so much at such little cost.

The limited appropriation available to the commission has necessarily been expended for the expenses of members in attending meetings, legal fees, secretarial and office expenses.

In partial discharge of the duties imposed upon it and as a result of the many studies and investigations made by the commission, during the past two years, the commission has caused to be introduced into the general assembly the following bills:

LOCAL GOVERNMENT COMMISSION

Digests of bills introduced at instance of the Commission.

MUNICIPAL BORROWING

(H. B. 525 by O'Connor and Bretherick)

The legislation proposed by the commission includes a "Municipal Borrowing Law" which is an attempt—and we believe a successful one—to restate the existing law now found in the act of 1874 and its numerous supplements and innumerable court decisions in one place for the convenience of local officials. It does not confer on anyone the right to borrow any money nor does it take away the right to borrow. It rather sets up the procedure for borrowing where the power to borrow is conferred by the various municipal codes or other laws.

As might be expected, however, in a complete review and restatement of the law the commission found some provisions which had in the past been abused and others which had been unduly restrictive of the municipalities. The commission has, therefore, in its proposed bill made some changes which are listed here.

(1) All bonds are required to mature serially in annual installments starting in the second year after the date of issue except for small issues where the rule is relaxed to make bonds salable.

(2) All bonds shall mature within the period of usefulness of the property or improvement to be purchased with the proceeds but the municipal authorities are made the sole judge of the period of usefulness.

(3) All future issues of "assessment bonds" or bonds to be paid from the proceeds of assessments on abutting property are to be general obligations of the issuing municipality, but municipal claims filed for the improvement may be offset in calculating the debt limit.

(4) The publication of bond ordinances or resolutions is simplified for most municipalities and at the same time made uniform for all. The period of time during which publication must be made has been shortened in some municipalities and provided for others, and may run concurrently with notice of an election to secure the assent of the electors to an increase of the debt. This will substantially reduce the minimum elapsed time between the desire to borrow and its consummation without jeopardizing the rights of any interested group.

(5) Bonds may be made callable either at par or at a premium provided that the terms of the call feature are set forth in the original proceedings authorizing the bonds. At present there is grave doubt as to the power to make bonds callable at a premium and there is no specific statutory authorization (nor prohibition) of issuing callable bonds.

(6) The items to be included in the debt and the deductions permitted in determining borrowing capacity are specifically itemized. While these do not now appear in statutory law the items set forth are those specified in a wide range of court decisions.

(7) The troublesome question of approval by the Department of Internal Affairs of time payment purchase contracts is resolved by limiting such approval to proceedings for the issuance of bonds.

(8) Provision is made for the method of funding accumulated operating deficits for which no provision is now made in the law. It is required, however, as a safeguard that the funding be approved by the court of quarter sessions after public hearing.

(9) Provision is made for the issuance of bonds for the construction and acquisition of utilities implementing section 15 of Article X of the constitution which has never before been properly implemented for use. The provisions cover the manner of issuing such bonds, the manner of computing net revenues of the utility and the manner of deducting such bonds in the calculation of borrowing capacity.

(10) The non-debt revenue bond provisions of the present law are reenacted with minor amendments to meet the constitutional objections raised by the Supreme Court in the recent Abington Township case and thereby preserve this method of borrowing for the municipalities.

METHOD OF CHANGING FROM AUDITORS TO CONTROLLER IN SIXTH, SEVENTH AND EIGHTH CLASS COUNTIES

(H. B. 526 and 527 by Baugher and Hare)

The present law permits the creation of the office of Controller (and the abolition of Auditors) in sixth, seventh and eighth class counties, upon a petition of 25% of the number of persons voting at the last general or municipal election, including a majority of the County Commissioners, Clerk of Courts, Coroner, Treasurer, Prothonotary, Recorder of Deeds and Register of Wills. When such a petition has been presented the court proceeds, after a public hearing, to order the creation of the office of Controller if the court is convinced that it is in the best interest of the County.

In order to simplify this rather difficult proceeding the Local Government Commission proposes an amendment to the County Code which provides for the creation of the office of Controller upon a majority vote of the electors of the county. The question would be submitted at a regular general or municipal election upon the motion of the County Commissioners or upon the presentation of a petition signed by 500 registered electors of the county. This form of proceeding prevents the situation which has arisen in one or two cases, where after considerable labor and expense, the signatures of 25% of the number who voted at the last election have been obtained to a petition, only to fail of creating the office of Controller, because of the refusal of some one of the row officers listed above to sign the petition.

A companion bill (H. B. 527) fixes the salary of Controllers in seventh and eighth class counties. The law provides for the salary in sixth class counties.

SECOND CLASS TOWNSHIP TAX COLLECTORS' BOND

(H. B. 528 by Baugher and Gates)

Due to a purely technical error in drafting the Local Government Commission's bill, which was enacted at the 1939 Session (Act No. 126), has been inoperative in that at one point in the bill, the Tax Collector is referred to as Treasurer of the Township. The present bill is proposed to cure the technical error and make the Act already approved at the 1939 Session operative.

BOROUGH TAX COLLECTORS' BOND

(H. B. 529 by Baugher and Gates)

The bill suggested by the Local Government Commission would make the tax collectors bond in boroughs conform with that now provided by law in Third Class cities and all Townships. Under a substantially similar bond provision the cities have recently succeeded in reducing their bond premiums without reducing the actual protection of public funds handled by the tax collector. It is hoped that corresponding reductions in bond premiums will shortly be granted to townships. The Commission believes that the boroughs should also be permitted to share in the possible economy.

STATE REIMBURSEMENT TO COUNTIES OF ELECTION EXPENSE IN EVEN NUMBERED YEARS

(H. B. 530 by Readinger and Wood, Lloyd H.)

The bill proposed by the Local Government Commission to have the state pay to the counties a substantial part of the cost of conducting elections in even numbered years—when only state and national officers are chosen—would amend section 305 of the Election Code (1937 P. L. 1333) by adding a new paragraph c at the end of that section. The proposed new paragraph provides substantially that for conducting elections in the even numbered years the state shall pay to each county:

(1) Seventy-five dollars ($75.00) for each borough and township not divided into wards and a like amount for each city, borough or township divided into wards

(2) Seventy-five dollars ($75.00) for each one thousand registered electors or major fraction thereof after the first one thousand in each borough or township not divided into wards and in each ward of each city, borough or township divided into wards; and

(3) Ten cents (10c) for each registered elector in the county (determined from the district registers in November).

The proposed reimbursement would not pay all the election expenses actually incurred by the various counties throughout the state. It is rather designed to reimburse the counties as equitably as possible for an approximate perfection in the economical conduct of state elections. Under (1) the counties would receive an amount sufficient to meet the base pay of election officers (except in 1st and 2nd class counties where the base pay is higher but this is partially offset under (3) since such counties pay no additional compensation to election officers) and a modest rental of a polling place for one election district in each borough, township or ward no matter how small such election district may be. Under (2) the counties would receive a like amount for each of the minimum number of election districts into which any borough, township or ward might be divided under the rules laid down in the bill for redistricting election districts proposed by the commission. Under (3) the counties would receive an amount per registered voter equal to one-half the cost per registered voter in the county having the lowest cost per registered voter in 1936. This amount (3) is designed to cover the extra compensation of election officers ($1.00 for each one hundred votes or fraction thereof after the first one hundred) and to cover such other expenses as printing ballots, storage and transportation of ballot boxes or voting machines, tabulating and verifying returns, etc., which expenses either vary widely or are directly related to the number of registered voters rather than to the number of districts.

In other words, a county divided into the fewest number of election districts possible under the redistricting bill proposed by the commission and in which all elements of cost are held to a minimum could conduct the primary and general elections in each even numbered year for the amount of the proposed reimbursement. Home rule is at the same time preserved by permitting the individual counties to suit the election machinery to local convenience or politics so long as the extra expense is borne by the counties so doing.

ELECTION DISTRICTS

(H. B. 531 by Readinger and Wood, Lloyd H.)

The commission proposes to reintroduce with minor amendments its 1939 bill requiring the county commissioners in each county to redivide the county into election districts in accordance with the following principles which

would thereafter govern the creation or division of election districts.

(1) each borough and township, not divided into wards, and each ward of every city, borough and township, now existing or hereafter created, shall constitute a separate election district

(2) no borough or township and no ward or election district may hereafter be divided to form two or more election districts unless such borough, township, ward or election district shall contain more than one thousand registered electors

(3) any borough, township, ward or district having more than 1000 and less than 1800 registered electors may be divided into two election districts as nearly equal in number of electors as may be

(4) any borough, township, ward or district having over 1,800 registered electors shall be divided into not more than one district for each 600 registered electors or major fraction thereof and not less than one district for every 800 registered electors or major fraction thereof

(5) where by reason of topography, distance to be traveled or other sufficient cause the court finds that great inconvenience would result to the voters a borough, township or ward having less than 1,000 registered electors may be divided into two election districts.

The county commissioners as the board of election would be required to prepare maps showing the present election districts and the proposed new districts with the number of registered electors in each old and new district. These maps would be presented to the court of quarter sessions of the county which, after hearing any exceptions which may be filed, shall alter the proposed districts as to it seems proper and order them established. The new districts shall be effective after the municipal elections in 1941 and in time for the spring primary in 1942. Provision is of course made for the rearrangement of the district registers so that they will conform to the new districts without any inconvenience to the electors.

It is hoped that this legislation if adopted will do away with a large number of unnecessary election districts which have grown up over a long period of time. The size of districts to be established under the act such as to permit the most economical conduct of elections without increasing the number of electors per district to the point where they cannot be handled conveniently at the polls.

LIMITING THE TIME OF EMPLOYMENT OF AUDITORS IN BOROUGHS

(H. B. 532 by Baugher and Hare)

The bill proposed by the Local Government Commission would limit the number of days for which borough auditors may be paid. This legislation is proposed both to prevent overpayment of a few conscienceless auditors and to cause audit reports to be completed sooner after the close of the fiscal year. The limits proposed are twenty days in boroughs of less than three thousand; thirty days in boroughs of three to ten thousand and forty days in all boroughs of over ten thousand population.

COMMONWEALTH TO PAY COSTS OF PROSECUTION AND MAINTENANCE OF PRISONERS WHERE FINES IF ANY WOULD GO TO THE STATE

(H. B. 533 by McIntosh and Bretherick)

Under the bill proposed by the Local Government Commission, whenever costs in a prosecution are imposed on the county by the jury or by operation of law or whenever a prisoner is committed to a county institution, for an offense in connection with which fines or forfeited bail are payable into the state treasury the county shall reimburse itself for such costs and expense of maintaining such prisoners from the fines and forfeited bail actually recovered by the county from all similar offenders.

The bill provides for an annual audit of the accounts of each county by the auditor general to determine the balance due to the Commonwealth after deducting the reimbursement to which the county is entitled. There is provision for an appeal from the audit to the Board of Finance and Revenue if the county is dissatisfied with the determination of the Auditor General. Conversely the Auditor General is authorized to deduct from amounts due to any county from Liquid Fuels taxes the amount which the county may owe to the Commonwealth in fines and forfeitures.

CONSTITUTIONAL AMENDMENT, ARTICLE 9, SECTION 15

(H. B. 534 by Holland and Sollenberger)

There is at present a difference of opinion among the outstanding legal authorities as to the proper interpretation of Section 15, of Article 9 of the Constitution which authorizes the issuance of bonds for the construction or acquisition of waterworks, subways, undergound railways and street railways by municipalities without such bonds being charged against the debt limit set up in Section 8, of Article 9 of the Constitution. The proposed amendment to Section 15 is intended to clarify the language and permit the exclusion from the debt limit of bonds issued for the above purposes to the extent that the revenues of such utilities are sufficient to pay debt service charges on the bonds. In addition, the proposed amendment permits the issuance of such bonds for the enlargement or extension of works or facilities of the above type and a paragraph would be added to the Section, giving Constitutional status to so called "Non-debt Revenue Bonds" for sewers and sewage disposal works.

RETIREMENT OF MUNICIPAL EMPLOYES

(H. B. 535 by Bentzel and Cordier)

The commission in discharge of the duty imposed on it by the act appropriating funds for the present biennium has suggested a state-wide system of retirement for municipal employes. The proposed system is optional with the municipalities (counties, institution districts, cities, boroughs and townships) but once having joined there is no method of withdrawal. The system would be jointly supported by the municipalities and employes—each providing substantially one half the final retirement pay.

Basically the proposed system provides that any employe of a member municipality may retire at age 60 or after and receive a retirement allowance made up of two parts:

(1) a pension provided by the municipality of one one hundredth of final average pay (five years before retirement) for each year of service but not more than one half pay or $2,000 per annum.

(2) an annuity purchased for the employe with his own contributions and the interest earned on them, which is to be calculated to approximately equal the pension (if all service were subsequent to membership in the system). Employes retiring voluntarily before reaching age 60 receive only their own contributions with compound interest at 3%. Employes retiring involuntarily with less than ten years service also receive only their own contribution but those retiring after serving ten years or more receive both the municipal pension and their own contribution as an annuity which is of course reduced in amount because of the greater life expectancy where retirement occurs prior to age 60. Provision is also made for disability retirement allowances after five years of service equal to 30% of final average pay but the employe if he has ten or more years service may elect to retire involuntarily.

The employe on retirement may elect to take his retirement allowance as an annuity on his own life, or an annuity on two lives, his own and one other persons having an insurable interest in his life, or on two lives but with payments to his survivor at one half the rate which he himself received or may take the annuity on his own life with a guarantee that the value of the annuity at the time of retirement will be paid to his estate if he dies before receiving all of it as a retirement allowance. In any event, however, as in the case of life insurance, the value at the time of retirement of the amount to be paid is identical and the monthly payments to the employe are reduced to compensate for the added risk assumed by the fund under the various options.

The proposed system is to be operated by a board composed of three members of the State Employes Retirement Board—the Secretary of the Commonwealth, State Treasurer, and one representative of the public appointed by the Governor—plus two municipal employes appointed by the Governor from nominees of the organizations of local officials. It is contemplated that the staff administering the State retirement system will with a few additions also administer the municipal system. The system will be financed by employe contributions deducted from salary plus a municipal contribution based on the amount of payroll. The rate of contribution in both cases to be determined by the actuary. Each municipality will in addition have to pay into the fund over a period of years the amount which they should have paid into the fund for municipal pensions had the system been in operation during the whole period of service of their present employes at the time of joining the system.

FEES OF REGISTRARS OF VITAL STATISTICS TO BE PAID BY THE COMMONWEALTH
(H. B. 536 by McIntosh and James)

The state now pays for the registration of vital statistics in first and second class cities, and the counties pay in all other cases. The Local Government Commission, therefore, proposes that since the counties have no part in selecting registrars, the rule as to payment be made uniform by placing the whole cost of registration on the state.

ALLOCATION FROM THE MOTOR LICENSE FUND FOR CITIES, BOROUGHS AND TOWNSHIPS
(S. B. 297 & 298 by Mallery, Stevenson, McGinnis and Coleman)

As mentioned earlier in this report the commission has created a committee to study the problem of allocation of motor user revenues to political subdivisions. From the preliminary work of that committee it is apparent that present methods of allocation unjustly discriminate against the cities, boroughs and first class townships of the Commonwealth. The commission, therefore, recommends a modest allocation to these units pending the completion of more detailed studies and the recommendation of a general revision of all allocations. To accomplish this purpose the commission suggests two bills:

First, S. B. 297, placing a limit of $15,000,000 on the amount distributed biennially to the counties. This limit is higher than the amount distributed to the counties in any past biennium but is less than the amount which would be available for distribution in the coming biennium by approximately $1,500,000 according to the commission's own estimate of gasoline tax yields.

Second, S. B. 298, appropriating $15,000,000 for distribution to cities, boroughs and townships in the calendar years of 1942 and 1943. At present second class townships are receiving an appropriation of $8,500,000 so that the proposed increase is only $6,500,000 which is further offset by the proposed saving of $1,500,000 by placing an upper limit on the county distribution. The net cost to the motor fund is, therefore, only $5,000,000 which is considerably less than the anticipated increase in gas tax yield.

The $15,000,000 appropriated for cities, boroughs and townships is to be distributed 65% on a mileage basis and 35% on a population basis. Each political subdivision will, therefore, receive annually approximately twenty-six and one-half cents ($0.265) for each inhabitant and eighty one dollars and twenty-five cents ($81.25) for each mile of streets, alleys or roads.

Respectfully submitted,

CHARLES R. MALLERY, Chairman.

THE PROPOSED EXTENSION OF THE STATE CAPITOL GROUNDS AT HARRISBURG, PENNSYLVANIA

A Report of the Capitol Grounds Extension Planning Committee

A Sub-Committee of The Pennsylvania State Planning Board Department of Commerce

"It shall be the duty of the State Planning Board to . . . advise with the various State departments and bureaus and with local authorities and individuals with a view to the coordinating of all physical development plans . . . and to prepare . . . a long term development program of all major State improvement projects . . ."

(Excerpt from State Planning Board Law, Act No. 32, July 10, 1936)

An appropriation was made ". . . to the Department of Property and Supplies for the purpose of paying the expenses of making preliminary surveys . . . in connection with any proposed acquisition of real property . . ."

(Excerpt from Act No. 42, Extraordinary Session of 1938)

May, 1941

STATEMENT OF THE COMMITTEE

Extension of the State Capitol Grounds northward has

been widely advocated for many years, but prior to appointment of this Committee, very little has been done about turning words into action.

Any project of this nature requires a considerable amount of spade work. The Committee felt that a sound basis for legislative action would require a thorough assemblage and analysis of all the facts, followed by a plan for action. The accompanying report, based on such a premise, is intended to serve as a guide for acquiring and developing the Extension Area.

Grateful acknowledgment is made of the invaluable assistance of Malcolm H. Dill, Planning Consultant, who was largely responsible for the detailed work in connection with the preparation of this report. The Committee also wishes to express its appreciation of the assistance given by various agencies and individuals who worked with Mr. Dill and with members of the Committee.

CAPITOL GROUNDS EXTENSION PLANNING COMMITTEE

Organized December 12th, 1938 as a sub-committee of the Pennsylvania State Planning Board to study all aspects of the Capitol Grounds Extension project, and to take suitable steps to promote its accomplishment.

DR. J. HORACE McFARLAND Chairman	Chairman, Pennsylvania State Art Commission
F. A. PITKIN Secretary	Executive Director, Pennsylvania State Planning Board, Department of Commerce
HON. JOHN A. F. HALL	Mayor, City of Harrisburg (Until December 31, 1939)
EDWIN S. HERMAN	President, Harrisburg City Planning Commission
HON. GEORGE KUNKEL	State Senator, District XV, Dauphin County (Until November 30, 1940
HON. VANCE C. McCORMICK	Chairman, Harrisburg Area Regional Planning Committee
HON. HOWARD E. MILLIKEN	Mayor, City of Harrisburg (Since January 1, 1940)
HON. DAVID P. REESE, JR.	State Representative, District I, Dauphin County
FRANK A. ROBBINS, JR.	Chairman, State Board of Public Assistance
ROGER W. ROWLAND	Secretary, Department of Property and Supplies
THOMAS E. STEPHENSON	Chairman, Harrisburg Housing Authority
HON. M. HARVEY TAYLOR	State Senator, District XV, Dauphin County (Since December 1, 1940)
HON. RAY E. TAYLOR	State Representative, District I, Dauphin County

STUDY COMMITTEE

Figure Subject
1 The first Extension Area, east of the Capitol, before acquisition, about 1910.
The first Extension Area, east of the Capitol, looked like this in 1910.
2 The same general area in 1940.
The same area thirty years later. All building proposed by the Brunner Plan have been completed.
3 Map of existing streets and blocks in the Extension Area and vicinity.
4 Panorama of the proposed Extension Area.
The white line indicates the scope of the proposed Extension Area.
5 The Capitol from the southwest.
The Capitol's ample altitude above Third Street helps to compensate for the comparatively narrow width of the intervening park strip.
6 View eastward on Primrose Street.
A meat-packing plant forms the end of the vista along Primrose Street.
7 The Capitol from the northwest.
Additional open space is needed north of the Capitol.
8 The southwest portion of Capitol Park, viewed from the Education Building.

The present informal park south of the Capitol Group is of adequate proportions.

9 Main entrance to the North Office Building.
The ungraded hump at Sixth and North Streets still persists, eleven years after completion of the North Office Building, to the main entrance of which a plank bridge serves as the approach.

10 Northwest corner of the Finance Building.
There is barely room for a narrow sidewalk between the Finance Building and North Street traffic.

11 View northward from the main entrance to the Finance Building.
Incongruous neighbors. This is the main entrance approach to the $5,200,000 Finance Building.

12 Intersection of Fisher Plaza, Seventh and North Streets.
The present offset intersection of Fisher Plaza, Seventh and North Streets, forms a traffic hazard.

13 Intersection of Commonwealth Avenue and North Street.
Narrowness of East Street (upper center) creates a traffic dead-end where broad Commonwealth Avenue meets North Street.

14 Map of present use and development, Capitol Grounds Extension Area

15 Map of condition and occupancy of properties, Extension Area.

16 Substandard properties fronting on North Street, across from the Finance Building.
Fire hazards directly opposite the Finance Building.

17 Wickersham School Playground.
Wickersham School Playground will be lost in creation of the Park Belt. It should be temporarily replaced by use of one of the new Building Sites.

18 Close-up of a property on Primrose Street.

19 Proposed street and block plan for the Extension Area.

20 Temporary building and parking in the East Plaza.
These Temporary Buildings, still needed for office space, prevent completion of "The People's Court" east of the Capitol. As long as they remain, parking (410 spaces) naturally continues.

21 View of the Capitol from across the River.
Viewed from across the Susquehanna, the Capitol's appearance suffers from competition of neighboring structures.

22 Vista of the Capitol from Front and State Streets.
As viewed from Front Street the Capitol is still further obscured by the Civil War obelisk.

23 Vista of the Capitol from Second and State Streets.
From Second and State Streets the vista of the Capitol is marred by ill-assorted trees and buildings.

24 State and Third Streets as seen from the west entrance to the Capitol.
In the view westward from the main entrance of the Capitol, high corner buildings diminish the spaciousness of State Street's 120-foot width.

LIST OF TABLES

D	Delinquent County and School Taxes for 1938; assessed valuations for comparison.
E	City and County assessed valuations in the Extension Area.
F	Comparison of appraisals with assessed valuations—site for new Dauphin County Courthouse.
G	Comparison of purchase price with assessed valuations—Northwest Office Building site.

FINDINGS IN BRIEF

1. The Commonwealth has a total investment in the Present Capitol grounds, buildings, and furnishings of more than $36,000,000.
2. Four main reasons urge the proposed extension of the Capitol Grounds:
   (1) Additional open space is needed north of Capitol Park, to provide an adequate setting for the Capitol and the two northern office buildings, and to permit completion of the main entrance to the North Office Building, including extensive grading.
   (2) A high percentage of substandard existing buildings in the Extension Area has a depreciating effect on the State's large investment in the Capitol Group.
   (3) Location of the Capitol Grounds in relation to Harrisburg's business district creates traffic problems that affect both State and City interests. Acquisition of the Extension area would facilitate action for improving traffic and parking conditions.
   (4) Extension of Capitol Park to Forster Street would provide sufficient land to permit future erection of additional State buildings if and when such might be required.
3. To the original 16 acres of Capitol Park the first extension (1912-1919) added 29.6 acres, of which 19 were purchased, the remainder comprising streets and alleys. The proposed extension of Capitol Park would add 23 acres, of which 15 are in properties to be acquired, and the remainder in streets and alleys.
4. In the proposed Extension Area 176 owners possess 334 properties; 13 per cent of the latter are held by financial institutions. (The first extension included 541 properties.)
5. The Extension Area is characterized by mingling of residential, commercial and industrial uses. Negro occupancy amounts to nearly 50 per cent.
6. A majority of the 295 dwelling units in the Area are in run-down or only fair condition; 27 per cent are obvious fire hazards; 30 per cent have outside toilets.
7. As of December, 1938, monthly residential rentals varied from $7, to $534. (The high figure was for a large apartment building.) Median residential rent was $25.
8. As of March, 1940, the Extension Area accounted for 2.3 per cent of delinquent county and school taxes within the City, while it comprised only 1.4 per cent and 1.5 per cent respectively, of the total assessed valuations.

9. Shortage of dwellings in Harrisburg has caused a higher percentage and quality of occupancy in the Extension Area than the average structure justifies. Easing of the shortage by new construction would tend to depreciate these properties further and faster.
10. City and County 1940 assessed valuations of the Extension Area are $1,549,694 and $1,378,820. Based on recent purchases of comparable properties, and considering the present, and probable future of the area, $2,750,000 is estimated as a likely purchase price for the tract, to which should be added an estimated 2½ per cent, or $68,750 for expenses of acquisition.
11. Possible methods of financing acquisition of the Extension Area include:
    (1) Legislative appropriation (preferably for complete purchase at one time; or a planned program of acquisition over a period of years).
    (2) An agreement by the State to repay the Harrisburg Housing Authority for its intermediary purchase of the Area with funds to be borrowed from the United States Housing Authority.
    (3) A similar State agreement to repay the Harrisburg Housing Authority for its purchase of the Area through sales of housing bonds.
12. Preliminary legal investigation indicates that existing legislation would permit adoption of any of the foregoing three methods of financing.
13. Although urgently needed to protect the Commonwealth's present and proposed investment, there are no existing restrictions as to the height, area, use, and character of buildings, or use of the land, on street frontage opposite the Capitol Grounds.

RECOMMENDATIONS

Concerning Purchase of the Extension Area, it is recommended:

1. That the 1941 session of the State Assembly take action to provide for acquisition of the Extension Area, and of the additional ground needed at the east approach to Memorial Bridge.
2. That in default of prompt purchase of the whole Area, the State take steps to acquire now-used or usable property in the Extension Area, such as the Oddfellows Building, and the north half of Block 10. (See Fig. 14.)

Concerning Streets in the Extension Area, it is recommended:

3. That North, Briggs, Capital, South, East, Cowden, and Seventh Streets, with intervening alleys, be eliminated.
4. That Commonwealth Avenue and Fisher Plaza be extended northward to Forster Street.
5. That the City of Harrisburg officially recognize as future construction projects, extensions of Commonwealth Avenue northward to Sixth and Boas Streets, and southward to Fourth and Chestnut Streets.
6. That widening of Forster and Third Streets be done as part of the Extension Area development, and of Sixth and Seventh Streets as related municipal projects.
7. That cooperation of the City be sought in improving the profile and gradient of Forster Street at the time of its widening by the State, and in making adjustments in adjacent streets affected by changes in the level of Forster Street.
8. That the entrance and exit drives northward and southward from the proposed Capitol Plaza garage provide for two-way traffic, in order to avoid concentration of all exiting cars at one point, thus involving an excessive number of left turns during peak-traffic hours.
9. That if street revisions cannot all be achieved at one time, the first phase include changes within the North-Briggs strip of blocks; the second phase to include the Briggs-Forster strip.

Concerning Blocks in the Extension Area, it is recommended:

10. That a distinction be recognized between a permanent park belt along the south half of the Area, and a strip of building sites along the north half, and east of Fisher Plaza.

Concerning Demolition of Buildings, it is recommended:

11. That all structures in the Park Belt except the Oddfellows Building, and all substandard structures in other portions of the Area, be demolished as soon as possible after acquisition by the State.
12. That whether or not the Harrisburg Housing Authority becomes financially involved in acquisition of the Extension Area, its assistance be sought in connection with the timing of demolition.

Concerning Underground Utility Lines, it s recommended:

13. That undertaking of changes be preceded by careful study of projected grading in connection with redesign of streets and blocks, so as to assure the minimum amount of alteration of utilities, and to avoid subsequent readjustments.

Concerning the Park Belt (See Fig. 19), it is recommended:

14. That it constitute a permanent park setting for the north side of the Brunner Plan group of buildings, now completed.
15. That it be planned as an extension of the informal character exemplified by the present grounds west and south of the Capitol group.
16. That it be planned as a unit by a landscape architect (the latter to be selected from a list furnished or approved by the Pennsylvania Chapter of the American Society of Landscape Architects), careful study being given to the relation between proposed grading of the Park Belt and of adjacent streets and building sites.

Concerning Interim Use of Building Sites A, B, C, and D (See Fig. 19), it is recommended:

17. That during the first interim period (prior to completion of all street alterations), having eliminated

undesirable buildings, the State utilize any remaining suitable structures. Probably included would be the Odd-fellows Building and the structures in the north half of Block 10. (See Fig. 14.)

18. That any other remaining structures be rented by the Commonwealth as lessor until their sites are needed for permanent State buildings. Probably included would be 43 dwellings in Blocks 3, 4, and 5, and the filling station, garage court, and cinder block buildings in the south half of Block 10.
19. That the State and City cooperate in selecting one or more areas for interim use as public playgrounds.
20. That space not otherwise needed be made suitably available for car parking, preferably with a moderate rental charge.

Concerning the Parking Problem, it is recommended:

21. That a comprehensive study be made of parking in relation to the Capitol Grounds, existing and proposed, and to city motor traffic and public transit, so as to determine the best permanent solution from the standpoint of all concerned.

Concerning Provision for Improvement of the Extension Area, it is recommended:

22. That in respect to such suitable activities as demolition of buildings, revision of streets, alteration of utility lines, and development of the Park Belt, future opportunities for alleviating unemployment and achieving economies through use of relief labor be investigated and planned for during the period of acquisition, so as to avoid subsequent delays in starting work.

Concerning Protective Regulations and Covenants for the Environs of Capitol Park, it is recommended:

23. That the City of Harrisburg have a zoning ordinance prepared as soon as possible.
24. That the City pass an ordinance requiring owners of frontage facing Capitol Park to submit proposed uses and structures for approval of the State Art Commission.
25. That the State seek passage of an Act covering the same item.
26. That efforts be made to organize a Capitol Park Association, formed of all, or as many as possible, of the owners of present or prospective frontage on Capitol Park and its Extension, for the purpose of promoting the optimum development of that frontage, and to confer with the State Art Commission toward that end.

THE PROPOSED EXTENSION OF THE STATE CAPITOL GROUNDS AT HARRISBURG, PENNSYLVANIA

I. INTRODUCTION

The original Capitol Park, comprising an area of 16 acres, was acquired at intervals prior to 1873. A four-acre tract donated by John Harris, the younger, founder of Harrisburg, formed the nucleus of the site. Ten acres were added by purchase from William Maclay, Harris' son-in-law, and one of Pennsylvania's first two United States Senators. A connecting strip, including several properties, rounded out the site. Cost of all acreage purchased was $36,430, or $3,028 per acre.

With completion of the present Capitol building in 1906, following the burning of the original structure in 1897, it became evident that construction of any additional buildings in Capitol Park would detract seriously from the dignity of the Capitol and its setting. By 1911 the need of more office space had become pressing. The first step in an expansion program was taken when, by Act of Assembly, approved June 16, 1911, Governor Tener appointed three citizens as members of the Capitol Park Extension Commission,

> ". . . to acquire title in the Commonwealth to all the land . . . within the following boundaries, namely, on the west, by the present eastern line of Capitol Park; on the north, by the southern line of North Street; on the east by the western line of the right-of-way of the Pennsylvania Railroad Company, and on the south, by the northern line of Walnut Street."

This tract, including streets and alleys, comprised 29.59 acres. The net area purchased contained 19.05 acres,* including 538 separate buildings, and 3 vacant lots. Acquisition extended from February, 1912, to March, 1919. Cost of all properties acquired was $2,276,070. Buildings on the site, except for a few that were used temporarily for State offices, were demolished following acquisition.

In 1916 Arnold W. Brunner, Architect, was employed to devise a plan of development for the new Capitol Park. Warren H. Manning was retained as Consulting Landscape Architect. The comprehensive scheme, since known as the "Brunner Plan," was the result of their joint efforts.

The first structure to be erected in accordance with the Brunner Plan was the South Office Building, completed in 1920. Space therein being inadequate for all needs, three smaller "Temporary Buildings" (still in current use after twenty years) were erected to the north of it, and east of the Capitol. Two more "Temporary Buildings" followed in 1925 and 1929. In the latter year the North Office Building was completed. The Education and Finance Buildings, occupied respectively in 1931 and 1939, filled in the last two spaces allotted for structures in the Capitol Park plan. Memorial Bridge, authorized in 1919, and essentially completed in 1930, centers on the east-west axis of the Capitol group, forming the eastern approach to Capitol Park from "The Hill" section of the City. The State's total investment in the Capitol area, including grounds, structures, and furnishings, amounts to more than $36,000,000 as shown by Table A.

TABLE A—INVESTMENT OF THE STATE IN THE PRESENT CAPITOL PARK AREA

	Cost	
Land		
Original 16-acre site, including gift of 4 acres	$ 36,430	
Extension of 1912-19 (29.59 acres)	2,276,070	
Total	$2,312,500	
Less .41 acre sold to Pennsylvania Railroad in 1928	45,100	
	$2,267,400	
Net total cost of present site		$2,267,400

* In 1928, .41 acre was sold to the Pennsylvania Railroad in connection with track relocation necessitated by construction of the State Memorial Bridge.

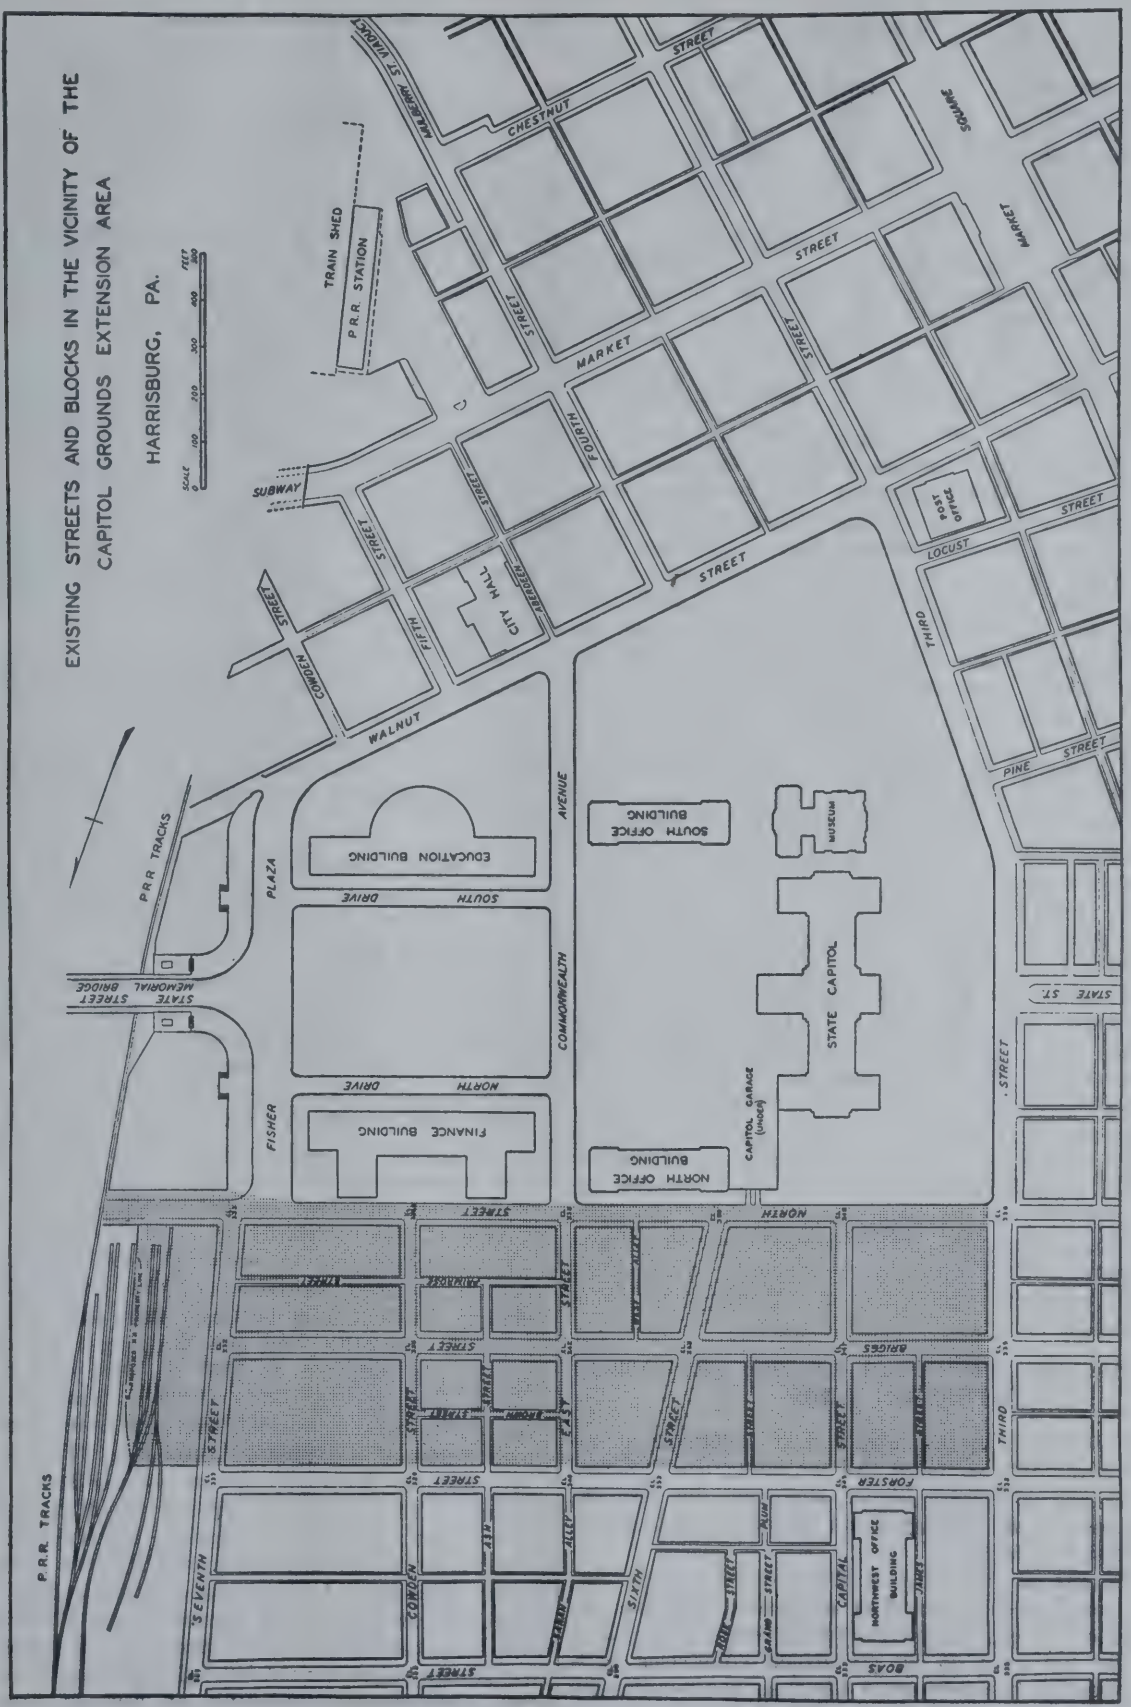

Fig. 3. The shaded portion indicates the proposed Extension Area.

	Completed	Cost	
Buildings			
Museum Building	1894	$ 500,000	
Capitol Building	1906	10,073,000	
South Office Building	1920	3,250,000	
North Office Building	1929	3,000,000	
Education Building	1931	5,500,000	
Finance Building	1939	5,200,000	
		$27,523,000	
Total cost of buildings			$27,523,000
Memorial Bridge—(Constructed 1919-30; not entirely completed)			4,000,000
Furnishing			2,500,000
Grand Total			$36,290,400

Mr. Brunner and his associates felt that additional land should be acquired beyond North Street, but because of the cost involved in its purchase, this extension was not pressed. North Street thus became the northern boundary of the tract, with the expectation that it would be lowered and regarded. As evidence that such action was anticipated, grading and the main entrance approach on the north side of the North Office Building have remained uncompleted for the past eleven years. (See Fig. 9.) North Street has not been lowered, on the one hand, because of the cost that would be involved in street reconstruction, in relocation of utilities, and in payment for heavy damages to adjacent private properties; and on the other hand, because of the weight of feeling that Capitol Park should eventually be extended northward, in which case North Street and these private holdings would be eliminated.

Generally speaking, properties in the northward vicinity of Capital Park have shown a tendency in recent years to deteriorate rather than to undergo improvement, but a recent considerable change in use of property at the corner of Third and North Streets serves as a reminder that at any time extensive development might occur which would add greatly to the cost of acquisition of land for extension of the Capitol Grounds.

The time therefore seems ripe for a thorough analysis of all factors involved in a second extension of Capitol Park. The purpose of this report will be to review the project—presenting all pertinent facts, making estimates of costs, where practicable, and recommending procedures, —as a basis for timely action by the elected and appointed representatives of the people of the Commonwealth of Pennsylvania.

II. SCOPE AND PURPOSES OF THE PROPOSED EXTENSION AREA

The area included in the proposed enlargement of the Capitol Grounds extends from and including North Street to the south side of Forster Street, and from the east line of Third Street to the Pennsylvania Railroad right-of-way east of Seventh Street.

The gross area of this tract is 23.0 acres—6.6 acres less than were contained in the first extension. Streets and alleys include 7.84 acres; service access ways total .22 of an acre; the net area to be purchased comprises 14.94 acres. Properties involved total 334,* as compared with 541 in the first extension project.

Several factors appear to justify the Extension Project:

(1) Additional open space is needed North of the Capitol, the Finance Building and the North Office Building.

The Park extends more than 600 feet southward from the Capitol Building to Walnut Street, but only 170 feet to the north. Both the North Office Building and the Finance Building are set within a few feet of the south line of North Street. The present sidewalk runs alongside the facade of the Finance Building, and a double ramp which gives access to the northeast wing takes up part of the sidewalk width.

When the North Office Building was erected the supposition was that either Capitol Park would be extended northward, or the hump in the profile of North Street at that point would be cut down. Accordingly the finished grade at the building line is 10 feet or so below the present street level. Since 1929 a makeshift wooden platform has given excess to the main entrance to this building. (Fig. 9.) Steep ramps connect North Street with the sub-terrace garage between the North Office Building and the Capitol.

Extension of the grounds northward, with suitable grading and planting, would provide an adequate, balanced setting for the front of the Capitol. It would also supply a much needed foreground for both the Finance and North Office Buildings in the latter case permitting unfinished grading and approaches to be properly completed.

(2) A high percentage of run-down and substandard buildings in the extension area has a depreciating effect on the states investment of $36,000,000 in capitol park.

In the blocks directly across from the new $5,200,000 Finance Building there are more than 50 structures that constitute obvious fire hazards. (See Fig. 16, page 19.) With some of these as near as 70 feet to the Finance Building, an extensive conflagration might seriously damage that structure, both outside and inside.

At least in the eastern half of the proposed Extension Area, properties have deteriorated to such an extent that there is no incentive for individual owners to take advantage of the proximity of Capitol Park by renovating existing structures or erecting new ones. The City's average assessed valuation of the 23 dwellings which front on North Street between East and Seventh Streets is $1,878, including land and buildings. Of these dwellings 15 are assessed at $850 or less; only four exceed $1,000. One, located on a $1,000 lot, is valued at $200! Such is the present outlook from the main entrance at the north Front of the Finance Building. (Fig. 11.)

Fortunately the north side of Forster Street is generally characterized by a better type of structure than those between North and Forster Streets, particularly in the section between East and Seventh Streets. Forster Street would therefore form a more satisfactory permanent boundary for the Capitol Grounds than North Street does now. Furthermore, with Capitol Park extended north two blocks there would be sufficient width so that even after considerable widening of Forster Street on the south side there would be ample room for any possible future State buildings to be set back from the street far

* This figure includes one residential property on Sixth Street obtained by the Commonwealth through a bequest, the legality of which has been upheld.

enough to eliminate fire risk from external sources, and to assure provision of satisfactory foreground on the Forster Street side.

(3) The location of the Capitol Grounds in relation to Harrisburg's business district creates traffic problems that affect both State and City interests.

Steps toward betterment of traffic conditions in the immediate vicinity of Capitol Park have included both marginal and interior street improvements. The former consisted of widening Third and Walnut Streets to 48 and 52-foot pavements respectively. Within the boundaries of Capitol Park have been located Commonwealth Avenue and Fisher Plaza,* with 52 and 80-foot roadways, and the one-way North and South Drives, each 36 feet wide. Construction of these new trafficways was in accordance with the Act of Assembly** which created the Capitol Park Extension Commission, and which specified

"that the said Commission shall lay out not less than two streets or public highways, running northwardly and southwardly through the said district, and one eastwardly and westwardly . . ."

Construction of Memorial Bridge on the line of State Street has provided an exceptionally fine eastern approach to the Capitol Grounds as well as to the business district of Harrisburg.

To the north of Capitol Park lies the unimproved portion of the street pattern. North Street, which forms the marginal thoroughfare, has only a 33-foot pavement. That it is highly inadequate to cope with traffic demands is demonstrated daily during the rush hour.

Into it from the south feeds Fisher Plaza, the northward outlet of State Street and Memorial Bridge. This street is dead-ended at North Street, and so traffic must turn westward thereon or make a sharp reverse turn into Seventh Street. (Fig. 12.) Also from the south comes Commonwealth Avenue, which likewise dead-ends in effect, inasmuch as its 52-foot roadway bottlenecks into the 22-foot width of East Street. (Fig. 13.)

All streets from the north between Third Street and the Railroad stop at North Street, if we except the previously-mentioned East Street, and the short jog at Seventh Street. Sixth Street, like Seventh, carries a large volume of traffic, which must turn right or left onto North Street.

As already noted, the entrance and exit to the Capitol-terrace garage, which stores some 70 cars, now involve steep ramps to and from North Street. During the late afternoon rush period, egress up to the street is difficult and dangerous for the numerous users of the garage.

Acquisition of the land as far as Forster Street would provide sufficient width to permit its being widened as an ample marginal thoroughfare; would permit satisfactory conections between Fisher Plaza and Seventh Street, and between Commonwealth Avenue and Sixth Street, and would facilitate safe and convenient issue of traffic from the Capitol garage.

It may be justifiably remarked that it is not up to the State to solve Harrisburg's traffic problems. In the instances mentioned above, however, interests of the State are clearly involved. Also, there are two good reasons why the State should cooperate with the City in working out improvements in traffic conditions in the vicinity of the Capitol Grounds. One is that occupancy by the latter of half the width of lower Harrisburg's restricted site—between river and railroad—adds greatly to the City's traffic difficulties. The second reason is that at the present time close to a thousand cars of State employees are parked daily in or near Capitol Park. Practically simultaneous mingling of this large group of vehicles with the City's traffic flow during rush hours is by far the largest single factor in what has become a complicated and difficult problem.

For the above reasons it seems logical to consider localized improvement of traffic conditions as one of the purposes for extending the Capitol Grounds.

(4) Extension of Capitol Park to Forster Street would provide sufficient land to permit erection of additional State buildings if such should be required in the future.

At the time of the first extension of Capitol Park it appeared that sufficient ground had been acquired to satisfy prospective needs for State building sites. Yet the large new Northwest Office Building at Capital and Forster Streets which houses the Liquor Control Board, has already been located outside of Capitol Park.

Contrasting with the recent period of building construction in and near the Capitol grounds, to house State departments, present administrative policy aims at the most effective use of present structures, and reduction of rented space to the minimum. It is difficult to foresee whether or not additional sites for State buildings may be required at some future time, but it seems wise not to limit the current Extension project to the very minimum of ground needed as a park setting for the present building group. Purchase of land to Forster Street would not only provide an adequate area for protection of the State's large investment in Capitol Park, but also permit any possible future structures to be grouped in convenient close relationship to each other, and to buildings of the present Capitol Group, without encroaching on needed open space.

III. PRESENT STATUS OF THE PROPOSED EXTENSION AREA

A brief inventory of present conditions in the area proposed for extension of the Capitol grounds will give a more complete understanding of several factors involved in its acquisition. Pertinent aspects include ownership, uses and physical condition of properties, and economic and social conditions.

(1) Summary of Property Ownership (March, 1940)

Separate groups of data were obtained at several different times, ranging from July, 1938 to March, 1940. Though some minor modifications have occurred since 1938, and one considerable change in use—in the Third and North Street block—all the data are still essentially valid. The date following each subheading indicates when the information was obtained.

Table B following shows that 43 properties, or 13 per cent of the 334 involved, have been taken over by banks, trust companies, or building and loan associations. These holdings are distributed throughout 11 of the 20 blocks in the Area, with more than half of Block 12 (bounded

* The not very generally known name of the broad north and south street at the west end of Memorial Bridge.
** June 16, 1911 (Penna. Laws, Page 1027).

by Briggs, Seventh, Primrose, and Cowden Streets), so owned. For all of Harrisburg, according to the City Assessor's Office, the percentage of properties held by financial institutions is only 5.3 per cent of all properties in the City.*

Of the 5 properties acquired for taxes, and now held by the City, 4 are in Block 7, on Forster and Brown Streets, and 1 is in Block 9, also on Brown Street. Two others on Sixth Street have recently been redeemed by former owners. The property at 707 Sixth Street was recently willed to the State.

Of the 10 properties owned by religious organizations only three are places of worship. Although the latter are not subject to condemnation by Pennsylvania municipalities, according to the Legislative Reference Bureau neither the Constitution of the Commonwealth nor any legislative act limits the rights of the State in respect to its acquisition of such properties.

(2) Summary of Property Uses (March, 1940)

The Map of Present Use and Development (Fig. 14) shows the location of buildings in accordance with the following classifications: Residential, Subsidiary Residential (generally private garages), Residential and Commercial, Commercial, Public and Semi-public, and Vacant Ground.

The whole area is characterized by intermixture of types of use. Only Block 10 and 11 are entirely commercial, and only Block 15, which is really only a quarter-block, is wholly residential. All of the others include one or more business or other non-residential occupancies intermingled with residences—a condition characteristic of unzoned communities, and an important factor in causing blight of real property values.

Classification of occupancies within the Area may be further simplified, as follows: RESIDENCE ONLY (dwellings with or without rental of rooms; apartments), 266, or 80 per cent: RESIDENCE COMBINED WITH BUSINESS (usually business on first floor, with residence above), 29, or 9 per cent; BUSINESS AND OTHER NON-RESIDENTIAL USES (churches, schools, filling stations, warehouses, etc.), 38, or 11 per cent. Total or partial residential use thus includes 295 properties, or 88 per cent of the total Negro occupancy occurs in slightly less than 50 per cent of the residential properties.

TABLE B—SUMMARY OF PROPERTY OWNERSHIP IN THE CAPITOL GROUNDS EXTENSION AREA

Classification	Number of Owners	Number of Properties
Individual Owners or Partnerships ..	155	257
Banks Trust Companies, Building and Loan Associations	8	43
City of Harrisburg	1	5
Harrisburg School District	1	3
Commonwealth of Pennsylvania	1	1
Religious Organizations	4	10
Secular Organizations Lodges, etc. ..	4	11
Large Corporations	3	5
Total	176	334

* Total number of properties listed is 24,624, including 477 taken over for taxes by the City, and 326 additional untaxable properties. Of this total, financial institutions own not less than 1300.

(3) SUMMARY OF PHYSICAL DEFICIENCIES OF PROPERTIES (July, 1938)

Conditions noted in Fig. 15 are as of July, 1938, but 17 dwellings (16 in Block 20, 1 in Block 7, all substandard), removed since that date, have been excluded from the figures which follow.

Of the 295 structures used for residence, 119 were in run-down condition, and 52 were in only fair shape; 106 had poor light and air, while 68 were only fair in that respect; 81 constituted serious fire hazards, and 39 were moderate menaces; 88 had outdoor toilets, but none inside; 33 had running water outside but not inside; and 3 had no running water inside or out.

There hase been no appreciable correction of deficiencies since the survey. Worst conditions are found in the 8th ward blocks east of Sixth Street, but there is not a residential block in the Area in which at least one type of substandard factor is not present to a marked degree.

(4) SUMMARY OF ECONOMIC CONDITIONS (Rentals —December, 1938: Tax Delinquencies—March, 1940)

In December, 1938, the area in question was covered by the Harrisburg Real Property Inventory. Residential rentals were among the data obtained. Figures given in TABLE C are based either on the actual rent reported as paid by the tenant or lessee, or in the case of owner occupancy, the amount which he gave as the probable figure that the property would bring if rented. In a number of cases, the occupant (renter or owner) derives considerable additional income from rental of rooms or apartments. Where first floors are used for business, only residential portions are included in rental figures.

In Table C, North Street is separated into two parts, because rentals westward from East Street are very much higher than they are eastward. No such variation is found on either of the other long streets—Briggs or Forster.

Due to Harrisburg's policy of selling properties for overdue taxes there is no delinquency of City taxes in the Area. However, the seven dwellings taken over by the City, as previously noted, are a reflection of formerly-unpaid City taxes.

School taxes are based on the City's rather than the County's assessed valuation, but delinquent School and County taxes in conformity with State law, are recorded together in the County Treasurer's office. In a few instances both these tax groups go at least as far back as 1931. For that year six properties within the Extension Area owe a modest total of $31.68 to the County, and three of the same ones owe $39.84 in School taxes. Most of the debts are being paid in small installments. For 1932, twenty properties owe the County $133.65, and the School District $317.15.* For the years following 1932 the amounts increase annually.

Table D indicates that the percentage of 1938 overdue taxes, both County and School, in the Extension Area, is somewhat higher than the Area's proportionate share of the total assessed valuation of Harrisburg's real property. It can hardly be said, however, that tax delinquency of

* All 1931 and 1932 Extension Area delinquencies were offered at tax sale in May, 1940. With very few offers made, most properties fell, with existing encumbrances, into conditional possession of the County Commissioners and the School Board.

Extension Area properties is excessive in comparison with that for the whole City.

TABLE C—MONTHLY RESIDENTIAL RENTALS IN THE CAPITOL GROUNDS EXTENSION AREA

Street Name	Number of Properties	Lowest Rent	Highest Rent	Median Rent	Remarks
BRIGGS	65	$11	$136.50	$30	Only 2 properties over $65
BROWN	16	7	17	12	
CAPITAL	22	10	98	42.50	
COWDEN	18	12	40	17	Only 2 properties over $25
EAST	19	12	75	20	Only 1 property over $25
FORSTER	24	10	40	25	
JAMES	15	14	22	20	
NORTH (Third to East) ...	13	35	534	60	Only 2 properties over $85
NORTH (East to Seventh)	23	10	40	17	
PRIMROSE ..	17	10	18	12	
SEVENTH	2	18.50	18.50	18.50	
SIXTH	47	22.50	205	60	Only 4 properties over $100; only 1 under $40
THIRD	12	35	130	50	Only 2 properties over $65
WEST ALLEY	2	25	25	25	

The above figures include several apartments, and boarding-houses containing multi-family units.

TABLE D—DELINQUENT COUNTY AND SCHOOL TAXES FOR 1938 (as of March, 1940); ASSESSED VALUATIONS, 1940, FOR COMPARISON

	County	School
Extension Area properties—1938 delinquent taxes	$365	$1,062
Total Harrisburg properties—1938 delinquent taxes	15,874	45,679
Extension Area's percentage of Harrisburg's Total—1938 delinquency	2.3%	2.3%
Extension Area: assessed valuation of taxed properties—1940	$ 1,186,370	$1,345,860
Total Harrisburg assessed valuation of taxed properties—1940	80,075,180	92,155,495
Extension Area's percentage of Harrisburg's Total assessed valuation of taxed properties ...	1.4%	1.5%

(5) SUMMARY OF SOCIAL CONDITIONS

Juvenile delinquency is not a serious problem in the Extension Area. Not more than five or six cases have occurred during the past two or three years. It is obvious, however, that physical conditions of properties such as have been previously noted are not conducive to desirable social and health conditions.

In many instances the character of present occupants of dwellings is superior to their environment because of the housing shortage in Harrisburg and vicinity. The recent Real Property Inventory showed that the City proper has a surplus of dwelling units only 2 per cent above actual requirements, as compared with a generally accepted normal minimum of 5 per cent. Of the 2 per cent, one-third were found to be substandard. Suburbs show an even narrower margin of surplus.

Such a shortage leads to overcrowding, and to forced acceptance of housing conditions that would not be tolerated where a reasonable margin of choice existed. If continued building of new dwellings should occur in Harrisburg and its suburban territory, so that a satisfactory surplus is created, the Extension Area will be one of the sections in which vacancies will tend to increase (unless renovation should keep pace with the increasing supply of dwelling units), thus further depreciating the less desirable properties in the section. Such depreciation would affect unfavorably the whole neighborhood, including Capitol Park.

IV. COST FACTORS IN ACQUISTION OF PROPERTIES IN THE EXTENSION AREA

Having considered reasons for purchase of the Extension Area, and its present status the next question concerns the probable cost of its acquisition.

Naturally only the actual process of purchasing can determine with complete accuracy what the cost will be, but consideration of pertinent data should make possible a reasonably close estimate. No single basis is sufficiently valid to stand alone, but several bases will furnish valuable indications of a likely figure.

Table E shows by blocks and totals both City and County assessed valuations of properties in the Extension Area. The City's total is approximately $1,549,694;* the County's $1,378,820. In the former instance, land values compose 42 per cent, and improvements, 58 per cent. County taxes do not separate these two items.

In the City's tax base, residential assessments are supposed to be 50 per cent of the true value. All other properties, including vacant lots, and mixed residential and commercial places, are presumably assessed at 66 2-3 per cent of true value. (An exception has been made in Table D as regards "Estimated True Values" by including church properties at twice, rather than two-thirds of their assessed valuations.) On the above basis, the total estimated true value of the City's tax base would be $2,742,880.

For the County's tax base, all assessments are supposed to represent from 50 to 55 per cent of true value. On this basis, the "true valuation" of the Extension Area would be between $2,506,945 and $2,757,640.

* This amount does not include a figure not yet available for improvements installed on the new parking lot at Third and North Streets. The old High School property (tax exempt), in accordance with the suggestion for the City Assessor's Office, is included here at $40,000 instead of the present book figures of $118,140 (City) and $150,000 (County). A strip of local tax exempt Pennsylvania Railroad property east of Seventh Street is prorated as part of the company's tentative valuation of $80,000 on its property proposed for acquisition.

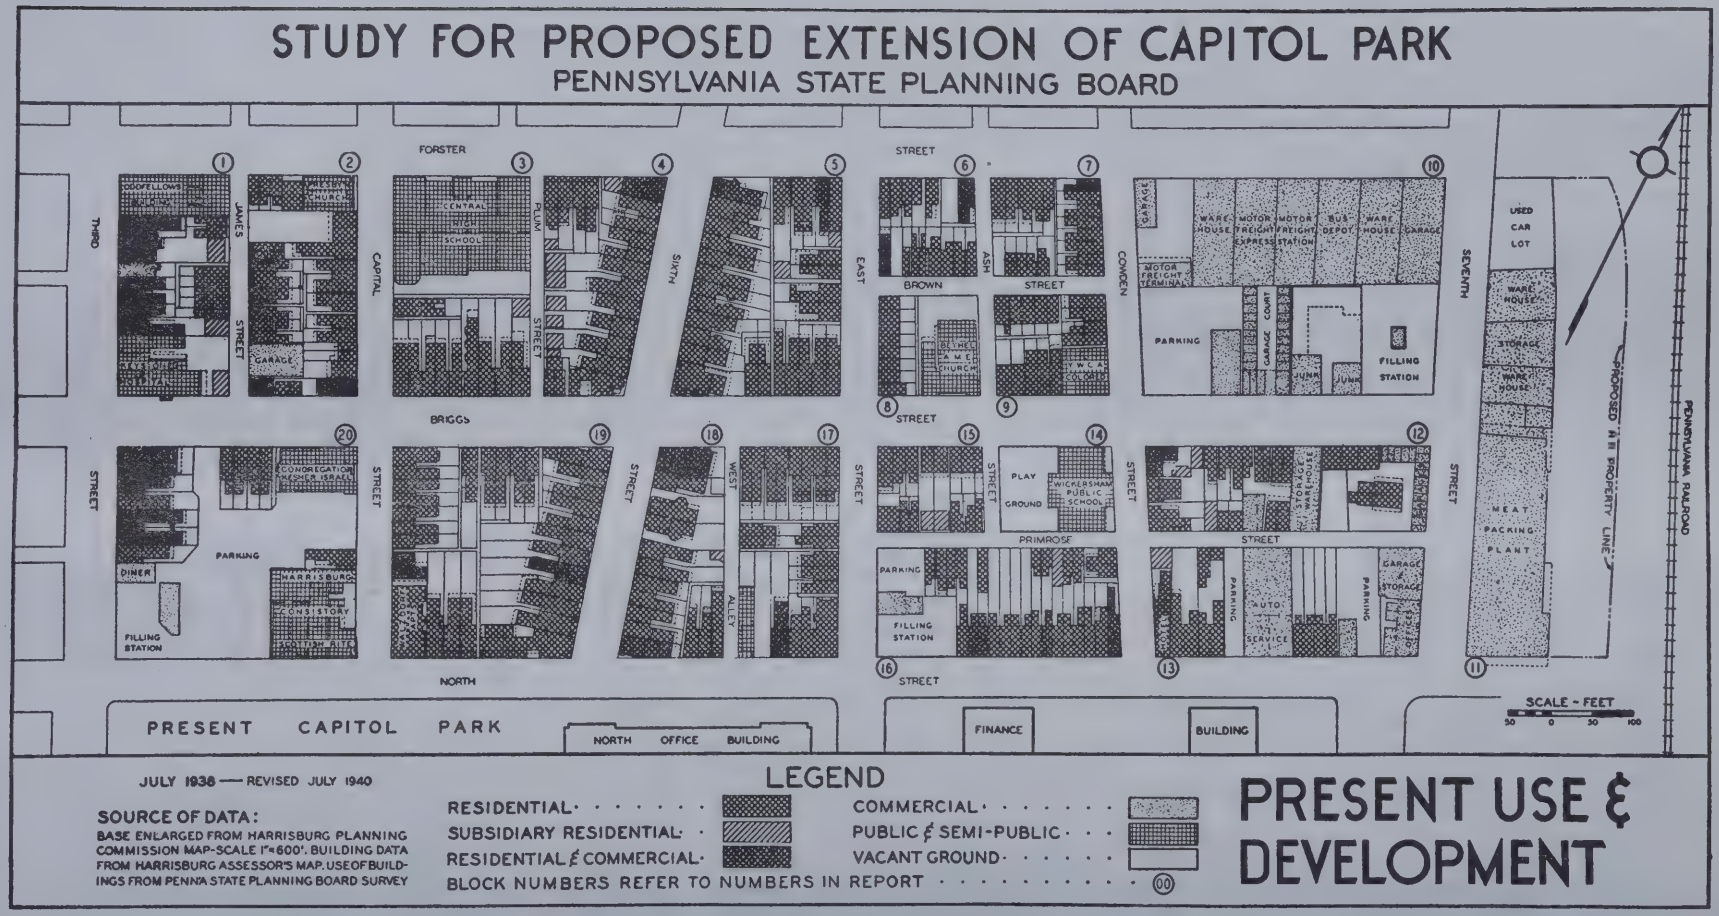

Fig. 14. Map of Uses.

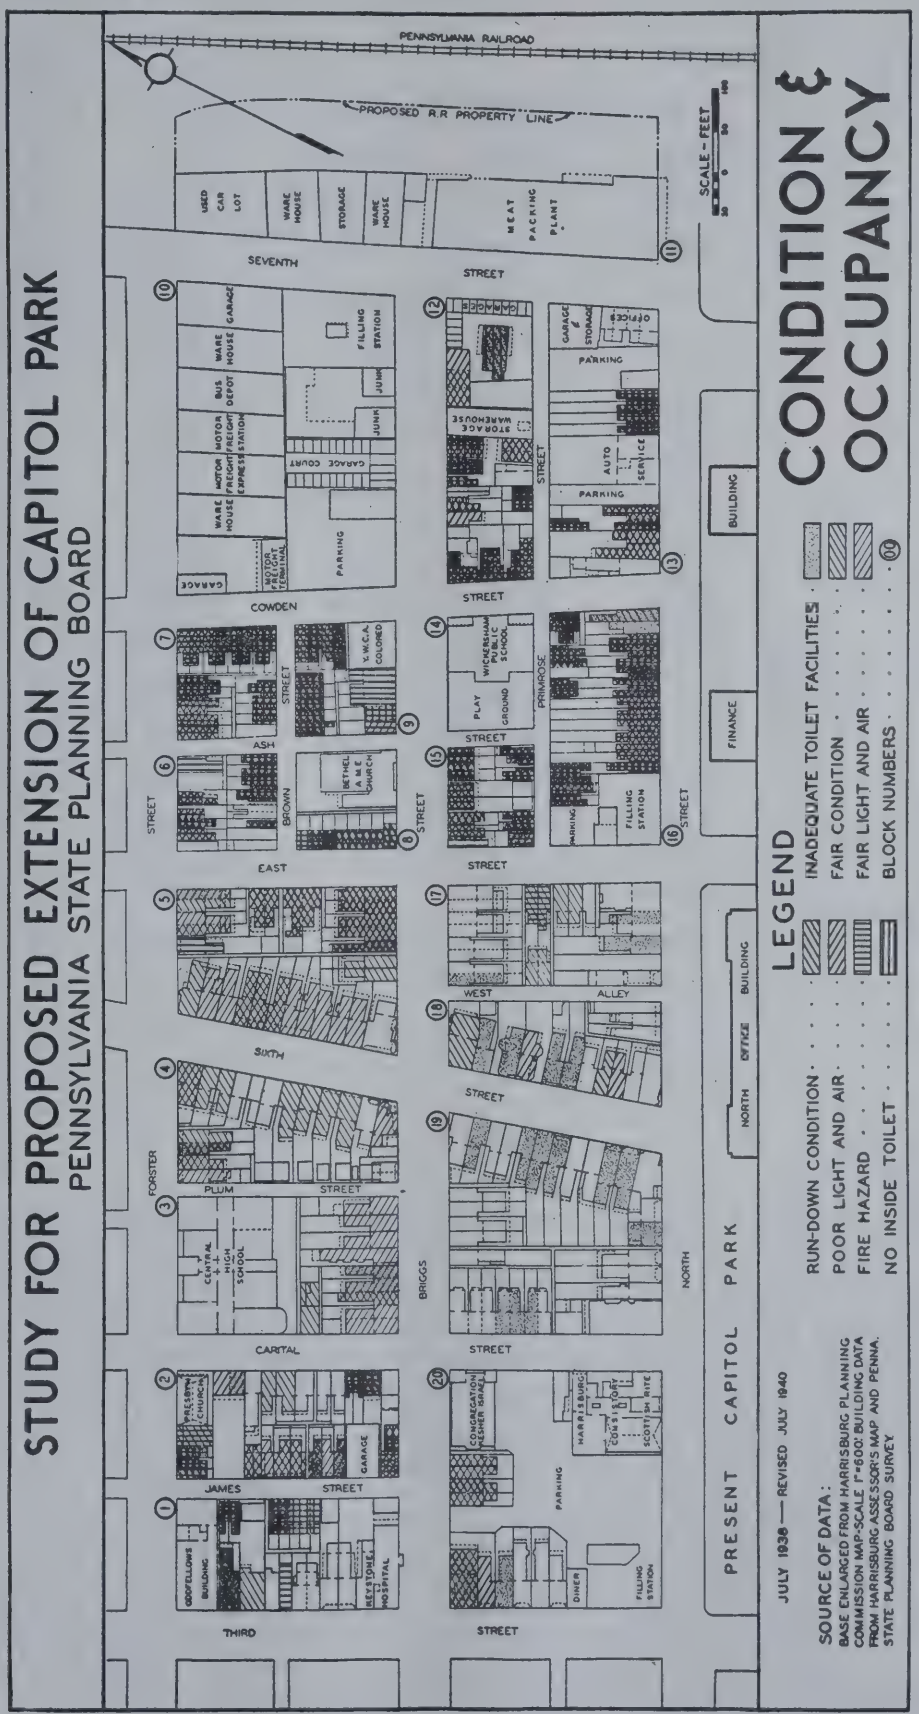

Fig. 15. Map of Conditions.

TABLE E—CITY AND COUNTY ASSESSED VALUATIONS IN THE EXTENSION AREA BY BLOCKS (1940)

Block	Boundary Streets	CITY ASSESSED VALUATION Land	Buildings	Total	COUNTY Est. True Value	Assessed Valuation Total	Est. True Value
1	Forster—James Briggs—Third	$50,300	$77,200	$127,500	$193,430	$120,500	
2	Forster—Capital Briggs—James	23,970	66,450	90,420	175,005	90,200	
3	Forster—Plum Briggs—Capital	37,640	48,060	85,700	151,400	88,000	
4	Forster—Sixth Briggs—Plum	34,040	48,650	82,690	161,180	93,100	
5	Forster—East Briggs—Sixth	39,090	78,850	114,940	225,595	99,650	(See total)
6	Forster—Ash Brown—East	8,660	9,450	18,110	33,180	16,445	
7	Foster—Cowden Brown—Ash	8,230	13,300	21,530	41,650	18,185

19	Briggs—Sixth North—Capital	68,460	121,500	189,960	353,990	194,900	
20	Briggs—Capital North—Third	111,800	72,600	184,400	321,315	164,500	
	Totals	$649,234	$900,460	$1,549,694	$2,742,880	$1,378,820	$2,757,640 (high at 50%) or ($2,506,945 low at 55%) *

* See text, preceding page.

Assessed valuations and adjusted percentages thereof cannot, however, be accepted as infallible evidence of probable costs. There has been no general revision of City assessments since 1918. County figures are based on personal opinions of local ward and precinct officials, who may vary considerably in their standards of judgment.

Another partial clue may be found in comparison of assessed valuation, appraisal, and final cost of the first extension of Capitol Park. The City's assessment figure was $908,014, and the appraisal approximately $1,738,300,* which is 191 per cent of the assessed valuation. Actual cost was $2,276,070 or about 250 per cent of the City's assessment. In considering these facts in relation to the proposed Extension Area, it is necessary to remember that ideas of real estate values have changed considerably since the period of 1912-1919. Then it was generally assumed that an indefinitely-expanding population would continue to require expansion of business districts, so that deteriorated residential areas along the edges of the main shopping section (such as the first extension area) were regarded as potential commercial property, and values scaled accordingly. Today, with the imminent prospect of a stabilized population in practically all cities, exaggerated ideas of future expansion must be discounted. One man connected prominently with Harrisburg real estate has affirmed that there has been a general depreciation of Harrisburg real property to the extent of one-third of peak values in former years.

A tendency to bear out the above contentions is indicated by Table F, which shows valuations of the site being obtained for a new Dauphin County Courthouse. As shown therein, the purchase price is 211.6 per cent of the County's valuation, and 166.6 per cent of the City's assessment figure. Yet this property has frontage on Market and Front Streets, within a block of Market Square. The

* Appraisal figures are not available on all properties. Records disclose, however, that the appraisals on all but twelve tracts (which cost $35,300) amounted to $1,703,000. The total given above is the sum of the two figures quoted in this footnote.

City's valuation indicates front foot rates of from $300 to $550 on Market Street, and $225 to $300 on Front Street. The most highly valued frontage in the proposed Extension Area is on the east side of Third Street, between North and Briggs Streets—$200 per front foot, and on North Street between Third and Sixth Streets—$160 to $168 per foot.

Though it is unwise to try to draw from these statistics or any others definite conclusions or accurate estimates for the cost of the Extension tract, the apparent general trend toward deflation of peak values seems apparent.

One other area may be used for purposes of comparison. In 1939 the State acquired as the site for a new office building the block bounded by Forster, Capital, Boas, and James Streets. Inasmuch as this tract is directly across Forster Street from the proposed Extension Area, there is added significance in the amounts paid for properties there.

Table G shows purchase prices and assessed valuations for this block.

The brewery and the 8 dwellings that were sold with it for a lump sum of $95,000 went at an admittedly low price in relation to the assessment figures—in fact 8 per cent below the County's valuation. On the other hand, a relatively high price was paid for the church property. If obsolescence and run-down conditions were contributing factors in the low price of the brewery, the same factors should have a lowering effect on the costs of numerous properties in the Extension Area. Though some assessments there may prove to have been low, it is equally probable that some are high, particularly in the eastern portion, where neither City or County assessments have appreciably reflected the marked physical deterioration that has occurred in recent decades.

In the light of all the above facts a figure in round numbers may be hazarded, as representing neither too liberal nor too conservative an estimate. $2,750,000 would be 177½ per cent of the assessed valuation shown for the City in Table E, and 200 per cent of the corresponding County figure. Taking into due consideration the prevailing condition and prospects of properties in the Extension Area, it appears that such a sum would be sufficient to pay for the land and present improvements.

Another item that must be included in the ultimate cost of the Extension Area is the expenses incidental to such purchase. The Act which authorized the first extension project (Act of Assembly approved June 16, 1911, P. 1027) provided for expenses.

TABLE F—COMPARISON OF APPRAISALS WITH ASSESSED VALUATIONS SITE FOR NEW DAUPHIN COUNTY COURTHOUSE (1940)

(Market, Front, Blackberry, and River Streets)

Assessed Valuations	
County	$172,500
City	219,100
Appraisals	
Viewers for the County	
Aggregate low—	$324,337
Aggregate high—	368,585
Viewers for Owners	
Aggregate high—	$440,674
Actual Purchase Price—1940—	365,000—211.6% of County's assessed valuation —166.6% of City's assessed valuation

Above percentages applied to Capitol Grounds Extension Area:

211.6% of $1,418,620—$3,001,800 (County)
166.6% of 1,579,110— 2,631,010 (City)

TABLE G—COMPARISON OF PURCHASE PRICE WITH ASSESSED VALUATIONS NORTHWEST OFFICE BUILDING SITE (1939)

(Forster, Capital, Boas and James Streets)

Proeprty	Purchase Price	Assessed Valuation City	Purchase Price—Relation to Assessment	Assessed Valuation County	Purchase Price—Relation to Assessment
Fink Ice Co. Properties:					
Brewery—312 Forster St.		$70,270		$87,600	
8 Dwellings—900-918 Capital St.		16,770		15,320	
	$95,000	$87,040	109%	$102,920	92%
309 Boas St. (Church)	15,000	4,870	308%	6,380	235%
6 Dwellings—311-321 Boas St.	19,500	9,660	202%	8,540	228%
TOTALS	$129,500	$101,570	127%	$117,840	110%

Above percentages of TOTALS applied to present assessed valuations in the Extension Area would give as "True Values":

City (127% of $1,549,694)—$1,968,111
County (110% of $1,378,820)—$1,560,482

"Section 6. The said commission is also hereby authorized and empowered to appoint one person to be known as secretary of the Capitol Park Extension Commission, one clerk, one stenographer, and one real estate expert, all of whom shall do such work in the premises as the commission shall direct; and said commission shall fix the respective compensations of the persons so appointed, which compensation shall be paid by the State Treasurer as hereinafter provided. The Attorney General shall be the counselor and attorney of and for the commission."

"The prothonotary and sheriff of Dauphin County shall each receive for his services, as aforesaid, compensation on the same scale as that fixed by law for similar services; which compensation and costs shall also be paid by the State Treasurer, as hereinafter provided, except in cases in which the appellant shall pay the costs as hereinbefore provided."

The final report of the Capitol Park Extension Commission to Governor Brumbaugh, dated August 28, 1917, contained the following paragraph:

"In the appended financial statement, it may be seen that the actual expenses of the Commission, including salaries of those employed, abstracts of title, court costs and other necessary expenses, were less than three per centum (3%) of the money appropriated, the balance of ninety-seven per centum (97%) having been expended for the actual purchase of property or reserved for payment for those properties taken by condemnation proceedings, pending the decision of the Court."

Although the amount of money involved in the case of the proposed Extension Project is greater than in the first instance, the number of properties and owners is considerably less: 334 properties as compared with 541, and 175 owners, as compared with 251. The work involved, therefore, should be less. In view of these facts, a tentative allowance of 2½ per cent for expenses is suggested, as applied to the figure of $2,750,000 mentioned above. The approximate acquisition figure thus becomes $2,818,750.

A third item of cost should be included, namely, the expense of relocating present railroad sidings which lie between the through tracks and the properties that front on Seventh Street. Several properties north of Forster Street, and east of Seventh, are now served by switchbacks, at least some of which would have to be eliminated or revised if this area were to be acquired and used by the Commonwealth. The Pennsylvania Railroad Company, on the basis of a preliminary study, has tentatively established a property line which demarcates the land depth and equipment which it must retain for public service, with access from Forster Street. The space left between such a revised property line and the east side of Fisher Plaza extended northward (see Fig. 19, facing page 6710) would be quite adequate for the State's purposes. The tract that would be available without any modification of present trackage, however, would not be deep enough for the purpose indicated on Fig. 19. Whether or not there is any imminent prospect of erecting a building on this site in the future, the State should assure the acquisition of a strip of land sufficient for protective purposes, as it did on either side of the west end of Memorial Bridge.

With the Extension Project in its present preliminary status, the Pennsylvania Railroad Company does not feel justified in incurring the expense that would be involved in making detailed studies of the cost of track relocations. Therefore no figure can be given to cover this item. It appears that roughly 700 feet of track would have to be replaced.

V. METHODS OF FINANCING ACQUISITION

There appears to be three practicable ways of financing the purchase of the Extension Area: (1) through direct appropriation of funds by the State Legislature; (2) through appropriation to repay over a period of time the Harrisburg Housing Authority for its intermediary purchase of the Area by means of funds lent by the United States Housing Authority; (3) similarly to repay the Harrisburg Housing Authority for its intermediary purchase of the Area by means of funds obtained through its right to issue bonds.

(1) Appropriation by the State Legislature is the method which was used in the case of the original enlargement of Capitol Park. By the Act of June 16, 1911, which authorized appointment of the Capitol Park Extension Commission, there was appropriated a sum of $2,000,000 to cover acquisition of the tract, and expenses incidental thereto. It was specified that not more than $100,000 should be spent or obligated during each of the two years ending June 1st, 1912, and 1913. Thereafter $450,000 was the limit of annual expenditure until June 1, 1917, the date set for completion of acquisition. These limitations were qualified by a statement in the Act that if the Governor, Auditor General and State Treasurer should certify to the Commission that there was sufficient money in the State Treasury, not otherwise appropriated, to warrant an increase in the annual expenditure, the Commission could make purchases not exceeding a total of $1,000,000 in any one year.

The report of the Capitol Park Extension Commission, dated 1917, states:

". . . owing to many changes made in buildings in the zone to be acquired, to the erection of new buildings, and to other conditions, the Legislature granted to the Commission an increase of three hundred thousand dollars ($300,000) which increase was duly approved June 18, 1915, making a total appropriation for the work of two million, three hundred thousand dollars ($2,300,000)." Of that figure there was actually spent $2,276,070.

No attempt will be made here to recommend or to outline any specific procedure for appropriation. The experience noted in the above-quoted paragraph, however, indicates the likely economy in optioning as many properties as possible at an early stage of the program so as to avoid having to make payments for any interim improvements.

(2) It is apparent that there would be advantages in having available the full amount needed for optioning and purchasing all properties in the Capitol Extension tract as quickly as possible after inception of the program. Pennsylvania has reached its constitutional limit of bonded indebtedness. The General State Authority was created as a means of providing additional capital funds for State Public works, but the present Administration does not favor further use of that agency's power to incur indebtedness through the issuance of bonds.

A possible solution would be reached if the United States Housing Authority would lend to the Harrisburg Housing Authority the sum required for purchase of the Area, and if the State Government in turn would furnish to the Harrisburg Housing Authority some acceptable guarantee of repayment, with interest and capital amortization over a period of—say ten years. On this basis biennial legislative appropriations of one-fifth of the capital loan, plus interest on the loan balance, would be required. Funds as repaid to the Harrisburg Housing Authority would be used by that agency for erection of additional new housing units. Reasons why both local and Federal housing authorities have an interest in the Extension project will be noted subsequently.

The situation in regard to obtaining funds from the United States Housing Authority is as follows: Congress has appropriated $800,000,000 for local allocation by the USHA to facilitate low rent housing throughout the country. Of that total amount some $160,000,000 have not been accompanied by funds for the annual Federal subsidy required in connection with USHA projects. Legislation now before Congres would supply such funds, making available the aforesaid approximate $160,000,000 and also authorizing additional subsidized capital for local housing loans. The application of the Harrisburg Housing Authority for an allocation from these funds is on the list of reservations.

Although the arrangement involving the State and the two Housing Authorities is entirely dependent on Congressional authorization of new housing funds, and contains a number of other contingent factors, the advantages that it seems to offer to all parties concerned appear to justify its thorough investigation as a possible means of acquiring the Extension Area. Both the United States Housing Authority and the Harrisburg Housing Authority have expressed their interest in the proposal, and their willingness to seek a mutually satisfactory agreement with the State on some such basis as that already outlined.

There has already been mention of the advantage to the State of the procedure whereby its payments for the

Area would be extended over a period of years, and yet th entire sum would be accessible as needed. This method would combine immediate availability of capital as exemplified by a bond issue, with the convenience of extended payments implied in annual or biennial appropriations.

Both the United States and Harrisburg Housing Authorities have an interest in this proposed financial arrangement in so far as it might tend to improve housing conditions in the City. The local agency is particularly concerned with the proposal because thereby it would be in a position to guide the demolition of Extension Area dwellings, both sub-standard and adequate, in such a way as to work as little hardship as possible in this community where the housing shortage is already acute. The First Capitol Park Extension program, carried out without any attempt to consider its effect on housing, resulted in dispersion of slum dwellers throughout the City, creating several widely-distributed new slum areas.

Both agencies are interested not merely in the creation of new housing units as such, but also in assuring that such housing will be related to planning and re-planning for improvement of the City as a whole. Equivalent demolition of sub-standard dwellings, which is a required factor in the public housing program, may itself create problem areas if logical and profitable uses cannot be found foi the cleared land. In the case of the Extension Area proposal, the projected use by the State solves this problem in advance.

Thus the same housing funds would provide twofold benefits; first, in facilitating demolition of structures in an area where the majority of dwellings are sub-standard and which is headed for continued depreciation—to be rehabilitated as a public park which would undoubtedly have a beneficial effect, not only on neighboring property values, but to a certain extent on the whole City, particularly through improvement of traffic ways, and secondly, by these funds being subsequently made periodically available, within the space of a decade or so, to create new dwelling units for Harrisburg.

(3) The third possible method of financing acquisition of the Extension Area involves a public bond issue by the Harrisburg Housing Authority, which would purchase the Extension tract with the funds derived therefrom. The issue would have to be backed by a re-purchase agreement between the State and the Authority, such as was indicated in item (2), so as to assure provision of funds to take care of interest and amortization of the Housing Authority's loan.

Notwithstanding the fact that the Commonwealth of Pennsylvania frequently enters into long-term agreements providing for the payment of obligations over a period of years, the fulfillment of such covenants is dependent on successive renewals of biennial appropriations. Situations of this sort imply a reliance on the integrity and responsibility of the State to live up to a legitimate agreement, as not only a financial, but also a moral obligation. Federal agencies in recent years have made grants and loans amounting to many millions of dollars, relying on promises of the Commonwealth.

Successful floating of such a loan by the Harrisburg Housing Authority would probably depend largely on the investing public's confidence in the type of security furnished by the State's cooperative agreement to repay the funds to be borrowed by the local Housing Authority. Although such an agreement, like the similar one involving USHA funds, has no precedent in practice hitherto, it is worthy of careful study.

Previous discussion has considered possible ways of acquiring the Extension Area as a unit. The State, however, should not overlook favorable opportunities for picking up individual pieces of property. Table B indicated that, as of March, 1940, forty-three properties in the Area were held by financial institutions. This number includes the Odd Fellows' Building, for which the State pays an annual rental of $10,000 on an assessed valuation of $47,950 (City)—$47,000 (County). Immediate acquisition of this structure and its site would appear to be profitable.*

Table G on page 6707 shows that the major tract in the Northwest Office Building site, purchased from a trust company, was obtained for 109 per cent of the City's assessed valuation, and 92 per cent of the County's. Similar instances might be found in the Extension Area.

On page 6719 the possible utility to the State of the north half of block 10 is discussed. Early purchase of this tract, considering its present assessed valuation in relation to the State's rental of garage space elsewhere, is indicated as an economy move. Use of this property for State Highway Department garage and parking purposes would seem to justify allocation of highway funds for its purchase.

VI. LEGAL ASPECTS

Legal procedures that would be required in connection with acquisition of the Extension Area necessarily involve the State and the City of Harrisburg, with a possibility that the Harrisburg and United States Housing Authorities might be brought significantly into the picture.

Clues to prospective types of State legal proceedings are to be found in the original Capitol Park Extension Act, and in the Report of the Commission, dated August 28, 1917.

The introductory brief description of the Act states that it was intended

> ".... to provide .... for the extension of Capitol Park in the City of Harrisburg; and for the acquiring, taking, and condemnation of real estate in connection therewithin ....; and for the demolition of the buildings and structures therein; and making an appropriation therefor; and also for the expenses and cost in connection therewith."*

The Commission's Report states that of the 541 properties involved, 516 were acquired by amicable procedure, 2 by release from the City, and 23 by condemnation proceedings. Of the latter instances, 11 were settled, deeds received, and the purchase money paid before the cases reached trial by jury. In one suit the constitutionality of the law was challenged, but its legality was upheld by both the lower court and the State Supreme Court.

The Attorney General's Department passed upon and approved each title and deed for the properties that were purchased without contest. It also directed all condemnation suits.

---

* No reflection is intended on the amount of rent paid. Taken on a square-foot basis, this is among the State's lowest-rate leases in the City.

* Laws of Pennsylvania, 1911, p. 1027.

The 1938 Special Session of the State Legislature passed two related enabling acts in anticipation of possible acquisition of the new Extension Area through cooperative action by the Harrisburg Housing Authority. One of these Acts, No. 11, authorizes

> "the Commonwealth or any of its agencies or instrumentalities of government . . . to contract with, and to lease or acquire from any housing authority, any area acquired or about to be acquired by such housing authority for slum clearance purposes."**

The Act further notes that

the State may effect such acquisition from a housing authority

> "for any public purpose or purposes, including the creation of public parks, and the erection on the lands contracted for of buildings, improvements and structures deemed necessary for the use of the Commonwealth."

The other Act,* which is the converse of No. 11, authorizes housing authorities to contract with the Commonwealth, etc., on the same basis as the one noted above.

Although these two Acts supply the requisite general enabling legislation, it would also be necessary, as noted in Section V of this report, for the Legislature to approve some form of specific agreement whereby the State would assure periodic payment to the Harrisburg Housing Authority for its advance purchase of the Extension Area. As of summer, 1940, the Attorney General's office is working on a form of agreement which might be mutually satisfactory to the State and to the Harrisburg and United States Housing Authorities.

The Special Session of 1938 also passed an Act whereby there was appropriated

> "the sum of fifty thousand dollars ($50,000), or so much thereof as is necessary . . . to the Department of property and Supplies for the purpose of paying the expenses of making preliminary surveys . . . in connection with any proposed acquisition of real property from any housing authority . . . including the compensation of attorneys at law, engineers, experts, clerks and assistants."** This Act furnishes the financial basis for the study of which this report constitutes the concrete product.

In the case of the First Extension project, before a single property was taken over by the State, the City of Harrisburg, conforming to a requirement of the Act of Assembly by means of an ordinance passed on October 31, 1911, and approved by the Attorney General on November 16, 1911, released to the Commonwealth all possible municipal claims to streets, alleys, and property within the Extension tract. This release included claims to two buildings occupied by the Fire Department. Records do not make clear whether or not the City was reimbursed for the two fire-house properties beyond the nominal consideration of one dollar which is mentioned in connection with the general release of its rights by the municipality.

Similar relinquishment by the City of Harrisburg would be required in connection with the proposed Extension of the Capitol Grounds. Such an agreement, as in the previous instance, in addition to vacation of streets and alleys, would involve eventual assumption by the State of expenses in connection with sewer and water mains and any other utility lines lying within the Extension Area that might have to be relocated as a result of future development of the Extension Area.

A question might be raised as to whether the Harrisburg Housing Authority has legal sanction for acquiring the Extension Area. The answer is to be found in the Housing Authorities Law of Pennsylvania.* In Section 10 of the Act, it is provided:

> "An Authority shall constitute a public body, corporate and politic, exercising public powers of the Commonwealth as a agency thereof, which powers shall include all powers necessary and appropriate to carry out and effectuate the purposes of this Act, including the following powers, in addition to others herein granted.
>
> (b) To determine when unsafe or unsanitary dwelling or housing conditions exist, or where there is a shortage of safe and sanitary dwelling accommodations for persons of low income.
>
> (d) To cooperate with any city, county, regional, Federal or other agency.
>
> (h) To arrange with any city or other muncipality located, in whole or in part, within the Authority's field of operation, or with the Federal or State government for the furnishing, planning, replanning, installing, opening or closing of streets, roads, roadways, alleys, sidewalks, or other places or facilities, or for the acquisition from such city, municipality or the Federal or State government, of property options or property rights, or for the furnishing of property or services in connection with a project.
>
> (i) To clear areas of unsafe or unsanitary housing, to provide for the use of cleared sites for community facilities and for any other public purpose authorized by this act.
>
> (j) To arrange with the Commonwealth, its subdivisions and agencies—to the extent that it is within the scope of each of their respective functions—(3) To plan, replan . . . any part of the municipality in connection with any housing project of the Authority.
>
> (n) To acquire by eminent domain any real property, including improvements and fixtures, for the public purposes set forth in this Act, in the manner hereinafter provided."

Section III of this report has clearly indicated that a high percentage of the residential properties in the Extension Area are in the substandard class, and that a considerable number are among the worst slums in the City. It seems clear, therefore, that the Housing Authority under Section 10 (b) would be amply justified in declaring the Area to be a slum neighborhood. The purposes to be accomplished fall directly under subsections (d), (h), (i), and (j). The power of eminent domain granted under (n) is therefore clearly applicable. Subsection (j) (3) is worthy of special note in that it emphasizes the coordination of housing with city planning.

The logical conclusion to be derived from the above facts is that the Harrisburg Housing Authority has the power to acquire the Area in question for the purposes previously outlined.

There remains a question as to the power of the United States Housing Authority to lend money to the Harrisburg Housing Authority for the Extension project. The Act of Congress* creating the USHA states:

** 1938 Special Session, Act 11, page 32.
* 1938 Special Session, Act 12, page 34.
** Ibid., Act 42, page 109.

* Approved May 28, 1937, Penna. Laws 955; 35 Penna. 1541 and following.
* Act of Congress approved Sept. 1, 1937, c. 896, Sec. 9, 42 U. S. H. A. 1409.

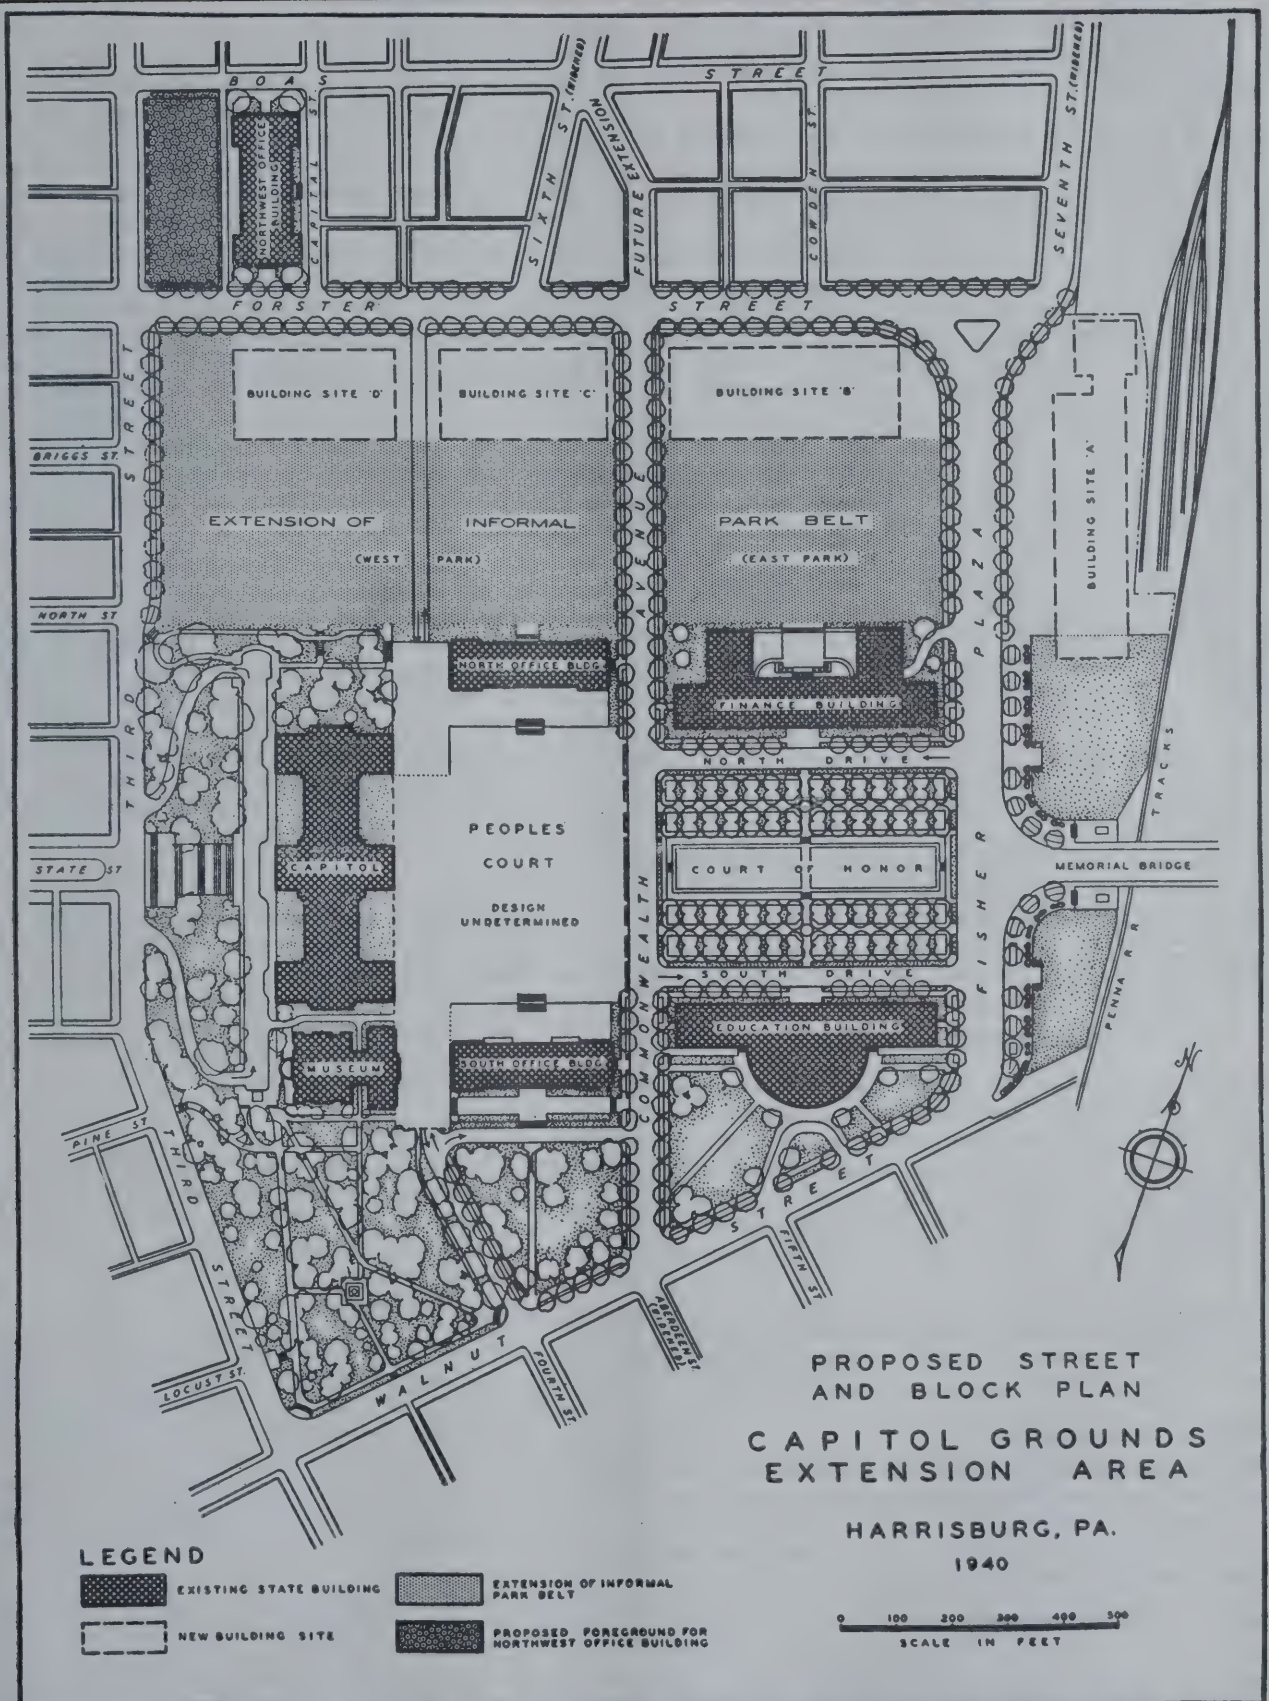

Fig. 19. This plan is a combination of existing and proposed items. Present temporary buildings are omitted from the People's Court, but no design is shown for the latter inasmuch as its form is still unsettled. The informal character of the Extension Area Park Belt is indicated, without attempting to show details such as paths, which in final form can be best determined in relation to actual buildings.

"The Authority (USHA) may make loans to assist the development, acquisition, or administration of low-rent housing or slum clearance projects of such agencies . . ."

Section 2 (f) of the Act, defines "slum clearance" as follows:

"The term 'slum clearance' means the demolition and removal of buildings from any slum area."

Inasmuch as one of the principal objects of the arrangement which would involve USHA funds is the assurance of a long-term housing construction program, following acquisition of the Extension Area, the loan would demonstrably aid low-rent housing in Harrisburg. Even if this aspect were subordinated, or absent from the program, the USHA has the power to lend money for slum clearance projects as such. The conjunction "or" as used in the Act renders the object of either "low-rent-housing," or "slum clearance" equally eligible. Annual contributions would not be required to support the loan until such time as the proceeds or portions thereof were repaid by the Commonwealth, and converted by the local Housing Authority into a housing project.

The foregoing statements seem to demonstrate clearly that the United States Housing Authority can legally lend funds to the Harrisburg Authority for purchase of the Extension Area.

VII. PROPOSED STREET AND BLOCK PLAN

In the case of the first extension of Capitol Park the Brunner Plan determined the revised pattern of streets and the general locations of building sites several years prior to erection of any individual structure. Similarly it is possible to determine in advance a street and block plan for the proposed Extension Area, with sizes of possible individual building sites left flexible enough to permit their adaptation to any future needs.

A. THE STREET PATTERN

A study of street revisions for the tract was first made in August, 1938, by the Harrisburg Area Regional Planning Committee. The proposals made therein were subsequently confirmed by the three consultants, Paul P. Cret and William H. Gehron, Architects, and Thomas W. Sears, Landscape Architect, who were temporarily retained early in 1939 by the Department of Property and Supplies.

The street system agreed upon—shown in Fig. 19 (a slightly modified version of the Consultants' plan), involves elimination of certain existing streets, and extension or widening of others, as hereinafter described.

STREETS TO BE ELIMINATED

Within the proposed extension of Capitol Park it is obviously desirable to limit public streets to the necessary minimum. Accordingly, North, Briggs, Capital, Sixth, East, Cowden, and Seventh Streets, with intervening alleys, would be eliminated.

STREETS TO BE EXTENDED

Recommendations include extension of two existing streets—Commonwealth Avenue and Fisher Plaza.

Commonwealth Avenue

With North Street eliminated, it would be essential to continue Commonwealth Avenue northward as far as Forster Street. A pavement width of from 56 to 60 feet would be desirable in order to provide an even number of lanes of adequate width, with or without parking, but unless widening of the older portion of the street from its present 52-foot width could be accomplished, it is doubtful whether a curb off-set of two to four feet on each side for a distance of two blocks would be advisable or helpful.

At Forster Street, Commonwealth Avenue would be less than 150 feet east of Sixth Street, thus providing a fairly direct connection between that important traffic artery and Walnut Street. The City, however, would eventually be justified in extending Commonwealth Avenue northward from Forster Street, possibly as a one-way street, to a five-point intersection with Boas Street, without affecting the Messiah Lutheran Church. If week-day parking were eliminated in the block between Forster and Boas Streets a 40-foot, four-lane pavement would be adequate for two-way traffic.

Plans in the City Engineer's office indicate the future possibility of extending Commonwealth Avenue southward on the line of Aberdeen Street from Walnut Street across Market Street, past a new Pennsylvania Station Plaza, to an intersection with Chestnut Street, Fourth Street and the Mulberry Street viaduct. (See Fig. 3.) There would thus be provided a thoroughfare from Linglestown Road by way of Sixth Street and Commonwealth Avenue to the southeast section of the City. Such an improvement would be a possible result, but not a part, of the Capitol Grounds Extension.

Fisher Plaza

It is recommended that Fisher Plaza be extended northward, with its present pavement width of 80 feet, to Forster Street. At that point it would connect, by easy curves, with Forster and Seventh Streets. By this means, northern and western traffic to and from Memorial Bridge would be served at least as adequately as is the Fisher Plaza-Walnut Street flow at present.

STREETS TO BE WIDENED

Widening of four streets is proposed: two—Forster and Third Streets, as part of the development of the Capitol Grounds Extension Area, and two—Sixth and Seventh Streets, as related municipal projects not within the Capitol Grounds.

Forster Street

With extension of Capitol Park, Forster Street becomes the northern marginal thoroughfare which must share, at least equally with Walnut, the work of carrying east and west traffic around the Capitol Grounds. As part of the new Capitol Park improvement, the pavement of Forster Street would be broadened southward to a width of 60 feet, which would provide for 6 lanes of moving traffic, or 4 lanes with 2 for parking, except perhaps during rush hours.

Forster Street gains additional importance as the logical approach to a future bridge across the Susquehanna River that would connect with the U. S. 11 Bypass on the West Shore. For many years there has been recognition of the need of another river bridge. The proposal of State Street as the site is now generally ruled out because of the traffic complications involved in its dead-end termi-

nation at the west front of the Capitol. Both North and Briggs Street will be eliminated for the same reason if Capitol Park is extended.

There is some difference of opinion as to whether a new bridge should preferably be built at Forster Street, or south of the Reading Railroad bridge, to connect Paxton Street with Lowther Street in Lemoyne. The question of priority need not be discussed here. Bridges at both sites will probably be needed eventually. Unquestionably the location of the present Walnut Street bridge only a block from the more permanently constructed one at Market Street contributes materially to traffic complications on Front Street. If the two bridges should be taken over by State or county agencies, or when the time comes that major repairs to the Walnut Street structure might be necessary, it should be replaced by a new one at the Forster Street location. This possible eventuality must be considered in planning any changes in Forster Street as part of the Capitol Park Extension project.

Third Street

The pavement of Third Street is now 48 feet wide between Walnut and North Streets. Beyond the intersection of Third and North Streets, the roadway narrows to 38 feet, the east curb line projecting two and a half feet, and the west curb seven and a half feet beyond the curb lines south of North Street.

When the Capitol Grounds are extended, Third Street should be widened to the east so as to provide an even number of lanes of adequate width. The present width of 48 feet permits two 8-foot parking lanes, and an excess of 2 feet over three 10 foot travel lanes. A width of 56 feet—allowing for four 10-foot lanes, and parking on both sides, is recommended from North Street to Forster Street. The eastward offset of the east curb at North Street, amounting to 13½ feet, would be accomplished with a gradual reverse curve. If, as has been proposed, the half block between Third Street and the new Northwest Office Building that lies between Forster and Boas Streets (occupied by the Liquor Control Board) should be purchased, thus permitting this structure to face onto Third Street, the latter should be widened to 56 feet for the length of this block also, as indicated by a dashed line on Fig. 19.

Sixth and Seventh Streets

Although both Sixth and Seventh Streets north of Forster Street are outside of the Capitol Grounds Extension Area, they are important factors in traffic relating thereto. From the City line southward to Reily Street, Sixth Street is 80 feet wide, with a 46-foot pavement. From Reily to North Street it narrows to 50 feet, with only a 28-foot pavement. Seventh Street is 55 feet wide, with a 31-foot pavement. In spite of their narrowness, these streets both have heavy traffic, particularly Seventh Street, which carries a large amount of truck traffic to and from Herr Street.

The 1939-40 Report of the Harrisburg Area Regional Planning Committee makes the following recommendations for these two streets:

"SIXTH STREET—Needs . . . establishment of building setback lines, by special ordinance, or by a general zoning ordinance, increasng the street to 80-foot width from Reily Street to North Street. Pavement to be increased to 56 feet (two 8-foot parking lanes, four 10-foot restricted speed lanes). An alternative would be to forbid parking within this section, widen the street to 60 feet, with a 40-foot pavement (four 10-foot lanes).

SEVENTH STREET—Needs establishment of building lines to provide at least a 70-foot street (better 80-foot . . .) with a 60-foot pavement (two 8-foot parking lanes, four 11-foot restricted speed truck lanes) from Fisher Plaza to Division Street or beyond."*

Capitol Garage Drive

The roadway providing entrance and exit to and from the Capitol Garage, though not a public street, is a rather important element in the traffic picture. Previous recommendations, including the 1939 report of the three Consultants, have included use of the present one-way entrance from Fourth and Walnut Streets, and a one-way exit running straight through the Extension area to Forster Street, as shown on Figure 19. Because of the nature of its use, this driveway would naturally be in effect a one-way drive—inward in the morning, and outward in the late afternoon. In order to provide two ways of ingress and egress in opposite directions, so as not to concentrate all Capitol traffic in one spot, it is proposed that the driveway permit two-directional travel. Fig. 13 (page 18) shows the effect of the present single exit onto Commonwealth Avenue. A similar one into Forster would be no improvement, because so many left turns would be required. Allotment of parking space in the proposed enlarged sub-terrace garage in accordance with the normal destination of each car, so as to produce a predominance of right-turn exists from the garage drive, would help to relieve traffic snarls. With prohibition of parking thereon, the present 24-foot entrance from Fourth Street would be adequate for two lanes outward (at the afternoon rush hour) and an occasional inbound car, traveling at a desirable moderate speed, but a width of 27 feet for both sections of the driveway would be preferable.

B. THE BLOCK PATTERN

Superimposing of the recommended revised street pattern on the Extension Area results in creation of four separate blocks: one between the railroad and Fisher Plaza; one between the latter and Commonwealth Avenue, and two between that thoroughfare and Third Street —divided by the garage driveway (see Fig. 19). As a matter of fact this drive would be narrow enough so that a building could be arched over it if circumstances so required.

BUILDING SITES

General principles concerning use for building sites within the blocks thus formed are outlined in the previously-mentioned Consultants' Report.*

"The new buildings ought to be located in such a way as:

a. to leave the principal architectural importance to the main group forming the Court of Honor;** this court ought to remain the show place of the State Group.

* Planning for the Future of the Harrisburg Area, Report of the Harrisburg Area Regional Planning Committee, 1940, pages 72-3.

* Report on the Proposed Extension of Capitol Park, by Paul P. Cret, William H. Gehron and Thomas W. Sears, Consultants, January 12, 1939.

** The term "Court of Honor" as here used implies the entire five-building group and the area enclosed thereby.

b. to allow erection of new buildings by sections, when needed, and with enough flexibility of design to accommodate the different purposes (office buildings, laboratory buildings, etc.). This means that there ought to be a separation as wide as possible between the formal group of the Court of Honor and the new group. To this end, we suggest that the building area be located along Forster Street, and be not over 200 feet deep, measured perpendicularly to that street, leaving a park area between the North Office Building and the new building area approximately 350 feet in width. The building area thus provided . . . faces on Forster Street and the Park belt . . . and can be divided into lengths suitable to the types of buildings that may be required.

. . . . . .

"We have considered several ways of planning these new buildings. However, as long as the program of what they ought to contain has not been determined, we feel that it would hamper more than assist to try to suggest a form in plan or elevation. We have satisfied ourselves that the area shown on the sketches for building purposes is adequate to receive 500,000 to 800,000 square feet of floor area if the proper planning and number of stories is used. The architectural treatment of these new buildings, on the location suggested, could, if desired, be made more utilitarian than the central group, desirable harmony being preserved by sympathetic design in relation to the existing buildings, and the proper selection of materials.

"The plan accompanying this report is merely a diagram, as the time and the information at our disposal prevented any attempt at planning either buildings or grounds. Our aim is only to illustrate the above recommendations and the general principles for the use of the area recommended for purchase . . . Once a broad policy has been decided upon, it is better to leave within the limits of this policy as much freedom as possible to those planning the future buildings. We believe that the separation of the proposed building area from the existing central group, by a green belt, makes for this desirable flexibility."

The fact that streets and potential building sites shown on Fig. 19, are very different from the existing street and block pattern (Fig. 3) is sufficient reason to justify the State's acquiring the Briggs-Forster strip of blocks simultaneously with the strip to the south, rather than delay purchase until there is need to obtain a particular site. Freedom for the State to use any building site within the Extension Area as required, and to revise streets therein in accordance with a long-term plan, is dependent on unified control of the whole tract.

THE PARK BELT

As far as the proposed Extension Area is concerned, the "park belt" or "green belt" referred to in above quotations would include the land bounded by the south side of present North and Briggs Streets, from Third Street to Fisher Plaza extended—and also the block bounded by Forster, James, Briggs and Third Streets. Concerning the general character of development recommended for this area, the Consultants' report states:

". . . we feel that the formal treatment with formal lines of trees, hedges, pools, etc., ought to be reserved for the Court of Honor. Other parts of the Capitol Park should be treated informally—as a green belt around the central group and to be as wide as possible to emphasize and isolate the formal center. Care must be taken to avoid wasting this opportunity for securing a fine restful area around the Capitol by letting new buildings encroach into it more than is strictly necessary. The width of this green belt (shown on our plan—about 350 feet), is adequate—but not more."

VIII. STEPS IN DEVELOPMENT OF THE EXTENSION AREA

The story of the Capitol Grounds Extension will by no means be complete when all properties have been acquired by the State. There will still remain for consideration such inter-related problems as (1) demolition of existing structures, (2) timing the removal of certain streets, and widening and extension of others, (3) modifications of underground utility lines necessitated by street changes, (4) development of park belt, (5) possible interim use of remaining sections of the tract prior to final development, (6) ways and means of providing for site improvement, and (7) provision of protective regulations and covenants which would help to assure that future private development adjacent to the entire Capitol Grounds would be harmonious as possible, and not such as to detract in any way from the State's large investment in the Capitol area.

If sufficient funds could be made available at one time to take care of all demolition in the Area, of all street changes, revisions of uitlity lines, and complete site improvement, little additional comment would be needed here. It seems unlikely, however, that the entire job will be done simultaneously. Shortage of dwellings in Harrisburg makes questionable the advisability of initial destruction of 295 residential units. Economy suggests that removal and reconstruction of streets and utilities, and general regrading might be done in more than one phase, over a period of time; also that in some portions of the tract certain structures might be rented after their purchase by the state, until such time as their sites may be needed for buildings. It seems worthwhile therefore to work out the best possible sequence of steps in the development of the Extension Area.

(1) DEMOLITION

The process of demolition would vary considerably according to whether or not the Harrisburg Housing Authority were directly involved in acquisition of the tract. The State Legislative Act previously referred to, wherein is authorized mutual action by a housing authority and by the State, reads as follows:

"Section 2. The Commonwealth of Pennsylvania, shall have the power and authority to enter into contract with any Housing Authority, either before said Housing Authority undertakes a project whereby it shall demolish, clear or remove buildings from a slum area, or after it has undertaken and completed such slum clearance project . . ."

It further notes that the contract

". . . shall impose a duty upon the Housing Authority to demolish, clear, or remove all such buildings from the slum area as shall be necessary to change the character of said area and remove the slums therefrom as promptly as circumstances shall permit."

It is apparent that considerable leeway is given to the Housing Authority to determine what properties should be demolished, and when. If the Harrisburg Housing Authority becomes a party to the acquisition of the Extension Area, it is clearly responsible, sooner or later, for elimina-

tion of what are demonstrably "slum dwellings." Such demolition would naturally be tempered by the housing agency's concern to avoid accentuating the present housing shortage, and therefore would need to tie in with either public or private dwelling construction programs.

It should be noted that the last quotation above states that "buildings" rather than "dwellings" shall be removed. Thus it appears that clearance of non-residential structures might devolve upon the Housing Authority, provided they are exceptionally run-down, or constitute fire hazards, or would contribute otherwise toward depreciation of the district. Demolition of other structures, superior to such a classification, would seem in any case the responsibility of the State. It should not be difficult for the State and the Harrisburg Housing Authority to achieve a mutually satisfactory agreement in regard to their respective shares of demolition.

If the Harrisburg Housing Authority were not directly involved in acquisition of the Extension Area, the State of course would take care of all clearance, as it did in the case of the First Extension. The assistance of the local Housing Authority, however, should be sought in connection with the timing of demolition, so as to minimize hardship on residents who must be dispossessed.

After acquiring the tract, the State would presumably wish to demolish at least all sub-standard or poor-quality buildings as soon as possible. Fig. 15 furnishes clues as to the distribution of such structures. On that basis, residential buildings, without exception, would be cleared eastward from East Street, and also in the eastern half of Block 5. Only certain institutional and commercial structures might be temporarily retained within that area. Poor-grade buildings in other blocks would also be subject to initial demolition.

(2) REVISION OF STREETS

Assuming that, for one reason or another, revision of streets within the Extension Area would be distributed over a period of time, analysis of the factors involved indicates two main phases of the work. The first would include changes in the block strip between North and Briggs Streets, from Third Street to the railroad. The second would comprise the corresponding strip between Briggs and Forster Streets.

THE FIRST PHASE

In discussing the purposes of the Extension on page 6700, it was noted that acquisition of this area by the State would relieve the present cramped and unfinished conditions on the north side of the North Office Building and the Finance Building, and would provide an adequate setting to the north of the Capitol. The key to these improvements lies in the removal of North Street and at least the south block of Sixth Street, thus permitting the necessary cutting down of the Sixth Street ridge, south of Briggs. Getting rid of North Street means the dead-ending, and therefore the removal of intermediate streets between it and Briggs Street, and demolition of buildings, regardless of their character, which front thereon. Continuity of East and Seventh Streets, it is true, would not be changed by removal of North Street. In the case of the former, however, buildings would have to be removed to permit its widening as a continuation of Commonwealth Avenue. At least in the first block of Seventh Street, buildings should also come down, for a meat-packing plant does not make a very satisfactory neighbor for the State Capitol group.

For reasons which will be explained later on, it is recommended that Blocks 1 and 2 (bounded by Third, Foster, Capital, and Briggs Streets) be included in the First Phase. This calls for removal of James Street, and demolition of all structures except the Oddfellows Building at Third and Foster Streets.

The First Phase thus means practically a clean sweep of streets and buildings northward to Briggs Street, and in the Briggs-Forster Block as far east as Capital Street. Thereafter follows the constructive stage of providing new streets. These include extensions to Briggs Street of Fisher Plaza, Commonwealth Avenue, and the Capitol Garage driveway.

FISHER PLAZA—Reference to Fig. 3 will indicate that with the elimination of North Street, west- and northwest-bound traffic from Memorial Bridge would have to make a jog eastward onto Seventh Street, and then back onto Briggs unless Fisher Plaza were extended northward. This fact seems sufficient justification for a one-block extension of Fisher Plaza in the First Phase, rather than later construction of both blocks at once. Gradient over the entire length will be negligible, so that permanent grading and surfacing of Fisher Plaza from North to Briggs Street could be accomplished.

COMMONWEALTH AVENUE—A necessary concomitant of the North Street elimination would be the continuation of Commonwealth Avenue north to Briggs Street. Although its further extension to Forster Street would be desirable, grading changes that would be required at the intersection of Commonwealth and Forster because of the rather steep present gradient of the latter would be impracticable to achieve prior to the major operation of widening and lowering the grade of Forster Street. It is true that a similar difficulty will be met at the junction of Commonwealth Avenue and Briggs Street, but this will not be a permanent intersection, and the State, owning all adjacent land, would be free to indulge in temporary grading expedients. Tentative profile studies indicate that the first block extension of Commonwealth Avenue could safely be made on the basis of the final profile.

CAPITOL GARAGE DRIVE—Careful study should determine whether the permanent profile of the first half of the drive to Forster Street could be achieved in the First Phase, or whether subsequent elimination of Briggs Street might involve some cutting to grade for the driveway. Rough profiles indicate something like a two-foot cut at the intersection of Briggs Street and the finished garage drive. Pending its extension to Forster Street this roadway could be built 27 feet wide to Briggs Street, probably without final surfacing.

BRIGGS STREET—Elimination of North Street in the first phase of the street revision program would leave Briggs as the marginal street. Thus the existing 25-foot pavement of Briggs Street would take over the traffic that uses the present 33-foot pavement of North Street. Actually, however, 33 foot is an inadequate width for four traffic lanes, and where there are numerous lateral intersections a third lane is nearly useless for passing. Thus both North and Briggs Streets, with partial parking, in

reality now have only one effective moving traffic lane in each direction.

It may very likely prove wise to eliminate the sidewalk on the south side of Briggs Street, and widen the paved way to 40 feet, providing an inexpensive, temporary surfacing, most of the street trees on Briggs are poplars or soft maples; few of the trees would be desirable for retention as part of the permanent planting of the park area. For that reason they need not be allowed to interfere with even temporary grading.

In connection with the First Phase all parking should be eliminated on Briggs Street, as it is on some sections of North Street at present. It might be possible to work out a system of one-way traffic for Briggs and Forster Streets. Traffic difficulties will still be present, however, until Forster Street has been widened, and Briggs eliminated, in the second and final phase of the program.

THE SECOND PHASE

The Second Phase is essentially a repetition of the elements involved in the first one, but applied to the Briggs-Forster strip of blocks. It involves the demolition of all remaining buildings, the removal of intervening streets (Capital, Plum, Sixth, Ash, Cowden, Brown, and Seventh Streets) as well as Briggs street, and the accomplishment of street extensions and widenings.

FISHER PLAZA—Reference to Fig. 19 shows that Fisher Plaza would be extended to a new and greatly improved intersection with Seventh Street at Forster. Grading will be negligible.

COMMONWEALTH AVENUE—As already noted in connection with the First Phase, continuation of Commonwealth Avenue northward with the present pavement width of 52 feet will involve a considerable grading problem at its intersection with Forster Street.

Coincident with this second one-block extension of Commonwealth Avenue by the State, efforts should be made to persuade the City to extend the avenue one block farther to an intersection with Sixth and Boas Streets. It is not impossible that the resultant increased assessed valuation of frontage on the new wide street over a period of time would repay in taxes the cost to the City of this improvement. A sufficient justification, however, would come from improved traffic conditions created by direct continuity between Sixth Street and Commonwealth Avenue. Eventual widening of Sixth Street from Boas to Reily Streets is contemplated in connection with this proposal, as noted on page 6713.

FORSTER STREET—Whether or not a river bridge is eventually built at the west end of Forster Street* the latter will be the permanent marginal throughfare on the north side of the enlarged Capitol Grounds, and as such it will carry a heavy volume of traffic. For a motorway of such importance the present profile of Forster Street would be unsatisfactory. Considerations of gradient, cross-slope at future intersections, and vertical sight-distance call for careful study as a basis for future improvement. Existing grades up to 7 per cent, and limited visibility at the intersection with Sixth Street, suggest that Forster Street will require more than mere widening of the pavement to 60 feet to make it a throughfare. It may be necessary to lower the grade at Sixth Street by two feet or more, with the cut tapering off to grade before reaching Sixth and Boas Streets. Buildings along the north side of Forster, and both sides of Sixth Street, could be adjusted to new grades without serious difficulty. Some cut also appears to be required at intersections with Capital Street and Commonwealth Avenue. In order to reduce the gradient, a moderate fill may be needed at the depressed intersection with Cowden Street, which is now four feet lower than the junction of Seventh and Forster Streets, and 19 feet lower than East and Forster Streets.

Cooperative action by City and State will presumably be required in improving Forster Street, and in making incidental grade adjustments outside the Extension Area. Forster Street holds the same potentialities for increased valuation of adjacent frontages as were noted for the Forster-Boas block of Commonwealth Avenue.

CAPITOL GARAGE DRIVE—Continuation of the Capitol Garage driveway from Briggs Street to Forster Street would complete the two-way road indicated on Fig. 19, providing garage access to and from both Forster and Walnut Streets.

Following completion of this Second Phase, the street and block pattern shown on Fig. 19 will have been achieved.

There should be noted the possibility that need for utilizing one or more of the Building Sites in the Extension Area might necessitate undertaking some street alterations beyond those indicated for the First Phase, without involving completion of the entire program as included in the Second Phase.

(3) CHANGE IN UTILITY LINES

Concurrently with street and block revisions within the Extension Area certain alterations in existing underground utility lines will have to be made. These lines include sewers, water mains, electric power ducts, steam-heat pipes, and telephone conduits. There are no subsurface municipal electric lines.

SEWERS

The Sixth Street ridge serves as a divide for existing sewer lines within the Extension Area. On one side pipes run eastward from East Street under Brown and Primrose Streets, and westward from Seventh along Forster and Briggs, to join the Cowden Street sewer. This line in turn feeds southward into the North Street sewer that begins opposite the east wing of the North Office Building, and continues eastward under the railroad, to enter the intercepting sewer at Paxton Creek. On the west side of the ridge a line beginning at Sixth Street follows Briggs Street westward, picking up a northward flowing line from Capital Street. At James Street it turns north and joins at Forster a short line which enters the Third Street sewer.

All these pipes, including the one in North Street, lie deep enough so that they would not be affected by grading cuts.

As evident from comparison of Fig. 15 on page 18 with Fig. 19, page 6711, the sewer in Brown Street, and the main from North Street cut across potential building sites. It will be a simple matter to abandon the Brown Street sec-

* See page 29.

tion and any other which might not be needed for storm drainage or for connections from possible future State buildings. Less simple is the matter of the North Street outflow line across Building Site A. Assuming the undesirability of constructing a building over so important a sewer line, there are three alternatives. (1) shortening the building site by some 110 feet; (2) moving the sewer southward so as to dodge the building, if and when constructed; (3) designing the building so as to provide an open passageway through to the rear, on the present line of North Street, thus providing an easement for access to the sewer. The choice of a solution, however, need not be faced until such time as construction of a building on this site becomes imminent.

WATER MAINS

Water mains occur in all streets within the Area except Plum and Ash Streets, West Alley, and Primrose Street between Cowden and Seventh. Most of these are 6-inch mains. Exceptions include an 8-inch line on Forster Street east of Sixth, a 20-inch main on Sixth Street, the 42-inch main on Seventh that connects with the new Clark Valley impounded reservoir, and four large mains in North Street—10, 16, 30, and 36-inch pipes.

In connection with development of the Extension Area the smaller mains would merely be disconnected and left in the ground, the value of the salvaged pipes being not worth the cost of their removal. The 20-inch main in Sixth Street, however, serves the northern section of the City. Because of the prospective cut along the ridge this line would have to be replaced. In order to avoid cutting through a potential building site a new location should be sought, probably via Commonwealth Avenue to Boas Street, if that extension is achieved.

Fortunately it will not be necessary to disturb the 42-inch main which lies just west of the center of Seventh Street. Neither appreciable cut nor fill will be involved in the replacement of that street by the extension of Fisher Plaza. As Fig. 19 indicates, any future building on site A would be set back sufficiently to avoid interfering with the water main.

The major item of expense for water-main relocation will be in connection with the cutting down of North Street, necessitating the lowering, probably from Capital Street to Commonwealth Avenue, of the four parellel mains previously noted. This, however, is an item of expense which would be incurred regardless of Extension of the Capitol Grounds, in conjunction with the long-delayed removal of the North Street hump, so as to permit completion of the grading and improvements in front of the North Office Building.

ELECTRIC POWER DUCTS

A power duct of the Pennsylvania Power and Light Company runs along Commonwealth Avenue and East Street to Briggs, and under the latter to and beyond Third Street. From Briggs Street a branch line extends along James Street to Boas Street, serving the Northwest Office Building. Apparently the only portion of these lines that would be affected by Extension of the Capitol Grounds is the section in Briggs Street between Commonwealth Avenue and Capital Street where lowering in place would be necessary because of prospective cutting down of the ridge.

STEAM-HEAT PIPES

The main line of the Power Company's steam-heating pipes follows the same route as the power conduits, on East and Briggs Streets. Additional connection lines run along North and Forster Streets between Commonwealth Avenue and Third Street, and in Sixth Street from North Street to Forster and beyond. There is also a pipe from Briggs Street along James Street to the Northwest Office Building.

With elimination of service to the adjacent Extension Area blocks, pipes on North and Sixth Streets within the Area could be eliminated. Those in Briggs and Forster Streets would have to be replaced at greater depth within the territory affected by the grading of the ridge, as previously noted.

TELEPHONE CONDUITS

Briggs Street is the location of the only continuous underground telephone conduits in the Extension Area. They will have to be lowered in place, probably from Capital Street to Commonwealth Avenue, as a result of the prospective slicing off of the Sixth Street ridge, on which preliminary study indicates an eventual cut of some three feet at the intersection of Briggs and Sixth Streets. Lowering of the conduits and deepening of manholes can be done satisfactorily prior to general grading of the adjacent ridge area.

Due to the necessity of leaving various subsurface utilities within the bounds of present Briggs Street, it is important that the south line of the three potential future Building Sites B, C, and D, shown in Fig 19 should not be permitted to encroach on the present north curb line of Briggs Street, in order to leave an adequate easement for access to pipes. Thus the available depth of building sites would become approximately 18 feet, rather than 200 feet, as noted in the quotation from the Consultants' report on page 6713.

(4) DEVELOPMENT OF THE PARK BELT

Reference was made on page 6714 to the "park belt" which the Consultants' plan, Fig 19, shows as occupying the blocks that lie between North and Briggs Street from the extension of Fisher Plaza to Third Street, and continuing northward along the latter at least as far as Forster Street. This belt would constitute a permanent park setting on the north side of the Capitol, the North Office Building, and the Finance Building.

On page 6713 brief note was made of a proposal that the half-block west of the Northwest Office Building be acquired by the State. Although such action would be desirable for several reasons, that tract is not considered an integral part of the Capitol Grounds Extension Area. Unless it is required, however, the preservation as an open space of Block 2, south of the Northwest Office Building would be advantageous, in order to provide an open foreground on at least one side of that building, and to help to tie it in with the whole Capitol Park Development. Inclusion of Block 1, which abuts on Third Street between Briggs and Forster, as part of the permanent park area, is a foregone conclusion, in order to provide adequate park frontage north of the Capitol. For these reasons Blocks 1 and 2 are both included in the recom-

mendation for complete demolition in the First Phase, as noted on page 6715. It is obviously desirable that these blocks as well as the entire strip between North and Briggs Streets should be freed of buildings and streets, and brought to finished grade shortly after acquisition, so that planting of trees, etc. may be done as soon as possible.

The Consultants' Report has recommended, (page 6714) an informal type of development for the park belt in contrast with the balanced symmetry of the present Capitol Group. There are several reasons for choice of this type of treatment. For one thing, informality would avoid any impression of competition or organic relationship with the Brunner Plan. Secondly, it would continue consistently along the north side of the present Capitol Group the informal type of landscape treatment which now prevails along the south and west sides.

Finally, existing variation of levels within the proposed park area would make difficult and expensive any efforts to formalize its treatment.

Two distinct units, separated by the broad pavement of Commonwealth Avenue, will occur in the permanent park area. One, which for purposes of description is designated as the East Park, will extend from Fisher Plaza to Commonwealth Avenue. The West Park will reach from Commonwealth Avenue to Third Street. Including the extra frontage along that street between Briggs and Forster, it will be twice as long as the East Park. The Capitol garage drive, unlike Commonwealth Avenue, will not form an appreciable break in the continuity of appearance of the West Park, and its presence can be minimized by the arrangement of plant materials.

The East Park will have a slightly concave cross-section for its long dimension, east and west, that is, from Commonwealth Avenue to Fisher Plaza. Present elevations of its northwest and southwest corners are respectively 342 and 338, (see Fig. 3, page 6699). Preliminary study indicates that neither of these figures is likely to be appreciably changed. Existing grades of the two eastern corners, at elevation 332, likewise are permanent. Halfway between these pairs of elevations, that is, on Cowden Street, the grade is lowest: 326 at Briggs Street, and 329.6 at North Street. A slight fill might be desirable in Front of the Finance Building and several feet of eventual fill in the low point at Briggs and Cowden Streets.

The West Park is quite different in topographic character, having a convex cross-section lengthwise. The present Sixth Street Ridge has its high point (within the Park area) at Briggs Street, elevation 352, and drops two feet to North Street. With an eventual three-foot cut likely at Sixth and Briggs Streets, and nearly ten feet at North Street, the future elevations would become respectively about 349 and 340. The necessary cut in front of the North Office Building will require grading of a gentle depression, draining eastward, its north side sloping up to a crest at the line of Briggs Street. At the western end of the Park there will be a fairly even rise eastward from Third Street to a saddle at the line of Capital Street, on which very little grading appears to be in prospect.

The complications involved in interrelating revised street profiles, park grading, present buildings, and potential building sites (not to speak of the general and detailed design of the park itself) will require careful study by an experienced and highly capable landscape architect, who should be brought into the picture in advance of any development of the park area. Grading and planting of both East and West Parks should be thoughtfully studied in relation to existing structures and prospective sites, as generally indicated by the Consultants' plan. At least preliminary grading studies should be made prior to demolition of buildings, so as to indicate possible places for depositing structural wastes, while avoiding any necessity of their rehandling incidental to final grading and planting.

(5) INTERIM USE OF THE BUILDING SITE AREA

The permanent Park Belt having been defined and discussed, consideration of the remainder of the Extension Area is called for. Included in the Building Site Area is the land between Fisher Plaza and the railroad, (see Fig. 19), and the strip now bounded by Forster and Briggs Streets between Seventh and James Streets—or under the conditions noted on page 6717, only as far west as to include Capital Street. On pages 6701 and 6713 reasons were given for acquiring all this land simultaneously, for potential building sites, even though current conditions render injudicious any specific prophecies as to future State building repuirements.

Inasmuch as this tract, unlike the Park Belt, is not scheduled for permanent park use, it seems reasonable for the State to make as effective and profitable use of it as possible in the interim (which may be of long duration) between its purchase and its use for State building sites. This may involve direct utilization for State purposes, or rental of selected properties in continuance of present uses, or for some new purposes.

Interim use should be thought of as taking place in two distinct periods. Duration of the first would be from completion of the First Phase of street revisions (see page 6715) to th ebeginning of the Second Phase. During this period Blocks 3 to 11 inclusive (see Fig. 14 or 15, on page 6704-6705) would remain intact, as blocks. The second interim period would extend from completion of the proposed street and block pattern to such a time as all of the potential building sites have been built upon by the State. This period also may be of long duration for all or parts of the tract.

(a) First Interim Period

At this point it may be well to note the prospective structural status of all twenty blocks in the Extension Area, following initial demolition of undesirable buildings, and in the First Phase of Street Revisions. (See Fig. 14.) page 6704.

Block No.	Structures Remaining
1	Oddfellows Building
2	None
3 & 4	Residences only (29), including 1 used partly for business.
5	West half of block: residences intact (14), including 1 used partly for business; east half: none.
6, 7, 8 & 9	None

10	North half of block: all buildings; south half: filling station, garage court (23 units), and the unnamed building just west of the court.
11 to 20	None

There would thus be only one structure left in the Park Belt—the Oddfellows Building, which is now rented by the State, (see page 6709), and which would remain until eliminated by the widening of Forster Street.

In the Building Site Area there would remain some structures that would be useful to the State, and others that might well be rented for the duration of the period.

The Commonwealth now leases a garage with 27,000 square feet of floor space at 38 North Cameron Street, for an annual rental of $5,100. In the north half of Block 10 is a row of structures, at present used for various purposes: a motor freight terminal, storage warehouses, garage, etc., with space all on one floor totalling nearly 39,000 square feet. In addition there is a small detached garage and a loading platform. Use of these conveniently-located facilities by the State during the First Interim Period, in place of the present rented garage space would mean considerable economy. Shortage of private garages in this neighborhood would probably justify retaining and renting out the existing garage court on Briggs Street, which contains spaces for 23 cars. The cinder block building west of the garage court, now occupied by a WPA project, might either be rented or used for some State purpose. The filling station at Seventh and Briggs Streets could undoubtedly be leased to advantage, in view of the fact that during the First Interim Period Briggs Street would be replacing North Street as the marginal thoroughfare north of the Capitol grounds. Annual income to the State of $1000 to $1500 from such a lease is a reasonable possibility. Finally the 43 residences on Blocks 3, 4 and 5 which bring in total annual rentals of not quite $40,000* should be retained and rented during this period because of the housing shortage in the City, and the financial assistance that they would furnish to the State in helping to pay carrying charges incident to the purchase of these properties. With the development of the Park Belt and other improvements in the vicinity, these houses would become more desirable than at present, and there should be no difficulty in maintaining practically 100 percent occupancy.

Additional land within the Building Site Area, now vacant, or to be cleared by demolition, would total nearly 220,000 square feet, of which something more than half would lie between Fisher Plaza and the railroad, in block 11, and something less than half in blocks 6, 7, 8 and 9, the east half of 5, and part of 10. Although some of this tract would have considerable slope, practically all of it shoud be used for parking of cars. Allowing 250 square feet per vehicle, about 875 cars could be accommodated. This figure is practically equal to the total number of parking spaces now available in the entire existing Capitol Park. Present streets and driveways in the latter, (Commonwealth Avenue, Fisher Plaza, North and South Drives, the roadway south of the South Office Building, and the Plaza in front of the Capitol) account for 476 spaces; the incompleted People's Court east of the Capitol has spaces for 410 cars. Although it is probable that under no conditions would it be desirable to eliminate all parking from these locations, availability of so much off-street parking space would permit a wide margin of choice in eliminating use of present paved areas, would relieve traffic congestion, and would improve the appearance of the Capitol Grounds where parking now protrudes too prominently into the picture. There seems to be no reason why a moderate rental should not be charged for parking space.

* Data from Harrisburg Real Property Survey, 1938-39.

(b) SECOND INTERIM PERIOD

The Second Interim Period would follow final demolition of all buildings remaining within the Area, and completion of the street and block pattern as shown on Fig. 19, facing page 6710. There would then be four vacant Building Sites namely: (A) the tract between Fisher Plaza (extended to Forster Street) and the railroad; (B) the tract between Fisher Plaza and Commonwealth Avenue (also extended to Forster Street); (C) the tract between Commonwealth Avenue and the Capitol Garage drive; (D) the tract between the latter and Capital or James Streets. Until such time as each of these tracts might be required as a building site, it should be used to as good advantage as possible for other purposes. Two potential uses appear most feasible: public recreation, and parking of cars.

Harrisburg is very badly in need of areas for active play, particularly in the western central part of the city.

"Within the older portion of the lower level of the city—from Front Street to the railroad, and from Division Street to Dock Street, a distance of nearly 3½ miles—lives about 50 per cent of the population of Harrisburg, over 40,000 persons; yet within this area there are only 10 playgrounds for young children, and six of these are merely small school yards. . . ."

"There is no generally-available large playfield in all Harrisburg, with provision for all kinds of recreation for youths and adults. Within the part of the city referred to above there is one public recreation area large enough for playing baseball (at Seventh and Oxford Streets); and by sufferance of the State, one softball field, (between Fisher Plaza and the railroad)."*

Naturally the State has no responsibility for making up deficiencies in Harrisburg's system of play area, but it has a large stake in its Capital City, and should be concerned with the social and economic welfare thereof. With the lower section of the City so closely built up, the mere finding of a vacant area of a size adequate for a playground near the most densely-populated district is a problem. The City Department of Parks has already indicated unofficially its interest in the possibility of leasing a part of the Extension Area, if available, for active recreation. Such a lease could not be expected to be highly profitable financially to the Commonwealth, but that should not be the only consideration involved.

For such reasons the State and City government should cooperate to the fullest extent in making available to the public one or more suitable recreational sites within the Extension Area. Of the four tracts, Site A, topographically at least, is most suitable. It is flat, and contains two acres or more—double the size of the vacant area directly south of it, at the northwest bridge abutment, now used

* Planning for the Future of the Harrisburg Area, Municipal League of Harrisburg, 1940, page 69.

extensively for softball league and informal games. A disadvantage of Site A is the fact that everyone using it would have to cross Seventh Street, which carries a heavy load of truck traffic. That fact as well as its general location seems to make this site best suited for use by older youths and adults. If the City should not see fit to make use of it as suggested, part or all of this site might be made available for parking.

The east half of Site B, the westerly three-quarters of Site C, and all of Site D will be sufficiently level for playground use. The first two will contain about one and one-half acres each; Site D, (including Capital Street) about two-thirds of an acre. All these sites would be handicapped by being across a heavy traffic street from the nearby residential population, but the fact that there would undoubtedly be a signal light at Forster and Commonwealth would make crossing reasonably safe. Certainly the hazard would not be equal to that now existing at intersections of Front Street with both Market and Walnut Sreets, where thousands of youngsters cross every week during hot weather, frequently without any form of traffic control, to use the municipal island bathing beach.

All of the above-mentioned sites would be usable for parking (as an alternative to recreation). In addition to these, the western half of Site B, and the eastern quarter of Site C would not be too steep for such use. In short it appears that there will be much more area in the Building Sites than would be needed for parking, even if all present Capitol Grounds parking were eliminated, so that there will be an opportunity for the City, at least for a considerable period of time, to do something about the present serious shortage of play areas in this portion of the city. No appreciable capital investment need be put into development of facilities in order to make a tract usable for recreation.

Comment in the previous paragraphs as to flatness or steepness of grades is based on very preliminary grading studies, which in turn are controlled mainly by tentative revised street profiles of Forster, Briggs, and other adjacent streets, as previously noted.

Although grading can hardly be considered final on any of the building sites until it has been occupied by a structure, and regraded accordingly, some planting can and should be done in the interim to remove the curse of complete bareness. Street trees should be planted throughout the Area. A certain number of such fast-growing trees as the Chinese Elm might be spotted in places within blocks where they would not be in the way of interim use. Later, if these interfered with permanent development they would be removed without question. Where it might be desirable to screen parking areas, quick-growing, inexpensive shrubbery such as sumacs and privets could be used.

(6) PROVISION FOR IMPROVEMENT OF THE EXTENSION AREA

The simplest way to develop the Extension Area is through appropriation by the State Legislature. The simplest method, however, is not always easy to achieve, as is evident from the unfinished status of the plaza east of the Capitol.

If the Extension tract had been purchased by the State several years ago, great progress might have been made by now in its improvement through use of relief labor, for which at times the securing of worthwhile, practical projects has been something of a problem. For many aspects of the Extension improvement, relief labor would be satisfactory. Demolition of buildings, revision of streets, changing of utility lines, development of the Park Belt, and provision for interim utilization of the Building Sites for playgrounds and parking lots—all these could use a high percentage of labor in relation to materials—although in that respect some types of projects would have obvious advantages over others.

In view of the present worldwide unsettled status of affairs it is impossible to foresee what labor supply conditions may be at such a time as the State may have purchased the Extension Area. Discussion of possible availability of relief labor therefore may seem academic inasmuch as acquisition of the Extension Area would take a considerable time, even if funds were now at hand. Such discussion in brief is worthwhile, however, provided the fact is recognized that relief labor is a means of effectuation which, because of its variable availability, should not be relied on for a particular period very far in advance.

It is to be hoped that the existence of relief labor will not be a chronic condition, but it might be occasionally recurrent. To give some indication of the number of relief workers that might be available for future work on the Extension Area it may be helpful to note relief figures for 1938, 1939, and 1940 to date. These years represent neither the depth of depression nor the peak of prosperity. Dauphin County is taken as a convenient unit for calculation, but it is estimated* that the number of county employables should be reduced by about one-fourth—principally because of transportation difficulties—in order to make it applicable to a project in the Harrisburg Area. Dauphin County figures (without the 25 per cent deduction) show that 1938 and 1939 averaged about 4000 relief cases, counting one or more available male employables, of which about 30 per cent were supported by the State, and 70 per cent by WPA. The high point of the period was reached in March, 1939, when the State's General Assistance load of male employables reached 1800, while WPA cared for 3200 males. 1940 represents a low point in the combined GA-WPA case load. During the first seven months male employables in Dauphin County averaged about 700 GA and 2400 WPA cases. During July WPA had increased to 2600 cases and GA had declined to about 300 cases.

If at such times as the Extension Area may be available for development, WPA or some similar Federal form of organized work relief should be in operation, the Commonwealth would be able to make extensive savings. According to current policy, WPA would credit the State with the amounts paid for acquisition of the Extension properties, as being equivalent to part of all of the State's necessary contribution as sponsor of a project. Thus for some aspects of the Capitol Grounds improvement, cost to the State would be little or nothing.

Without some such Federal relief program as that of WPA, or something similar set up on a state or county basis, the use of relief labor for Extension improvement would be of dubious advantage. The present State work relief program, supplementing WPA, and for which em-

* By the State Department of Public Assistance.

ployment figures were noted in a preceding paragraph, is based on a fourteen-hour work week per individual, an arrangement which could hardly be used effectively for the Extension Area work.

Part way between 100 per cent payment by the State for a development program, noted briefly in the initial paragraph, and the opposite extreme, represented by WPA where the Federal government would assume most of the financial load, is the type of Federal aid represented by Public Works Administration projects. Although no further funds are in prospect in connection with the recent PWA program, it can hardly be affirmed unqualifiedly that there will be no future instances in which the Federal government may give similar assistance for selected state and local public works projects.

Pennsylvania cannot at present plan action on development of the Extension Area, but that is no excuse for failure to prepare for action that may take place at a suitable time. Insofar as it may be possible to do so, commitment should be made to a plan of procedure, involving a series of projects representing the several stages of development, and put in readiness to proceed when opportunity knocks. The present Capitol Group exists only because advance planning anticipated future expansion that subsequently materialized.

(7) PROTECTIVE REGULATIONS AND COVENANTS FOR THE ENVIRONS OF CAPITOL PARK

Having made so large an investment in the existing Capitol Grounds and buildings, with the prospect of eventually adding thereto the Extension Area and its improvements, the State may well give some thought to the immediate environs of the present and future Capitol Park.

Currently there are no significant restrictions, aside from the city building code, on what may be done with privately-owned frontage across the streets from Capitol Park and the Extension Area. Harrisburg has no zoning ordinance, and so there are no limits on building heights or bulks, and only such regulations of use as might prevent an obvious nuisance or menace to health.

Arbitrary restrictions on use of private property are undesirable but experience has shown that certain democratically-imposed forms of regulation such as zoning, deed covenants, and building codes are legitimate checks on individual actions that might result in lasting detriment to the community, and in the long run, to every individual therein.

It seems desirable to consider what reasonable and generally acceptable means might be used to promote, over a period of time, such uses and types of structures on street frontage facing the Capitol Grounds as would be harmonious and consistent with the dignity of this governmental center of the Commonwealth. Before discussing such procedures, however, it may be worthwhile to note briefly what has already occurred along streets adjacent to the Capitol Grounds. Of the present marginal streets, Walnut, Third, and North, only the first two are regarded as permanent, and therefore need to be considered. In addition to these State Street, both east and west of Capitol Park, has an important relationship to the buildings of the Capitol group.

Capitol Hill was originally chosen and the four-acre site donated for its present purpose because of its dominating position in relation to the general level of what is now downtown Harrisburg. It was rightly felt that the Capitol Building, as the nucleus of the Capitol City, should stand "head and shoulders" above its surroundings. West State Street was planned to be the principal approach to the Capitol, and wisely was laid out 120 feet wide. That even this exceptional width, however, was inadequate without being supplemented by deeply-set-back building lines, or limitation of building heights, is obvious to anyone who views State Street from the west entrance to the Capitol, or who looks back toward the building from Second or Front Streets. As it is, the vista toward the Capitol is impaired by miscellaneous sizes of trees and of flanking buildings, (Fig. 23) and the length and breadth of the view are halved by the Civil War obelisk at Second Street, (Fig. 22). In the opposite direction the same construction of the vista is evident, and in addition the height of the two flanking corner buildings on Third Street belittles even more noticeably the breadth of State Street, (Fig 24).

Sufficient foresight would have reserved at least the width of one block on either side of State Street from Third Street to the river for a Capitol park, with or without anticipating future need of buildings in addition to the Capitol. Even without acquisition by the Commonwealth of the blocks along State Street, action to limit heights of buildings fronting thereon to about half the width of the street could have been taken without cost not so many years ago, through a zoning ordinance.

In 1820, two years before completion of the Capitol which burned in 1897, there was a movement to purchase the tract of nearly vacant land between North and South Streets, from Third Street to Court (then Raspberry) Street. The price of $25,000, however, was regarded as excessive and so the matter was dropped.

The above statements are made, not as futile recriminations, but to emphasize the need of taking steps to prevent similar errors of commission and omission from being made in the future. The apparent unlikelihood of recurrence of boom times in building, and increasing realization that Harrisburg, like most other cities, is approaching a stabilized population, may tend to prevent erection of additional high buildings; yet, thinking in terms of generations, rather than the immediate future, many replacements of present structures will eventually be called for. Taking thought in advance may prevent duplication of past civic mistakes in relation to Capitol Park, and may even permit correction of some already made.

Comments about State Street will apply also to Third and Walnut Streets, and in the future, to Forster Street. None of these, however, has the type of axial relationship that State Street has to the west front of the Capitol, and, on the east side, to the whole Brunner group. Third Street has shown a particular tendency to attract the tallest buildings in Harrisburg. Obviously this is due to the fact that the presence of Capitol Park across the street is a guarantee of adequate light and air, as well as an attractive foreground for all time. In effect, excessively high buildings across from Capitol Park take unfair advantage of the latter in that they detract from the desirable dominance of the Capitol and its associated buildings, while profiting from the presence of the park in which those public buildings are set.

The following comment on the effect of high buildings

is quoted from a report of the Urban Land Institute, an agency for research and consultation, created under the sponsorship of the National Association of Real Estate Boards:

> "High buildings are believed by many to be a cause of blight. They have a depressing effect on nearby property. Too intensive use of one plot of land necessarily reduces the utility of others. It is an anomaly to note that while a few years ago it was frequently said that high land values compelled the erection of high buildings we now have many high buildings adjoining or near vacant lots in business areas for which no stable use other than automobile parking can be found. Apparently too intensive use of land is not economic or necessary."*

In brief, the things to be sought are prevention of future erection of buildings so high as to detract from the appearance and dignity of the Capitol group; to prevent occurrence of structures of obviously unsuitable architecture, regardless of size—such as, say, a "Brown Derby Restaurant," emulating the shape of its Hollywood namesake, or a use of the trans-street frontage for some clearly undesirable purpose, such as a junk-yard, a factory, or coal or building-material storage. Any of these things might occur under present conditions.

So much for the reasons why some regulation of adjacent privately-owned frontage on streets opposite to Capitol Park is important. What are the possible means by which reasonable control might be obtained? Four methods will be noted, no one of which would be entirely adequate by itself. Combination of two or more, however, could go far toward securing satisfactory protective results.

(a) ZONING

Zoning of the land adjacent to the Capitol Grounds, whereby certain standards for use and for building construction would be established, must wait upon action by the city government of Harrisburg, for legality requires that the whole city be zoned simultaneously. "Spot Zoning," covering only a portion, has generally been judged to be illegal. At the present time there is much sentiment, both official and citizen, in favor of bringing Harrisburg into line with the more than 1,000 cities in this country which have found zoning, if wisely utilized, to be a boon to both individual and community interests.

A state enabling act for zoning such as Pennsylvania has passed, is a grant of the Commonwealth's police power to municipalities,

> "for regulation by districts of the height, area, and use of buildings, and the use of land. In the exercise of this grant the regulations must be reasonable and not arbitrary or discriminatory. They must have a substantial relation to the health, safety, morals, comfort, convenience, and welfare of the community."*

> ". . . when properly applied, zoning does not deprive an owner of reasonable use of his property, but merely provides against any use of it which would take an unfair advantage in depreciating the values of nearby properties. . . . Zoning is a form of publicly-applied insurance against cupidity and selfishness. Some degree of restriction of unbridled freedom of action in the use of a piece of property is surely a small premium to pay for such insurance."**

> "To declare that the social value of land should be recognized is not to indicate that it should be treated as communal property. This is a primitive conception, quite out of line with our national economy. Rather, it is to recognize that the community has the right in determining both for the present and the future, the proper use of land, whether its use is to be for purposes of housing, manufacturing, commercial or agricultural use, forestry or public parks. By this recognition the benefits to the individual are actually increased, because, by putting land to its best use, its value is protected and preserved."***

As applied to frontage across from Capitol Park, a zoning ordinance (1) could limit the maximum height of new structures, perhaps also requiring one or more successive setbacks above a certain height, so as not to deprive existing or potential adjacent structures of equal opportunities for light and air; (2) it could regulate uses of the land to those suitable to Business or Apartment Districts, excluding those permitted only in Heavy Commercial or Industrial Districts; (3) it could restrict the bulk of any structure erected, or the percentage of area covered thereby, to whatever would be allowed as reasonable in that particular type of zoning district; (4) it could limit the intensity of land use (or the density of population) thus preventing aggravation of traffic, parking and other problems such as result from over-concentration of land use.

The one protective phase in which zoning is not at present to be relied on concerns the appearance of structures. Zoning has always tended to shy away from the esthetic aspects of land use, but recently, especially in California, county zoning has ventured to introduce the element of architectural control in connection with roadside structures. It is significant to note a judicial reaction to such a procedure, as exemplified by a 1938 decision in Monterey County, California:

> "I take it as settled that the police power cannot be exerted constitutionally for purely esthetic reasons. But what of the case where the esthetic affects property values and general economic welfare? . . . The expansion of the constitutionally recognized field of the zoning power in recent years leads me to believe that the higher courts may now be ready to recognize the validity of the next step in that field as represented by the ordinance here under attack, viz., the protection of natural scenic beauty along our highways by reasonable regulation of the character and appearance of the structures upon the borders of such highways, in recognition of the fact that they do react upon the value of the property along such highways and the general economic welfare."*

Architectural control in any form as applied to privately-built structures has not been recognized as a normal function of municipal zoning. There is a real question as to whether it should be, for the essence of zoning is and always has been uniformity of regulation within any one zoning district. Discrimination among functions or appearances of individual structures within the same district seems contrary to the spirit of zoning. Therefore, for the present at least, it appears wise to look to other means than zoning in order to assure the attractive and

* Decentralization—What Is It Doing to Our Cities? Urban Land Institute, Chicago, 1940, page 2. (The Institute is a reasearch and action agency created under the sponsorship of the National Association of Real Etate Boards).

* American Society of Planning Officials News Letter, December, 1938.

suitable appearance of structures that may hereafter be built opposite the Capitol Grounds.

(b) MUNICIPAL ORDINANCE

One of three apparent possible means of accomplishing the end referred to in the preceding paragraph is a municipal ordinance.

It is to the interest of the City as well as of the State to do everything it can to promote favorable and harmonious development of the Capitol Park neighborhood. Besides being one of Harrisburg's greatest civic attractions, the Capitol Group is an important factor in creating and preserving real property values. Neither public nor private holdings, however, are proof against instrusions of ill-advised, unsuitable structures or land uses.

> "The jumble of indescribably bad architecture which the American cities represent is in itself a potent cause which drives many people from the cities. Few cities have exercised any architectural control which would tend to provide for even a minimum of harmony in the central business areas, and the same has been true of the older and close-in residential districts. All of these business areas and close-in districts, therefore, are nightmares of ugliness and drabness to one with any sense of form and beauty."*

The City has already given some degree of recognition to this potential danger by its passage of an ordinance relating to the Memorial Bridge. This ordinance (necessitated by a pervious State Act,** requiring it incidentally to construction of the bridge) states:

> ". . . That the property paralleling the Soldiers' and Sailors' Memorial Bridge, from the line of the Pennsylvania Railroad Company eastwardly, for one block north of said bridge and one block south thereof, shall not be hereafter put to any use which in the judgment of the State Art Commission shall damage or detract from said bridge; provided, however, that the present use of said property shall not be affected by this provision . . ."***

The fact that the ordinanace specifies the State Art Commission rather than the State or City Health, Highway, or Safety Department, or others which might be implied by such aspects of the police power as "health, safety, morals, comfort, convenience, and welfare," indicates that the primary aim was to protect the appearance of the bridge and its immediate environs from incursion of inappropriate uses. That the ordinance was not retroactive, and therefore could not eliminate existing discordant uses and structures does not invalidate the clear intent of the act.

If the City felt justified in passing an ordinance to guide the development of environs of Memorial Bridge, there seems no valid reason why it should not take similar action in regard to Capitol Park, which is much more clearly integrated with the heart of the City that the bridge is. It seems reasonable therefore to propose that the City Council pass an ordinance requiring submission to and approval by the State Art Commission, of any projected use of, or structure proposed for erection on, ground having any frontage on Third or Walnut Streets across from the Capitol Grounds, or on State Street between Third and Front Streets. Subsequent inclusion of Forster Street would be necessary, following acquisition of the Extension Area. In order to put teeth into the ordinance, approval of the Art Commission might be required as a prerequisite for issuance of a building permit within the area in question.

Legality of the Memorial Bridge ordinance has not been tested. That it, or the suggested similar ordinance relating to the Capitol Grounds might well be upheld is indicated by the recent decision of Justice Hooley, of the New York Supreme Court in Nassau County, sustaining an ordinance of the town of Hempstead, Long Island which prohibited all types of vertical and projecting signs. The decision states:

> "This court is not restricted to esthetic reasons in deciding to sustain the validity of the ordinance in question, but if it were so restricted, it would not hesitate to sustain the legislation upon that ground alone . . .
>
> "For years the courts have strained to sustain the validity of regulatory or prohibitory ordinances of this character upon the basis of the public safety. They decided that esthetic considerations could afford no basis for sustaining such legislation. Such considerations were deemed to render an ordinance of this character unconstitutional. But the views of the public change in the passing of years. What was deemed wrong in the past is looked upon very often today as eminently proper. What was looked upon as unreasonable in the past is very often considered perfectly reasonable today. Among the changes which have come in the viewpoint of the public is the idea that our cities and villages should be beautiful and that the creation of such beauty tends to the happiness, contentment, comfort, prosperity and general welfare of our citizens. The zoning regulations, which have been upheld by our courts, indicate the changes in the attitude of the public and the courts with respect to the right of a man to use his own property. He must now consider to some extent the interest of his neighbors and the interest of the community in general. The courts should not be so bound down with ancient precedent that they should close their eyes to every change."*

In 1934 San Diego, California passed an ordinance requiring approval by the City Planning Commission of plans filed with the Building Inspector, for erection along the principal street. At the requests of property owners themselves, the application of the ordinance has since been extended from the original district so as to include several other portions of the city.

Since 1930, private structures to be erected facing parks or public buildings in Washington, D. C. under the "Shipstead-Luce Act" have had to meet the approval of the National Commission of Fine Arts before building permits can be obtained.

By action of the property owners concerned, authority for architectural control of a half mile of frontage opposite one side of the California State Buildings was recently vested in the City Planning Commission of Sacramento. This agreement enters into the chain of title of each property.**

If the spirit of the Commonwealth were able to give voice to the intent of such an ordinance as is proposed, it might speak somewhat as follows:

---

* Decentralization—What Is It Doing to Our Cities? Urban Land Institute, Chicago, 1940, page 4.

** Pennsylvania Act No. 420, Section 13, July 18, 1919 (P. L. 1049).

*** Ordinance No. 127, Session of 1918-19. File Folio 280.

* Preferred Tires, Inc., v. Village of Hempstead, 173 Misc. 1017, N. Y. (Quoted in the American City, July 1940, page 48.)

** The Next Step in Community Planning, by Albert S. Bard, 1938, pages 4-6 printed by the City Club of New York Committee on Constitutional Convention and distributed by the National Roadside Council, New York City.

"The Capitol Grounds are the focal point of Harrisburg and of the State government. We the people of Pennsylvania have invested between thirty-five and forty million dollars in this State civic center, and we want to make and to keep it a thing of which all Pennsylvanians may be proud. We feel that the properties surrounding Capitol Park have a very definite and important relation thereto. From it they derive the advantage of permanent, attractive open space as a foreground for which they pay nothing.

"In return for this amenity we ask you, the owners of these properties, to cooperate with us in assuring, to your individual and group advantage, that none of these bordering properties shall be used in such a way as to detract from any of the others, or from the Capitol Group which they face. To make certain of this we request you to submit any proposal for use of your property, including preliminary plans and elevation of structures, to be inspected by the State Art Commission, which over a period of years has amply demonstrated its value by the saving of large sums of public money, and by assuring a high quality of design and workmanship in all structures built with public funds throughout the Commonwealth.

"Because of the close relation of your property to the Capitol Grounds, the discriminating advice of this group of outstanding specialists is available to you without cost, and you have the knowledge that your property will be protected and enhanced by the availability to your neighbors of that same mature counsel."

(c) STATE LEGISLATIVE ACT

A State legislative Act would be similar to a municipal ordinance in character and effect. One advantage of such an Act as compared with an ordinance would be possibly greater ease of passage, because such a bill might be less likely than an ordinance to be affected by personal opposition from self-interested local parties. Also repeal of such a State law would be more difficult and more unlikely than in the case of an ordinance. On the other hand, enforcement of a State Act might be somewhat hard to achieve without cooperation by the municipality.

As a matter of fact, effectiveness of such an Act would depend on prevalence of public conviction that the idea embodied in the law is reasonable and necessary. More can be accomplished in improving architecture and public taste in general through education and contact with good examples than through imposition of restrictional laws. It is probably as difficult to promote good taste as it is to improve public morals, through legislation alone. This does not mean, however, that some degree of legislative control is not essential.

There seems to be no legal basis for feeling that the City has received any delegation of authority from the State that would deprive the latter of its right to pass legislation of the type called for in this instance.

(d) ASSOCIATION OF PROPERTY OWNERS

It has been previously noted that owners of properties across the street from Capitol Park and its Extension have a common concern in assuring their mutual protection from occurrence of unsuitable uses of structures on any of the component privately-owned sites. The issues here involved are somewhat similar to those which prompted formation of the Fifth Avenue Association, and the more recent Sixth Avenue Association, in New York. Most cities, in fact, have a Downtown or Uptown, or Main Street Improvement Association. Few of these concern themselves with the matter of architectural control, but most of them might well do so.

At any rate it is suggested that owners of the Harrisburg properties in question form a voluntary organization under some such name as The Capitol Park Association, the purpose of which would be to promote the best possible development of street frontage across from the Capitol Grounds. Frontages which would be included would consist of the south side of Walnut Street, from the railroad to Third Street, the west side of Third from Walnut to Forster Street, and the north side of Forster from Third to the railroad. The outside corners of the area indicated should be included. State Street from Third to front Street might also be added, if so desired by a majority of the property owners.

Unanimous participation in membership would be desirable, but initial acceptance by only a majority would make a significant start. The members might select a committee to confer with the State Art Commission which, for obvious reasons, should be recognized as the authority for approval of development plans.

Existence of this commission provides an exceptionally satisfactory answer to the question as to how to secure a disinterested group sufficiently qualified to weigh questions of architectural merit and appropriateness.

The four types of regulatory means heretofore noted are not incompatible. As a matter of fact, combination of all four would be the best possible insurance of effective neighborhood control in behalf of community and individual interests. Zoning would give general, basic protection by regulating the height, area, and use of buildings, and use of the land. A municipal ordinance, a state act, and an association of property owners could dovetail together, giving the necessary legal authority, and providing a democratic means for effectuating a mutual covenant. Any one of these mediums taken separately, would be useful; two, three, or four of them together would be proportionately more effective.

For the benefit of any person who might regard the placing of any such restraints on private development as being radical and unwise, it may be interesting to note that in such essentially conservative countries as England and Wales—

". . . control of the external appearance of building has, for some years, been a part of planning practice . . . and with good results.

"It began in 1914 with the second planning scheme to be approved, namely, that for Ruislip-Northwood. That scheme empowered the local council to refuse to pass plans for new buildings if they considered that they would be seriously out of harmony with their surroundings.

"Furthr prominence was given to the subject by the Bath Act of 1925 which gave the Council of that beautiful old city similar powers with regard to both new buildings and alterations to existing ones in the built-up portions of the city.

"The powers were specifically conferred in relation to all future planning schemes by the Town and Country Planning Act, 1932, with the proviso that opportunity for appeal must be provided for.

"In order to assist local authorities in exercising this important but delicate function . . . advisory panels of architects in all parts of the country . . . give their services voluntarily and advise as to which plans should be rejected and as to desirable amendments in designs which are submitted."

It is vital to recognize that all the regulations or cov-

enants heretofore advocated are based on recognized aspects of the police power, and are to be imposed democratically, for the benefit of the whole community, rather than by arbitrary will of any individual or group, to serve the interests of a favored few.

"In addition, many authorities, often with the help of the panels, have issued brochures in which are explained the elements of good design and the materials appropriate to the locality.

"As may be imagined, results vary widely, but on the whole I think it can be said that when the powers are exercised with firmness mellowed by tact and discretion, they have proved most successful."*

In Stockholm and other Swedish cities, no building may be erected without approval of the building board, which must see to it that structures are suitable for their sites, and that they are reasonably satisfactory from the standpoint of taste and good architecture. Such a board comprises typically a lawyer, a physician, two architects, and a building contractor.**

IX. CONCLUSION

It will be said by many persons who read this report (and also by many who don't) that this is no time for the Commonwealth to consider acquisition of the Extension Area. As a matter of fact it is unlikely that any particular time will ever appear entirely propitious for expenditure of such a sum as is involved. It is conceivable that delay might permit purchase sometime at an even more depressed figure than at present, but it seems doubtful wisdom for the State to procrastinate merely in the hope of further degeneration of Capitol Park's environs. On the other hand it is not unlikely that delay may see one or more expensive structures erected on some of the more favorably-located sites, thus seriously increasing the financial problem of purchase by the State. Assuming therefore, that acquisition of the Extension Area is a highly desirable eventuality, if not indeed an actual necessity, it would seem wise and economical for the State to make provision for its purchase at the earliest possible moment.

Some might question the advisability of undertaking the Extension project until all details of the Brunner Plan have been completed. The People's Court development, however, cannot be carried out until the five Temporary Buildings have been dispensed with. Demolition of the latter is not likely to occur unless there can be a more radical cut in requirements for State office space than now appears likely, or until additional office space can be provided on State-owned land. The latter alternative emphasizes the prior need of the Extension Area. Location of the Northwest Office Building outside of that Area because the State owned no available site therein at the time that its construction was urgent (in order to take advantage of PWA funds) should emphasize the advantage to the Commonwealth of having suitable building sites available, under State control, in the right place.

With all needed property in State ownership, eventual completion of the Brunner Plan would be reasonably assured. Until the Extension Area has been procured, however, there is always the possibility that interim private development therein may jeopardize its acquisition. For this reason, immediate purchase of the Extension tract by the State is urgently recommended. For the same reason this recommendation also includes the obtaining of additional land needed at the eastern end of Memorial Bridge, as a related project, but not as part of the Extension proposal.

In conclusion it seems worthwhile to express a hope that the people of Pennsylvania will feel an increasing pride in Harrisburg as their Capital City, and that all possible steps will be taken by local and State authorities to justify such pride. There is no reason why Harrisburg should not become the sort of civic symbol for Pennsylvania that the City of Washington represents for the Nation. As the State Capital, it is appropriate for Harrisburg to serve as a demonstration of civic efficiency and beauty to the rest of the State. Achievement of that aim will require maximum cooperation between State and municipal officials, and above all, a determination on the part of citizens of the Harrisburg Area and of the entire Commonwealth that their Capital City shall become second to none in the Nation in the amenities that it offers, with particular emphasis on the governmental nucleus represented by the State buildings, in a dignified, well-planned relationship.

REPORT OF THE COMMITTEE TO INVESTIGATE OPERATION AND PROCEDURE OF THE PENNSYLVANIA CONSERVATION BOARD AND THE EXTENSION SERVICE OF PENNSYLVANIA STATE COLLEGE

LETTER OF TRANSMITTAL

To the Members of the House of Representatives of the General Assembly of the Commonwealth of Pennsylvania:

In pursuance of House Resolution, No. 15, Serial No. 36, we submit herewith the report concerning the operation and procedure of the Pennsylvania Soil Conservation Board and the Extension Service of Pennsylvania State College.

CLAYTON E. MOUL, Chairman.
ROY C. HABERLEN.

AUTHORIZATION

The House of Representatives, on February 18, 1941, by a vote of 118 to 80, adopted House Resolution No. 15, Serial No. 36, which reads as follows:

Whereas, The mountains and hillsides of Pennsylvania feed the headwaters of important drainage areas of the Nation; and

Whereas, The wealth of topsoil has eroded from the hillsides of Pennsylvania with accelerated speed as the forest resources have been depleted and exploited and as the natural barriers of erosion have been broken by reckless and profligate methods of tillage and wasteage; and

Whereas, The Democratic Administration of George H. Earle enacted the Soil Conservation Districts Law of 1937 and created the Soil Conservation Board to cooperate with the Federal Government in a National program of conservation and erosion control; and

Whereas, The Democratic Administration of Franklin D. Roosevelt had provided funds to eventually control erosion on the hillsides of Pennsylvania and other headwaters states so that appropriations may be diminished for the dredging of harbors and waterways and the soil may be saved for future generations of farmers; and

Whereas, Said Federal funds have been accepted very generally by farmers of other headwaters states, while Pennsylvania has instituted only four soil conservation districts; and

Whereas, The ineptitude of the present administration has brought the General Assembly face to face with a major fiscal crisis with many funds raided and many appropriations hampered; therefore be it

Resolved, That the Speaker of the House appoint a committee of three from the House of Representatives to investigate into the operation and procedure of the Soil Conservation Board and the Extension Service of Pennsylvania State College so that the finding of said investigating committee may be made available to the House of Representatives before any appropriation is approved for said board and college.

Pursuant to the provisions of the foregoing resolution, the Speaker appointed as a special committee to investigate the operation and procedure of the Pennsylvania Soil Conservation Board and the Extension Service of Pennsylvania State College, the following committee: Clayton E. Moul, Chairman; Roy C. Haberlen, and Frank E. Snyder.

REPORT

Procedure

The Committee held its first hearing on March 2 and has met each week thereafter, the last meeting held on May 12, 1941.

The Committee heard from numerous farmers in various sections of Pennsylvania, who appeared of their own volition or at our request, to give out of their own experiences and knowledge facts regarding the conduct of the soil erosion program. Representatives of the four district Soil Conservation Boards in Clarion, Indiana, Lancaster and York Counties were heard at length.

The Honorable John H. Light, Secretary of Agriculture for the Commonwealth, his deputy and other officials of his department appeared before us on several occasions, while Dr. M. S. McDowell, Director of Agricultural Extension of the Pennsylvania State College, appeared in behalf of that agency.

All of the meetings have been open to the public and the fullest opportunity has been given to all witnesses to tell the Committee all facts pertinent to our investigation.

In addition the Committee had for reference the following data:

Minutes of hearing held under auspices of the State Soil Conservation Board at the Court House, McConnellsburg, Fulton County, December 4, 1939.

Minutes of hearing held under the auspices of the State Conservation Board at Shirleysburg, Huntingdon County, in a Shirleysburg Grange Hall, December 5, 1939.

Letter transmitted to Mr. S. Luther Bentzley, Chairman of the Adams County Soil Conservation Committee, Gettysburg, by C. H. Musselman, under date of July 23, 1940.

Minutes of hearing held under the auspices of the State Conservation Board in the Chamber of Commerce Building, Chambersburg, Franklin County, July 25, 1940.

Minutes of meeting held under the auspices of the State Soil Conservation Board at the Court House in Gettysburg, Adams County, July 26, 1940.

Minutes of hearing held under the auspices of the State Soil Conservation Board in the Lehigh County Court House, Allentown, July 29, 1940.

Minutes of hearing on the investigation of soil erosion control, held in Harrisburg, on March 3, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, March 10, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, March 17, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, March 24, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, March 31, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, April 7, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, April 9, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, April 14, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, April 15, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, April 22, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, April 23, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, April 28, 1941.

Minutes of public hearing held before the Committee investigating Soil Conservation Board and Extension Service of Pennsylvania State College, held in Harrisburg, May 12, 1941.

Report of M. S. McDowell to Soil Conservation Board regarding the Work of the Extension Service in Prevention of Soil Erosion.

DISCUSSION OF TESTIMONY.

We believe that the Act of July 2, 1937 (P. L. 2724—Act No. 557) stated beyond a shadow of doubt the considered intention of the State Legislature; that the Commonwealth of Pennsylvania, through its elected representatives, believed a grave emergency existed in the form of soil erosion; that the legislature in the Act stated that it was the purpose of the Legislature "to provide for the conservation of the soil and soil resources of this Commonwealth and for the control and prevention of soil erosion and thereby to preserve its natural resources, control floods; prevent impairment of dams and reservoirs, assist in maintaining the navigability of rivers and harbors, preserve wild-life, protect the tax base, protect public lands, and protect and promote the health, safety,

and general welfare of the people of this Commonwealth."

We further find that the Legislature gave in great detail in Section 2, sub-section C of the Act, a listing of the various types of soil erosion control to be offered under the program the Act contemplated.

We maintain that even a school child reading this Act would understand beyond shadow of doubt that the Legislature intended the fullest possible cooperation by the state government and all its agencies with the Federal Government in carrying through a comprehensive program of erosion control.

We learned that during the year and a half following the effective date of this Act, the period in which the previous Administration was in control of the State government, a splendid beginning was made on this program in cooperation with the United States Soil Conservation Service. Four districts situated in Clarion, Indiana, Lancaster and York Counties were established and extensive conservation work completed on hundreds of farms in these districts.

The effectiveness of this work was confirmed by the unanimous reports from members of the Boards of the various districts and by farmers who had joined the districts and benefited immensely by the conservation work.

We also learned that since January 15, 1939, when the present Administration came into office, the intention of the Legislature as written in the Act of 1937 and confirmed in the subsequent Act of 1939, has been deliberately, consistently and openly sabotaged, misinterpreted and virtually frustrated by the persons who were charged with its promotion and operation. This conclusion is amply buttressed by the evidence presented and has been upheld by farmers in every section of the State desiring to establish soil conservation districts. It is upheld by farmers in localities where districts have already been established who testified to the absolute lack of cooperation from the State Soil Conservation Board, the State Department of Agriculture and the Extension Service of State College.

Mr. Light's unbending opposition to this program was shown in the method in which he conducted hearings in various sections of the State to determine whether or not districts should be established.

Mr. Light's hostility was shown in his own testimony given before this Committee in which he was evasive, contradictory and unresponsive to questions put to him by the Chairman and committee members.

Mr. Light's sabotage is shown in the Minutes of Soil Conservation Board Meetings held since he took office.

Many farmers testified before us stating that the County Agents of the State College Extension Service, personally willing to cooperate with this program, were compelled by "higher ups" to withdraw from any cooperation in this field.

This attitude of the County Agents became easily understood when Dr. McDowell appeared before the Committee and in a prepared statement and in oral testimony placed himself on record as being opposed to the program envisaged in the Act of 1937.

In order that the House of Representatives may understand the extent of misbehavior in office of which Secretary Light, the other members of the State Soil Conservation Board and Dr. McDowell are guilty, we reproduce here a list of the duties and powers of the State Soil Conservation Board as outlined by the General Assembly in 1937 (Act 557, P. L. 2728).

The first duty of the Soil Conservation Board is as follows:

1. "To offer such assistance as may be appropriate to the supervisors of soil conservation districts organized as provided hereinafter in carrying out of any of their powers and program".

Testimony given before our Committee by the members of the Boards of the districts already organized indicate absolute refusal on the part of Secretary Light and Dr. McDowell to give them any assistance whatsoever in carrying out their powers and programs.

Duty two is as follows:

2. "To keep the supervisors of each of the several districts organized under this Act informed of the activities and experience of all other districts organized hereunder, and to facilitate an interchange of advice and experience between such districts and cooperation between them."

Again the members of the district boards testified before us that they had received no information through the Soil Conservation Board of the activities of the other districts which would be helpful to them in carrying out their local programs.

Duty three is as follows:

3. "To coordinate the programs of the several soil conservation districts organized hereunder so far as this may be done by advice and consultation."

Here again the Soil Conservation Board has been negligent in carrying out any coordinating activities.

Duty four is as follows:

4. "To secure the cooperation and assistance of the United States and any of its agencies and of agencies of this Commonwealth in the work of such districts."

It is true that half-hearted efforts were made by the Soil Conservation Board to keep in touch with the United States Soil Conservation Service but again the attitude of the State Board may be described as suspicious.

The State Board was apparently unwilling to embark on this program because it had originally been launched by United States Government. They have no wish to work with any federal agency lest that agency receive public credit.

The Board was also charged under this sub-section of the Act with securing the full cooperation and the assistant of agencies of the Commonwealth and here again the Board was derelict in its duty, refusing to obtain the wholehearted cooperation of the Department of Highways, Department of Forests and Waters and the Pennsylvania State College.

The final section is as follows:

5. "To disseminate information throughout the Commonwealth concerning the activities and programs of the soil conservation districts organized hereunder, and to encourage the formation of such districts in areas where their organization is desirable."

The obligation here is plain. The Board is to "dis-

seminate information" and to "encourage the formation of such districts . . ." It is obvious that the Legislature meant to build up an active promotional agency. Under the leadership of Secretary Light the Board has been merely passive, acting only when prodded into activity by outside individuals and agencies.

The Act requires the Board to conduct referenda in various localities where it seems desirable to establish a district. Secretary Light interpreted his duties under this act as "Impartial Chairman of such meetings." He failed to perform his duty to "encourage" the formation of districts.

The minutes of the hearings held in Fulton, Huntingdon, Adams, Franklin and Lehigh Counties, display him as a carping critic of the erosion control program, encouraging residents of the various counties who spoke against the formation of the district and harassing and frightening witnesses who spoke for it.

In hearing after hearing he led farmers to believe that if they voted "aye" in the referenda on the question of whether or not the district should be established, they were binding themselves to all the costs and penalties which might follow the formation of such a district.

It is interesting to note at this point that W. S. Hagar, Mr. Light's deputy, took his official life in his hands and publicly disputed Mr. Light's interpretation. Mr. Hagar gave the true interpretation—that voting "aye" in the referendum merely meant that the resident of the community was in favor of the soil conservation district and that no farmer could be bound unless he entered into an agreement which would follow the formation of the district.

Mr. Light, in a bulletin prepared by his office and sent throughout the State, notably only to those men known to be opposed or doubtful regarding this program, consistently states that erosion problems in Pennsylvania can be adequately met by methods prescribed by the State Department of Agriculture and State College; namely, strip-cropping and contour plowing.

And though many farmers told Mr. Light and later informed the Committee that this program while adequate for certain farms failed totally to prevent erosion on others, he proceeded in his obstinate course.

Had Mr. Light desired to be an impartial arbiter at such public hearings he would have sought to produce evidence of the success of the program in districts already in operation and encouraged the introduction of testimony favorable to the plan as well as that opposed to it. But all his questions, as indicated by his own notes of testimony at the hearings, indicate an unholy zeal to place upon the record unfavorable testimony and by threats and innuendo seek to frighten supporters of the plan into voting against it.

Numerous complaints reaching us regarding the methods of holding the elections in these referenda were pursued by the Committee. While we make no charge of fraud in the conduct of these elections, it is obvious that the elections were not conducted in an impartial manner and that men subservient to Mr. Light and dependent upon him for their jobs were in charge rather than placing local farmers in charge as was done under the previous administration.

Mr. Light's chauffer, for example, acted as judge for one election; local dog law enforcement officers known throughout the communities as "dog catchers" conducted others and ballots were not counted in the presence of the local farmers but were carried away for counting in privacy.

These actions created, of course, grave suspicion in the minds of the farmers and left no doubt in the minds of most that the State Department of Agriculture was not in favor of the erosion control plan and would go to almost any limit to prevent its operation.

Examination of official activities of the State Soil Conservation Board shows that the present State Board delayed its organization for six months—not meeting until June 13, 1939. Mr. Light attempted to explain away this gross dereliction of duty with the statement that it took them that long to unravel the affairs of the preceding Board.

This was singularly unconvincing to the Committee in view of the fact that the previous Board had been able to organize, start functioning and set up four district boards in a year and a half. Had Mr. Light displayed any enthusiasm for the program or intelligence in carrying out his responsibility he would have found a way to hold a meeting of his new Board before six months had elapsed.

Another reason was probably behind this failure to start. The delay permitted the 1939 session of the Legislature to take the funds remaining unspent out of the allocation of the 1937 session and return them to the General Fund. The delay also made it possible for the Soil Conservation Board to keep its request to the Legislature to the picayune sum of $1000.

In his testimony before this Committee Mr. Light explained that economy was the watchword. Our Committee points out that through an expenditure of $7000 by the previous Board in 1937-38 four districts were started and hundreds of thousands of dollars of irreplaceable top soil saved for the Commonwealth. Under the Light administration only $1000 was obtained and only $400 spent and as one would expect, nothing has been accomplished to date under this program by the present Board.

Mr. Light further defended his inaction by stating that the Department of Agriculture and State College had an efficient, successful conservation program functioning and that it had been under way for twenty-five years.

The effectiveness of the 1937 program as compared with the twenty-five year program of the Department of Agriculture is shown in the report of York County:—during the previous twenty-five years eighty-eight farms received conservation treatment; in the year and a half the 1937 program was in effect two hundred farms received conservation analysis and treatment.

The Act of 1937 instructed the Soil Conservation Board to pay no salaries but to reimburse the local district boards for necessary and proper expenses including postage, stationery, transportation, etc. Under the previous Board such expenses were paid but the officials of the district boards informed us that since the present Soil Conservation Board has been in office they have been unable to obtain any reimbursement for expenses.

It is a great tribute to the devotion of these men to the common welfare that despite this mean and narrow attitude of the Soil Conservation Board they are continuing their activities and paying their expenses out of their own pockets.

The Committee wishes to record its firm belief that this type of penny-pinching economy is the most wasteful and extravagant vice of which a government can be guilty.

Top soil cannot be replaced for one thousand years. As it washes down our creeks into the rivers and into the sea it closes harbors, and requires the expenditure of millions of dollars of the taxpayers' funds in dredging operations. The expenditure of a few thousand dollars by the State now will save literally millions later as well as preserve for our State our most vital natural resources.

It is a sad commentary on the limited vision of Mr. Light and his associates that they can let petty political advantage blind them to this essential fact.

Any doubt as to the attitude of the State College Extension Service toward the soil conservation program was dispelled when Dr. McDowell appeared before us. In a labored statement he attempted to distinguish between educational, promotional and administrative activities under the conservation act. He freely admitted the responsibility of State College to the State and nation in carrying on soil conservation work, but said that State College could not obey the mandate of the Legislature to include the formation of districts because it would be promotional, and that State College could not help the districts after they were formed because that would be administrative.

When the State College Extension Service county agents work on the State College program, lay out farms for contour plowing and strip-cropping, show movies of such work, organize meetings in its behalf, it is being purely "educational" according to Dr. McDowell. But similar activities under the 1937 plan would be "promotional" and "administrative" and therefore improper.

Dr. McDowell attempted to evade his personal responsibility as head of the Extension Service by throwing the onus of State College's failure to cooperate back on the Board of Trustees. He prated at length about the obligation of State College to the federal and state taxpayer and indicated the basis of his hospitality to the 1937 program to be its excessive cost.

When it was pointed out to him that the taxpayers had through their representatives in Congress and through their representatives in the General Assembly voted their willingness for the adoption of this program throughout the nation and in our State and it laid the responsibility on his shoulder to carry out their mandate he was unable to answer. He further attempted to dismiss the 1937 program as unimportant insisting that the major portion of Pennsylvania can be saved from soil erosion through the methods promulgated by State College. In this position he stands alone, as every practical farmer and all the specialists of the United States Soil Erosion Service agree that the rotation of crops, strip farming and contour plowing are inadequate for sharply sloping, irregular farm lands.

In the conclusion of his prepared remarks, Dr. McDowell stated that a large expenditure of funds is not necessary in Pennsylvania and that the problem could be solved by educational processes. In other words, it is the belief of this highly important educator that Pennsylvania must stand idly by while its invaluable top soil washes down to the sea and take no action other than educational activity by county agents to halt this tragic loss.

One bright spot in the soil conservation picture during the present administration has been the activities of Dr. S. W. Fletcher, Dean and Director of the Agricultural Experimental station of State College. The minutes of the meetings of the State Board portray Dr. Fletcher as extremely interested in the 1937 program and his desire to carry out the mandate of the Legislature.

It was largely through his efforts that Mr. Light was prodded into any activity whatsoever. Unfortunately for the extension of the program it was Mr. Light and not Dr. Fletcher who conducted the hearings preceding the referenda.

This conflict between Dr. Fletcher and Dr. McDowell, both representatives of State College, must be resolved in order that State College can faithfully fulfill the duties laid upon it by the Legislature.

FINDINGS AS TO FACT

The Committee reports the following findings as to fact:

1. The officials responsible for the promotion and operation of the soil erosion control program—Hon. John H. Light, Secretary of Agriculture, the State Soil Conservation Board, Dr. M. S. McDowell, director of Agricultural Extension of Pennsylvania State College—are guilty of gross dereliction of duty, having deliberately and openly refused to carry out the mandate of the Legislatures of 1937 and 1939.

2. As a result of the failure of the Soil Conservation Board to organize prior to June 13, 1939, funds for erosion control appropriated in 1937 were allowed to lapse, virtually no funds were appropriated to carry on the program after 1939 with a result that the erosion control program of the Commonwealth was almost wiped out.

3. Under the law it is the duty of the Secretary of Agriculture, ex officio head of the State Soil Conservation Board, to see to it the Board performs the functions for which it is responsible under the law. John H. Light, Secretary of Agriculture, is opposed in principle to federal soil erosion legislation, is opposed in principle to the Pennsylvania statute providing for and governing the creation of soil erosion districts. Through his personal leadership and through the activities of his department, an atmosphere of hostility and uncertainty was created which hampered the progress of the cause the State Soil Conservation Board of Pennsylvania was created to promote. The Chairman of the Board, the Secretary of Agriculture, pursued a policy of delay where sentiment in favor of the creation of soil erosion districts rendered open hostility inexpedent.

4. The Chairman of the State Soil Conservation Board of Pennsylvania was actively supported in his efforts to sabotage the 1937 act by Dr. McDowell who is opposed in theory, in practice and in principle to federal soil erosion legislation and to the Pennsylvania Erosion District Statute of 1937, and who does not intend in the future to do anything calculated to place the Pennsyl-

vania Erosion District Statute in full force and effect.

5. The program for which the State Soil Conservation Board of Pennsylvana was primarily responsible was consistently undermined by county agents, operating under Dr. McDowell's direction, who, in a majority of instances, either openly or covertly opposed the formation of soil erosion districts. Dr. McDowell himself exerted direct pressure on his county agents with a view of inducing or requiring them to oppose the formation of erosion districts and to influence those residing within the proposed districts to vote against the district plan.

6. The activities and utterances of both the Secretary of Agriculture and the director of Agricultural Extension at the Pennsylvania State College have been persistently calculated to discourage the formation of erosion districts and promote active hostility to them.

7. Both Mr. Light and Dr. McDowell maintained the position it was not their duty to promote soil erosion by advocating the creation of erosion districts under the law, but that it was instead the duty of the Board and the duty of the Agricultural Extension executives simply to assist in the administration of such districts as were thrust upon them. On the other hand, Dr. S. W. Fletcher, dean of the School of Agriculture, Pennsylvania State College, was consistently interested in furthering the creation of soil erosion districts by means of educational and promotional programs. Dr. Fletcher's attitude, as a member of the State Soil Conservation Board of Pennsylvania, was distinctly helpful to those desirous of operating under the erosion district law. Dr. Fletcher's attitude and activities were in marked contrast to the attitude of the Secretary of Agriculture and the director of Agricultural Extension.

RECOMMENDATIONS

We recommend:

1. That the Soil Conservation Board be recognized and be made up as follows:

The Secretary of Agriculture
The Dean of the State College Experimental Station
The Pennsylvania State Coordinator of the Soil Conservation Service of the U. S. Department of Agriculture
Four duly elected representatives from among local soil erosion control district boards

This will give control to the men who are intimately connected with the problem and who are working on it and will insure the farmers of the State sympathetic hearing of their problems and wholehearted cooperation in bringing to them the benefits of this national conservation program.

2. That John H. Light, Secretary of Agriculture, be cited by this House for gross dereliction of duty in his deliberate refusal to follow the mandate of the Legislature, and that he should be dismissed by the Governor if he is unwilling to cooperate during the remaining term of his office.

3. That the House cite Dr. M. S. McDowell, Director of Agricultural Extension of State College, to the Board of Trustees of State College for his refusal to cooperate in the Erosion Control program and for his failure to use the county agents of the Extension Service for the furtherance of the Soil erosion program and the assistance of the districts already formed.

At the same time we would cite with approval to the Board of Trustees Dr. S. W. Fletcher for his interest and determined activity in behalf of the program. That he did not succeed is no fault of his.

4. That the House of Representatives cite Dr. McDowell to the United States Department of Agriculture for his failure to cooperate in this program.

5. We recommend that the appropriation to the Soil Conservation Board and the local districts be increased to $57,500, to enable them to carry out the wishes of the Legislature and that it be made clear in the Act making the appropriation that local boards are not to be denied reimbursement of proper expenses.

6. We recommend that the usual appropriation be made to Pennsylvania State College with the stipulation that funds for the Extension Service be paid only if full cooperation is given by it to the soil conservation program.

7. Our investigation has compelled us to give serious thought to the proper function of Pennsylvania State College in relation to the Commonwealth as a whole and to agriculture in particular.

It is not our function to determine the future conduct of the College in relation to any other matter other than soil erosion control. We urge, however, the State College in planning its future curricula lay greater emphasis upon preparing its students for participation in their post-college life in modern methods of farm and forestry technique.

MINORITY REPORT OF THE COMMITTEE APPOINTED BY THE SPEAKER OF THE HOUSE OF REPRESENTATIVES IN ACCORDANCE WITH RESOLUTION NO. 15—FEBRUARY 4, 1941

Submitted by Frank E. Snyder, Member of Committee

Under the provisions of Resolution No. 15, the Speaker of the House appointed a committee of three from the House of Representatives "to investigate into the operation and procedure of the Soil Conservation Board and the Extension Service of Pennsylvania State College * * * *." Immediately upon the opening of hearings upon the subject it became evident that the Chairman of the Committee entered upon his duties with a pre-determined opinion and that he would not permit that opinion to be changed in spite of any testimony with the result that there is justification for the charge that the hearings were resolved into an attempt at prosecution of those persons who were officially associated with the operation of Act 557 rather than an investigation of their official acts.

The first five hearings were devoted to hearing testimony from residents of York, Lancaster and Clarion Counties; and, the Black Lick District, which comprises some townships in Indiana County and one township in Cambria County, in each of which Soil Conservation Districts were established under the previous State Soil Conservation Board; and, from Jefferson, Adams, Lehigh, Franklin and Fulton Counties in each of which the farmers voted against the establishment of districts and also from Bucks County, where it was stated some farmers were interested in having a district established. All of those appearing and giving testimony favored Soil Conservation Districts but in the case of Lehigh County two groups appeared, one favoring the establishment of a

district, the other opposing the establishment of a district.

The records do not show one instance in all the testimony offered in which the present State Soil Conservation Board failed to perform its functions. Some of those testifying claimed that the Board failed to give cooperation to districts already formed but they offered only personal opinions without any facts to substantiate those opinions.

It was evident from the beginning of the hearings that the Chairman of the committee desired the opinion to prevail that opposition on the part of farmers to the formation of soil conservation districts was the result of subtle and sinister efforts eminating from those who were responsible for the administration of Act 557. Considerable time, however, was devoted to testimony by representatives of fishing clubs who were not farmers and who admitted that they owned no land which would give them the right to vote for or against the establishment of a district. The interest of their organizations was purely based upon the idea that as the result of the establishment of the Soil Conservation District the streams might be improved for fishing.

In some instances those testifying made the blanket statement that Mr. Light indicated opposition to the establishment of districts while he was conducting hearings, but absolutely nothing was offered to justify those statements nor was permission given to persons who opposed the establishment of districts to give their version of Mr. Light's attitude at the hearings. The testimony given by the farmers from Lehigh County, who opposed the establishment of a district and who appeared voluntarily described their opposition as based upon objection of being told what to do about their own affairs.

Under Act 557 "Any twenty-five owners of land lying within the limits of territory proposed to be organized into a district may file a petition wth the State Soil Conservation Board, asking that a Soil Conservation District be organized to function in the territory described in the petition." It further provides that "after such a petition has been filed with the State Soil Conservation Board it shall cause due notice to be given of a proposed hearing upon the question of the desirability and necessity, in the interest of public health, safety, and welfare, of the creation of such a district * * *." The present State Soil Conservation Board received such petitions from farmers in a certain area in each of Adams and Franklin Counties and from the farmers in each of Lehigh, Fulton and Huntingdon Counties. These petitions were acted upon according to law, and hearings were conducted. Secretary of Agriculture John H. Light being designated under the Act as a member of the Soil Conservation Board was named by the Board to be the Chairman. He personally conducted each of the hearings. An effort was made throughout the hearings of this committee to prove that partiality was shown in the conduct of these hearings; that the chairman in these hearings indicated opposition to the establishment of Soil Conservation Districts. Nowhere in the testimony can this charge be substantiated. The testimony by Mr. Norris from Huntingdon County who was favorable to the establishment of a district, might be suggested as an example of a definite refutation of this charge in which he said, "The hearing was conducted very impartially so far as Mr. Light was concerned."

Typical of the testimony given in an effort to show partiality, is a statement by a Mr. Magee in which he said, "Wherever a man got up who opposed the program our Secretary's face lit up and he showed interest." This can hardly be taken as a responsible contribution to the hearing nor can it be imagined that one seriously interested in learning facts would attach much importance to it.

A singular development in the hearings was that the testimony shows in every instance where hearings were conducted by the present Soil Conservation Board few farmers who were opposed to the establishment of Soil Conservation districts attended those hearings. If opposition was designed and promoted by those who were responsible for the enforcement of the law, would it not be logical to conclude that they would have arranged formidable opposition at the hearings which could have provided reasons for not holding a referendum, rather than to run a chance of a favorable referendum vote.

An attempt was made in the earlier hearings to throw a cloud of considerable mystery about a set of questions and answers which was circulated in the areas of the proposed districts previous to the holding of referenda.

The record indicates that the chairman desired to show that this set of questions and answers left reaction unfavorable to the establishment of the district and that they were sent out in a subtle manner. It finally became necessary at the hearings for the chairman to permit this cloud of mystery to evaporate when he was unable further to avoid having the complete facts regarding the pamphlets included in the records. The questions and answers had been arranged from purely an informative point of view by Dr. Fletcher at the request of the State Soil Conservation Board. In compliance with the law the Soil Conservation Board mailed this set of questions and answers as a source of information to the farmers living in the proposed districts. Believing that the list of farmers in the files of the Bureau of Animal Industry of the Department of Agriculture was the most complete list available, that list was used in the mailing of the pamphlets, the method followed by the previous board.

Throughout the hearings the statements made by the chairman showed definitely his unalterable bias, many of his questions were unfair and in innumerable instances he insisted upon interpreting the replies according to his own desires.

The chairman devoted much time at the hearings and interjected rather scurrilous statements relating to the manner in which the Board conducted the referenda. In case notice was given of the holding of the referenda in accordance with the law and the referenda were conducted under regulations established by the Board as is provided by the Act. Voting places were established according to a geographical survey of the proposed district. As an economic measure employees of the Department of Agriculture were sent into the proposed districts to conduct the referendum. These men all operated under instructions by the Board which were typewritten and are included in the official records of the Board. Each person appearing at the polling place was required to sign his name upon a register and to indicate upon his ballot the acreage and location of his farm. He marked his own ballot and deposited it in the ballot box. The ballots

were later counted by the persons who conducted the referenda.

In accordance with the law which states that the Board shall publish the result of such referendum, announcements of the results were made by the Board immediately following the checking of the tabulations.

When he appeared at the hearings of this Committee at the request of the Chairman, Secretary of Agriculture John H. Light who is chairman of the Soil Conservation Board extended an invitation to the Committee or any member to examine any of the material and records of the Soil Conservation Board in the office at the Department of Agriculture. As the minority member of the committee, I availed myself of that invitation. I found all of the material pertaining to each of the referenda conducted by the present Soil Conservation Board including the registers, the ballots and the tally sheets are all filed in the offices of the Soil Conservation Board and that they are complete in every detail. When the suggestion was made at the hearings that the present Board conducted the elections by delegating members from the Department of Agriculture as an economic measure I found that to be substantiated when comparison was made with the method of conducting elections followed by the previous Soil Conservation Board. Under that plan the stated policy of the Board was to employ three persons for each polling place to be paid $3.00 each and expenses for three days. Under the plan by the present Board no additional salary payments were necessary as the employes delegated merely received their regular salaries and devoted only one day to each referendum. In spite of the determined effort on the part of the chairman of the committee to attempt to show that the method of conducting a referendum followed by the present Soil Conservation Board tended to make the referendum an undemocratic affair and also by innuendo at least to suggest that the method indicated an unfavorable attitude on the part of the Board so far as the establishment of districts is concerned there is no testimony in the records which gives the slightest basis for those contentions. On the other hand, interesting information is in the files of the previous Board which definitely shows that politics entered into the situation under that Board. Under date of March 9, 1938, S. M. Wass, Executive Secretary of the State Soil Conservation Board wrote to the Postmaster at Pitcairn as follows: "Mr. Lawrence's office has suggested that we write you in reference to a matter that is of considerable importance to us.

"There is to be a Soil Conservation District referendum held at Community Hall, Monroeville, on Wednesday, April 6, 1938, from 1 to 9 p. m. At that referendum we need a judge and two tellers to have charge of the election. The judge and one of the tellers should be Democratic. The other teller should be Republican * * * *."

The political angle is again substantiated in a letter dated March 10, 1938, in which Mr. S. M. Wass, Executive Secretary, State Soil Conservation Board wrote to Mr. Harry O. Kimmel, State Coordinator, U. S. Department of Agriculture, Soil Conservation Service as follows: "Will you please have Stark and Beamer start to select names for the supervisors to be elected in the Westall and Black Lick Districts * * * *. If either Stark or Beamer have in mind men who could secure the approval of the Democratic County Committee and whose names could, therefore, be placed before the Board for consideration when the Board elects the two supervisors they are to appoint, I think it would be well for Stark and Beamer to make such suggestion through you. I have already written two county chairmen, Cochran and Spicher asking them to send in a list of names, any two of which they would be satisfied for the Board to appoint as supervisors."

Records of the previous Soil Conservation Board shows that no advanced educational work was carried on by that Board, this phase of the work having been handled entirely by the United States Soil Conservation Service. In a report to the Board made by Mr. Wass, Executive Secretary, he stated, "Since my previous report was submitted, I have again read the Act under which this Board was created and I find noting therein that places on this Board any obligation to hold educational meetings nor to take any part in the formation of Soil Conservation Districts previous to the receipt of a petition * * * *." A report of the hearing held in York County contains the following: "It was suggested, and Mr. Kimmel, on behalf of the United States Soil Conservation Service agreed to arrange that four or more educational meetings be held in that County within the next two or three weeks." This plan was followed in the other districts according to the reports of Mr. Wass, which further shows that the United States Soil Conservation Service had a large part in arranging the activities of the former Board. Besides conducting educational work in the proposed districts Mr. Kimmel had much to do with the conducting of the hearings, the setting of the dates for referenda and the boundaries were established by the United States Soil Conservation Service. As a matter of fact the procedure policy adopted by the previous board, as stated in the minutes was as follows: "The submission of petitions for the creation of Soil Conservation Districts should be discouraged until the creation of a district seems desirable."

On October 11, 1939, the Department of Justice answered a request made by the present State Soil Conservation Board for a digest of the provisions of the Soil Conservation Districts Law as follows: "Insofar as is concerned the duty of the Soil Conservation Board with respect to the formation of Conservation Districts, it should be noted that the Board has no authority to institute any action with respect to the creation of soil conservation districts of its own motion. On the contrary, the initiative must come from a group of at least 25 owners of land lying within the limits of the territory proposed to be organized."

In a contention over that part of Secretary Light's statement in which comparison is made by districts instead of acres with other states, the chairman of the committee stated, "We are going to give a verbatim report of what transpired here during the last 10 minutes so that the House of Representatives will have a fair picture."

The inference by the chairman in this instance is that Secretary Light avoided acreage comparisons because of the fact that some states have greater areas under projects than has Pennsylvania The statement by the Secretary dealt with districts and on that basis his comparisons were justified. On the other hand Secretary Light said in his statement, that so long as the Pennsyl-

vania Soil Conservation law contains the penalty clause. Soil Conservation in this State will not make much progress.

Reports of the Federal Soil Conservation Service show that by far the greater number of projects are centered in the Southern States and that with only one possible exception, all the States have laws far more favorable to the farmer than has Pennsylvania.

As further evidence that the former Board felt that the assistance to be given by the Federal Soil Conservation Service was an imperative factor in establishing districts in Pennsylvania is the following quotation from the Executive Secretary's report: "No hearing was held on the Butler-Venango petition. Instead a meeting of the subscribers was arranged for, at which 18 of the 25 subscribers were present. Your Secretary explained that the creation of a district and the acquisition of a CCC Camp in this area were not possible at this time."

The chairman of the investigating committee was rather caustic in his remarks relative to the fact that the present Board did not organize until June 1, 1939. The reason for this is given concisely in the statement presented to the Committee by Secretary Light, Chairman of the Board, in which he states, "The records and minutes of the previous Board are incomplete and in a confused condition. The true legal status of the four districts is not known. The actions of the former Board had a deterrent effect on the organization of Soil Conservation Districts."

Notwithstanding the fact that the previous board did not inherit any confused condition nor incomplete records since it was the first board established under the law, the records show that whereas the Soil Conservation Act was approved by the Governor, July 2, 1937, it was not until October 25, 1937 that it held its first meeting.

In his effort to show lack of cooperation on the part of the State Soil Conservation Board with the Soil Conservation Districts the chairman devoted considerable time to the matter of finances. Contending that it was the duty of the board to give assistance of this kind, it is interesting to note in the minutes of the previous board that the matter of finances was brought before each of the hearings conducted in proposed districts. The following appearing in the minutes of the previous board covering the hearing held in the proposed Westall district is typical of the discussions in other districts. A farmer asked, "Will we get assistance from the State, financially?" Major Wass replied, "Not from the State. The State Board has no money for that purpose but there are agencies that have money." The farmer—"Doesn't the State or Federal government allow something for this kind of work the same as they do for raising different crops?" Major Wass—"To make money available for direct assistance to individual farmers there is nothing like that in the State of Pennsylvania." The farmer—"I'd like to know whether or not it would be possible to get benefit payments from agricultural conservation. Will anything be done under this program? Major Wass—"It's not included in the program. No money is available from the State." Since the true legal status of the four districts organized is not known there necessarily developed some question about the bills which were submitted for postage and traveling expenses of the supervisors. It might here be noted that the legal status of the districts was brought to the attention of the State Board by the Federal Soil Conservation Service. Bills which had been approved by the previous board and not paid were paid by the present board but there was a bill amounting to $14.25 for printing and stationery submitted by the York County district which the controller under the previous administration claimed was not in proper order for payment in that all printing by the State must be done through the Department of Properties and Supplies. This particular bill received much attention by the chairman as an illustration of the lack of cooperation on the part of the present State Board. The evidence shows that the districts submitted no requests for financial assistance. Early in August, 1939, the Board learned that there might be some bills that were not paid and on August 9, 1939, wrote to the supervisors of the districts requesting them to submit any bills which they might have. A comparison was indicated by the investigating committee chairman of the amount of money spent by the previous board and that spent by the present board with an effort to show that the greater sum would indicate cooperation on the part of the previous board with the districts. It must be realized that $3,000 of the previous board's expenditure went for salary of an executive secretary, more than $1200 for his expenses and that he was provided with a stenographer, showing that a great part of the amount spent by the previous board had nothing to do with financial assistance to the districts.

The total experience of the present board and of the chairman of that board is summed up in the simple statement by the chairman, Mr. Light, in which he stated that under the present law, due to its penalty provisions, soil conservation in Pennsylvania will not be accepted by the farmers. There is definitely no indication in any part of the testimony given at any of the hearings to show that the farmers in the proposed districts in which hearings were conducted by the present board did not make their own decision according to their own judgment in voting down the establishment of Soil Conservation Districts.

The minutes of each hearing of the investigating committee reveal most emphatically the bias and unfairness on the part of the chairman of the committee and show further that regardless of what the testimony might have been he had previously made up his mind as to the type of report he intended to make.

It is further quite evident that the chairman of the committee realized that the broad scope of his resolution under which an appropriation to State College would be denied was most unpopular and to say the least, a grandiose political move, and that to cover that grave error it was necessary for him to find a goat. To carry out his plan of relieving himself of the onus of including the entire College in a matter of this kind, he determined to lay the blame upon two individuals to justify his own position. Those individuals are Secretary of Agriculture, John H. Light, Chairman of the State Soil Conservation Board and M. S. McDowell, Director of the Extension Service of State College. If time could be taken by any person interested, to read the minutes of the investigating committee's hearings it could be seen at once that the conclusions on the part of the chairman which were promulgated by him at each hearing are purely interpretations of his own and not based upon the evidence.

In a hurried perusal of the majority report I find state-

ments absolutely at variance with the testimony given at the hearings of this committee. One example is the statement, "Mr. Light's sabotage is shown in the minutes of the Soil Conservation Board meetings held since he took office." Here I challenge the majority members of the committee to sustain that charge with evidence. The minutes of the Board are a part of the record of the hearings of this committee and do definitely refute that charge not alone but prove it to be rather evidence of irresponsibility.

A charge of further irresponsibility is justified from that part of the majority report which states that "Mr. Light further defended his inaction by stating that the Department of Agriculture and State College had an efficient successful conservation program functioning, and that it has been under way for 25 years. The effectiveness of the 1937 program as compared with the 25-year program of the Department of Agriculture is shown in the report of York County * * * *." Absolutely no evidence nor defense of this kind was given by Mr. Light and the Department of Agriculture never has had a conservation program because that is not within the function of that department, this work being operated by the Extension Service of State College.

The following statement was presented to the committee by Mr. Light which gives explicitly the functioning of the State Soil Conservation Board under the present administration and there is no evidence which disproves the correctness of that statement:

STATEMENT BY HON. JOHN H. LIGHT

I understand that the object of Resolution No. 15, of the House of Representatives, is to find out why there are only four Soil Conservation Districts in Pennsylvania. I shall try to give facts and figures taken from the records, which may prove helpful.

We would invite your Committee, either as a body or individuals, to inspect books, records and minutes of the State Soil Conservation Committee for any additional information.

Many difficulties have been encountered, from the beginning, by the present State Soil Conservation Board.

1. The records and minutes of previous Board are incomplete and in a confused condition.

2. The true legal status of the four districts is not known.

3. The actions of the former Board had a deterrent effect on the organization of Soil Conservation Districts.

On January 17, 1939, when I took office as Secretary of Agriculture, there were on the Secretary's desk unsigned Work Agreements for the four Soil Conservation Districts reported organized during the previous Administration. We did not sign the agreements, pending a thorough study of Act No. 557. It seemed strange that these Work Agreements were not signed by the previous State Soil Conservation Board, however, upon investigation, we found:

(1) That the previous State Soil Conservation Board in their minutes of October 11, 1938, had this to say, "Four of the projects originated by the U. S. Soil Conservation Service have now been, or are now being, formed into Districts. There are still three (3) Soil Conservation Service work areas in which there is only a skeleton organization, and one of which does not have a CCC camp. After discussion, it was felt that the U. S. Soil Conservation Service should be requested not to encourage the formation of any more districts until there is at least one district in actual operation, and to advise the Board as to their future intention in the three work areas in Berks, Franklin and Huntingdon Counties."

It was also suggested that the Board request the Federal Soil Conservation Service not to open up other areas in the State until they have first considered the following projects; (1) At or near the junction of the two forks of the Susquehanna River at Northumberland; (b) In Center County in conjunction with the experimental work being carried on at State College; (c) Improvement of pastures in the Northern Tier of Counties, principally those that are known as Dairy Counties.

It is evident that the retiring Chairman of the Board did not favor signing the Work Agreements.

(2) That nowhere could we find any obligation or authorization to sign such plans either in the Federal or State laws.

(3) That according to a printed statement released by the Waynesboro Station, "the Pennsylvania Soil Conservation Board's only authority is to hold hearings on petitions; if favorable, define the boundaries of the district; hold referendum votes, and if favorable, appoint two local farmers as supervisors."

Having made this exhaustive study, we answered the request of the Federal representative "that the Chairman of the Board sign the work agreements by stating that nowhere could we find any obligation or authorization to sign such plans, either in the Federal or State Laws," whereupon, Dr. Jones, of the Federal Soil Conservation, advised the Board that an exception will be made in the State of Pennsylvania.

The present State Soil Conservation Board has endeavored to straighten out some of these entanglements by building records and procedures on a sound basis.

Hearings were all properly advertised, referenda conducted according to Act No. 557. Full and complete information prepared from material furnished by Mr. Kimmel and Dr. Fletcher was mailed to farmers previous to every referendum. Newspapers copied and published such information. Correspondence has been answered promptly and information given whenever requested.

The present State Soil Conservation Board has acted upon petitions from the following counties: Jefferson, Fulton, Huntingdon, Franklin, Adams, and Lehigh. Hearings were held according to advertisement in accordance with the Act of Assembly, and complete minutes of all the hearings are on file in detailed form, giving every question asked and the answer given. Every person attending a hearing was asked to state his position and to give one or two reasons for that position. In addition, every person signed a card giving his name, township, number of acres of land owned and whether or not he is a farmer.

In all the Hearings conducted by the Board, the following order of business was observed: Call to order, Hearing Notice Read, Reading of Petition, Proving of Petition, Roll of Attendance, Statement of purpose of meeting, Determination of State Board—How, Reading of Act No. 557, Introduction of Testimony, Questions in

Summary, Introduction of letters, maps, etc., Agreement on District Definition, Adjournment.

In Huntingdon County in 1935, there were 2035 farmers. The petition asking for a Hearing was signed by 181 persons and 65 persons attended the Hearing—53 of whom represented approximately 8252 acres and resided within the boundaries of the proposed District. 12 persons attended who lived outside of the District and represented 3194 acres of land. The persons who favored the creation of a Soil Conservation District gave the following reasons for their position: (1) Land Washes, (2) To save and conserve the soil, (3) They had seen what had already been accomplished on projects, (Huntingdon County has a demonstration District).

Those who opposed the District gave as their reasons the following: (1) On account of the compulsory side of the law, it is a trend toward dictatorship, (2) They feel they can conduct their own farms, (3) Takes power away from the farmer, ties his hands and puts him in a straight-jacket, (4) The Act is not fully understood and, therefore, they do not want to go into something they don't know much about, (5) the fear of higher taxes, (6) They do not know what it will cost and, therefore, do not know whether a plan of this kind could be financed, (7) The program sounds too expensive, (8) The Act is top-heavy, (9) Supervisor has too much liberty.

Prior to this Hearing, the Waynesboro Station of the Federal Soil Conservation Demonstration Area distributed throughout the District a seven-page mimeographed information circular entitled "Do You Know"—according to the evidence given by Ralph R. Wakefield, Jr., and a copy of which is attached herewith. The Huntingdon County people have had in their midst a Federal Soil Demonstration area so that the farmers of that County had ample opportunity to get information at first hand, yet in the hearing, the testimony was 2 to 1 against the project. On this basis, the State Soil Conservation Board did not grant a referendum.

FULTON COUNTY HEARING

In 1935, Fulton County had 1355 farmers. The Petition requesting a Hearing was signed by 69 persons. The Hearing held at McConnelsburg was attended by 85 persons, 12 of whom were boys attending school, and 21 could not be classified for want of information.

The opinions of those in favor of a Soil Conservation District can be summarized as follows: (1) Land Washes, (2) Land lying idle which could be reclaimed for agriculture, (3) Save the land to save our water, (4) Farmers cannot afford to purchase lime, etc., and then have it washed away, (5) Save and conserve the soil, (6) They have seen what it accomplished in other districts.

The following were the outstanding reasons against the formation of the District: (1) To gain absolute political and economic control of the farmer, (2) Unconstitutional as it takes the liberty and property without due process of law, (3) The farmers have not been given a fair example of how it will work, and, therefore, they are not sure what the results will be, (4) Do not know what it will cost the farmer, (5) The Act was not fully explained to the farmer in its entirety, (6) The farmer feels that he doesn't need anyone to tell him how to run his farm, (7) A project of this kind is not necessary, as with the right man and a little common sense, the land can be built up.

The State Soil Conservation Board reviewed the testimony and found that those attending the hearing were equally divided in the opinions. The Board ordered a survey and study made in compliance with Section B, page 6, of the Act, which requires that in its determination, the Board must give due weight and consideration to the topography of the area, composition of soil, distribution of erosion, prevailing land use practices, the benefits the lands may receive from being included within the district boundaries, relation of the proposed area to water sheds and agricultural regions and other soil conservation district already organized or proposed, and other relevant physical, geographical and economic factors. When this survey was completed, the State Soil Conservation Board advertised for holding a referendum. The election was held and from an estimated eligible 1153 persons entitled to vote, 42 votes were in the affirmative and 477 votes in the negative.

LEHIGH COUNTY

Lehigh County had 2861 farms in 1935, and the value of field and fruit crops in Lehigh County in 1938 was $3,264,260.

There were filed with the State Soil Conservation Board 18 petitions with 548 signatures. The Board advertised a Hearing according to the Act of Assembly and 70 persons attended the hearing, of which number, 41 were interested in one way or another with Federal activities, according to a survey made. 67 cards were returned, representing 14,608 acres of land.

Previous to the hearing, the State Board caused to have mailed the Questions and Answers, referred to above, to 2600 persons in Lehigh County. Favorable newspaper publicity created much interest. With few exceptions, those in attendance favored the creation of a Soil Conservation District. A strong factor in the Hearing was the effort to rehabilitate the water-shed of the Jordan Creek. The belief was prevalent that a Soil Conservation District would serve a useful purpose to accomplish this end. Added to this was the belief that a CCC Camp would be located in Trexler Park.

The reasons advanced in the hearing favorable to a District, were: (1) To control floods, (2) Sheet erosion, (3) Save topsoil, (4) Save water—build up water sheds for droughts and in case of fires, (5) To take care of water from highways, (6) Farmer does not have time and equipment to make an efficient program himself and needs the help of supervisors, (7) To save health of the people as surface water gets into water supply and carries germs, (8) If the Government pays for it and if the farmer can retain his liberty, it is a fine thing, (9) The serious problems in Lehigh County need Federal aid for solution.

The following opposition was registered: (1) Afraid of the Law, (2) Every good farmer can take care of his own land.

The survey according to Section B of the Act was made. The report studied by the Board and a referendum was advertised. In Lehigh County, there are 2253 eligible voters according to a reliable estimate. The result of the Election was 204 in favor of a District and 351 against the formation of a District.

ADAMS COUNTY

The petitions for the creation of the South Mountain Soil Conservation District included Franklin County and part of Adams County. For convenience and the better accommodation of persons attending the hearings, the Board advertised for two hearings, one in Adams County and one in Franklin County.

There were 14 petitions from Adams County, with 195 signatures. 99 persons attended the hearing, 80 of whom returned their registration cards, representing 13,085 acres of land.

The following reasons were advanced for the District: (1) Saw work done which was successful, (2) To save soil and fertilizer from washing away, (3) To hold moisture, (4) Benefits to be derived; better crops, advice and aid, (5) Will result in an organization which will give strength to a program.

Against the District: (1) Did not see enough of the work to show what can be accomplished, (2) Too expensive for the ordinary farmer, and if the Government continues to pay for such projects, they will be bankrupt, (3) Every farmer should be able to take care of his own land, (4) Engineering service from the Extension Service is a lot to be desired, (5) People want to be their own managers, (6) Do not duly understand the law.

The Board reviewed the testimony, ordered a survey made, followed by the advertisement of a referendum vote. The election resulted in 179 in favor of a District and 185 votes against the proposition.

FRANKLIN COUNTY

There were presented to the Board 24 petitions with 582 signatures, asking for a hearing to be held, covering the townships of St. Thomas, Hamilton, Antrim, Greene, Guilford, Quincy and Washington Franklin County, and the townships of Liberty, Hamiltonban, Franklin, Menallen, Butler, Highland, Freedom, Cumberland, Huntingdon, Tyrone, Strabane, Mt. Pleasant and Mt. Joy in Adams County. The hearing was advertised accordingly. The hearing was held in Chambersburg and 53 persons attended, representing approximately 7000 acres of land.

In general, the opinions expressed were mostly favorable to the District. The Waynesboro Soil Conservation area, a demonstrational project, is within Franklin County, and this may have had a bearing on the opinions expressed. The summary of the opinions expressed can be summarized as follows:

Those in favor advocated: (1) To build up the soil for future generations, (2) to Conserve Water, (3) To have a definite organization which will give strength to a program and which can supply advice and aid, (4) They have seen what can be accomplished from other projects, (5) To save fertilizer and stop soil.

Those opposed had this to say: (1) Everybody should be able to take care of their own land, (2) Information can be secured from State College, (3) Act is not thoroughly understood.

The hearing was reviewed by the Board, a survey was ordered made, this completed, the Board ordered a referendum and the result of the election was 152 votes in favor of the district and 191 votes against it.

The summary of the referenda held under the direction of the present State Soil Conservation Board is as follows:

These figures show that those favoring the establishment of districts, as compared to the eligible vote, was as follows:

In Jefferson County, only 13.9% of those entitled to vote showed interest.

In Fulton County, only 3.6% of those entitled to vote showed interest.

In Lehigh County, only 8.9% of those entitled to vote showed interest.

In Franklin County, only 10.8% of those entitled to vote showed interest.

In Adams County, only 9.5% of those entitled to vote showed interest.

In the Districts organized by the previous Board, the results were no better and perhaps worse.

In Black Lick District, 12% of the eligibles favored the District; in Lancaster, 7%, in Clarion 12%, and in York only 7% of a total of 5000 favored the District.

Based upon these figures, and the testimony in the hearings, what then is the answer to your question, "Why are there only four Soil Conservation Districts in Pennsylvania." There are several reasons:

First, The hearings brought out the fact that many farmers have practiced soil conservation for many years. They have maintained the fertility of the soil and they do not want interference. They do not trust Act No. 557. Therefore they oppose the District plan.

Second, While Pennsylvania has four Districts, New Jersey has 4, Maryland has 5, West Virginia 5, Ohio none, New York 9 in progress of organization. Other states have Districts as follows: Vermont 2, other North Eastern States none, Indiana 8, Illinois 7, Michigan 7, and many of these states have more favorable laws than has Pennsylvania. Most of the 460 districts of the United States of which we hear are in the Southern States. Therefore, Pennsylvania is in as favorable a position as our neighbor states.

Third, Many conservative successful farmers are opposed to Soil Conservation Districts, and according to the testimony given, many of those favoring the plan want financial aid from the Government, or are interested in some phase of governmental activity.

Fourth, The testimony shows further that in common with other East Central States, farmers of Pennsylvania desire to conduct their farms in their own way and carry on farm practices as they choose.

Fifth, In practically every hearing, it was evident that many farmers of Pennsylvania believe that the agreement between District Supervisors and the U. S. Department of Agriculture will eventually mean government domination of their farms. Many Pennsylvania farms have been in the same family for generations and there is a close tie between the farmer and his farm.

Sixth, Frequent expressions in hearings show that Pennsylvania farmers, as a class, are opposed to governmental interference, and they look upon Act No. 557 as an attempt to do just that.

Finally, in every hearing, it developed that farmers realize that the Soil Conservation Districts plans require labor and heavy machinery for operation. Farmers do not know what will be required of them in the future

if they participate, but they know that the technical service, material, equipment and labor must be paid for. They fear future taxes to pay the hundreds and thousands of technicians, engineers and supervisors of one kind or another.

I INCLUDE HEREWITH STATEMENT OF M. S. McDOWELL GIVEN AT THE HEARING

Director of Agricultural Extension, The Pennsylvania State College

The Land Grant Act, passed by Congress in 1862, established the Agricultural Colleges and provided the foundation for the teaching of Agriculture. As these State Agricultural Colleges developed it was soon discovered that worth-while teaching required a continual study of the underlying facts and principles. This need was recognized in 1887 and the State Experiment Stations were established.

The research activities of the United States Department of Agriculture, these State Agricultural Experiment Stations and other institutions and organizations under way for many decades had developed and were continually developing a large amount of scientific information which had a very practical application to the improvement of farm practices.

Principles underlying the maintenance of soil fertility, the developing of improved crop varieties, crop rotation, the control of plant diseases and insects, the breeding and feeding of animals, farm woodlot and tree planting, and all other phases of farm management, including those principles which have to do with the marketing and distribution of the products of the farm, were studied. Much valuable information was and is available concerning human nutrition and other problems which vitally affect health and home.

The need for a third phase of activity, that of carrying accumulated information to the farmers, was recognized and the Extension Service was established as an integral part of the work of the Land Grant Colleges.

The Agricultural Extension Service is the channel through which the information accumulated by research agencies and good farming practices is distributed and made available to all farmers.

Extension work was established as a definite unit of the School of Agriculture in 1907. The present system of working through County Agents was set up and the first County Agents were appointed in 1912. There are now 66 counties with agents.

The Federal Smith-Lever law was enacted in 1914.

Section 2 of the Smith-Lever Act defines Extension work as follows:

> "It shall consist of the giving of instruction and practical demonstrations in agriculture and home economics to persons not attending or resident in said colleges in the several communities, and imparting to such persons information on said subjects through field demonstrations, publications and otherwise."

In a word, the Extension Service aims to assist the farmer and his family to do those things which they can themselves do to improve their own practices.

Under the Smith-Lever Act the responsibility for administration is placed upon the Agricultural Colleges of the States.

Systematic and continuous contact with a community, a knowledge of local conditions and needs, personal acquaintance in the community and ability to organize the forces of the community are requisite to the application of Extension teaching. The county has been adopted as the geographical unit. The requirements mentioned are secured through the County Agent, who is the College representative and is a permanent resident of the county with headquarters at the county seat, and who is selected because of his peculiar fitness for the position. A trained Home Economics worker meets these same requirements in the application of Extension teaching as it touches the management and conduct of the home.

It is self-evident that no individual could be found who could combine a well-rounded knowledge of all the various subjects which are brought into play in the operation of the farm. Backing up and supplementing the County Agent are such specialists as needs require, with headquarters at the College. They furnish the technical information as well as help to give inspiration to the farmers of the county. These specialists, being in close contact with the Experiment Station, keep up to date on the results of current research which may have a helpful bearing on farm and home operations.

One of the most vital factors in the Extension system is the part which the local people themselves take in the development and conduct of an Extension program. This is accomplished through a county organization, known as the County Agricultural Extension Association, which cooperates with the County Agent and the College.

Careful planning of the work to be done together with the establishment of definite aims and purposes are essential to obtaining satisfactory and progressive results. It is also necessary that the people of the community assume some responsibility in connection with planning and carrying out of community projects.

A few of the principles which effort has been made to keep in mind in the development of the work may be mentioned.

1. Extension work represents a definite and well organized program based on local conditions and situations which meets the needs of the various communities.

2. Continuous effort is made to reach as many people as possible through the use of the group method, although, of course, much individual aid is given.

3. It is essential that its activities be free from commercial, political, sectarian, and other controversial entanglements.

4. The Extension Service has been maintained as an educational agency. It is an institutional policy of The Pennsylvania State College to avoid administrative or regulatory work. These latter are functions of the State and Federal Governments and the distinction has come to be pretty well understood by the farming people of Pennsylvania.

Any activity which includes making contracts or agreements with farmers, furnishing labor or supplies to them, paying money to farmers for any purpose, checking as to whether farmers have complied with required conditions, and administering and carrying out laws is not in the Extension field.

If the Extension Service has information of value

within its field it is glad to make it available for the use of any organization or any group of rural people, or to individuals. These principles represent an institutional policy and have been applied to situations in past years.

In 1929 when the Farm Marketing Act was put into operation by the so-called Farm Board the Extension Services through the country were requested to take a responsibility in carrying out that law. The Pennsylvania State College refused to take such responsibility. The present policy, therefore, is neither a new nor a recent one.

In the development of an Extension program the County Agents meet with community groups. The problems of the community are discussed from the community standpoint, and the more important problems are selected for the year's activities.

Effort is made to have the local people take responsibility for determining local needs, and for building an educational program around those needs. The Extension Service assists in furnishing information which will be helpful in determining a program and in carrying forward that program when it is developed. Interested farmers in the various communities are chosen as local leaders of each phase in the program.

The sum of these community programs constitute the county programs. This procedure is followed both in Agriculture and in Home Economics. Last year there were 9,009 men and women who acted as leaders.

In addition to the planned programs, information is given to individuals and groups on all phases of farm and home problems that are within the Extension field.

For many years the Extension Service has had an educational program the heart of which is better farm management.

Good farm management which includes the proper handling of the land both as regards tilled crops, pastures, and forest plantings, is after all the answer to the problem of reducing soil losses.

The erosion problem in Pennsylvania is not as serious a problem as it is in some other states.

The practice of simple strip cropping of tillable land using proper rotations will serve to care for erosion losses in 90 per cent of the cases in the state. In limited sections some terracing may be necessary. These are operations which the farmer himself can carry out with such technical assistance as the Extension Service is giving. Attendance at a demonstration meeting is all that many farmers require in order to do a satisfactory job on their own farms.

The Extension Service does not, of course, furnish labor or material but endeavors to have farmers adopt these practices where needed because it is good farm management to do so.

Since 1935 the Extension Service has had a definitely organized systematic program on the reduction of soil erosion losses.

This work was definitely under way with trained Specialists in charge prior to the passage of the State District Soil Law, (557).

At the present time there are 817 demonstrations, covering 66 counties of the state, on strip cropping and contour orchard planting. In addition to these demonstrations, 1489 farmers have started strip cropping practices on their own as a result of this work, making a total of 2366 farms on which steps have been taken to reduce erosion losses.

So far as the 2366 farms in 66 counties, for which Extension has been responsible, directly or indirectly, are concerned there has been no public expenditure other than a small proportion of the funds contained in the annual budget assigned to the Extension Service.

The expense to the farmer has been small, consisting of some labor in changing fence rows and in rearranging fields.

These figures do not include the large number of additional farms upon which the value of cover crops, pastures, and forest plantings have been demonstrated.

These practices are simple means of reducing erosion losses.

In 1940 there were 709 pasture improvement and cover crop demonstrations.

County Agents' figures indicate that 10,434 farmers adopted one or more of these practices last year.

During the past 20 years the Extension Service has conducted 478 demonstrations in 65 counties on the value of tree plantings on hillsides and unused lands. During that period there have been held over 1200 field meetings at these demonstrations, attended by 30,000 people. At least 50,000 acres have been planted with 50 million trees, due to the influence of these demonstrations.

Last year (1940) there were 107,251 different families influenced by some phase of the Extension program.

There were 62,264 office calls at County offices; 69,565 telephone calls; there were 41,538 different farms and homes visited.

The total number of Extension meetings was 28,129 with a total attendance of 798,389.

Soil conservation districts are legally constituted bodies for carrying out the provisions of law. They are administrative and regulatory in character. The promotion and administration of soil districts is not an educational function.

We would like to call attention to some of the differences in approach to this matter between the Extension program and the District plan.

The Extension Service has added assistance in the way of personnel as the demands of the work required. A larger and larger number of our regular employees are qualifying in ability to give assistance without the necessity of building up a large additional force. Further, many farmers are qualifying in this same way and help their neighbors in many cases where some additional assistance in a community is needed. This accomplishes the main result, educates larger and larger numbers of farmers and at a minimum of expense.

Our approach, therefore, is to provide a force to meet growing demands, whereas the other approach is to put a large force to work in an effort to create demands.

From available information liberal estimates shows one soil district technician services not more than an average of 35 farms per year.

There are 169,000 farms in Pennsylvania. It would take one man, therefore, 4828 years, or 1000 men employed continuously about five years, to complete the job at the same rate of progress.

According to an official statement of the Federal Soil Conservation Service, the average annual technical service cost per soil district is $37,500. One Pennsylvania district has made 90 farm agreements per year. These 90 farms represent the combined work of a number of men. This makes the technical service cost $416 per farm. There are 169,000 farms in Pennsylvania. At the same rate, the total cost for the State would be $70,304,000.

But this represents only a portion of the expenses. There are in addition various specialists; like, foresters, engineers, etc. Farmers must be contacted and consent to have their farms laid out before the actual work can start. There are District expenses like the expenses of the supervisors and local officer, the large over-head expenses of divisional and state offices, and supervision within the state. Then there is the pro rata expense of the regional offices and the Federal office. In addition, there is the expense involved in furnishing material like lime, etc.; not to mention the work of the CCC Camps.

Further, the above 35 farms per year per man represent the farmers who are most easily persuaded to go along with the movement. Each successive 10 per cent require more work and more time to convince. The cost, therefore, is tremendous.

The principles underlying our approach is that this large expediture of funds is not necessary in Pennsylvania but that this problem must be solved through educational processes. Such procedure is likely to prove sounder and more permanent.

Conclusion of M. S. McDowell's Statement.

The soil districts law section 4-B says "Upon the request of the board for the purpose of carrying out any of its functions, the supervising officer of any agency of the Commonwealth or of any State institution of learning shall, in so far as may be possible under available appropriations and having due regard to the agency to which the request is directed, assign or detail to the board, members of the staff or personnel of such agency or institution of learning and make such special reports, surveys or studies as the board may request."

There are no responsibilities placed upon The Pennsylvania State College. All it may be asked to do is to assign members of its staff to make such special reports, surveys or studies as may be within its field. These if made are made for the State Conservation Board and not on its own responsibility. Further, so far as surveys and studies are concerned these are functions of research of which the Director of Research is directly in charge and not of Extension.

The Extension Service has no duties or responsibilities whatever assigned to it by the State Conservation Law either for the promotion or administration of soil districts.

There is no evidence that the county agents received instructions to work against the formation of soil conservation districts. Some farmers stated that in their opinion the county agents were following instructions but it was only an opinion.

As a matter of fact, county agents are in accord with College policies.

The Director of Extension is responsible to the Dean of the School of Agriculture, Dr. S. W. Fletcher, and the latter has approved of the work and policy of the Extension Service as has also the College administration. All available evidence confirms this fact. The attitude of other States may be illustrated by the following passages from a paper by Dr. Noble Clark, Associate Director of the Wisconsin Agricultural Experiment Station, June 23, 1939.

I firmly believe all other aids to agriculture, except these two types just cited, can be much better handled by state and local agencies. Erosion control, for example, is not a separate and distinct farm practice; it is inextricably bound up with the matters of crop rotation, crop selection, field culture, pasture management, and nearly every farm operation. Those in charge of public programs to reduce erosion therefore cannot prescribe erosion control methods without cutting across, and becoming all tangled up with, the rest of the practices that agricultural scientists are recommending to farmers.

The present SCS program puts the administration of erosion control work in the hands of federal officials, and leaves the states responsible for making recommendations regarding the other farm management practices. Even though the SCS counsels with the state officials, is it any wonder there is a constant problem of securing better coordination? This division of authority is unnecessary and unjustifiable. It is likewise wasteful and inefficient.

The federal government is giving $25,000,000 to the Soil Conservation Service, and enough more to the CCC camps engaged in erosion work, to total in the neighborhood of $100,000,000 each year for erosion control. Less than 4% of the farms of the United States have so far been assisted by the program. On the other hand, the federal treasury supplies only one-fifth this amount, or $20,000,000, with which to do all the rest of the agricultural extension work with farmers. This extension work now reaches, not 4% of the nation's farmers, but the majority of them, and it does not limit its service to a single factor like erosion, but includes the whole gamut of agricultural production and marketing, home economics work, and the 4-H program for rural boys and girls.

There is no more reason for erosion control work on farms to be administered by federal agencies than the control of noxious weeds. The sooner this is recognized, and the federal service reorganized so as to make erosion control the same kind of joint federal-state enterprise as agricultural extension, the quicker will the erosion control program secure freedom from its restriction to a small fraction of the farms that need it, and the taxpayers begin to get more adequate returns on their investment.

We need to remember that improper land uses, such as result in erosion, are not due so much to the forces of nature, or to what the Lord does to land, as to what man does. The little erosion that was occurring in this part of America when white men first came here was of negligible economic importance. It had significance to geologists, but not to farmers or to the general public. Destructive erosion, as we know it today, is largely recent and man-made, but too much of the present erosion program is based on the assumption we are trying to control the physical forces of nature—when in reality it is man. Our biggest job is not hydraulic engineering, but human engineering.

This report therefore finds that:

1. There is no evidence to show that the present State Soil Conservation Board has not fulfilled its responsibilities and obligations under the law and that criticism of the Chairman of that Board is unfair and unjust.

2. That the majority report can well be termed one dealing with personalities and not with officials. Mr. Light is chairman of the State Soil Conservation Board and his every official act was in accordance with the action of that Board. He was responsible to the Board and there is no evidence that any of his official acts at any time were questioned or criticized by the Board, and yet the report singles out Mr. Light alone for condemnation insofar as the activities of the Board are concerned.

3. That the Extension Service has no responsibility under the State Soil Conservation Law.

4. That there is no evidence justifying criticism of the extension service, but on the contrary the evidence of the farmers indicated that the administration and functioning of the Extension Service in the counties is very satisfactory.

5. That we recognize the right of any educational institution to develop its policies without political domination or interference and recommend that no strings be attached to any college appropriation.

FRANK E. SNYDER,
Member of Committee.

10TH BIENNIAL BUDGET OF THE COMMONWEALTH OF PENNSYLVANIA

For the Fiscal Biennium June 1, 1941, to May 31, 1943

Submitted to the General Assembly by the Committee on Appropriations, May, 1941

TABLE OF CONTENTS

CHAIRMAN'S BUDGET MESSAGE

SUMMARY OF THE BUDGET

SECTION ONE: GENERAL FUND, APPROPRIATIONS

Appropriations for 1939-1941; Appropriations 1941-43 recommended by the Governor; Appropriations for 1941-43 recommended by the Committee on Appropriations

SECTION TWO: GENERAL FUND REVENUES AND RECEIPTS

SECTION ONE

APPROPRIATIONS

GOVERNOR'S OFFICE

General Fund Appropriations

Governmental Operations Other Than Subsidies	1939-1941	Recommended by Governor for the Two Years 1941-1943	Recommended by Appropriation Committee for the Two Years 1941-1943
Salary of Governor	$36,000.00	$36,000.00	$36,000.00
Salaries and Expenses	298,000.00	325,500.00	325,500.00
Portrait of Governor	750.00	.....	.....
TOTAL—Governor's Office	$334,750.00	$361,500.00	$361,500.00

LIEUTENANT-GOVERNOR'S OFFICE

General Fund Appropriations

Salary of Lieutenant-Governor	$16,000.00	$16,000.00	$16,000.00
Contingent Expenses	10,000.00	10,000.00	10,000.00
Lieutenant-Governor's Portrait	750.00	.....	.....
TOTAL—Lieutenant-Governor's Office	$26,750.00	$26,000.00	$26,000.00

DEPARTMENT OF THE AUDITOR GENERAL

General Fund Appropriations

Salary of the Auditor General	$24,000.00	$24,000.00	$24,000.00
Salaries and Expenses	1,450,000.00	1,450,000.00	1,629,759.00
Compensation of Fiscal Agents	1,000.00	1,000.00	1,000.00
Portrait of Auditor General	.....	750.00	750.00
Fees of County Officers	4,000.00	4,000.00	4,000.00
TOTAL—Department of Auditor General	$1,479,000.00	$1,479,750.00	$1,659,509.00

TREASURY DEPARTMENT

REPORT OF COMMITTEE OF THE HOUSE OF REPRESENTATIVES

APPOINTED BY VIRTUE OF RESOLUTION 25

ADOPTED FEBRUARY 19, 1941

TO INVESTIGATE THE GAS EXPLOSIONS OCCURRING IN THE TWENTY-SIXTH WARD OF THE CITY OF PHILADELPHIA ON FEBRUARY 11, 1941

Your Committee, consisting of Paul D'Ortona, Daniel DiGenova, Charles Melchiorre, Joseph Skale, Harry P. Voldow, Samuel M. Rosenfeld, Francis J. Falkenstein and John P. Corrigan, respectfully reports:

That upon organization Hon. Paul D'Ortona was selected as Chairman and Hon. Charles Melchiorre was elected Secretary of the Committee. Immediately thereafter the Committee selected James F. Masterson, Esq., of the Philadelphia Bar as its counsel.

The Committee and its counsel immediately proceeded to the scene of the explosions on Greenwich Street between 11th Street and Passyunk Avenue, and made an extensive investigation of the premises lasting several hours.

The Committe then called upon Coroner Charles H. Hersch of Philadelphia County to secure his co-operation and to make sure that the records of the City and the Philadelphia Gas Works Co. which had been impounded by the Coroner would be available to the Committee.

The Committe then retained William H. Gravell, an engineer and Dr. Louis Gershenfeld, a well known Professor of chemistry, to advise the Committee on the technical ends of the investigation.

A meeting of the Committee and its counsel and engineer was called for the purpose of outlining a method of procedure.

Subpoenae were issued and served on various witnesses who lived in the neighborhood, to appear at public hearings of the Committee to be held on February 27th and 28th, 1941 in Room 483 City Hall, which room had been obtained by the Committee through the courtesy of Common Pleas Court No. 7 of Philadelphia County. In order to avoid taking the witnesses away from their employment these meetings were scheduled and held during the evenings of February 27th and 28th.

The Committee also scheduled public meetings for March 5th, March 27th, April 4th, April 18th and April 25th, 1941 and heard all told approximately 100 witnesses, and their testimony covered about 650 pages. Witnesses from the different Departments and Bureaus of the City of Philadelphia and the Philadelphia Gas Works Company were called and testified, and from their investigations gave their reasons for the cause of the explosion and the consequent fires, deaths, injuries and damages.

The testimony heard by the Committee showed that on February 11, 1941, at about 5 A. M. Carmino Trerotola who lived at 1112 Greenwich Street was awakened by his wife, who complained that she smelled the odor of gas, Mr. Trerotola then went to the kitchen of his home where was located a gas range, and he noticed the odor of gas very heavy and the pilot light on the range was out. He examined the pilot and found no gas was coming from the pipe. He then opened the doors and windows and went down the cellar, obtained a wrench and turned the gas off at the valve on the gas pipe leading into the meter. He noted the odor of gas very strong in the cellar. He turned to go up stairs to take his family out of the house, and just as he reached the stairs, there was a flash of fire immediately succeeded by an explosion. Mr. Trerotola was burned all over his body, but managed to get up stairs, and found that the walls of his home had been blown out. He somehow got out of the house as did his son, Rocco, who is 18 years of age. His wife and his two daughters were trapped in their bed room and burned to death. The body of the youngest daughter was found in the cellar and the bodies of his wife and the older daughter burned beyond recognition were later found in the ruins on the second floor.

John Diano and his brother lived in 1114 Greenwich Street. John Diano was awakened by his alarm at 4:50 A. M. that morning; he smelled gas and told his brother to get up. As he was going from the second floor to the first floor the explosion occurred and he was knocked down and dazed. He managed to get his brother out, and as he was getting out another blast occurred, which threw him out into the hallway. He then assisted in getting other persons out of their homes, and within twenty minutes of the first explosion another explosion occurred which leveled properties 1105-7 Greenwich Street, which is on the North side of the street immediately across from 1112-14 Greenwich Street. John Diano was buried under the debris but scrambled out. He testified that they had been smelling gas on the street for two years before the explosion, but that he never had any water in his cellar, nor was there ever any trouble with the sewage.

Sabastino Caccamo and his family of five children lived at 1105 Greenwich Street. Mr. Caccamo woke early on the morning of February 11th, smelled gas, wakened his wife and got his children up. Mrs. Caccamo went to the window and called across the street to 1112 Greenwich Street, shouting that she smelled gas. As she was endeavoring to close the window she heard the explosion which occurred at 1112-14 Greenwich Street, and she and her husband got their family out of the house before the second explosion occurred. Just as Mr. Caccamo was at the front door the second explosion followed and he was blown to the center of the street. This witness had had considerable trouble with water in his cellar a year before the explosion, and he testified that there had been a cave-in in the street below his home and the water backed up into his cellar weakening his foundation walls.

This witness had a petition prepared which was signed by the neighbors, and a copy of which was sent to Mayor Lamberton of the City of Philadelphia complaining of the conditions in the cartway of Greenwich Street where the cavity had been filled with cinders and not repaved for several months.

This witness also testified that he had smelled gas in Greenwich Street a year before the explosion and stated that after the first cave-in had been repaired a second cave-in occurred opposite his home, and that it had remained there for months before it was repaired.

Mr. Caccamo's married daughter, Lena Gazzara, testified that in February, 1940 the street caved in and they had considerable water in the cellar, and that after the water leak had been repaired the sewage backed up in

their drains, and that a petition objecting to the condition of the road way and water had been prepared, at the instance of her father, by one Rocco Prete, and that her mother obtained the signatures of various residents on the street, and the petition was to be sent to the Mayor.

The Leonardi family lived at 1107 Greenwich Street at the time of the explosion. Harry Leonardi, the only one available to testify, since the other members of the family were confined in a hospital, testified that the first explosion knocked him out of bed; he was dizzy; he saw the flames across the street, tried to wake other members of his family and help them down stairs. He stated that he got as far as the kitchen of his home, and that that was the last he remembered.

Dominic Solvibile, 1517 E. Passyunk Avenue, which is directly opposite to Greenwich Street, heard the first explosion, looked out his window, saw someone running, and saw the flames. He dressed and ran to the street; he saw that 1112-14 Greenwich Street had collapsed. He then assisted in getting persons out of 1108 Greenwich Street, and as he was standing on the sidewalk of 1108 he heard Joseph Leonardi open the door and call for help. He entered premises 1107 Greenwich Street and found Harry Leonardi, brother of Joseph Leonardi, trying to get out and Joseph struggling with his father. Mrs. Leonardi was up against the kitchen door. The witness grabbed Harry, pushed him out of the house, and helped Joseph with the father. He got Mrs. Leonardi and was helping her out when patrolman Clarke entered the building. Clarke and the witness were carrying Mrs. Leonardi out and had gotten her to the sidewalk, and Clarke started back into the building to go upstairs. Other persons were helping the witness with Mrs. Leonardi, when the explosion occurred, and the next thing the witness remembered was picking himself up in the middle of the street from under debris. He had been fully clothed when he entered the building, and when he picked himself up in the street he was practically nude. He had been blown completely across the street from the entrance of 1107 Greenwich Street.

This was the explosion which killed patrolman Clarke and the Insurance patrolman Ruhl. Patrolman Clarke's body was later found in the cellar of 1105 Greenwich Street, and Ruhl's body was under the debris caused by the collapse of the front wall of 1107 Greenwich Street.

Fireman Percival Samuel Parker testified that he went into 1107 Greenwich Street and met Battalion Chief Cost and officer Clarke carrying a woman out from the entry. The witness took the place of the Battalion Chief in carrying the woman out and Ladderman Coyle took the place of Clarke. The two firemen were carrying the woman out of the house when the explosion occurred. The witness Parker was blown across the street and covered with debris. Coyle likewise was blown to the center of the street and covered with bricks and debris caused by the explosion. Other firemen dug Parker out, and in pulling him out his boots were left in the debris.

This witness testified that there were flames coming out of both the water and gas vents on both sides of the street, and that the smell of illuminating gas was very heavy.

Charles A. Coyle testified that when he arrived on the scene he went into premises 1116 Greenwich Street, and the family in the house were in their night clothes. This witness escorted them out of the house. He testified that he saw Mr. Trerotola who had gotten out of his house, sitting in a chair in 1116 Greenwich Street and his son Rocco was kneeling with his arms wrapped around his father who was yelling to get his wife and daughters out. This witness was then called into 1107 Greenwich Street and as he entered people were coming out carrying a woman. He saw Frank M. Ruhl, fireman attached to the insurance patrol, coming out. He and Parker took the woman and carried her out and put her down near the steps and someone gave them a coat to cover her as she was partly nude, and as they were doing that the house blew up. This witness was blown into the street. As he was lying partly in the street and partly on the sidewalk his face was near a gas vent from which flames were issuing. He was severely burned. After he was dug out from under the debris he was taken to the hospital. He stated that insurance patrolman Ruhl was caught under the falling wall and killed. This witness described the flames which shot across the street from 1112 Greenwich Street as though under pressure, just as it might come from a blow torch. He stated the flames were coming clear to the other side of the street.

Louis DiScali lived at 1119 Cross Street, which backs on Greenwich Street. This witness testified that about one week or ten days before the explosion they complained to the Philadelphia Gas Works Company of gas leaks and the odor of gas; that the gas company came down and changed their meter.

Mrs. Lucia DiScali wife of Louis DiScali testified that she heard the explosion and saw the flames of the property backing up to her yard. She corroborated her husband that a week before the explosion they complained of gas leaks, and that shortly before the explosion the gas company, without request from them replaced the meter, and that subsequent to the replacing of the meter they again complained of the smell of gas and that the gas company came and fixed the meter.

Salvator Sinaldi, who lived at 1102 Greenwich Street, testified that he was thrown out of bed by the first explosion, and was getting his family out of the house when he heard the second explosion. This witness saw patrolman Clarke go into 1107 Greenwich Street, and stated that shortly thereafter the explosion occurred leveling 1107 to the ground. He described the scene as like a panic, people running back and forth in all conditions of undress.

This witness testified that about a year before the explosion there was a smell of gas in the neighborhood and that he called the gas company and complained of it; that the gas company employes came down and put a temporary main from the witness' home to 1112 Greenwich Street, and that they dug a trench in the street from 1112 to 1107 Greenwich Street, and ran that line to the North side of the street, and that that is how they got their gas. He stated that later a permanent main was laid and the temporary main through the cellars of the houses was removed.

This witness further stated that he smelled gas before he explosion, but thought it was gasoline.

Mrs. Jennie Rinaldi, wife of the previous witness, corroborated her husband with respect to the various explosions, and testified that on previous occasions she had smelled gas in the house, and complained to the gas com-

pany. She stated that there had been a water cave-in in the street, and that the water came through the walls, and that the City came and repaired he water leak and pumped the water out of the cellars. She further stated that everyone complained of the odor of gas and that the gas company came down and cut off the gas and put in temporary mains as described by her husband. She testified that after the cave-in which occurred in February, 1941, there was a later cave-in opposite to 1105 Greenwich Street, and that this cave-in was filled with water, and that this occurred sometime in September or October of 1940. That a lantern was put on the cave-in and that it was filled with cinders.

Rocco Anthony Marinucci, who lived at 1120 Dickinson Street, described the various explosions, and testified that they had trouble with the gas about five months before the explosions, and that his family had become sick from the smell of the gas, and that they reported it to the gas company on three occasions. On the first two occasions the gas company ignored the reports, and on the third they sent workmen there who examined the pipes and stated that they had water in the line and that they would have to get their own plumber to fix it. The witness employed a plumber who looked over the lines and informed that it was all right, but the witness stated that they still smelled gas after that.

Gaetano Porpore, brother-in-law of the previous witness, who lived at 1120 Dickinson Street, testified that they had trouble with gas leaks from the winter of 1940, through the summer of 1940, and during the winter of 1940-41, and that his wife, her sister, and mother-in-law were over-come; that he complained to the gas company four or five times; that they sent some workmen who tested some of the things and who told them they were crazy, that they were smelling gasoline and not gas. He stated that he last complained about eight months to a year before the explosions. He also stated that the last time repairs were made on Greenwich Street was a few months before the explosions, but he did not know whether they were made by the gas company or the water department.

This witness further testified that he smelled gas around Greenwich Street and around his home a few days before the explosions. That the smell of gas was all around the section.

The Pellicano family lived at 1116 Greenwich Street. The mother, Philamena Pillicano, described the explosions and how she got her six children out of the house. She testified that they smelled gas on the previous summer in Greenwich Street as they sat on the front steps. She stated that a couple of times she reported it to the U. G. I. and that they sent a man around who told them there was nothing the matter.

She testified that her daughter Vincentina complained on several occasions, when she was paying the bill, of the odor of gas on Greenwich Street.

James Diaddorio, 1110 Dickinson Street, described the several explosions, how he got his family out, and testified that he smelled gas on Greenwich Street during July, August and September, 1940.

Caroline Coia, who lived at 1212 Dickinson Street, testified that she smelled gas in the neighborhood for several years previous to the explosions.

Anthony Damasco, 1029 Greenwich Street, described the explosions, and testified that he smelled the odor of gas in Greenwich Street the year around, and that he smelled it two or three days before the explosions.

Madeline Latour, 1120 Greenwich Street, testified that she smelled gas for two years previous to the explosions. She also testified that six months before the explosions the pressure of the gas was so low that they could not cook on the gas range; that they complained to the gas company who came down and cleaned out the pipes but that in the evenings, immediately before the explosions, they could smell gas in the bed rooms of their home. They thought, she said, that it was coal gas and changed their fuel, but that the smell persisted. She also testified to the cave-in which occurred in October, 1940 and saw water running in the hole.

Joseph Ciliberti, 1122 Greenwich Street, testified that last summer when they sat on the steps of their home they could smell gas on Greenwich Street; that the last time that he had smelled gas on the street was about two or three weeks before the explosion.

Emielo Yannelli, 1112 Dickinson Street, testified that he smelled gas in Greenwich street every week during the summer of 1940; the last time about September, 1940.

Diovanni Di Benedetto, 1124 Greenwich Street, testified that he smelled gas in Greenwich Street during the summer of 1940.

Primo Pontuto, 1118 Greenwich Street, testified that he smelled gas on Greenwich Street almost all of the time; that he never had any gas smell in the house, but always on the street.

Joseph Capriocci, 1103 Greenwich Street, testified that he smelled gas on Greenwich Street last summer.

Guiseppi Tortortelli (notes 123) testified that he had Rocco Prete (a former witness) prepare a petition, after having been asked to sign a complaint, and that he got the petition addressed to Mayor Robert E. Lamberton, requesting that the conditions in Greenwich Street be rectified, and that after signing it he gave it to Mrs. Caccamo to have signed by the people on Greenwich Street.

Louis Menna, who lives at 1120 Dickinson Street, testified that he smelled the odor of gas in Greenwich Street, but was not sure that it was gas, but complained to the gas company about the odor of gas after the explosions, and stated that it was the same odor he had smelled in Greenwich Street before the explosions.

Angelo Maiuri, 1108 Greenwich Street, testified that he woke up about 4 A. M., put the gas on to cook breakfast; the gas started to sputter and flames shot up and down; he called his father and told him that the gas seemed to be working funny, and stated he was in the kitchen, heard the explosion and ran out. He testified that the water came out slowly when they turned it on; and that they had difficulty with the pilot light on the gas range previous to the explosions.

A number of other citizens witnesses were called but their testimony was simply a corroboration of the facts testified to by the other witnesses as above set forth.

Also a great number of firemen and policemen testified, and corroborated the conditions testified to by the neighborhood witnesses, particularly in that there was a very strong odor of gas in the neighborhood and that the flames from the burning buildings and from the gas and water vents in the street were gas flames.

The City of Philadelphia produced a great number of

witnesses from its various bureaus and departments with respect to Greenwich Street and the water pipes lying thereunder.

Fred Matheas, of the Bureau of Water, testified that there had been complaints of water leaks on February 22, 1940 at 1105 Greenwich Street, and on February 25, 1940 at 1102 Greenwich Street. He stated that these leaks were caused by a broken six inch water main opposite 1105 Greenwich Street; and that repairs to the main were made February 24, 1940 by placing a skinner band around the break. He stated, however, that the street had been undermined and washed away and on the 25th the main broke again, and that this break was repaired on February 27th. The cave-in caused by the break washing the dirt away was repaired by filling in the cave-in, but apparently the main again broke and the ferule broke leading into 1107 Greenwich Street. These repairs were all made at about the same time, and there was no further complaint until April 5, 1940, when because of a broken sewer lateral water backed up into the cellar of 1105 Greenwich Street. This sewer lateral was repaired. Then on July 18, 1940 the water main again broke at a point 103 feet West of the West houseline of Passyunk Avenue; the complaints having come from 1103, 1105, 1107 Greenwich Street. This break was about 38 feet East of the previous break, and was repaired on July 22, 1940.

The next complaint was on July 20, 1940 from 1102 Greenwich Street. This, however, was caused by a leak in the service pipe which was repaired by the owner on August 1, 1940.

This witness further testified that the six inch water main was laid in Greenwich Street in August, 1898.

He also testified that he arrived on the scene about 10 o'clock and found a hole in Greenwich Street about 40 feet long, and the width from curb to curb. That on the West end the cavity was about 4 feet deep and on the East end it was about 8 feet deep; that there was a gradual slope from the West to the East. He stated that the ground was solid clay soil and that when the pipes were uncovered the gas pipe was broken in about four places, and the water pipe in five places, and that part of the gas pipe pierced the sewer, and that the water pipe had fallen on the gas pipe. He testified that there was no free water or puddles of water in the excavation, nor anything about the excavation that would indicate to him that there had been a cavity or cave-in previous to the explosion. That the water pipes were in good condition when uncovered and showed no signs of leaks, and that the broken parts were not corroded or rusted, but that they showed evidence of fresh breaks. He further testified that about a week after the explosions repairs were made to the water main in Garrett Street in the 1100 block, where the street had been undermined by a water leak. Garrett Street is a small street just north of Greenwich Street.

Max Barofsky, an engineer from the Bureau of Bridges and Sewers, testified that on February 24, 1940 the sewer in Greenwich Street was examined due to the water break, and two breaks were found in the sewer just East of the manhole in the center of the street which was just west of 1105 Greenwich Street, where the water break had occurred. The sewer was repaired from the inside and some laterals leading into 1105 and 1108 were repaired, but that was the only break in the sewer of 1940 or previous to the explosion on February 11, 1941. This witness had charge of the examination of the sewer after the explosion and stated that the examination disclosed the dirt in the sewer to be 3 inches deep at the manhole at Passyunk Avenue, and continued for a distance of about 90 feet where the depth increased to 14 inches, making it impossible for the workmen to go any further. This sewer is an egg-shaped sewer being 2 feet 6 inches high by 1 foot 8 inches wide. A man examining it from the manhole at Dickinson Street was able to crawl about 35 to 40 feet when he was stopped by dirt in the main, which was about 9 inches deep.

He also testified that on the 15th of February, 1941 a break in the sewer was located about 12 feet west of the manhole in the center of Greenwich Street. The place where the sewer was broken was in the deepest part of the excavation.

With reference to the condition of the sewer after the explosion, this witness was corroborated by two of the workmen who entered the sewer and made repairs. These witnesses also stated that the debris in the sewer consisted of clay, gravel, black dirt, and few pieces of charred wood.

Gerardo Cedrona, foreman for the Philadelphia Highway Department, in charge of street repairs, testified that he was instructed by the District Engineer to uncover the pipes after the explosions, and that he spread his men over the area with instructions to call him when they located any pipes. They first uncovered a break in the gas main in front of 1114, "right at the connection of the gas main and the service pipe." He stated that this service pipe led into 1112 Greenwich Street, and that a two and a quarter inch nipple was snapped off, one half of the pipe was broken and one-half was corroded. He testified that he and his men found three breaks in the gas main itself, before he was put in charge of another phase of the work. He testified that the City Water Bureau only have a few men who are experienced. He stated that there was some water at the bottom of the excavation.

Ralph Miller, Supervisor of Maintenance, Second Highway District, for the City of Philadelphia, testified that an asphalt patch was placed in Greenwich Street in front of premises 1114 and 1116; that on February 24, 1940, a cave-in in front of premises 1103, 1105 and 1107 Greenwich Street was made safe by placing cinders in the hole to bring it up to the level of the street; that on February 26, 1940, barricades were placed at 1105 Greenwich Street and on February 28, 1940, 1102, 1105, and 1107 Greenwich Street the steps were reset and the cave-in was again made safe. He testified that again there was a settlement and on March 13th to March 27th inclusive barricades were erected on Greenwich Street from Passyunk Avenue to Dickson Street, and lights were put on the barricades, as the street was unsafe; that on March 28th cinders were spread on the cave-in and the barricades were removed. He testified that the cinders were allowed to stay in that position and the street was declared safe for traffic. He further testified that again on April 10th another cave-in was made safe, and on May 17th a gang of workmen were sent into Greenwich Street to reset the curb in front of 1103, 1105 and 1107 and repairs were made to the sidewalks. One month later, he testified, on June 17th permanent asphalt repairs were made. On

August 1, 1940, a ditch in front of premises 1104 Greenwich Street was made safe, and on August 21, 1940, this ditch was permanently paved. On January 3, 1941, there was a complaint of a depression in Greenwich Street along the curbing in front of 1102 and 1104, but no repairs had been made. When asked what in his opinion caused the cave-in in front of premises 1102, 1105 and 1107 Greenwich Street on February 28, 1940, he stated that it was caused by a water break at that time.

Dr. Edward J. Burke, City of Philadelphia chemist, testified that he was present when the pipes were removed from Greenwich Street, and that in his capacity as City Chemist he examined the various pipes. The Committee to better understand his testimony and to permit the witness to demonstrate on the actual pipes heard the doctor's testimony in the basement of the Philadelphia City Hall where the pipes were stored.

Dr. Burke testified that the water and gas pipes were removed under his direction, turned over to him, and were under his control ever since, and have been located in a room in the basement of City Hall which has been locked and he has the key. The gas service pipe which extended from 1112 Greenwich Street has been kept by him in the Chemical and Optical Laboratory—in a closet which is under his control.

The Committee then went to the room in the basement of City Hall were the pipes were located, and Dr. Burke pointed out the various gas and water pipes, indicating the breaks that occurred at the time of the explosion, and those that were made manually to remove the pipes, and certain breaks that were made by corrosion and erosion in the gas main and the gas service connection to 1112 Greenwich Street. The witness indicated the piece of gas main which was in front of 1112 Greenwich Street and pointed out a hole in this main which he described as a tap hole where the service pipe connected with the main. He indicated another piece of gas pipe (specimen No. 6) which was found protruding from the sewer, and also pointed out another piece of pipe which was the gas service pipe feeding premises 1107 or 1109 Greenwich Street, directly across from 1112. He testified with regard to the service pipe to premises 1112 Greenwich Street as follows:

"This is a small piece of gas service pipe which extended from 1112 Greenwich Street underneath the street. The end was eighteen inches above the gas pipe specimen number three. This hole in gas pipe specimen number three was eighteen inches below this point of the gas service pipe. Eighteen inches below the roadway surface there is a bend in this pipe in order that this nipple could come in contact with and be screwed into the small hole. Above the nipple there is a 'T' and the middle part of the 'T' comes to an 'L'. This particular pipe has been one where corrosion and erosion has taken place over a considerable time. There is a wearing away of sections of pipe facing number 1110. That is worn to a point or to such an extent that the thickness of this pipe is practically paper size.

BY MR. MASTERSON:

Q. Was it that size normally?

A. Normally, it would be different, about one-quarter of an inch. A small portion of the threading is visible. At this point where the greatest amount of erosion has taken place the threading is invisible, it has been completely worn away, that is at a distance one-quarter of the total circumference of the pipe a small piece of that threading may be found in the hole of gas pipe specimen number three."

He testified that the corrosion had eaten through the service pipe about three-fourths of the circumference, and that there was a space of about eight millimeters between the edge of the service pipe and the main, and stated that the condition the pipe was in would cause a leak over a long period of months.

Dr. Burke illustrated by photographs the positions of the gas main and service pipes as they were in the ground after the explosion and before they were removed.

Dr. Burke then described the various combinations of gases used in the manufacture of illuminating gas, and testified that the volumne of gas which caused the explosion must have been considerable judging by the violence and the force required to destroy the properties and cause the terriffic damages in the street.

The witness' opinion as to the manner in which the explosion was caused was that the separation in the service pipe from the gas main in front of premises 1112 Greenwich Street permitted the gas to leak out, and as the hole became larger greater amounts of gas accumulated until a sufficient amount worked its way to the cellar of 1112 where the first explosion occurred, and that that explosion probably ripped the service pipe apart from the main in front of 1112 and caused other breaks in the gas main from which gas leaked, and that gas seeking the line of least resistance filtered into the cellar of 1107 where the second explosion occurred, and that the gas then continued to leak out of the main and accumulated under the street until it mixed sufficiently with air to form an explosive gas, which was exploded by the sparks or flames from the surface fire.

This witness testified that the gas main and service pipe in the street opposite 1112 Greenwich Street became in a defective condition when the corrosion had taken place to the point where there was a hole formed in the pipe, and that both the service connection and the tap hole in the main were corroded and eroded in approximately the same manner. He also described the condition of the water pipes as having been in good condition, with the original tar paint visible on them; that the joints were in good condition; the outside coating was in good condition; that there was some sediment in the interior; that you could see in some of the pipes the inside coating; that there was a slight corrosion in some of the pipes, but it was not nearly as bad as the corroded condition of the gas main.

It was observed by the Committee that the water pipes taken out were only those which were exposed by the excavation after the explosion; the water pipes opposite premises 1102, 1104, 1106, 1108, and 1105 Greenwich Street that had previously broken were not exposed and their condition was not observed by this witness or by the Committee.

Mr. Rushworth, Supervisor of the Street Division of the Philadelphia Gas Works Company, testified that his territory embraced the 1100 block of Greenwich Street; that

on February 24, 1940, one of his men read a news item in the Evening Bulletin describing a street cave-in and water leak in the 1100 block on Greenwich Street, and that as a result a gang of men was sent down and the foreman called him on the telephone; that he went down and saw that the street surface in front of 1104 and 1106 had fallen into a cavity and that the surface where the asphalt paving was missing had been filled with cinders; that they had no notice of and had not seen the cave-in before it was filled; that an examination showed that the soil was soft over an area of forty-five feet along Greenwich Street and extended three feet north of the south curb across into the north footway; that they decided that because of the condition of the cinders and the soft soil to relocate the main; that the main was cut off and a piece of main about on hundred and seventy feet put through the cellars of the houses up to 1110 Greenwich Street. This witness further added that when they tested the cinder fill they found water running under the paving. The water was running and the leak was supposed to have been repaired. This witness did not report to the City of Philadelphia the presence of the water, and apparently made no report to the gas company that running water was under the fill, which if not stopped might undermine more of the street and affect their pipes.

Ernest F. Stolpe, Supervisor in the Street Division of the Philadelphia Gas Works Company, testified as to the relocation on July 18, 1940, of the gas main on Greenwich Street from the street to under the south sidewalk on Greenwich Street. At that time the witness found water leaking in the excavation in the center of the street over the water main. He stated that water was leaking but was not running on the street, and that for three days while the witness was working there nothing was done to repair the water leak; that he returned to the work on the 22nd of July and he thinks that at that time the water leak had been repaired, but he was not sure. He stated that at that time the water leak was in front of premises 1104 and 1106 Greenwich Street; that there was a hole in the street which had been filled with cinders and that it was there the water was running, although it did not come to the surface of the street. He testified that he had a man notify the Water Bureau.

Paul Brown, Assistant Supervisor of the Customer's Service Department of the Philadelphia Gas Works testified that on the night of February 24, 1940, he received a telephone call that a temporary line or main was to be run on Greenwich Street and that he went down; that a about 1102 Greenwich Street there was quite a good bit of water coming from under the paving and running down to the gutter; that the gas crew had dug a hole to cut off the gas main and that it was necessary to use a pump attached to a compressor to get rid of the water; that the water was rushing out which indicated a very active leak; that he did not notify the Water Department since one of the neighbors told him that the Highway Bureau had dumped cinders into a hole that had been there and that they said they would be back; that to his knowledge no one had ever reported a cave-in or cavity on Greenwich Street.

Thomas V. Flynn, Superintendent of the Street Division of the Philadelphia Gas Works Company, testified that he had no reports from any of their departments, the Water Bureau or the Highway Department or any other departments of the city of any cave-in on Greenwich Street: that in February, 1940, Mr. Rushworth called him on the telephone at his home and told him of the condition on Greenwich Street which Mr. Holcomb had seen in the Evening Bulletin; that as soon as he knew of the condition he dispatched a gang and that under the supervision of Mr. Rushworth and Mr. Brown a temporary main was laid through the cellars of the homes; that this had to be done because the ground was soft and that it was unsafe for their main; that he was given a verbal report that this was due to a water leak, but that no report or record in writing was made. He stated that the gas company made a practice of notifying the Water Bureau, the Highway Department, the Bridge or Sewer Department or any City Bureau of anything that their men see wrong in the street, such as a bad depression, cave-in, water leak, water running in the man-hole, etc., because they feel that it is their duty to do so, but that a one-hundred per-cent record of such reports is not kept. He testified that neither the Highway Department nor the Water Bureau notified them of the cave-in or water condition on Greenwich Street and that it was just luck that one of their men saw it in a newspaper item.

Hudson W. Reed, executive Vice-President of the Philadelphia Gas Works Company, testified that on the day of the explosion at about 12:30 P. M. in company with Mr. Laurer, President, and Mr. Newhall, assistant to the president, he called on Mayor Lamberton of the City of Philadelphia, and discussed the matter with the Mayor and explained the cause of the explosion as being due to a wash out of earth from a water leak which left the gas pipes dangling and caused them to break; that the leak in the water main washed the earth into the sewer through a break in the sewer, and state that what occurred was a typical case of hydraulic mining. He was unable to give an opinion as to the length of time it would require to cause a cavity of these dimensions, but stated that in this particular case it would have taken months, depending upon the size of the leak, the amount of water coming from the leak, and the drainage space, and the size of the hole in the sewer. He testified that his opinion was based on what he saw after the explosion and the fact that at each end of the cavity there was a cave under the street; the one towards Dickinson Street was ten feet underneath and that no explosion could have blown that dirt away.

Howard T. Jayne, Safety Inspector for the Philadelphia Gas Company, testified that he did not know of any inspection that had been made of the gas main in Greenwich Street previous to the explosion.

C. L. McAllister, Supervisor in the Casualty Insurance Department of the Philadelphia Gas Works Company, testified that on the morning of the explosion, at about 9:30 A. M., he received a call from one of the company's men at the scene reporting the breaking of a number of windows and asking that a glazer be sent down; that he communicated with a glazer and ordered him to go down and put in the lights; that he did not know how much glass was broken. He testified that he did not know who gave him the order as he had received several calls, but thought it might have been Mr. Douglass.

Wharton W. Weir, Inspector for the Philadelphia Gas

Works Company, testified that he arrived at the scene of the explosion at about 6:20 A. M. that he saw a great deal of debris in the cartway and in the vicinity of the houses; that he saw the flames and admitted that some of the flames gave an indication of gas flame; that he saw gas flame where the asphalt joined the curb in front of premises 1112 or 1110 Greenwich Street. He testified that he was present when the third explosion occurred and stated that the center of the street for a distance of about thirty-five feet seemed to rise up about two and a half feet and then the whole thing collapsed; that there was a dull report; that after the explosion the street collapsed and went down into a cave or cavern about six feet deep; that he rushed over and saw the broken water main with water coming from it.

Blackwell Newhall, assistant to the President of the Philadelphia Gas Works Company, testified that on the morning of February 11th he called on Mayor Lamberton of the City of Philadelphia, in company with Mr. Laurer, President of the Philadelphia Gas Works Company, and Mr. Reed, Executive Vice-President of the gas company, and that Mr. Laurer advised the Mayor that the catastrophe was caused by a water leak that had washed the soil away from the gas pipe; and stated that this conclusion was based on reports they had received from the men in the field.

Harry D. Lehman, Manager of the Customer's Service Department of the Philadelphia Gas Works Company testified that on February 21, 1940, they received a complaint from 1103 Greenwich Street of a gas leak; that as a result of that complaint the meter was changed; that on June 28, 1940, they had a complaint of a gas leak in the cellar of 1102 Greenwich Street, and their repairman found a leak on a 1¼ inch coupling on the service extension. The next order, he testified, was on February 11, 1941, when a report of an odor of gas was received. This was the date of the explosion. There was, on February 26, 1941, another report of an odor of gas and the gas company employees found a slight odor of gas in a manhole. He further testified to a complaint on October 4, 1940, by a customer at 1120 Greenwich Street about getting a very poor supply of gas to his range. Workmen found that the fuel lines were trapped under the shed. The condensate was cleaned out. On November 4, 1940, there was another complaint from 1120 Greenwich Street of a noisy meter, but the workmen again found accumulated condensate, which was cleaned out. He also testified to a complaint of a customer getting no gas to his range at 1120 Dickinson Street on October 26, 1940. Workmen there also found the lines trapped. He testified to a complaint from 1134 Dickinson Street on June 11, 1940, that there was a leak at the gas range. Workmen found that the pilot was out and that it was corrected by putting in a new part. He then testified that there had been a previous complaint from 1134 Dickinson Street of a leak at the range and the workman found no leak but adjusted the range. This it appears was only one week before they replaced a part on the pilot light on the same range.

This witness then testified that complaints had also come in from Cross Street, another street in the immediate vicinity. That on January 13, 1940, a complaint came in from 1109 Cross Street of a leak at the gas range; that there was no leak but some difficulty with the pilot. On September 3, 1940, a complaint came in from premises 1113 Cross Street of a leaking meter; workmen put in a three-quarter inch union on the fuel line. On October 31, 1940, 1113 Cross Street again complained of a fluctuation of gas at the range and that they could not use the range; workmen cleaned out a deposit in the pipes. On March 21, 1940, 1115 Cross Street complained of an insufficient supply at the range. Workmen again cleared out a stoppage in the service pipe and changed the meter. A great number of other complaints, from houses on the various streets in the immediate neighborhood, almost all of which required the workmen from the Philadelphia Gas Works Company to clear stoppages in the service pipes were testified to, and are set out in detail in the notes of testimony at page 389 to 399 inclusive.

H. Bruce Anderson, Engineer of Distribution for the Philadelphia Gas Works Company, testified that he is a mechanical engineer; that the gas main in Greenwich Street was laid in 1900; that it replaced an old three inch main which was laid before the Philadelphia Gas Works Company took over the gas works in that section. He stated that he arrived at the scene of the explosion on the morning of February 11, 1941, at about 10 A. M. and that he saw two houses down on the south side of Greenwich Street, and on the north side houses were down and burned, but he could not tell how many; that in the street from curb to curb for a distance of thirty feet, in front of the houses which had been demolished on the south side, there was a deep cavity. He stated that there was a cavity under the asphalt extending about 10 feet and the cavity gave the appearance of being freshly washed; that it glistened as if water had been there. He stated that gas cannot explode in a street filled with earth, and that there must have been a cavity there before the explosion. He gave as his opinion that a water leak started and carried a great many cubic yards of earth away from the gas and water mains, taking away the foundations from the pipes and finally the gas main broke, escaping gas filled the cavity and got into the houses through the cellar walls. He suggested that the actual explosion may have been set off by a heater fire or a little pilot light on the gas range of one of the houses. He admitted that to create so much damage there must have been a great quantity of gas escaping. His reasoning is as follows: (page 465, 466)

"My conclusion was that the cavity must have been there when the explosion occurred under the street, because you cannot have any explosion without a cavity or space for the gas to explode in, and if the cavity were there the earth that occupied it must have gone some place. I have heard you asking questions of the witnesses of the possibility of the earth going up in the air. Anticipating such a question there is not the slightest indication that any earth whatsoever came out of that cavity. If there had been any earth that came out of the cavity, it is reasonable to suppose that some of it would have spattered over the faces of the houses. Not one bit of it happened. There is no evidence of it. Now when earth disappears, from underneath the street surface, and it occasionally does, these foremen that you have heard testify a few minutes ago and myself

and Mr. Flynn know only one place where that earth can go and that place is down a sewer. The sewer is the only way we know of escape for earth that is once on the street surface unless it be quicksand or subterranean river. The sewer is the only place which earth of that large cubical quantity can escape to, and so what I believe happened there is that a water leak started sometime, at which time is not known, the water carried away a great many cubic yards of earth underneath that street and as it carried that earth away the gas and water mains were further undermined. The foundations were taken away from them and finally they could not stand it any longer and the gas main broke. The water main must have broken ahead of the gas main because the only possible way earth can get away is through the sewer. That cavity was there and finally the gas main broke. With the existence of a cavity gas could then go through the cellar walls in those houses. How it was exploded, no one can tell. Heater fire may have supplied the spark to cause the explosion or a pilot light on the gas range. That is my idea of what happened."

He stated that illuminating gas becomes explosive when mixed with from 6% to 30% of gas to 94% to 70% of air, and that the greater the amount of gas in the mixture the greater the violence of the explosion.

This witness stated that in his opinion the cavity under the street must have existed for a considerable length of time before the explosion, because the amount of dirt that was washed away would require a considerable period of time to wash through the sewer, depending upon the extent of the leak and the force of the water attacking the earth.

His explanation of the length of time elapsing between the first two explosions and the third explosion, which occurred under the street, was that the gas accumulated in the large cavity under the street and remained there until a quantity of air from the street or from the opening in the sewer mixed with the gas, caused it to reach an explosive proportion, and was ignited by a spark from the flames in the neighborhood. He stated that gas cannot impregnate earth and cause an explosion.

Mr. Anderson further testified that there was no pool of water in the cavity and that the only water was that coming from the broken water pipe. He estimated that to wash away the cubic contents of this large cavity, which he estimated to be 40′ x 14′ x 7′ would require weeks if it was a large water leak under pressure, and from two to three months if it was a small water leak; but he was quite definite that in his opinion the cavity had existed for a sufficient length of time to undermine the gas and water pipes and cause them to break, which in his opinion was the cause of the explosion.

This witness inspected all the gas main and water main pipes in the basement of City Hall, and testified particularly with regard to the connection between the gas main and the gas service line going into premises 1112 Greenwich Street. He stated that in his judgment the cause of the break in that pipe was force, either weight imposed on the gas main from above or other force from the explosion. He testified that he saw evidence of surface corrosion, but nothing to indicate that the corrosion had gone all through the pipe. He further said there was no absence of thread on either the hole going into the main or the service pipe. He stated that there was evidence of thread in the tap hole, which is the remaining part of the thread missing from the service connection. He said you could not see or feel this thread because the piece of service pipe on which the thread was cut was still in the tap hole of the main. He said that the service pipe being made of wrought iron would probably break under stress quicker than the cast iron main. He stated that he thought he saw evidence of a fresh break on both the service pipe and the main at the tap hole, and that the only corrosion on the service pipe was surface corrosion.

He further testified that the thinness of the pipe indicated by Dr. Burke was in some measure due to "stretch" and that the original thickness of the pipe is less than one-tenth of an inch. He also stated that wrought iron rusts more quickly than cast iron, which in his opinion does not rust at all. He stated that in his opinion there was no evidence of serious corrosion of the gas main pipes in the basement of City Hall, except some surface corrosion, but no evidence of corrosion on the inside of the pipe. He disputed the testimony of Dr. Burke with respect to the bending of the service pipe connected to the main and stated that the bending was probably caused by the weight of the asphalt and dirt over the pipe after the explosion. He denied there had been any leak before the break in the gas main, and reiterated that the break in the gas main was due to the undermining, which suspended the gas main in the air without proper support, caused the break, and the gas then issued into the cavity and worked both ways, North and South, into the cellars of the houses on both sides and filled the cavity in the street.

He contradicted the testimony of Dr. Burke that if the wrought iron connection corroded it would affect the thread in the cast iron pipe, and stated that from his experience cast iron does not rust. He differentiated between the appearance of a pipe which is cut or broken apart and one in which corrosion had set in causing a break, by stating that it depended upon whether you saw the pipe immediately or later, because corrosion could form on the edge of the fracture in a very short time after the fracture, and that in the case of the service pipe the fracture edge showed so little corrosion, that in the opinion of the witness, the pipe had been broken.

Dr. Anderson testified that there was no regular method of inspecting the gas mains except by taking advantage of the openings made during the year to do various kinds of services to consumers, and taking advantage of openings made by the City of Philadelphia, the Water Bureau, and other utilities in the construction of sewers and work of that type. He testified that there was no record of any inspection of Greenwich Street except when some work was done there in 1940, which went up to premises 1110 Greenwich Street, but that the rest of the main from 1110 westward was not inspected and no record of any such inspection made by the company. He testified that no man-holes are located in the system which would permit an inspection; that on the low pressure gas mains there are very few valves, and they are rarely used to turn off the gas; and that there are no valves located in the general vicinity of the explosion.

He testified that the reason no valves are maintained was that it would be a hazard rather than a safety feature, because they would be misused by unauthorized persons who might want to turn the gas off. He stated that having safety valves in the system would not facilitate inspection of the gas mains and would not be feasible.

This witness testified that he was unfamiliar with Regulation Circular 9-A, Rule 7, of the Public Utility Commission, which provided (record 505)

> "Each utility shall inspect its equipment and facilities, including the necessary tests for water and leaks in its lines in accordance with good practice in a manner satisfactory to the Commission and shall maintain its equipment as specified in Rule IX, and shall keep a complete record of all such inspections and tests and shall file with the Commission a statement of the condition of its equipment, and in such form as the commission may require."

He later said that he had heard of the requirement and thought that the company had complied with it.

This witness testified as to the mud in the sewer and stated that the water could be seen in the man-holes at Passyunk Avenue and Dickinson Street, and that it was running in opposite directions, which indicated that the sewer was blocked in Greenwich Street by the dirt that had been washed into the break in the main, and that all the dirt which was missing from the cavity was washed through the sewer.

He testified that while frost on the surface has some effect on the pipes that are laid less than three feet under the ground—which he contended is the frost line for this section—this particular gas main was located between two feet eight inches and two feet ten inches under the surface of the street.

This witness further stated that in examining the water pipes removed from the hole, he found evidence in a number of breaks that indicated to him that the breaks had been in existence for several weeks before the explosion. He explained that by saying that the ends of the breaks differed so much in appearance; were discolored and had on the breaks a form of deposit which could not be removed. He testified: (record 541)

> "The west end of Dr. Burke's number 2 is what we consider has every indication that a break had existed there for some time. At the west end of Dr. Burke's number 4 pipe we found what we considered to be a very good indication that break had been in existence there for some time. At the lead joint, which was towards the east end of Dr. Burke's number 4, we believe there is evidence that the lead on the bottom of that joint had been pulled out for about three-eights of an inch for quite sometime. There could have been a leak at that joint for quite a while."

He also testified that generally both the gas and water pipes were in good condition.

Mr. Anderson also testified that he thought there was the proper co-operation between the City and the various utilities in reporting things discovered by the various companies and bureaus which affected the equipment of the others. However, he admitted that there was something definitely wrong in 1940 when the City failed to notify the gas company of the cave-in in Greenwich Street which was reported to Mr. Rushworth by an employe who read of it in a newspaper.

He stated that he felt that the inspections made by the Philadelphia Gas Works Company were reasonable and adequate, and he did not think any wholesale inspection was justified, since he felt that the company keeps its mains in very good condition, and nothing he had seen or heard indicated anything to the contrary to him. He later produced the record of inspections for the year 1940, which he considered a typical year, which is as follows:

1. Gas Main Examinations on work of installing new services when main is not installed at the same time—303.

2. Gas Main Examinations on work of renewing services —4263.

3. Gas Man Examinations on work of reconnecting services to mains—55.

4. Gas Main Examinations on work of repairs to services—47.

5. Gas Main Examinations on work of abandoning mains —5783.

6. Gas Main Examinations on work of abandoning mains —109.

7. Gas Main Examinations on work of renewing mains which are to be put back in the same location as the old one—216.

8. Gas Main Examinations on work of renewing mains in different locations—155.

9. Gas Main Examinations on work repairing mains which does not include the work of renewing mains under the items I have given—1347.

10. Gas Main Examinations on work of installing new main extension from existing mains—307.

11. Gas Main Examinations on work of visiting bridge gas mains—1237.

12. Gas Main Examinations on work of investigating various construction work—149.

13. Gas Main Examinations on work of investigating surface indications of under ground trouble—60.

These examinations are apparently made by the laborers, handymen, or gang foremen who are doing the work involved. They make no report unless they find trouble; they made no record of the inspection except when trouble is found, and when no report of trouble is made it is assumed the main is in good condition; there is no record kept off the inspection and no reports have ever been made by any inspector who made an inspection and found the main in good condition. These so-called reports of inspections are merely report of types of work done, and it is assumed that an inspection of the main has been made and that it is in good condition unless there is a report of trouble.

This seems like a most cursory and hap-hazard method of inspection and certainly is not an inspection in the true sense of the word. There is no individual upon whom the duty is imposed to see that the mains are properly inspected, and although this witness is responsible for the condition of the equipment, he makes no report to the Public Utility Commission in accordance with their Rule 7 as above set forth. This witness testified that he knows of no request by the Public Utility Commission for a report as to the condition of the equipment of the Philadelphia Gas Works Company in accordance with Rule 7.

He did testify that there was a record showing that the gas main in Greenwich Street was broken in 1933, opposite the premises 1114 Greenwich Street, at a point where the service line entered the main. This break was repaired by putting a sleeve around the main, and the service pipe was attached to a tap hole in the sleeve. The break at that time was caused by some settlement of a sewer lateral. There was no inspection of the gas main or service connection of 1112 Greenwich Street at that time.

William H. Gravell, consulting engineer, retained by the Committee, examined the scene, inspected the pipes, and listened to all of the testimony, and filed his written report to the Committee, a copy of which is attached hereto, and stated that in his opinion the explosion was caused by the negligence of the Philadelphia Gas Works Company and the City of Philadelphia, and in his report gave his reasons therefor.

From the testimony adduced at the various hearings from neighborhood witnesses, firemen and policemen whose duties required them to be at the scene of the explosions, public officers and workmen who had from time to time been engaged in doing work in the 1100 block of Greenwich Street and the immediate vicinity, and from officials and workmen of the Philadelphia Gas Company, as well as from personal investigation by the members of the Committee and its technical advisers, the Committee has reached the conclusion that the catastrophe was avoidable, and that it was the result of negligence and neglect on the part of both the Philadelphia Gas Work Company and the City of Philadelphia as hereinafter more fully explained.

As to the Philadelphia Gas Works Company, numerous witnesses testified that they had complained of the smell of gas around Greenwich Street for a period of two years before the date of the catastrophe; their records showed that they had a great number of complaints of failure of gas in the gas ranges in the immediate vicinity due to stoppage in the service pipes; that there were a great many complaints and repairs of joints being pulled loose, and leaks at the joints; that there were complaints of failure of pilot lights to stay lighted; complaints of fluctuation of gas at gas ranges; complaints of smell of gas in the houses; complaints of persons being overcome and made sick of the odor of gas; that it knew of the water leaks and made repairs to its main; that an inspection of the gas main removed after the explosion showed that it was corroded, and at the joint the threads on the pipe were barely distinguishable, and towards the end were entirely rusted away; that during a period when certain houses were having difficulty with their gas flow the gas company installed a temporary main through the basements of houses on the south side of Greenwich Street and then continued the temporary piping under the street to premises on the north side; that the trench dug for the purpose of erecting this temporary line was filled with cinders, and this trench dug through the solid earth and then filled with loosely packed cinders acted as a pathway for the escaping gas to the houses on the north and south sides of Greenwich Street directly in line with the trench, and it was these particular houses which exploded and burned, and it was in these particular houses in which the dead were found.

The testimony showed that when the main was relocated on Greenwich Street a new pipe was put in under the sidewalk on Greenwich Street up to 1110, and was connected with the old main that had been in Greenwich Street since 1900. In 1933 a break in the main occurred in front of the premises 1114 Greenwich Street, which break was repaired by putting a sleeve around the main, but no inspection was made to ascertain the condition of the main between 1114 and 1112 Greenwich St. If the main had to be relocated in 1940 up to premises 1110 it would seem that ordinary care would have required the company to inspect that part of the main in front of premises 1114 Greenwich Street, which its records would show had been broken in 1933 and had been fixed by putting a sleeve around the main, and such an inspection would have undoubtedly shown the deterioration and corrosion in the main and the service pipe in front of premises 1112 Greenwich Street, and would have indicated the necessity of extending the new main to at least premises 1114 Greenwich Street, where their main had previous cracked.

The fact that there had been so many complaints of trouble and so much odor of gas in the neighborhood should have indicated that an examination of the entire main on Greenwich Street was necessary, but the company contented itself with making whatever temporary repairs it could without exposing the main and trying to find out what the real trouble was and correcting it.

An inspection of the gas main and service connection pipes by the Committee itself confirms the testimony of Dr. Burke and the report of Mr. Gravell that the pipes were in a dangerous corroded condition and must have been in such a condition for a long period of time. In the words of Mr. Gravell: "The connection from 1112 to the Cast Iron Main, was Wrought Iron or Soft Steel. It has been carefully examined and shows a very badly corroded condition which could not have resulted from a few days exposure. In fact it undoubtedly took years to reduce this pipe to its present state of corrosion so that very little strength remained."

Ordinarily, reasonable co-operation between the City of Philadelphia and the Philadelphia Gas Works Company would, in our judgment, have prevented this terrible explosion. The lack of co-operation is evident from the fact that the only notice the Philadelphia Gas Works received of the original cave-in on Greenwich Street in February, 1940, was the newspaper item read by one of their employes; and when the repair was supposed to have been completed, and the crew of the gas company examined the soil to determine whether it was safe for their main, Superintendent Rushworth saw running water in the cinder fill, but failed to notify the City of Philadelphia so that it could re-examine the main to determine whether the repairs to the water main had been proper or whether another leak had developed.

This testimony is further corroborated by civilian witnesses who saw water in the hole opposite premises 1105 Greenwich Street after the hole had been filled with cinders.

The experience of the Highway and Water Department officials in connection with the 1100 block Greenwich Street was certainly sufficient to put them on notice that there was something wrong under the surface of the

street which required a thorough investigation and extensive repairs rather than the make-shift, haphazard investigations and inadequate repairs that were made.

The facts present a picture where the rights of citizens were ignored and neglected by both the Philadelphia Gas Works Company and the City of Philadelphia. Mr. Anderson of the gas company attempted to show a method of inspection of the gas mains by citing the record of all work done by the gas company of any kind, character or description that had anything to do with its equipment, with the exception of repairs or renewals of gas ranges, meters, or other facilities in consumers homes; even to testifying that mains that were abandoned were inspected and a record of the inspection kept. It is apparently conceded that no inspections were made as required by the Public Utility Commission, and certainly no tests of its equipment were made in accordance with the Commission's rule. The assumption that its equipment was in good condition because its laborers, handymen or gang foremen did not report any corrosion, erosion, breaks, etc. does not in the opinion of fthe Committee amount in any sense of the word to a proper inspection of its equipment, considering the dangerous substance it carried in that equipment.

As to the City of Philadelphia, there is no doubt that there were leaks in the water main in Greenwich Street several times within the year preceding February 11, 1941; that earth and soil were washed away and that it was necessary for the Philadelphia Highway Department to block off the street with barricades, and put lights thereon because of the unsafe condition of the street because of cave-ins; and that they were required, as shown by its own records, to fill in the cave-ins with cinders. The fact that it was necessary for the City to fill in these cavities on a number of occasions was certainly notices to it that there was serious trouble present, and yet it contented itself with filling in the cave-ins without making a thorough inspection of its water mains and sewer to determine the cause of the cave-ins and eliminate the defect.

It is worthy of comment that after the first repairs were supposed to have been completed in February, 1940, the witness Rushworth in examining the soil found evidence of running water under the paving, and had it been reported to the City the second break may have been avoided.

It is important to note that there is no systematic check on the water mains or sewers under the City streets. From the testimony it appears that there is a hit or miss method of testing the flow of water in the main, during certain hours of the early morning, when it appears that too much water is being used in a given neighborhood. Even after the repairs that were made to the water main in Greenwich Street, and the continued cave-ins, not even this test appears to have been made to determine where there was a leak. The continued succession of cave-ins was certainly notice to the City that the ground was unstable and that their water pipes in a dangerous condition, likely to break and cause other more serious and disastrous cave-ins—which is what eventually happened. No inspection was made of the sewer until after the explosions, when it was found that there was a hole about three feet long and eight inches wide.

The City of Philadelphia apparently inspects its water system for leaks, and while the method used is a good one, inspections are not made frequently enough in view of the age and condition of the pipes in the water system. As everyone knows, the water system of the City of Philadelphia is in very poor condition and extremely antiquated, and measures have been taken to renovate it, which the Committee trusts will be followed through.

FINDING OF FACT BY THE COMMITTEE

The Committee, after hearing the testimony of the witnesses and its own personal inspection of the scene of the explosion and the pipes of both the gas and water mains and connections thereto, and for the reasons set forth in the foregoing report, find that the Philadelphia Gas Works Company and the City of Philadelphia are jointly responsible for the explosions, and the resulting deaths and injuries which occurred on the morning of February 11, 1941, in the 1100 block of Greenwich Street in the City of Philadelphia.

RECOMMENDATIONS OF THE COMMITTEE

1. We recommend legislation be enacted creating a Board of Inspection in the City of Philadelphia under the control of the Director of Public Works of the City of Philadelphia, whose duties and functions shall be to investigate and inspect complaints concerning gas and water mains, and order and affect replacements or repairs to all gas and water mains or any and all connections thereof found to be in defective or dangerous condition.

2. That there be an immediate inspection of all mains thirty years old or over, and that thereafter water and gas mains be inspected once every five years. That the inspection be similar to that required by rule 7 of the Public Utility Commission for other gas and water companies, and in addition thereto, modern engineering methods be used to make the examinations adequate and complete, and a permanent written report of such inspection be kept as a public record by the Board of Inspection.

3. That where any citizen suffers any property damage or personal injury because of failure or difficulty in the gas or water mains or connections thereto, that the Board of Inspection shall make an immediate investigation to ascertain responsibility, and to effect an immediate correction of such dangerous or defective condition.

4. That in any action for damages brought against such city or any lessee thereof because of property damage or personal injuries sustained by such person because of the defective or dangerous condition of any water or gas main or any connection thereof, the plaintiff shall make out a prima facie case by establishing the fact of such damage and the casual connection thereto with such dangerous or defective main or connection thereof.

5. That said Board of Inspection shall be given the power to make and enforce such rules and regulations which it shall deem necessary or proper for the safe distribution of gas and water.

Gas Explosion and Fire on February 11, 1941, in The 1100 Block, Greenwich Street, Philadelphia
Engineering Report

To the Chairman and Members of the Legislative Committee appointed pursuant to House Resolution No. 25, adopted February 19, 1941, to investigate gas explosions in Philadelphia:

On February 11, 1941, about 5 A. M. an explosion occurred in a dwelling—1112 Greenwich Street, which set fire to 1112 and 1114, resulting in their destruction, with the death of three occupants. Less than an hour later another explosion totally wrecked 1105 and 1107 Greenwich Street, killing a policeman and a fireman. About two hours later there was a third explosion in the cartway located nearly midway between the above four dwellings. Many injuries resulted from these explosions.

It is not the province of an engineering report to fix blame, to moralize on negligence, to recommend penal laws nor disciplinary action. It is the duty of the engineer making such a report to examine the site, to review evidence, to put resulting data in perspective with that somewhat nebulous background:—standard engineering practice and to recommend a procedure aimed at preventing a repitition of such a serious tragedy.

The houses enumerated above were from 60 to 70 years old. Judging from their remains and from similar houses in the street, they were of fair if not the most durable construction for buildings of this class. It is probable that gas was introduced at a later date. Certainly electricity was much later. Water may have been supplied with their first occupancy. They were not likely supplied with sewer connections for some time after building. Yet all these utilities have since been in operation for a long time. The gas main in this street appears to have been laid about the turn of the century.

The soil on which these houses were built is probably an old natural fill consisting of sand, gravel and clay. It is a poor and quite porous soil. It has been dug up frequently, as for instance when gas repairs were made and when the water pipes were repaired. A substantial cavity seems to have existed where the street explosion occurred, possibly over a foot or more below the paving.

The explosions were due to illuminating gas which had leaked out of breaks in the lines outside the house lines. The odor of gas was reported on numerous occasions. Repairs were made from time to time and certain pipes replaced.

Illuminating gas is a mixture of hydrogen, carbon monoxide and certain hydro-carbon gaseous compounds, all of which are very inflammable. They are explosive when mixed with air, within certain limits, say approximately 5 to 15 percent gas to 95 to 85 percent of air. There are other ingredients not inflammable not explosive, such as carbon dioxide gas and water vapor, but in small quantity. These gases and vapors are practically without odor. Therefore a volatile oil is added which gives the very characteristic odor to illuminating gas. This being a suspended vapor is filtered out when the gas passes through sufficient thickness of soil or other porous material. The amount of gas in the ground, in any cavity and in fact reaching the houses may be much greater than inferred only from the odor.

The gas pressure does not seem to have dropped enough to be appreciable to the users in this street until the resident of 1112 shortly before 5 a. m. on February 11th investigated the gas odor and noted that his gas stove pilot was out. It is likely therefore that something happened that night to increase the flow from a break, thereby reducing the pressure in the house gas piping.

The gas main in the street was above the water main and about 3½ feet below the cartway grade, both of these pipes were above the sewer level.

In this latitude it is good engineering practice and it is so incorporated in certain laws as necessary, to place permanent structures below the frost line, namely 3′-6″ below permanent grade. This was done when these three utility structures were laid. The gas main was just about at the minimum safety depth for protection against frost; any loss of protection above would encroach on this safety limit. This unquestionably was what happened. The air cavity, probably containing water, above the gas main reduced the protection so that undue stresses were produced on this main and service connection to 1112. A break resulted or an old break was opened up, the service connection separated from the main and the porous earth, possibly made more porous due to the recent trenching, allowed the gas to enter the cellar of 1112 and was set off by a flame in the heater, the hot water heater or some other source, not beyond proper requirements of a household.

Once 1112 and 1114 were fired, flames appeared from burning gas escaping from cracks and vents. It was only necessary for the gas leaking into 1105 and 1107 to reach the dangerous mixture, so that an explosion could result. The same is true of the explosion in the street cavity.

The connection from 1112 to the Cast Iron Main, was Wrought Iron or Soft Steel. It has been carefully examined and shows a very badly corroded condition which could not have resulted from a few days exposure. In fact it undoubtedly took years to reduce this pipe to its present state of corrosion so that very little strength remained.

There are several causes for corrosion in cases like this. First rust takes place where moisture and air are present together, as in the case here. Then there may be active alkalies or acids in the soil or carried there by leaky house connections to sewers. Organic acids are notably harmful to iron. A very general cause of deterioration has been introduced since this installation was first made: Electric leakage which causes electrolysis of metal. Wrought iron or steel is particularly subject to this. Water and gas lines of metal are grounded by construction in the ground and are excellent electric conductors. The grounding of electric service lines to water and gas pipes,

leakage from trolley rails and various other electric lines, although perhaps minute, yet over a long period of time will cause a great amount of corrosion.

Now this soil from its porosity was nearly ideal for the leakage of water, gas and electricity. Leaks from the water supply mains, or from surface water augmented settlement in this poor soil. Underpinning work was necessary to preserve walls in this street. Water and gas pipes were dug up and repaired from time to time. It is known that in the winter of 1936, during a foundation construction at 9th and Mifflin Streets, not far from this site, showed solid freezing of earth to a depth of 2′-6″ below grade. There probably was less cover than that over the gas main in Greenwich Street. Had there prior to the Eleventh been sufficient strength in the service connection at 1112 to sustain the weight of the main after the nearly complete corrosion, then the action of frost would account for its final breaking away with the dropping down of the main in the disturbed earth or washout cavity below.

The City Authorities have shown that in the past inspection of sewers, fire hydrants and the testing for water leaks have been accomplished and repairs made.

The officials of the Philadelphia Gas Works Company have not shown that any organized efforts have been made to follow up possible trouble. Reports are received of leaks, usually detected by the familiar odor. In fact, this seems the usual practice in other cities. However, the Company and its officials were given much evidence of trouble from bad underground conditions, deterioration and repairs to their own, city and other utilities in this vicinity and particularly in this street. In fact in 1933 a leak where the service connection to 1114 joins the main was repaired, yet there was no suspicion that 1112 or other connections under similar conditions as that of 1114 might need attention.

It is recommended that the City of Philadelphia as owner and lessor of the Gas Works properties and installations and the Philadelphia Gas Works Company as lessee and operator of this property establish a mutually responsible agency for the reporting and co-ordination of all pertinent data, the following up of all reports and suspicions of trouble and the instituting of some procedure for inspections and investigations based on modern methods which may have been pursued separately by these two parties, or elsewhere in the United States. This Board should be placed under the Department of Public Works of the City, whereby the City Authorities will be responsible for the carrying out of a procedure mutually agreed upon for the prevention of calamities like that which has brought forth this investigation. Should loss of life or limb, or property damage result thereafter, this Board shall determine responsibility and preserve all data for the review of higher authority.

This Board referred to in the foregoing paragraph, and under the jurisdiction of the Department of Public Works of the City of Philadelphia, shall institute a study, together with detailed inspections, of lines and service connections which have been in use for thirty years or more, starting with the oldest or those where it is known that trouble may be expected. This procedure shall also govern for localities or installations which, like that on Greenwich Street, have shown trouble from time to time, such that suspicion is aroused as to their security. A complete report with necessary plans and details and records of work done shall be made at least once a year starting with a preliminary report as of October 31st of this year. This report certified to by the President of the Philadelphia Gas Works and the Director of Public Works of the city of Philadelphia shall be transmitted through the Mayor of the City of Philadelphia to such agency in the Commonwealth as the General Assembly shall determine.

Respectfully submitted,

WM. H. GRAVELL (Sgd.)
Wm. H. Gravell, Reg. Engr.

MINORITY REPORT OF HOUSE COMMITTEE TO INVESTIGATE GAS EXPLOSION

Pursuant to House Resolution No. 25 adopted February 19, 1941, to investigate gas explosions in the Twenty-sixth Ward of the City of Philadelphia, the following minority report is respectfully submitted:

The majority report reviews the testimony of the various witnesses and no attempt will be made in this report to do so again.

It is crystal clear that the concentration of gas in Greenwich Street was responsible for the unfortunate explosion under investigation. It is equally clear that such concentration of gas was caused by the large cavity in the street which had developed over a long period of time. The only logical conclusion that can be drawn from the testimony of the various witnesses, including the experts who were produced by the City of Philadelphia, the Philadelphia Gas Works and the expert retained by the Legislative Commission, is that the cavity in the street was caused by the washing away of the earth under the surface of the street into the sewer. There was clear evidence of a bad break in the sewer. There was also some testimony of a leak in the main. The earth either worked its way into the sewer, causing the hole in the street, or it was washed by the leak in the main into the sewer forming a cavity in which the gas concentrated.

The undermining and removal of the earth supporting the gas mains caused the gas mains to buckle, filling the cavity with gas.

Due to the washing away of the earth the cavity in the street extended to the house line on either side. Later the gas escaped from the large cavity in the street into the cellars of the houses on either side, became mixed with air and ignited in some unknown manner, causing the explosion.

It is respectfully submitted that from all the testimony, and the inferences to be drawn therefrom, that no blame whatsoever can be placed upon the Philadelphia Gas Works for the explosion.

There was no evidence presented to show any negligence or carelessness on the part of the Philadelphia Gas Works. In fact the contrary is true. The evidence indicates that the gas company handled complaints of leaks as they arose in an expeditious manner and in accordance with a well-established practice.

It is equally clear that the City of Philadelphia is in no way responsible for the explosions. There was no evidence of any kind to indicate that the City could have

foreseen or prevented the unfortunate occurrence in Greenwich Street. It is the belief of your committee that the City should be exonerated from any blame whatsoever.

Your committee further disagrees with the recommendations of the majority report relative to corrective legislation. The legislation recommended would impose tremendous financial burdens upon the gas company and upon the City of Philadelphia and instead of relieving or remedying conditions similar to that occurring in Greenwich Street, it would defeat its own purpose in that there would be more frequent excavation in the streets, thereby increasing the possibility of dangerous conditions beneath the surfaces of streets. In the main the recommendations are impractical and denote a total lack of understanding of the problems involved, and would impose additional financial burdens upon the gas company and the taxpayers.

Your committee desires to take notice of the impulsive and discourteous attitude of the Coroner for the County of Philadelphia in appointing a so-called "Blue Ribbon Jury" to conduct a superficial investigation of the gas explosion in the midst of the study by the Legislative Body. Such conduct on the part of the Coroner was inexcusable. He deserves criticism for his lack of respect for a Legislative Body.

A report of this investigation would not be complete without comment relative to the efficient manner in which the catastrophe was handled by the Philadelphia Police and the Philadelphia Firemen. Particularly worthy of comment is the heroic action of the members of the Philadelphia Fire Department. Despite the presence of gas in the midst of a terrific fire the firemen saved the lives of many persons by their fearless conduct. This is another noteworthy deed to the credit of the Philadelphia Firemen who are conceded to be the finest in the United States.

Your committee concludes that the unfortunate explosion in Greenwich Street was unavoidable and could not have been prevented or foreseen.

EARL E. HEWITT, SR.

To the Honorable, the Members of the General Assembly:

The Bituminous Coal Study Commission was created by a concurrent resolution of the General Assembly, and approved by the Governor of Pennsylvania on the 5th day of June, A. D., 1937. This resolution reads as follows:

Section 1. Be it resolved, &c., That a commission is hereby created which shall consist of three members of the Senate to be appointed by the President Pro Tempore of the Senate and four members of the House of Representatives to be appointed by the Speaker of the House, whose duty it shall be to make a thorough study and investigation of the proposal incorporated in Senate Bill No. 632 of the Legislative Session of 1937, to ascertain whether it would be economically feasible to enact such legislation requiring operators of bituminous coal to move all cars to and from the face of the workings, or whether its enactment would result in so increasing mining costs as to effect the production of bituminous coal in this Commonwealth, and to make reports of its findings and recommendations to the General Assembly in the year 1939.

Section 2. The commission shall organize by electing a chairman, vice-chairman, and secretary. The members of the commission shall serve without compensation, but shall be reimbursed for all expenses incurred in the performance of their duties. The commisson shall have power to appoint such assstants as are deemed necessary and to fix their compensations. The commission shall have power to sit after the adjournment of the 1937 Session of the General Assembly.

Section 3. The sum of seven thousand five hundred dollars ($7,500), or so much thereof as may be necessary, is hereby specifically appropriated to the commission for the payment of the expenses of the commission, for the compensation of the assistants appointed by the commission, for supplies, postage, telephone, telegraph, and incidental expenses, for compiling and printing a report, and for all other necessary and proper expenses of the commission.

The President Pro Tempore of the Senate appointed as the three members of the Senate:

John J. Haluska, Cambria County
Charles Ealy, Somerset County
Glen R. Law, Mercer County

The Speaker of the House of Representatives appointed as the four members of the House:

Blake R. Shugarts, Clearfield County
Matthew Welsh, Fayette County
Joseph Baine, Allegheny County
E. Kent Kane, McKean County

The Commission organized by the election of Senator John J. Haluska as chairman, and Blake R. Shugarts as vice-chairman.

I.

APPEARANCES BEFORE THE COMMISSION

The Commission acknowledges its indebtedness to the following persons who, by appearance, correspondence,

and other forms of assistance, supplied the Commission with valuable information, much of which is incorporated in this report:

Officers and members of 42 Local Unions located in Cambria County.
Robert M. Newcombe, Representing the Central Coal Operator's Association.
Robert Hill, Local No. 36, Nanty Glo, Pa.
H. L. Good, Irwin District, Westmoreland County, Pa.
Tom Jeffrey, Sup't., Rochester and Pitt. Coal Co., Waterman, Pa.
Anthony Hall, Foreman, Rochester and Pitt. Coal Co., Waterman, Pa.
Anthony Anderson, Pres. of Local, Rochester and Pitt. Coal Co., Waterman, Pa.
John Popp, Loader, Rochester and Pitt. Coal Co., Waterman, Pa.
Mr. Cannon, Representing the Western Penna. Coal Operators.
Joseph Jones, Local No. 2008, St. Benedict, Pa.
W. B. Trimble, Pres., Indian Creek Coal Co., Indian Head, Pa.
J. E. Lowery, Sup't., Indian Creek Coal Co., Indian Head, Pa.
Earl Miller, Pres. of Local No. 6309, Indian Creek Coal Co., Indian Head, Pa.
Patsy Capriotti, Loader, Indian Creek Coal Co., Indian Head, Pa.
Walter Jones, Secretary-Treasurer, Central Penna. Bituminous Coal Producers' Assn.
John Covicas, Local No. 3648, St. Michaels, Pa.
J. J. Coffee, Sup't., Bird Coal Co., Kelso, Pa.
Andrew Starvish, Loader, Bird Coal Co., Kelso, Pa.
J. W. Gray, Foreman, Penna. Coal and Coke Co., Winburne, Pa.
Joseph Dingey, Committeeman, Penna. Coal and Coke Co., Winburne, Pa.
Fogle Bros., Garret, Pa.
James George, Sup't., Rock Hill Coal and Coke Co., Robertsdale, Pa
Eldon McClune, Motorman, Rock Hill Coal and Coke Co., Robertsdale, Pa.
George Mosler, Local No. 1386, Nanty Glo, Pa.
Steve Kish, Local No. 621, Vintondale, Pa.
Mr. Stover, Cosco Gas Coal Co.
Sterling Moshannon Coal Co., Houtzdale, Pa.
L. S. Rush, Boss, Fair Oak Coal Co., Confluence, Pa.
Harry Hillard, Loader, Fair Oak Coal Co., Confluence, Pa
George H. Humphrey, Local No. 6411, Johnstown, Pa.
John Nobelski, Local No. 1318, Jamestown, Pa.
Mr. Seman, Hillman Coal and Coke Co.
Lee Campbell, Committeeman, Clearfield Bituminous Coal Co., Grassflat, Pa.
John M. Bugosh, Committmen, Clearfield Bituminous Coal Co., Grassflat, Pa.
Paul Peachman, Committeman, Yorkshire Coal Co., Madera, Pa.
L. F. Crouse, Sup't., Monroe Coal Co., Revloc, Pa.
Robert Banfield, Committeeman, Monroe Coal Co., Revloc, Pa.
George H. Balog, Loader, Monroe Coal Co., Revloc, Pa.
J. B. Moore, Foreman, Consolidation Coal Co., Acosta, Pa.
Rex Redrick, Pres. of Local, Consolidation Coal Co., Acosta, Pa.
Frank Niemiec, Loader, Consolidation Coal Co., Acosta, Pa.
Roy Keck, Butler Coal Co.
Mr. Smith, General Manager, Rochester and Pitt. Coal Co., McIntyre, Pa.
Lawrence Reading, Sup't., Rochester and Pitt. Coal Co., McIntyre, Pa.
Frank Kelly, Committeeman, Rochester and Pitt. Coal Co., McIntyre, Pa.
Levy Thomas, Sup't., Tuscoria Coal Co., Holsopple, Pa.
Andy Andrews, Check Weighman, Tuscoria Coal Co., Holsopple, Pa.
James Sechler, Pres. of Local No. 6203, Garret, Pa.
J. F. Simpson, Sup't Clearfield Bituminous Coal Corp., Dixonville, Pa.
John Ledbeder, Foreman, Clearfield Bituminous Coal Corp., Dixonville, Pa.
Steve Macuga, Loader, Clearfield Bituminous Coal Corp., Dixonville, Pa.
James Lytle, Sup't., Lytle Bros. Coal Co., Robinson, Pa.
James McEllwee, Pres. of Local, Lytle Bros. Coal Co., Robinson, Pa.
Bernard Bush, Committeeman, Lytle Bros. Coal Co., Robinson, Pa.
Atlantic Mining Co., Houtzdale, Pa.
William McCuen, Sup't., Mine No. 51, Ellsworth, Pa.
Arthur Sowell, Pres. of Local, Mine No. 51, Ellsworth, Pa.
William Mayo, Sup't., Koppers Coal Co., Melcroft, Pa.
Lloyd Erhard, Pres. of Local, Koppers Coal Co., Melcroft, Pa.
Raney Barmariotti, Cutter, Koppers Coal Co., Melcroft, Pa.
Walter Hamrock, Loader, Koppers Coal Co., Melcroft, Pa.
Robert Tedrow, Local No. 998, Tire Hill, Pa.
Dwight R. Shaffer, Local No. 998, Tire Hill, Pa.
Archibald Miller, Sup't., Loyalhanna Coal Co., Cairnbrook, Pa.
Thomas Latvich, Pres. of Local, Loyalhanna Coal Co., Cairnbrook, Pa.
H. C. Ford, Sup't., Davis Coal and Coke Co., Boswell, Pa.
Fred Moore, Foreman, Davis Coal and Coke Co., Boswell, Pa.
Ralph Watkins, Loader, Davis Coal and Coke Co., Boswell, Pa.
J. Nicoski, Local No. 998, Tire Hill, Pa.
F. R. Boyd, Sup't., Hillman Coal and Coke Co., Jerome, Pa.
John Lees, Pres. of Local No. 1113, Hillman Coal and Coke Co., Jerome, Pa.
Waser Suproon, Loader, Hillman Coal and Coke Co., Jerome, Pa.
E. A. Bankert, Time Keeper, Keystone Coal Co., Mooween, Pa.
James Alexander, Loader, Keystone Coal Co., Mooween, Pa.
John Flinn, Foreman, Consolidation Coal Co., Jenners, Pa.
Terry Russell, Motorman, Consolidation Coal Co., Jenners, Pa.
Mike Salamanta, Loader, Consolidation Coal Co., Jenners, Pa.
James Meehan, Sup't., Varssia Coal Co., Heshbon, Pa.
Barney Sutton, Loader, Varssia Coal Co., Heshbon, Pa.
Fred Bass, Sup't., Clearfield Bituminous Coal Co., Commodore, Pa.
George Daniels, Loader, Clearfield Bituminous Coal Co., Commodore, Pa.
Charles Gates, Pres. of Local, Clearfield Bituminous Coal Co., Commodore, Pa.
Charles Estep, Sup't., Reitz Coal Co., Central City, Pa.
Nick Bruno, Pres. of Local, Reitz Coal Co., Central City, Pa.
Pius Yeaglin, Sup't., Royal Quemahoning Coal Co., Stoystown, Pa.
Edward Burnett, Loader, Royal Quemahoning Coal Co., Stoystown, Pa.
John Simpson, Sup't., Diamond Smokeless Coal Co., Hysota, Pa.
Leno Lappi, Check Weighman, Diamond Smokeless Coal Co., Hysota, Pa.
J. D. Helman, Sup't., Imperial Coal Co., Coalport, Pa.
Harvey Trent, Committeeman, Imperial Coal Co., Coalport, Pa.
James B. Marshall, Foreman, Bird Coal Co., Ginter, Pa.
Mike Janocko, Committeeman, Bird Coal Co., Ginter, Pa.

W. S. Merow, Foreman, Kristianson Johnson Coal Co., Lance, Pa.
William Thompson, Boss, Diamond Smokeless Coal Co., Boltz, Pa.
Tony Furman, Pres. of Local, Diamond Smokeless Coal Co., Boltz, Pa.
Bill Smith, Check Weighman, Diamond Smokeless Coal Co., Boltz, Pa.
J. B. Yonidy, Boss, Rochester and Pitt. Coal Co., Clune, Pa.
Mike Pasternick, Pres. of Local, Rochester and Pitt. Coal Co., Clune, Pa.
Metro Balue, Loader, Rochester and Pitt Coal Co., Clune, Pa.
John Kowalsky, Committeeman, Leland Coal Co., Beccaria, Pa.
Cliff Nevling, Committeeman, Leland Coal Co., Beccaria, Pa.
Frank Lambert, Foreman, Proctor Mines, Force, Pa.
Carlo Bonesa, Loader, Procter Mines, Force, Pa.
George Linzy, Sup't., Mine No. 9, Heilwood, Pa.
Mr. McCloskey, Pres. of Local, Mine 9, Heilwood, Pa.
C. L. Buhite, Sup't., Cramer Mines, Stopville, Pa.
Joseph Staples, Committeeman, Cramer Mines, Stopville, Pa.
Jack Tabane, Loader, Cramer Mines, Stopville, Pa.
Robert Percell, Foreman, Consolidation Coal Co., Gray, Pa.
John Miehankie, Pres. of Local No. 6456, Consolidation Coal Co., Gray, Pa.
Earl Hoover, Loader, Consolidations Coal Co., Gray, Pa.
Art Anderson, Pres. of Local No. 448, Rochester and Pitt. Coal Co., Lucerne Mine, Pa.
John Marince, Foreman, Morrisdale Coal Mining Co., Morrisdale, Pa.
Frank Roach, Committeeman, Morrisdale Coal Mining Co,. Morrisdale, Pa.
John Hewitt, Committeeman, Morrisdale Coal Mining Co., Morrisdale, Pa.

II.

THE COMMISSION'S APPROACH TO THE PROBLEM

The resolution creating this Commission was adopted after the presentation of Senate Bill No. 632, by Senator John J. Haluska of Cambria County, endeavoring to abolish car pushing in the bituminous coal mines of Pennsylvania by human power. It is maintained by those employed in the bituminous coal mines that the most hazardous work in these mines is the moving of empty and loaded cars in and out of the working-places by man power. It is claimed that this phase of work is the greatest single cause of injuries sustained by the coal miner.

In substantiation of these assertions, a survey taken in what is known as the Fifteenth Bituminous Coal District of Penna., shows that out of approximately 270 injuries in this district during a recent period, 105 were attributed directly to the handling of mine cars to and from the working place. Taken from the compensation records, the following data, pertaining to the above mentioned injuries, are here quoted:

Table I.

Case No.	Nature and Cause of Injury	Days Lost
1.	Brush burns, contusion of knee. Dropping load from place.	5
2.	Broken ribs. Dropping car down heading, brake would not hold.	56
3.	Three broken teeth. Pushing car to fore, looked over car.	11
4.	Sprained back. Pushing car, hoist rope jerked, slack rope.	13
5.	Sprained knee. Pushing car, slipped, fell.	6
6.	Contusion of chest. Pushing car on curve, car ran back	5
7.	Sprained back. Pushing car, slipped.	7
8.	Fracture of left arm. Dropping car into place, car jumped back.	46
9.	Contusion of foot. Throwing car over switch, car fell on foot.	74
10.	Finger caught between car and prop. Pushing loaded car.	6
11.	Sprained back. Pushing car.	31
12.	Sprained back. Pushing car, slipped and fell.	27
13.	Contusion of knee. Pushing car, fell.	11
14.	Sprained back. Shifting car on track.	11
15.	Squeezed between loaded and empty car. Dropping car down heading.	47
16.	Supposedly hernia. Pushing car.	10
17.	Hand caught. Dropping car out of place, put sprag in wheel.	1
18.	Sprained back. Pushing car, felt pain.	107
19.	Sacro iliac sprain. Stumbled while pushing car.	15
20.	Stoved arm. Dropping car into place, car caught onto another.	12
21.	Finger lacerated. Caught between car and prop.	18
22.	Squeezed between face and car. Took brake off.	54
23.	Thumb crushed, loss of nail. Caught between bumpers of cars.	39
24.	Fracture of arms. Dropping car out of place, car derailed.	42
25.	Hernia. Pushing empty car.	139
26.	Sacro iliac sprain. Pushing Car, slipped.	30
27.	Lacerated finger. Pushing car, derailed.	11
28.	Left hernia. Pushing car, felt pain.	96
29.	Finger crushed. Pushing car.	4
30.	Sprained back. Pushing car.	62
31.	Cut ear, contusion of side. Dropping car, car got away.	41
32.	Sprain of lumbar muscles. Pushing car.	27
33.	Sprained back. Pushing car, Slipped, fell.	15
34.	Recurrent hernia. Pushing car.	152
35.	Sacro iliac sprain. Pushing car.	4
36.	Sacro iliac sprain. Pushing car.	10
37.	Sprained back. Pushing car.	32
38.	Chest hit by prop. Pushing car, prop hit car and rebounded.	28
39.	Bruised foot. Pushing car, jumped track catching foot.	5
40.	Bruised knee. Pushing car.	17
41.	Strained muscles of back. Pushing car.	13
42.	Amputation of finger. Pushing car.	43
43.	Hand caught. Pushing car.	4
44.	Sprained back. Pushing car.	14
45.	Laceration of finger. Pushing car, finger caught on coal.	7
46.	Foot fracture. Dropping car, hit another load.	84
47.	Wheel ran over finger. Pushing car, foot slipped.	20
48.	Contused knee. Pushing car, fell.	25
49.	Contused knee and brush burns. Pushing car, fell.	25
50.	Sprained back. Pushing car, foot slipped.	6
51.	Contusion of eye. Putting car on track, struck face.	4
52.	Sprained back. Pushing loaded car, foot slipped, fell.	45
53.	Contusion of toe. Lifting empty car, car fell.	31
54.	Sprained back. Lifting empty car.	50
55.	Bruised finger. Dropping car, caught between coal and car.	17
56.	Fingers cut. Pushing loaded car, hand caught against prop.	23
57.	Sprained right shoulder. Pushing car.	4
58.	Sprained muscles of left shoulder. Pushing car.	4
59.	Contusion of foot. Pulling car out of place, rope gave, caught.	5
60.	Sacro iliac sprain. Putting car on track, slipped.	5
61.	Sacro iliac sprain. Lifting car, slipped.	38

Case No.	Nature and Cause of Injury	Days Lost
62.	Left inguinal hernia. Pushing car, injured left side.	84
63.	Bumped and bruised back. Pushing empty car into place.	167
64.	Sprained back. Lifting empty car on track.	11
65.	Finger caught. Putting car on track.	26
66.	Side abrasion. Pulling car out of place, struck by hoist rope.	15
67.	Sprained wrist. Switching car, hand caught.	35
68.	Bruised knee. Pushing car, fell.	6
69.	Sprained left side. Slowing car in working place.	19
70.	Sprained muscles of leg. Pushing car.	12
71.	Sprained muscles of chest. Pushing car.	5
72.	Sprained muscles of abdomen. Pushing car.	4
73.	Lacerated finger. Putting car on track.	7
74.	Sprained back. Pushing car.	6
75.	Foot torn off at ankle. Caught in hoist.	128
76.	Sacro iliac sprain. Pushing car, slipped.	4
77.	Sprained right knee. Pushing car.	5
78.	Sprain of lumbar muscles. Pushing car.	38
79.	Contusion of fingers, sprained back. Pushing car, slipped.	38
80.	Sprained back. Pushing car.	6
81.	Crushed finger. Lifting car on track, finger caught.	24
82.	Lacerated leg. Dropping empty car, leg caught.	47
83.	Sprained knee. Pulling hoist rope, slipped.	13
84.	Sprained muscles of lumbar region. Pulling car.	18
85.	Contusion of chest. Shoving brake on car, fell.	11
86.	Sacro iliac sprain. Lifting car.	2
87.	Sacro iliac sprain. Pushing car.	1
88.	Sprained ankle. Following car.	3
89.	Contusion of foot. Dropping car, caught.	5
90.	Laceration of finger. Pushing car, caught.	34
91.	Lacerated elbow. Dropping car.	38
92.	Toes caught. Pushing car.	23
93.	Hurt knee. Pushing car, slipped.	53
94.	Finger cut off. Pushing car.	37
95.	Bruised arm. Pulling car, struck with rope.	5
96.	Leg caught between two cars.	14
97.	Sacro iliac sprain. Pushing car.	9
98.	Bruised hand. Brake flew back.	2
99.	Contusion of shoulder. Pulling car, squeezed.	46
100.	Sacro iliac sprain. Pushing car.	2
101.	Sprain of lumbar muscles.	2
102.	Sacro iliac sprain. Pushing car.	7
103.	Hernia. Pushing car, felt pain in right groin.	6
104.	Sprained right foot. Pushing car.	13
105.	Sprained back. Pushing car.	21
	Total Days Lost	2836

The Commission determined to exercise great pains in studying these and other reports. The facts in the case were obtained first hand by journeys through coal mines in various counties by the Commission, as well as by others connected with the investigation, by conversation with workers, and by conference with operators and mine officials. All means were employed in an effort to get acquainted with the allegations made by those employed in this industry.

III.

PROBLEMS CONFRONTING THE COMMISSION

The Commission learned early that a great evil exists in the coal mining industry, but was constantly aware of the necessity of determining the effect of legislation upon both industry and those who labor at this hazardous occupation. Legislative enactment aimed at the improvement of working conditions may possibly result in a detriment to the industry, and ultimately to everyone concerned. The coal producing industry of Pennsylvania in recent years has enjoyed varying degrees of success, and obviously the periods of decline and low production were attended by distressing uncertainties. Such a state of conditions in our basic industry, to say the least, is certainly not conductive to the general welfare of the Commonwealth. The Commission was compelled, therefore, to dwell into facts and figures at all times when investigations were made. The statistics set forth in the following section are very pertinent to the problems under consideration.

IV.

PENNSYLVANIA STATE PRODUCTION OF BITUMINOUS COAL

The investigation shows that in the year 1937, the total capital invested in the bituminous coal mines of Pennsylvania was between $550,000,000 and $600,000,000, and that the total number of mines was 1,456, of which 919, or 63%, were working. It is further revealed that 133,414 miners were employed, producing 110,417,947 tons of coal, distributed among the various counties as follows:

Table II.

County	Tonnage	No. of Employes
Allegheny	15,213,350	15,544
Armstrong	2,945,132	3,766
Beaver	89,777	221
Bedford	471,506	944
Blair	227,667	484
Bradford	8,092	16
Butler	700,448	1,441
Cambria	14,807,485	21,177
Centre	473,490	801
Clarion	1,254,862	1,850
Clearfield	3,168,807	5,776
Clinton	40,912	67
Elk	606,955	1,103
Fayette	20,464,526	21,557
Fulton	139,525	245
Greene	4,157,344	3,954
Huntingdon	482,907	1,029
Indiana	6,710,349	8,104
Jefferson	2,131,721	2,804
Lawrence	264,255	496
Lycoming	60,009	142
McKean	7,277	22
Mercer	314,812	643
Somerset	5,218,592	7,915
Tioga	162,059	576
Venango	17,116	59
Washington	19,399,990	20,589
Westmoreland	10,878,982	12,039
Total	110,417,947	133,414

It is particularly illuminating for the present study to note the variations in production over a period of years. A specific comparison is here given:

Table III.

Year	State Tonnage	No. of Miners
1900	79,318,362	108,735
1937	110,417,947	133,414
1938	77,040,426	133,487

The 1938 output was the lowest since 1900, with the exception of the depression year 1932.

For further comparison, authentic figures on the variation of tonnage of nine coal companies, operating in the county of Cambria, follow:

Table IV.

	1926	1937	1938
Barnes Coal Co., No. 14-15	997,310	749,789	369,952
Carrolltown Coal Co., No. 9, and Cherrytree Coal Co., Emeigh ..	764,079	452,390	452,641
Sterling Coal Co.	79,039	343,367	262,503
Duncan - Spangler - Delta, and Joseph H. Reilly Shaft	132,691	63,419	15,862
Penna. Coal and Coke Co., No. 21-22-17	867,435	604,626	501,107
Rich Hill	203,239	153,879	115,997
Hastings Fuel	28,163	100,070	80,512
Lanark Coal Co.	.....	99,807	98,253
McCombie Coal Co.	41,291	66,820	59,049
Totals	3,113,247	2,634,167	1,955,876

In justification, the decline in 1938 in the state's production should be compared with the following total bituminous coal production in the entire United States:

Table V.

Year	Total U. S. Tonnage
1937	428,687,000
1938	325,479,000
Decrease	103,208,000

In considering the future course of our state's coal industry, it is very pertinent to note, further, that the virgin, or the best of this state's coal, comprising over 50%, has already been mined.

V.

REPORTS OF INVESTIGATORS

The information gathered in and around the bituminous coal mines of Pennsylvania, relative to the handling of mine cars in the working places, reveals a veritable conglomeration of conditions of all degrees of safety and satisfaction: from desperate working conditions to comparatively safe and easy ones, from disgruntled workers and defiant officials to happy workers and pleasant and cooperating officials. It was found, too, that these various conditions may be due, in a measure, to the nature of the mines. Thus, for example, an operator whose coal production cost is relatively high because of the make-up of his coal cannot maintain the more favorable conditions of his more fortunate competitor without some risk of financial embarrassment. In a great number of cases, however, it was very apparently not a question of feasibility for improvement of conditions, but rather an attitude of non-interference.

A vast majority of the contacts made by the investigators shows that the handling of cars in the working places is a dangerous and energy-racking task. Such conclusions were drawn only after an unbiased analysis of the facts are carefully observed and set down by the investigators. The highlights of a number of typical cases are now presented.

CASE NO. 1

No. of miners	350
No. of cars	800
Height of coal	3 ft. to 4 ft.
Length of rooms	Up to 350 ft.
Weight of empty cars	1725 lbs.
Weight of loaded cars	4200 lbs.
No. of motors	10
No. of hoists	44

The number of hoists in this mine is inadequate and a considerable amount of difficult pushing is necessary. It was reported that "the men are fighting with one another for the hoists." A mine official "didn't have any time to talk about such a thing as car pushing."

CASE NO. 2

No. of miners	600
No. of cars	1000
Height of coal	3½ ft. to 5½ ft.
Length of rooms	Up to 350 ft.
Weight of empty cars	4000 lbs.
Weight of loaded cars	8000 lbs. to 9000 lbs.
No. of motors	5
No. of hoists	6

The pushing here is extremely difficult as the cars are large and "have bent axles and the brakes drag. It takes five or six men to push the cars into place." A number of injuries were reported. The number of hoists is, of course, utterly inadequate.

CASE NO. 3

No. of miners	135
No. of cars	158
Height of coal	2½ ft. to 3 ft.
Length of rooms	Up to 425 ft.
Weight of empty cars	1350 lbs.
Weight of loaded cars	3800 lbs. to 4400 lbs.
No. of motors	4
No. of hoists	10

There is plenty of car pushing and it requires all that "three men can do to push a car into the face, and we had cases of men unable to come to work the next day from car pushing. The Company told the men that they couldn't put more hoists in on account of financial difficulties."

CASE NO. 4

Height of coal	3½ ft.
Length of rooms	Up to 350 ft.
Weight of empty cars	1800 lbs. to 3000 lbs.
Weight of loaded cars	3000 lbs. to 7500 lbs.
No. of hoists	None

The men do all the pushing, and it often takes "five or six men to push these cars." The men were told that "if they don't push the cars they will get men who will."

CASE NO. 5

No. of miners	300
Height of coal	3½ ft.
Length of rooms	Up to 250 ft.
Weight of empty cars	2400 lbs. to 2800 lbs.
Weight of loaded cars	6000 lbs. to 6500 lbs.
No. of hoists	34

"The men sit down to rest as much as five or ten minutes after pushing cars into their place."

CASE NO. 6

No. of miners	150
No. of cars	300
Height of coal	3 ft., 3 in.
Length of rooms	Up to 400 ft.
Weight of empty cars	2100 lbs.
Weight of loaded cars	5000 lbs. to 6000 lbs.
No. of motors	3
No. of hoists	35

Many of these men have no hoists at all and the pushing "is a man-killer." A mine official asserted that if they are compelled to install more equipment it will "drive the operators out of the state."

CASE NO. 7

Height of coal	5½ ft.
Length of rooms	Up to 250 ft.
Weight of empty cars	3100 lbs. to 4100 lbs.
Weight of loaded cars	9000 lbs. to 10,000 lbs
No. of hoists	None

Most of the mine trouble is car pushing. The cars are large and it requires "six or seven men to push them." Many injuries are reported.

In contrast to the above cases, many were found which add much milder tones to the picture. Indeed, a number of them may well be considered a pride to the industry. The following are given to round out the picture.

CASE NO. 8

No. of miners	70
No. of cars	300
Height of coal	3½ ft. to 4 ft.
Length of rooms	Up to 200 ft.
Weight of empty cars	2200 lbs.
Weight of loaded cars	4700 lbs. to 5000 lbs.
No. of motors	5
No. of hoists	20

According to an official the men prefer pushing to using a hoist, but the men say that the hoists are not much good. The grades are generally not steep and the men admit that "the push is not so bad."

CASE NO. 9

No. of miners	93
No. of cars	150
Height of coal	4 ft. to 4½ ft.
Length of rooms	Up to 500 ft.
Weight of empty cars	2200 lbs.
Weight of loaded cars	5200 lbs. to 6200 lbs.
No. of motors	9
No. of hoists	38

The men push cars occasionally, if they can, to save time, but they "have hoists to use now, and the men are not getting hurt any more."

CASE NO. 10

No. of miners	1024
No. of cars	1600
Height of coal	3 ft. to 4 ft.
Length of rooms	Up to 250 ft.
Weight of empty cars	3300 lbs.
Weight of loaded cars	9000 lbs. to 11,000 lbs.
No. of motors	37
No. of hoists	34

There had been trouble, but recently new motors and hoists were installed. A committeeman reports that now "our conditions are pretty good and we have no kick coming." A mine official volunteered that "the better the working conditions are . . . the less trouble . . . and the more money we make." And "if there is anything we can do for you (the investigators) we will be glad to help you."

CASE NO. 11

No. of miners	300
No. of cars	600
No. of hoists	25
No. of conveyors	20

This mine is highly modernized. Conveyors are used throughout, and car pushing is completely eliminated. The men declared that the conditions are good and that they are well treated.

The eleven cases presented are but a few of all those reported, and these were selected to give a good cross section of the situation as it exists generally throughout the state's bituminous field. Moreover, this picture is in complete corroboration with the observations of the members of the Commission during their excursion through several mines.

Since the bituminous coal mines were opened in Pennsylvania, the manual handling of cars, commonly called car pushing, has been an integral duty of the miner, and compensation therefore has been included in the tonnage rate. Because of changing mining methods, increasing mechanization and other economic changes, car pushing has been materialy and substantially reduced and the rate of reduction therefor will be accelerated in the future. Indicative of this trend, it is to be noted that in Pennsylvania, where the mines are old and the seams are thin, that car pushing has been eliminated for over thirty-three and one-third per cent of the tonnage due to the installation of conveyors and mechanical equipment. In addition thereto, thousands of room hoists have been installed to handle the cars against the grade and further, motors are used in many mines to handle the cars to and from the face.

In addition to large mines there are some thirty-five hundred small mines, employing a mere handful of men, which are not equipped to install motors or car handling equipment, and the owners thereof would be unduly embarrassed financially, and in numerous cases actually forced out of business, if required to eliminate the manual handling of cars. It is conservatively estimated that in the Pennsylvania field less than twenty per cent of the coal is handled manually by the miner.

This Committee realizes that there has been a marked diminution in car pushing and further realizes that it cannot be wholly eliminated, but urges that the operator exert his best effort to accelerate the elimination of car pushing so far as practical in and about the bituminous coal mines of Pennsylvania.

Many other investigations were made and the Committee finds that since the investigation started a large number of mines have installed electric hoists and storage battery motors, and that a large number of small operations have provided that mining cars be placed to and from the working place by mule haulage.

The Committee realizes the hardships of the men that must place their mining cars to and from the working place by man power and the danger involved in such work. The Operators are also concerned about this dangerous procedure and many of them are abolishing car pushing by man power as quickly as their finances permit.

The Committee is very much concerned with their findings of this investigation and feels that any legislation

affecting this great industry might be advantageous to the large Operations and that the ultimate result would mean the closing of hundreds of small operations throughout the Bituminus Coal Fields in Pennsylvania.

Therefore, the Committee finds that this problem should be a matter to be finally determined between the Leaders of Labor and the Coal Operators at the next Scale Conference Meeting, and so suggest. This report should be beneficial to all concerned and after the findings are analyzed by both Operators and Miners, it seems apparent that an agreement could be reached between these two groups.

This conclusion was arrived at by the Committee, only after deliberate thought and study, and after receiving a cross-section of opinions from Operators both large and small and Local Unions and their Members from various counties located in Bituminous Coal Fields.

REPORT OF THE LEGISLATIVE COMMITTEE TO INVESTIGATE THE HOUSING SITUATION IN THE CITY OF PHILADELPHIA

Commonwealth of Pennsylvania, House of Representatives, June, 1941

Honorable SAMUEL M. ROSENFELD, Chairman
Honorable JOSEPH M. O'BRIEN
Honorable CHARLES E. VOORHEES.

FOREWORD

Housing provides conditions favorable or unfavorable to health, morality, domestic content, and the dignity and joy of life. Self respect, and the normal gladness which is the natural antidote for moral contagion are effectively fostered or as effectually prevented by material surroundings. They do not gain by extravagance and ostentation, but by comfort and comeliness.

In multitudes of cases the wretchedly housed pay enough to entitle them to better quarters. It is often said that the worst tenants are the most profitable. Left to unregulated competition the homes of laborers are found in many cases to be unfit for human habitation.

This report arises out of the study of a practical situation and in carrying out its functions, the committee affords Pennsylvania legislators and interested persons the opportunity to view a problem in its actual light.

With a realization that the General Assembly is about to adjourn, attempt is being made to present only a compendium of a perplexing human problem with a hope that it may promote comprehension and insight.

Press of time and lack of funds have prevented the compilation and analysis of extensive statistical data collected by the committee, and this report is therefore submitted as a preliminary report to be revised at a later date if funds are made available.

The indebtedness of the committee is beyond my capacity to acknowledge here. Thanks are due to committee counsel John Morgan Davis, Esq. and Sidney Schulman, Esq. who gave unstintingly of their time and have made possible the completion of this study. To President Judge James Gay Gordon, Jr. the committee is grateful for the use of his court room for conducting the hearings.

SAMUEL M. ROSENFELD, Chairman.

REPORT OF HOUSE COMMITTEE APPOINTED PURSUANT TO RESOLUTION No. 14, SESSION OF 1941

The Committee appointed pursuant to Resolution No. 14, Serial No. 35 of the Session of 1941 to investigate housing conditions in the City of Philadelphia, submits the following report.

The Committee, consisting of Hon. Samuel M. Rosenfeld, Chairman, and Representatives Joseph M. O'Brien and Charles Voorhees, all of Philadelphia, organized immediately upon its appointment on February 24, 1941, and conducted public hearings in the City of Philadelphia on March 14th, 21st, 28th, April 4th, 10th, 18th, 25th and May 2d, 9th, 16th and 23d. The scope of the investigation, as originally outlined by the Committee, was as follows:

To conduct a full and impartial hearing with an opportunity for all interested parties to be heard for the purpose of obtaining a complete and accurate picture of all phases of the housing situation in Philadelphia; to inquire into the scope and enforcement of existing housing and sanitation legislation; to determine whether such legislation is adequate and to recommend to the Legislature such amendments or further legislation as may be found necessary by the Committee.

The Committee, through its investigation, hopes to obtain complete information as to

(a) The defense housing situation, particularly with reference to immediate and future needs, the probable effect on rent levels and means of preventing a repetition of unwarranted rent rises such as occurred during the World War, and the methods by which such housing needs, as may be disclosed by the investigation, can be immediately and effectively supplied; to determine whether the agencies concerned with such defense program have adequately met the situation and whether any legislation is needed to assist the program.

(b) To inquire into the need for low rent housing accommodations; to determine how such need can best be met; to inquire into whether the Philadelphila Housing Authority, the Mayor and City Council have taken the necessary and proper steps to obtain such housing; to determine how far such need may be supplied by the Public Housing Program of the Philadelphia Housing Authority; to inquire into how far rehabilitation and private enterprise may supply such need; to inquire into the adequacy of existing legislation covering these subjects.

(c) To conduct an injuiry into the scope, operation and effect of the housing and sanitation codes, the building codes and the Fire Marshal Acts in order to determine how far enforcement or non-enforcement of these acts affect the housing situation; to inquire into the conduct of the various departments; to deermine whether the Mayor and City Council have adequately recognized the budget needs of such enforcement agencies; to inquire into the tenement house situation; to determine by what means the unlicensed tenement house situation, with its hazards to health and life, may be remedied; to inquire into the adequacy of existing legislation and to make such recommendations as are necessary.

(d) To inquire into the condition of relief and W.P.A. tenants in order to determine the relationship between poor housing conditions and inadequacy of income; to determine whether the present relief grants for housing and shelter are adequate to supply proper housing; to determine what methods may best be adopted to improve the housing situation of such persons.

(e) To inquire into the methods of combatting the spread of blighted and sub-standard areas within the city; to determine how such blight may be halted and how far city planning may be used in such a program; to determine how effective our present city planning statutes are, and what changes might be needed in existing planning legislation; to examine into the function of a public housing program; to determine whether the city requires legislation to promote the existence of rehabilitation housing corporations.

During the course of its investigation, over sixty witnesses were examined and dozens of reports and documents bearing on the subject matter were considered. Despite the voluminous evidence, press of time has prevented adequate consideration and discussion of certain of the subjects originally outlined in the scope of the Committee's report, such as planning, zoning and the prevention of blight and deterioration, and it is the earnest hope of the Committee that these subjects may later receive adequate attention, either by a joint commission or some other agency.

THE FINDINGS

Housing Conditions Generally

Probably the most enlightening and most striking report on housing conditions in the City of Philadelphia is found in the 1939 Real Property and Low Income Survey conducted by the W.P.A. under the auspices of the Philadelphia Housing Authority. Other valuable information is found in the annual reports of the Philadelphia Housing Association (a private non-profit organization for the improvement of housing conditions in the City of Philadelphia), the 1934 survey of the City Planning Commission, and surveys made by the Department of Public Assistance and other agencies.

The method used for the 1939 Real Property and Low Income Survey was worked out by the most competent experts in the County for the use not only of the Philadelphia survey, but of similar surveys undertaken throughout the United States. The agencies which pooled their experience and knowledge to produce this method were the Coordinating Committee of the Central Statistical Board, the Works Progress Administration, the Division of Economics and Statistics of the Federal Housing Administration. The use of this method guaranteed impartial and reliable results, in no way influenced by local desires or needs.

The City was divided into census tracts and enumeration districts, and trained enumerators visited 545,519 family accommodations in Philadelphia and obtained identical information for each of these family units. These facts, evidencing the reliability and impartiality of the information, are stressed as some witnesses have attempted to dismiss or discredit the findings by characterising it as "new deal" or a W.P.A. project.

It is obviously impossible to include in this report all of the findings of the survey. Some of the outstanding findings reveal that 81,262 families, with more than 300,000 persons, were found to be living under substandard housing conditions. In addition, 7,869 vacant dwelling units were found to be substandard. Of all family accommodations in Philadelphia 17.3%, or almost one out of every five, were found to be substandard.

Typically substandard units were defined to include only those units needing major repairs or unfit for use, lacking private flush toilet, bathing unit or running water, no central heating equipment, electricity or gas for light. Units having more than one family in a unit were considered substandard as to occupancy, if the rental was less than $40.00 per month.

According to these standards, 10%, or over 51,500 of all family accommodations were overcrowded, 10% had no toilets, and 11.3% lacked private bathing facilities. While these figures indicate the need of several hundred thousand persons for better living quarters, very few family accommodations were available for low income families. Of the more than 80,000 families found by the report to be living under substandard conditions, more than 54,000 were living in units renting for less than $25.00 per month.

A separate study of the income of these families revealed that 36.5% of them were receiving public assistance. The median family income of the remaining 63.5% was $1167.00 per year, which means that many were earning still less. Families with such incomes cannot, under any circumstances, afford more than $20.00 to $25.00 per month for rent. There were, in 1939, only 23,917 vacant family units in Philadelphia, of which 7,869 were substandard, leaving 16,048 standard vacant units. Of these, only 2,877 or 18% could be rented for less than $25.00 per month.

For the 54,234 low income families now living under substandard conditions, there were thus only 2,877 standard vacant units renting for less than $25.00 per month available in 1939. This number has, since the 1939 report, been undoubtedly considerably reduced, and the rents have been increased.

In summary of the report, it might be concluded that nineteen out of twenty low income families, now living under substandard conditions, cannot obtain decent, safe and sanitary living quarters in the homes now available in Philadelphia.

The Social Effects of Bad Housing

The Committee had presented to it much testimony and many reports on the social and economic effects of bad housing. The present Director of the Department of Public Health and other witnesses testified to the relationship between bad housing and diseases, such as tuberculosis. The Department of Public Safety and the Crime Prevention Association testified as to the relationship of crime and juvenile delinquency to bad housing. The high cost of governmental services in such areas, far in excess of the tax receipts, was vividly presented.

Since it is impossible to include in this report all the statistical evidence obtained, reference is made to the source material found in the 1934 City Planning Survey, the reports of the Philadelphia Housing Association, the Department of Health and the Crime Prevention Associa-

tion, and two reference works, "Slums and Blighted Areas" by Edith Elmer Wood and "Introduction to Housing Facts and Principles" by Edith Elmer Wood.

These reports and statistics all show that the death rate in slum areas is higher than for the rest of the city, tuberculosis and communicable diseases are higher, the rate of juvenile delinquency and crime is higher, and fire losses are higher. (See 1940 Report of Department of Public Health and Tables from City Planning Report.)

It is not contended that bad housing alone is responsible for all these social evils, but it is undoubtedly a contributing factor.

The Economic Costs of Slums

Not only are slums costly in their social effect, but there is real evidence that they are economically costly. Studies made by the Philadelphia Housing Association in 1934 show a staggering burden of governmental losses which slums impose upon Philadelphia. In one slum area of forty-five acres, the maximum return of all taxes if paid was $67,329. This area shows for the same year governmental costs for health, fire services, crime, street cleaning, lighting, garbage removal and education were $193,000. If there is added other governmental costs, on a per capita basis, the above figure would be increased by about $143,800, making the total cost of the forty-five acres approximately $336,800. Studies indicate these conditions prevail in other cities throughout the United States. (See "Slums and Blighted Areas" and "Introduction to Housing Facts and Principles")

That these slum areas are poor taxpayers is further illustrated in some of the sites of the Philadelphia Housing Authority program. The tax delinquencies on the Poplar Project at 9th and Poplar Streets at the time the Authority undertook its slum clearance project was $93,-530. On the Southwark Site, rejected by City Council, delinquencies to the end of 1930 were $39,545. These figures, discussed in detail later, indicate that something must be done to prevent the economic waste to the City of these blighted areas.

The Improvement of Housing Conditions

The conditions just described have been part of the picture of every large American community for generations. Philadelphia, planned originally by Penn as "Ye Greene County Towne, which will never be burnt and always be wholesome" has long departed from that happy hope. The absence of public controls over land, building, subdivision and sanitary conditions led to the bandboxes and alleys which now make famous Philadelphia slums.

Legislation designed to improve housing conditions has undergone three phases of development. First, the period of restrictive, regulatory and punitive legislation dealing with health, sanitation and safety, and now administered by the Housing and Building Codes and the Fire Marshal's Office. Then came so-called preventive legislation in the form of zoning laws and planning boards designed to prevent future blight. The third and present stage is that of participation by the government in a public housing program designed to eliminate the slums by the provisions of adequate, safe and sanitary dwellings for low income families at rentals they can afford. (For an excellent history of housing and housing legislation in Pennsylvania, see Vol. 13, Temple Law Quarterly, p. 166 (1939) "Housing in Pennsylvania" by Sidney Schulman)

An examination of the agencies designed to improve housing conditions in the City of Philadelphia reveals that in all three aspects Philadelphia has failed miserably.

The Inspection Services

(a) The Division of Housing and Sanitation, which is charged with the administration of the Housing and Sanitation Code of 1915, which if adequately enforced would materially improve conditions, reveals, by the testimony of the Division Head himself and an examination of its records and reports, the complete inability of the Division, due to lack of personnel and adequate funds to properly cope with housing conditions. The Division Head, in his annual reports, has repeatedly pointed to his needs and has as consistently been ignored by City Council for reasons unwarranted.

In the 1938 Report of S. Davis Wilson, Mayor of Philadelphia, at Pages 527-28, the Division of Housing and Sanitation reports as follows:

> "Although the housing inspection force has remained the same as it was in the year 1921, the number of tenement and rooming houses has increased from 8,256 to more than 18,500. The receipts in the year 1921 amounted to $20,065.50 and in the year 1938 amounted to $35,267, the total number of applications received being 11,660. . . .
>
> "During the year 1938 regular inspections were made from cellar to attic, of 8,980 tenement, rooming and lodging houses which left uninspected 9,522 multiple dwellings. No comment is necessary on the insufficiency of the inspection force, as these figures disclose, that it was not possible to inspect even one-half the total number of multiple dwellings listed on the records of the Housing Section. The amount of inspection fees which were lost during 1938 through lack of inspectors would, no doubt, reach $20,000. It is not only the loss of these fees, however, as the fact that so many multiple dwellings are uninspected for such a long period of time—for more than two years—and that there may be some properties in the condition of the houses on South Fifteenth Street which collapsed about two years ago, and the fact that all of these buildings could be inspected at no cost whatsoever to the city. The increased receipts of application fees would more than pay for additional inspectors and office employes."

The Housing and Sanitation Code of 1915 requires City Council to appoint "sufficient inspectors." Nevertheless, the 1939 budget provided for only twenty-five inspectors for the entire Housing Division, of whom only five were available for tenement housing inspection. This number has recently been slightly increased, due to the motorization of the Housing Division permitting the transfer of a number of inspectors.

In 1937, there were, according to the Division's own report, over 4,437 known tenements which could not be inspected and licensed because of the shortage of inspectors. An analysis of the tenement and rooming house statistics for the year 1940 reveals the following important facts:

Total number of tenements on record	18,032
Total number of rooming houses on record ..	2,766
	20,798

Rooming house applications 1940	2,244
Tenement house applications 1940	10,988
Tenement house applications Jan. 1, 1941 to March 31, 1941	1,836
Total number of tenement applications	12,824

Of the tenement and rooming houses listed above, it was possible, due to the small force of inspectors, to inspect only 11,655 tenement houses and 1,258 rooming houses, thus leaving almost 8,000 known tenements and rooming houses uninspected and in most cases unlicensed.

Against the group of tenement and rooming houses inspected, the following orders were issued:

	Orders Issued	Orders Complied With
Make application for license	10,413	9,440
Produce certificate from Fire Marshal	10,351	5,175 (app.)
Install toilets	939	53
Install sinks	467	48
All other orders	11,805	1,976
Total orders issued	33,757	
Total orders complied with		16,682

As explained by the supervising housing inspector, the small proportion of orders complied with does not show the true picture, as it was not possible to make reinspections of any except the "bad cases."

Another startling point concerning the tenement house situation is the vast number of unlicensed tenements for which application is pending. Thus, according to the 1939 report, there were 13,272 tenement house applications, of which only 171 were approved, 2 rejected, and the balance of 13,099 marked as pending. Further testimony revealed that of the almost 18,000 current applications now pending, only 112 have thus far been granted, and 57 declared uninhabitable.

One of the principal reasons for this discrepancy between applications applied for and those granted lies in the inadequacy of the personnel to make inspections. Other reasons for failure to actually apply for issuance of the license after approval, and also the fact that in many cases the department finds itself unable to grant a license because the tenement fails to comply with the standards of Section 6 of the Housing Code of 1915, as to open space and other standards. In this respect, the Division Head pointed out that although the tenement complied with the zoning code, or a variation had been granted by the Zoning Board of Adjustment, he was powerless to grant a license.

The same inadequacy of inspectors in the tenement house division is also found in the housing division. Reinspection is practically impossible. In 1939, there were 9,905 regular inspections and 833 reinspections. The Housing Association and the various social agencies cooperate with the Division in forwarding complaints, and the Philadelphia Housing Association, a private organization, mantains its own inspectors to help improve conditions. Of the total of 29,276 orders issued in 1939, only 15,348 were indicated as complied with. Lack of inspectors makes prosecution impossible.

Under the Act of 1915, the Division if authorized to abate nuisances where the owner fails to comply with an order, and to charge the cost as a lien against the property, which lien is collectible as other city liens. However, there has been made available to the Department only the pitiful sum of $500.00, although the needs of the Division in this regard are unlimited.

Council, in its budget appropriation, has consistently turned a deaf ear to the needs of the Housing Division. Yet the Division is only self-sustaining from fees and fines, but actually returns a profit to the City, which last year was over $16,000 and has reached $45,000. Also, the failure to supply inspectors is shortsighted, as additional inspectors could more than earn their salaries by the license fees to be derived from the uninspected and unlicensed tenements known to be in existence. The Division Head estimated that in 1937 more than $9,000 in revenue was lost from the almost 5,000 unlicensed, uninspected tenements.

(b) The Fire Marshal's Office created under the Act of 1911 is also severely handicapped in the performance of its duties through lack of adequate appropriation and personnel. The annual reports of the Fire Marshal to the Mayor (1937-38) and his testimony before the Committee reveal that at least one hundred and fifty able-bodied men are needed for semi-annual building inspection. Yet the Fire Marshal has only a handful of men, the majority of them incapacitated firemen incapable of other than light duty.

The law requires inspection of all buildings with fire escapes four times a year. Yet the Fire Marshal confessed that the inadequacy of the staff makes it impossible to inspect them even once a year, or to follow up with reinspections. The Fire Marshal also blamed 65% of all fires in Philadelphia on substandard housing.

One of the principal fire hazards is caused by illegal conversions of dwellings. The greatest number of conversions, according to the 1939 survey, are found in the older sections of the City. The lack of dwelling construction and housing supply since 1925 has undoubtedly been one of the principal causes. Although the Building Inspector must issue a permit for conversion, there are admittedly thousands of illegal conversions, which, due to lack of inspection, escape regulation by the Fire Marshal, Building Inspector or Housing and Sanitation Division.

Through the efforts of this Committee and the Philadelphia Housing Association regulations designed to cut down these fire hazards have been issued by the Fire Marshal. Whether the Fire Marshal will be supplied by City Council with the staff to enforce the regulations remains to be seen. So far, City Council has turned a deaf ear.

The Fire Marshal also brought to the attention of the Committee what he considered to be inadequacies in the Act of 1911, and legislation has been introduced into this session of the Legislature, giving the Fire Marshal power to vacate dangerous dwellings and to "quarantine" them.

(c) The Bureau of Building Inspection faces the same difficulties as the other inspection services, in that it lacks personnel and funds to adequately enforce the law. The Bureau, although denied sufficient appropriation, is self-sustaining and returns a profit over expenses, which is turned over to the general fund of the City.

The Building Code of 1929, now superseded by the Ordinance of 1939, required at least thirty inspectors. The

Chief of the Bureau testified that although at least seventy-five inspectors would be needed to adequately perform the Bureau's duties, only twenty are available. Needless to say, not only is inspection inadequate, but reinspection and follow ups are impossible.

There are over 543,000 structures in the City which require inspection. Semi-annual inspection would be desirable, so that the Bureau could discover and prevent conditions such as caused the collapse of a tenement house at 15th and Rodman Streets in 1937, with the loss of five lives. Following this, the Bureau enlisted the service of police, firemen and sanitary inspectors and has, according to the Chief of the Bureau, demonstrated the value of sufficient personnel to maintain a reasonable periodic inspection service.

The demolition of dangerous dwellings has been proceeding in Philadelphia at a rapid rate since 1929. According to statistics publshed by the Department of Labor Bulletin No. 668, there were 7,556 demolition permits issued from 1929 to 1935. The statistics supplied by the Bureau of Building Inspection from 1936 are as follows:

	Demolition Orders Issued	Demolitions by Sheriff
1936	1278	273
1937	2473	520
1938	1428	491
1939	1724	404
1940	813	226
	7716	1914

Altogether, the Chief of the Bureau testified almost 19,000 structures have been demolished since 1928.

Due to the repeal of the Building Code of 1929, and the substitution of local codes by ordinance, the demolition practice has been rendered more cumbersome. Under the Act of 1929, where the owner refused to comply with a demolition order, the matter was referred to the Sheriff, who could, by filing a petition to remove a dangerous building, quickly obtain a court order. However, the Superior Court, in Philadelphia v. Bartell, 139 Superior Court 319 (1940), held that the City of Philadelphia could not by ordinance authorize a special proceeding to remove a dangerous building, such as has been formerly provided under Section 404 of the Building Code of 1929.

The Court held that only the Legislature could authorize such proceedings. The City is therefore now required to proceed in equity, with hearings, proof and notice and to proceed to final decree. This proceeding is cumbersome, and the procedure formerly provided under Section 404 of the 1929 Code should be restored by the Legislature.

Whether the Sheriff should retain control over demolition is doubtful. It would seem reasonable to permit the Building Inspector to supervise the demolition and the award of bids. Although the Committee has had no opportunity to fully investigate the practice of awarding contracts to demolition companies, from information which comes to it, it appears the City is being overcharged by "rigging" of bids. Although repeatedly requested the sheriff failed to furnish the committee with detailed information and data regarding demolition contract awards and therefore further comment in this particular is impossible. Another factor which increases the cost of demolition is that neither the contractor of the City is permitted to salvage any of the materials. If this be the law, as contended by the Sheriff's Office and the City Solicitor, it should be changed, as there is no reason why the City should not be permitted to salvage materials to pay for the cost of demolition.

Housing the Relief Client

There are at present about 220,000 persons in the City, or 11% of the population, dependent upon public assistance or W.P.A. Public assistance includes general relief, old age assistance, blind pensions and aid to dependent children, formerly designated "mother's pension." Although many now in W.P.A. will be absorbed by expanding industry, about 115,000 are considered by the Philadelphia County Board of Public Assistance as long term dependents, who will be unaffected by any improvement in employment conditions.

There are 21,000 on old age assistance, about 50,000 persons in the families dependent on blind pensions and mother's assistance, and about 40,000 persons on general relief in families where there are no employables.

Until October 1934, there were no provisions for rent payments by the Relief Administration. In 1934, the State Emergency Relief Administration introduced a rent allowance for relief families, which was admittedly inadequate, being based upon one and one-half the taxes on the property plus water rent. The rent relief grant at the present time varies from $5.85 for a single person to a maximum of $9.75 for the largest family.

The Philadelphia County Board of Assistance has made several surveys as to the shelter costs of its clients, all of which reveal that it was impossible to provide accommodations for relief families on the grant allowed, and that 71% of relief clients paid more than the Department allowed, depriving themselves of allowances for food and clothing to meet their rent budgets. The introduction of the Food Stamp Plan, requiring minimum expenditures for food, has further reduced the inability of the relief client to rob his food budget to pay for rent.

The following table, prepared in 1939, reveals the relationship between shelter allowance and actual costs:

Size of Family	Monthly Shelter Allowance	Average Cost of Minimum Shelter
1	$ 5.85	$ 7.50
2	8.70	10.55
3	9.75	12.80
4	9.75	15.05
5	9.75	17.30
6	9.75	19.20
7	9.75	21.05
8	9.75	21.80
9	9.75	22.55
10	9.75	22.55

No consideration was given to the sanitary and other housing conditions in computing average shelter costs, and of 74,565 dwelling units rented for $20.00 a month or under, 44,549 or over 60% were physically substandard. Since the rent allowance is so inadequate, families become delinquent in rent and move frequently; over 6500 change of addresses being revealed in the files of the County Relief Board.

Although denied by the representatives of the Philadelphia Real Estate Board, witnesses connected with the Department of Public Assistance, testified that reliefers were from the real estate viewpoint undesirable tenants, and were unofficially blacklisted, not because of their character, but because of their economic status.

The difficulty of obtaining accommodations for relief clients is illustrated by the vacancy figures of the Real Property Survey of 1939, which showed that there were only 5,032 dwelling units of any sort in Philadelphia renting for $10.00 per month, or less than one such unit for every ten relief families. Of these dwellings, 4,631 or 93% were found by the Survey or by the relief agencies to be substandard. There were only 25,407 dwelling units of any sort renting for under $15.00. So it is self evident that relief families, despite living under substandard conditions, are living in homes renting for over $15.00, or $6.25 more than their maximum rent allowance.

It was also found by the 1939 Survey that negro families, both relief and non-relief, paid higher rentals and occupied worse accommodations than similar white families. Personal investigation of a limited number of families by the Chairman of this Committee and counsel verified these facts. Similar studies made in other cities reveal the same condition. (See Public Housing News, Vol. 2, No. 39, Issue of May 24, 1941; also 1939 Real Property Survey)

The Philadelphia County Board of Public Assistance is probably Philadelphia's biggest single customer as far as rental is concerned, paying out approximately $8,000,000 per year in rent. Yet, it has no power to demand decent accommodations for its clients or to attempt to enforce standards. If the landlord is to be expected to supply adequate, decent housing for $9.75 per month, he must bear a burden which is out of proportion to the actual cost of the property. What has actually happened, however, is that the burden has to a great extent been borne by the City in loss of taxes. Although the relief rent allowance is supposed to cover taxes and water rent, relief clients occupy thousands of properties at exorbitant weekly rents, upon which properties taxes have been unpaid for years.

Other cities, notably Milwaukee and New York, supply adequate rent allowances and enforce housing standards. In Milwaukee, the properties are "rated" by the relief agency and rents are based on decent standards; no family being permitted to occupy unsafe or unsanitary quarters. In Philadelphia, the Head of the Division of Housing and Sanitation confesses his inability to enforce the Housing Code because families occupying substandard quarters can fined no other decent accommodations.

It has been estimated by the Department of Public Assistance that to bring rental allowances nearer to the minimum cost of rental, it would cost the State nine to ten million dollars a biennium. Since Philadelphia carries about one-third of the State burden, it would require for Philadelphia an increase of $1,500,000 to $2,000,000.

If, in addition to this increase, the County Relief Board were given adequate personnel to "rate" housing and to enforce standards much could be accomplished, but even this would not be enough to entirely improve conditions, as the shortage of housing accommodations for families of low income would make impossible the finding of decent accommodations.

SOLUTIONS

(a) Strengthening the Inspection Services

As already pointed out, enforcement of the Sanitary and Inspection Codes is not of itself a complete solution to the housing problem. Unless steps for increased regulation are accompanied by increase of decent housing accommodations available for low income families, strict enforcement may mean ejecting many low income families from their present substandard dwellings without giving them any place else to go. Also, enforcing extensive repairs will, in many cases, automatically mean increase of rents, which low income families will be unable to meet.

However, in those cases where the slum landlord profiteers in poor housing they should be ruthlessly prosecuted and the law enforced. The Committee is convinced that such practice of profiteering exists, and on a larger scale than imagined. Speculators buying up small substandard properties at distress prices find they can rent them without repairs, thus reaping a large income. Other so called "real estate managers" secure control for nominal rentals of slum property, in many cases tax delinquent, and then sublet or operate them as tenement houses.

In one tenement investigated by the Committee and found to be in a horrible and uninhabitable condition, the landlord rented the property for $20.00 per month and sublet "apartments" by the week for rentals totalling $67.50 per month. The Committee caused an investigation to be made by the Division of Housing and Sanitation which found serious violations of the Act.

(b) The Role of Private Enterprise

That private enterprise has thus far adequately failed to meet the housing problem of low income groups seems a fact incapable of denial. Yet, those who oppose governmental participation have consistently refused to face that fact. Statistics supplied by the United States Department of Commerce one construction activity in the United States from 1915 to 1937, and construction trends in the United States in 1937-1938 show that construction of non-farm dwellings declined from almost 919,000 to 60,000 in 1933.

Adding to this decline in housing has been the withdrawal of structures from use by demolition. Offsetting this has been a great number of conversions. Of all conversions in Philadelphia, 51.7%, according to the 1939 Real Property Report, have been made during the past ten years, when new construction has been far below normal. In fact, in many years in Philadelphia the demolition exceeded new family accommodations.

Thus, according to Bulletin No. 668 of the United States Department of Labor, showing construction activity from 1921 to 1938, in 1937 there was provided 2,221 new family accommodations, while, according to the Bureau of Building Inspection, 2,473 dwellings were demolished in that same year.

In 1938, new construction provided 2,069 family units, while there was demolished 1,428 buildings. An analysis of the new construction in Philadelphia from 1936 to

1940, prepared by the Philadelphia Housing Association (see tables attached) reveals some interesting statistics. From 1936 to 1940, there were 12,500 single family homes erected. During the same period, according to the Bureau of Building Inspection, there were 7,716 homes demolished During the same period, there were an estimated 7,420 units supplied through conversion.

A significant factor is that practically all of the new construction is offered for sale and not for rent. In 1936, out of a total of 2,053 single homes, only 57 were built for sale under $4,000. In 1940, only 9% of all new Philadelphia construction, amounting to 3,362 family accommodations, was offered for sale at $4,000, or under; 55% was offered for sale from $4,000 to $5,000; 25% for sale from $5,000 to $6,000, and 11% at $6,000 or over.

Nor has the provision of F.H.A. financing helped supply housing for low income families. Assuming that such families could raise the necessary down payment, the carrying charges would be beyond that permitted for low income families. According to figures supplied by the F.H.A., the total monthly charge on a $4,000 mortgage for a twenty-five year term would be $30.25, not counting repairs and other costs of home ownership, and would require a weekly income of at least $27.44 to qualify.

REHABILITATION

Rehabilitation has been so frequently advanced, especially by critics of the Public Housing program, as the solution by private enterprise of the housing problem, that your Committee has felt it necessary, in order that its report might be complete, to examine the various plans which have thus far been suggested.

The term rehabilitation has been so loosely applied as to acquire a number of quite different meanings. Rehabilitation to some means simply the modernization and repair of existing substandard structures, either vacant or occupied. Rehabilitation, as opposed to repair of single isolated units, has also been used in the broader sense of developing and rehabilitating blighted and deteriorated areas, either by new construction, by repair and modernization, or both. Since both types of rehabilitation usually require enabling legislation to be effective, brief reference will be made to some of the suggested proposals.

Rehabilitation of Existing Substandard Units

Rehabilitation, or more properly speaking, repair and modernization of existing substandard property has been suggested as a means of supplying the housing shortage and meeting the needs of low income groups. Recently, the Mayor of Philadelphia appointed a Committee on Rehabilitation to consider the problem. The report of that Committee recognizes the housing shortage, the needs of the low income group, the failure of private enterprise to presently meet that need, and suggests the utilization and rehabilitation of existing substandard tax delinquent property.

The Mayor's Committee proposes amendments to the tax lien acts expediting the present cumbersome method of tax sale, and permitting the City to sell tax delinquent property to persons demonstrating their willingness and ability to rehabilitate the property and to rent it for $20.00 to $25.00 per month or less. The number of such vacant, tax delinquent properties has been estimated by some members of the Mayor's Committee as 8,000 to 9,000. How many of these tax delinquent properties are actually available for rehabilitation under the method proposed by the Mayor's Committee is not known, and until a survey of tax delinquent property, now under way, is completed, no accurate figures will be available. These figures are entirely too optimistic and your committee believes the figure disclosed by the survey will be much less.

The survey will also disclose the locations of these tax delinquent properties, and whether they can be acquired in blocks or are scattered throughout the City in isolated units. In such case, rehabilitation of single properties will have little effect in improving a deteriorated or blighted area.

The Chairman of the Mayor's Committee in his testimony as well as the Mayor himself and other witnesses, recognized the limitations of hit or miss rehabilitation of single properties. He pointed out that one of the real and obvious problems in rehabilitation is to get the tax delinquent properties into stronger hands, possibly through the use of limited dividend corporations with power of eminent domain and subject to regulation by the State Commissioner of Housing, such as are provided for under the New York law.

The suggestion was also advanced by Mr. Thompson of the Mayor's Committee that rehabilitation must be done on a large scale, in accord with City Planning, and that the City might itself acquire tax delinquent property to be used for public purposes, or for rehousing.

That the danger of tax delinquent property falling into irresponsible hands, is a real danger, is disclosed by the present status of tax delinquent property upon which the Receiver of Taxes has levied the rents. Evidence produced before the Committee disclosed that there are now eight hundred such properties. An investigation by the Committee of a number of these properties picked at random revealed disturbing and shocking conditions. In one group of twelve properties in the 800 block on Kater Street, the records of the Receiver of Taxes indicated that he was receiving under his rent levy the sum of $5.00 per month per dwelling. The properties were found to be renting for $12 and $14 per month.

The Deputy Collector explained that he had permitted the agent to keep the difference for repairs. From the condition of the properties, no repairs had been made for years, and examination by the Division of Housing and Sanitation revealed serious infractions of the law in many cases.

The registered owner of the properties denied any interest in the rents, and it was finally revealed that although the properties were ten years delinquent in taxes, the bank which held the mortgage had not only applied the rents toward interest, but had received considerable upon its principal as well.

On three properties in the 500 block on Manton Street, the Receiver of Taxes records indicated he had levied upon and received $8 per month rent. The properties were found by the Committee to be actually renting for $16 and were eight years delinquent in taxes. Again it was explained the agent had been allowed to keep the difference for repairs, which from the obvious condition of the properties had never been made.

The Committee, in an attempt to find the disposition of the balance of rents, traced back through six successive agents without ever finding that the real owner had ever entered into the picture. In one case, a so-called "real estate operator" who "operated" twenty-five or twenty-six properties had rented the properties from an agent for $5 per month, put in some repairs and re-rented for $14 and $16. One of the properties had a condemned and dangerous wall, and the others were in disrepair. All were substandard.

In another property at 13th and Fitzwater Streets, the Receiver of Taxes records indicated he had levied upon and was receiving $18 rent. The property was found to be a tenement house, which, upon inspection, was found to be in shocking disrepair and in serious violation of the tenement code. The "real estate manager" who operated the tenement paid to another agent $20 per month rent, and sublet "furnished" apartments upon a weekly basis, netting him almost $70 per month.

Although the Committee was unable to investigate other of these tax delinquent properties, undoubtedly similar conditions exist. Since the Committee's disclosure of these facts, the Receiver of Taxes has ordered the Deputy Collector to levy upon the entire rents in cases where no repairs had been made as promised. The Deupty Receiver testified that although the City was really a landlord, it had no legal right to undertake repairs or to apply the rents for such purposes. Neither does the City have the right to enter into leases.

This failure of the City to assume responsibility for the condition of these dwellings, thus places it in the position of being one of Philadelphia's worst slum landlords. Although it would appear no legislation would be needed if the City really desired to correct these conditions, such legislation, if needed, should be enacted. Legislation recently passed in New York State permits the City to levy upon and apply the rents of tax delinquent properties for repairs, as well as for payment of taxes.

In passing, critical reference must also be made to the condition of the Receiver's records of tax delinquent properties. The Receiver has no master list of properties upon which rents have been levied for taxes, and was compelled to call in the various Deputy Collectors, who seem to have complete autonomy, and have them prepare for the Committee lists of such properties, which were submitted in an entirely unsatisfactory manner, being incomplete, untidy and unworthy of the business efficiency which should be expected from the City's records.

The plan proposed by the Mayor's Committee on Rehabilitation seeks enabling legislation removing what it terms the "legal bottlenecks" of the tax lien act of 1923. Under this Act, if taxes are more than a year delinquent, the City may offer the property at Sheriff sale. Mortgages are not discharged by such first sale, the Act providing for a second sale at later date in order to discharge the encumbrance.

Prior to the recent decision of the Supreme Court in City of Erie v. Piece of Land, 339 Pa. 321, it was held that mortgages were not discharged by tax sales under the Act of 1923. That decision held that the second sale discharged the mortgage lien.

The Mayor's Committee points out that in addition to the cumbersome procedure provided for obtaining a second sale, there are two further bottlenecks. First, the property, under the Act and City Ordinance, cannot be sold to rehabilitators at tax sale for less than the tax liens. Secondly, the Act of 1923, grants to the owner a year's equity of redemption after sale; thus, for all practical purposes, preventing prospective rehabilitators from acquiring the property.

The Mayor's Committee therefore recommends that the Act of 1923 be amended so as to permit the sale of properties tax delinquent for five years or more, which sale, whether the bid be less than the delinquent taxes or assessed value, shall give the purchaser an absolutely clear title, free of the encumbrance of the equity of redemption.

The plan proposed by the Mayor's Committee, however, fails to contain a number of essential safeguards to its abuse. First, there is no assurance that if the Act of 1923 be amended as suggested, such properties will not fall into the hands of the speculators and real estate managers, who now control much of the tax delinquent properties. If the properties are sold at public sale, it will be difficult to check on the bidders. If the City attempts to set up qualifications for bidders, by requiring them to demonstrate their financial ability and willingness to repair, the City could probably exercise better control by acquiring the properties themselves and then selling them to limited dividend companies or other stronger interests who would rehabilitate. Further, the plan proposed by the Mayor's Committee carries no assurance that the properties when rehabilitated will be rented at figures within the reach of low income groups.

Also, the plan fails to distinguish between occupied and vacant dwellings. Insofar as vacant, substandard properties are modernized and restored to use, the plan has some limited value, especially in times of housing shortage; insofar as the plan contemplates the rehabilitation of occupied, substandard properties, it will, in view of the already existing shortage of low rent homes available, probably have disastrous effects upon the present low income groups now occupying such properties. Any modernization of such properties must necessarily result in a substantial increase of shelter rents, which in many cases will mean dispossession of such low income groups. Unless such rehabilitation plans are accompanied by an expansion of the public housing program, or some other means of housing low income families, rehabilitation, while improving houses, will aggravate the plight of low income families.

Finally, as already pointed out, modernization of isolated, single, scattered units will do little to improve neighborhoods or to aid in resistance of blight and deterioration. It is doubtful how long a single rehabilitated property in a deteriorated block would itself be able to survive.

Recognizing the limitations of this approach, a number of other plans have been developed, to which only brief and passing reference can be made. New York has just enacted an "Urban Redevelopment Corporation Law," permitting the formation of redevelopment corporations which are granted the power of eminent domain in order to secure control of sufficient property adequate for redevelopment on a large scale basis. Power of condemnation is granted only for assembling property in areas officially declared substandard, and only after approval

of the development plan by the City Planning Commission; also, only after the corporation has secured control by option, purchase, ownership or some other manner of fifty-one per cent of the area.

The Act also limits taxes for a period of ten years, so as to exempt from local taxes any increments of value accruing by reason of the redevelopment and new construction. The corporations are subject to public supervision as to approval of projects, financial set up, management and rent structure, and dividends are limited.

Since the New York law has just been enacted, it will be a considerable period before it can be possible to ascertain the results. In the meantime, further study should be given to this and similar proposals in order to determine their applicability to Philadelphia.

Another rehabilitation plan presented to the Committee is that of the National Association of Real Estate Boards. The Board, while strongly opposing any further extension of the Public Housing Program, believes that the major problem of our cities is combatting blight, and recommends the creation of instrumentalities by cooperation of municipal, state and federal government with private enterprise, whereby such areas can be acquired under the right of eminent domain for the purpose of replanning and rebuilding them through private redevelopment organizations. The plan contemplates the aid of the Federal Government in purchasing and condemning land, and to lease or sell such land to private limited dividend corporations operating under F.H.A. supervision.

The F.H.A. Act would be amended so as to permit ninety per cent insurance of mortgages of such rehabilitation corporations at low rates of interest. The corporation would acquire the land from the Government under a fifty year lease purchase plan. After payment of taxes and operating costs, interest, amortization and land costs, the corporation would be permitted to earn dividends of not more than eight per cent in any one year until the debt for land cost had been repaid.

The redevelopment corporation would, under its charter, be free to buy, sell, lease or rent property under its control, and provided its operations were sound, the company would be free of prescribed rentals or prices, and would conduct its operations in accordance with market conditions. It would be the object of the company to sell as many homes and other types of property as possible to individual owners, thus gradually eliminating itself. The company in its deeds would develop restrictions and general control through a continuing maintenance organization as to preserve the character of the neighborhood, even after a large share of the property has passed from the hands of the company into individual private ownership.

Whether or not the plan proposed by the National Association of Real Estate Board will aid in the prevention of blight and help in the reconstruction of deteriorated areas, it is quite apparent that any measure of success it achieves will depend principally upon governmental aid in land assembly, financing and land usage planning.

From its investigation of the limited dividend companies in New York, enjoying partial tax exemption, and other similar developments in other states, the Committee is not convinced that such plans can contribute to the housing problem of the lowest income groups. Knickerbocker Village in New York is an example of slum clearance by a limited dividend corporation, which, because of its high rentals, was unable to rehouse any of the former occupants of the area.

Your Committee does not wish to appear opposed to the limited dividend corporation plan, but merely to point out that they are no substitute for the Public Housing Program. Limited dividend corporations, operating under proper public supervision, can be of great value in slum clearance and in replanning. Every slum site is not necessarily a desirable area for the erection of a public housing project. Many slum sites can be cleared and devoted to higher uses, either residential or commercial. In such a program, private enterprise properly controlled and publicly aided can play an important part. But accompanying such a program must be a parallel program of public housing or some other plan designed to provide accommodations for the dispossessed low income families.

One of the underlying factors in all these proposed large scale rehabilitation plans is the necessity of proper and effective city planning and zoning by an effective functioning City Planning Commission. In this respect, your Committee finds that Philadelphia has done little or nothing. The City Charter Act of 1919 authorized the City to appoint a City Planning Commission, which had only advisory powers. This Commission, created by ordinance in 1929, while granted extensive duties, was given no powers.

City Council, since its inception, has failed to supply it with any personnel or any funds. For a number of years, the W.P.A. conducted a City Planning Project in conjunction with the Commission and expended several hundred thousand dollars in the compilation of valuable basic material, which now lies unused.

Zoning, which is closely and integrally connected with planning, has likewise suffered from the failure to have an effectively functioning City Planning Commission. The Zoning Commission, appointed under the Enabling Act of 1929, made its recommendations to City Council, which by the Zoning Ordinance of 1933, enacted the Zoning regulations and maps and created a Bureau of Zoning. This Bureau, however, was never adequately supplied with funds by Council to employ planning and zoning experts. The Zoning Board of Adjustment, which is given power to hear appeals and to grant variances in cases of special hardship, is not equipped to properly control the zoning and replotting required by changing conditions.

If effective direction is to be given to the reconstruction of blighted areas within the City of Philadelphia, legislation creating a functioning and effective planning commissions will have to be adopted.

Public Housing in Philadelphia—Who Killed Public Housing and Why?

The Committee is convinced from the testimony and its investigation that one of the real hopes of improving housing conditions of a large portion of the lowest income groups lies in the Public Housing Program of the Philadelphia Housing Authority.

Under the United States Housing Act of 1937, the United States Housing Authority is empowered to make loans

to local housing authorities for the construction of low rent housing and slum clearance projects, which loans are repaid over a period of sixty years. The United States Housing Authority, in order to permit the local authorities to maintain the low rent character of their projects, also enters into an annual contribution or subsidy contract with the Authority, and the City is required to make a contribution by exemption of the properties from taxation. The Authority, however, in lieu of taxes makes payments to the City to compensate it for part of the costs of city services. Occupancy of the projects is limited by law to families of low income, and the local Housing Authority or the City are required for each new Housing Authority unit constructed to eliminate an equivalent number of slum properties by demolition, closing or repairs.

Under Mayor Wilson's administration, the Philadelphia Housing Authority undertook three housing projects. Three other proposed projects involving $17,000,000 of U.S.H.A. loan funds, the Southwark Project in the neighborhood of Front and Washington Street, the Germantown Project at Haines and Boynton Streets, and the Kirkbride Project at 48th and Market Streets, providing over 3,000 family units, were rejected by the Mayor and City Council in June of 1940.

The Committee received the testimony of the Mayor, of the opposing Councilmen, of the Real Estate Board, of the Housing Authority, and others in order to determine the basis and validity of such rejection. The Mayor's principal objections were that the program was "experimental," and the City should therefore mark time; that the tax exemption features of the project involved such financial loss as to be detrimental to the best interest of the City.

Echoing the Mayor, other witnesses, in addition, claimed the projects were too costly, wasteful, unsound, unamerican, undemocratic, were part of the "New Deal," and were not wanted by the community; that better housing would not improve conditions, as "people make slums and not slums people."

All of these arguments have been advanced and rejected in every major city of the United States. Nevertheless, your Committee has attempted to thoroughly investigate and to evaluate the objections.

Since the principal objection is apparently that of tax exemption, this will be considered first. A tax and assessment study of the existing and rejected public housing projects leads to the conclusion that the tax revenue loss to the City is extremely small, and that the losses are in reality "paper losses," as the tax levies in most slum areas are so far delinquent as to produce almost no revenue.

On the Poplar site at 9th and Poplar Streets, now under construction, the total City School Tax levy for the year 1938 was $36,790, while the total tax delinquency was $93,530; all of which had to be paid by the Authority to the City before it could acquire the site. While there is an apparent paper loss of $19,948 to the City, representing the difference between the City tax levy of $23,826 and the payments in lieu of taxes amounting to $3,078, the City is in reality the gainer, for it has collected over $93,000 in back taxes and has developed the neighborhood in such a manner that it may prevent further blight and tax delinquencies.

Similarly, although the rejected Southwark site showed a paper loss to the City of $11,567, the total tax delinquencies in 1939 were $39,545; all of which would have been paid had the program been allowed to continue. The Kirkbride site, which was also rejected, would have shown a net gain to the City of $4,530, because being occupied by the Pennsylvania Hospital, it was tax exempt.

The Tasker Project, recently completed, shows a net annual gain to the City of $142.00. This site was formerly waste land and, according to the testimony of expert witnesses, could not have even been profitably developed by private enterprise. Through the efforts of the Housing Authority, the area has now been opened for private development, with undoubted benefits to the entire City.

On the three rejected sites, the paper losses to the City would have amounted to only $19,806 per annum. Against this would be the immeasurable benefits to 3,000 families, savings in governmental costs, the clearance of slums, the redevelopment of such areas, and an arrest of the blight and deterioration spreading through such areas.

Other cities have found that the City has gained more than it has lost in tax exemption. Thus, the New York City Authority reports that on the last five of its projects, out of total tax assessed of $173,885, only $101,007 was collected, the rest being delinquent. In lieu of taxes, the City is receiving payment of $91,000. While this loss is apparently large, when measured against the taxes actually collected, the loss is only $10,000. This does not take into consideration the fact that the City has fireproof dwellings and save considerable in garbage collection, street paving maintenance, lighting, etc.

The City of Minneapolis reported to your Committee that on the Sumner Field Housing Project in that City, the comparative fire losses over a period of years in that area showed a startling reduction after the clearance of the slum area and its replacement by a housing project. In 1932, there were fifty fire calls, estimated at $260.00 each, on the site with a loss of $45,985. In 1939, during the first year of occupancy of the Sumner Field homes, there were six calls with a fire loss of $1,800.00. These figures bear out the figures of Chief Fire Marshal Clinton of Philadelphia that sixty-five percent of all fires are caused by substandard housing.

While no such figures are yet available in Philadelphia's slum clearance project, other testimony was presented to the Committee showing that the development plan of the housing project sites eliminated several thousand feet of streets and curbs, which would result in great savings to the City in upkeep. Also, the Authority, in addition, would have spent on the rejected sites $125,440 for streets, sidewalks and off-site utilities, and $149,000 for community buildings and facilities; all of these installations being available to and for the benefit of the community.

The City also lost an estimated $100,000 in wage taxes, which would have been collected from the labor involved in the three rejected projects. In regard to the wage tax, Councilman William Simon volunteered the statement that Philadelphia's wage tax is destined to be a permanent part of its tax structure. Despite this pay envelope levy of $17,000,000, Council is so unconcerned

over the welfare of its citizens that it refuses over $17,000,000 in federal funds to help provide decent housing accommodations for the wage earners whose taxes it takes.

Are the Projects Costly and Wasteful?

In respect to this charge, the Committee examined all the available evidence, and finds no evidence to support such charge. The construction costs of the Authority compare favorably with private enterprise. According to figures supplied by the United States Housing Authority, as of the week ending May 15, 1941, the average net construction costs of all U. S. H. A. aided projects was $2,707 per dwelling unit, and the estimated total over-all cost, including land, architects' fees, administration costs, etc., and non-dwelling facilities such as community buildings, amounted to $4,292.

Figures supplied by the Philadelphia Housing Authority show that the estimated anticipated costs of the three existing projects will average about $5,300 per dwelling unit. Savings already indicated over estimated costs should reduce this cost to about $5,000 per dwelling unit. As stated by the Chairman of the Authority, it is impossible to accurately compare the relative cost of public and private housing, as the type of construction and purposes are different. The housing projects are so constructed as to have a useful life of at least sixty years. The construction is of the best in order to keep maintenance low. The buildings, in accordance with the best planning practices, occupy less than twenty-five percent of the site, leaving open space for light, air and recreation.

Community facilities are provided and, in addition, the Housing Authority incurred costs for construction of off-site utilities, such as sewers costing on the Glenwood Project over $83,000, which cost should have, and in the case of private construction, would have been borne by the City

Keeping all these factors in mind, the construction costs of Public Housing compare favorably with that of private enterprise, and from the viewpoint of planning and of the facilities offered even surpass it.

Charges were also made by representatives of the National Association of Real Estate Boards that the monthly cost of each dwelling unit supplied by Public Housing Authorities was more than $51.00, while private enterprise could supply the same for half that amount.

The figures submitted by Mr. Arthur W. Binns, Chairman of the National Association of Real Estate Board's Committee on Housing and Blighted Areas, to substantiate his charges are wholly in error and misconstrue the facts. Audited figures submitted from the reports of the Philadelphia Housing Authority reveal that the average costs of the three approved projects are $29.30. Of this sum, an average of $10.44 is contributed by the United States Housing Authority, $13.56 is paid by tenants for shelter rent, and $5.66 for utility charges. These figures effectively demonstrate the inaccuracy of the charges of wastefulness and cost.

Sites—Several of the Councilmen based their objections to the Housing Program on the location of the sites of the proposed projects. Without passing on the merits of the sites, this objection has no real basis in fact. The resolution in support of the public housing program, which Council was asked to vote on, did not commit it to any sites, but merely requested Councilmanic support of the program as a whole. Further, the Philadelphia Housing Authority and the U. S. H. A. offered to Council fourteen additional sites, but Council evidenced no interest in this suggestion.

The opposition to the proposed sites was, according to the testimony of some witnesses, largely stimulated by local politicians and division committeemen. James McDevitt, Vice-President of the Housing Authority and President of the local Building Trades Council, testified that in his opinion political opposition had been responsible for the death of Philadelphia's Public Housing Program. Coupled with this political opposition was the admitted opposition of the Real Estate Board.

Other factors, in the opinion of your Committee, were mistakes of policy of the Housing Authority, both in failing to vigorously press for councilmanic approval of the projects during the administration of Mayor Wilson, and of failing to properly educate and enlist public support, so that the campaign of misinformation about the program might have been effectively combatted.

The funds for the three rejected projects were earmarked by the U. S. H. A. on September 28, 1938. The Southwark Project loan contract was approved by the President on March 29, 1939, and the Germantown Project on October 5, 1939. The Kirkbride site was acquired on December 18, 1939, and the loan contract approved in March, 1940. The projects marked time during the summer of 1939 due to the absence of the Chairman. In the meantime, the death of Mayor Wilson in late August, lost the Housing Authority his support, and the matters were allowed to drag until after the municipal elections.

Finally, on April 1, 1940, new ordinances for separate approval of the projects were introduced and the Housing Authority announced a public hearing on April 15, 1940, to hear objections to the site. The Housing Authority, after the hearing, concluded that the projects were beneficial to the community and desired by the majority of the inhabitants.

Representatives of the Philadelphia Real Estate Board, testifying before this Committee, said that the projects were rejected because "public sentiment had crystallized against them." What had happened was that misinformation and vilification of the program had done its work.

Had the Housing Authority benefited by the experience of other cities, it would have realized the value of public education and of neighborhood information offices and coordination of the various social and civic agencies of the community behind its program. As it was, it belatedly recognized the necessity for such action, but the information offices were opened too late, and the public support rallied around the Authority's program could not prevail upon a City Council which was politically pre-occupied with an ensuing Presidential campaign.

DEFENSE HOUSING

If the defense program is to function efficiently, industrial centers, such as Philadelphia, must be able to adequately supply the housing needs of workers engaged in

national defense. Our experience during the last crisis of 1917-18, graphically portrayed in the recently released report of the Twentieth Century Fund, indicates the disastrous effects of housing shortages upon production and industrial efficiency.

In order to determine whether Philadelphia's defense housing needs are being adequately provided for, your Committee has given exhaustive consideration first, to the labor market conditions in order to determine what demand for housing may reasonably be expected to result from Philadelphia's share in the defense program; and secondly, rental and housing market conditions, in order to determine whether the sources of supply are adequate. The Committee has called before it representatives of labor, industry, real estate, builders and the various government agencies concerned with the problem in order to obtain a complete picture of the situation.

Statistics supplied by the Department of Research and Statistics of the Federal Reserve Bank of Philadelphia indicate that in the Third Federal Reserve District, embracing the Camden and Philadelphia industrial area, prime defense contracts from June 1, 1940 to March 31, 1941 totaled $1,370,291,000. These figures do not include sub-contracts placed by other concerns within the Philadelphia area, do not include contracts under $10,000, of which there are a considerable number, nor do they include "secret contracts" placed by the armed forces. The total of these sub-contracts, secret contracts and under $10,000 contracts, while unknown, is estimated to be a considerable sum.

According to a labor market survey released in February, 1941, conducted among 218 Philadelphia companies having primary defense orders, 51,000 workers will be added before the end of the year, and it is estimated that an additional 117,000 jobs will be created in secondary manufacturing plants and in non-manufacturing establishments.

The labor market survey, as well as surveys conducted by the Office of Production Management, indicate that of the total of new jobs 110,000 will be filled by men and 50,000 by women. In order to check against these estimates, the Committee called before it representatives of leading Philadelphia industrial concerns, whose figures of estimated labor increases more than confirm the anticipated tremendous increase in labor needs.

As examples, the E. G. Budd Company, which on April 30, 1941, held $18,000,000 of defense contracts for its Philadelphia plant, increased its employees from 5,950 in August 1940 to 8,850 in April 1941, and will add at least 500 or more workers during the coming months.

Baldwin's, which holds $99,246,375 in defense contracts, had 3,400 employees as of January 1, 1940, and 6,575 as of April 20, 1941, and will require 10,600 before the end of the year. About fifty percent of its employees come from or live in Philadelphia.

Midvale Steel had approximately $39,000,000 in defense orders as of April 1941. During 1940, its employees averaged 3,893, and there are present 5,280, to which will be added another 1,300 within the next year.

Cramp's Shipyard in Philadelphia, which has just started production, now has 1,130 employees, and its cruiser contracts alone, not counting other work which it will undoubtedly receive, will require an additional 6,000 employees by 1943.

The Sun Shipbuilding Company, which now holds $187,000,000 in defense contracts alone, employed 7,103 as of January 1, 1940, and 8,329 as of January 1, 1941, expects to have 12,000 by the end of the year, and about 18,000 by April, 1942.

Representatives of the Shipbuilders Union testified that the need for shipyard workers in the Philadelphia area will increase from its present employment level of 37,700 to 87,000 in 1943, of which 53,000 will be employed by the Philadelphia Navy Yard alone.

To supply the total estimated need of 168,000 new workers to be hired during 1941 alone it is estimated, according to figures supplied by the Bureau of Employment Security in collaboration with the Pennsylvania Bureau of Employment and Unemployment Compensation, that there is a total available reserve of 117,000 persons (76,000 men and 41,000 women). Of the total of 76,000 men, it is unlikely that more than three-fourths will be able to meet the employers' demands as to age, citizenship, experience, physical experience and other factors. Since from the available labor supply, approximately 15,000 men will be drafted, it is estimated that about 70,000 men will have to be brought into Philadelphia before the end of 1941.

Few of the men required will be able to be drawn from the adjoining counties, since all of these counties are heavily engaged in the defense program; and, according to surveys made by the Pennsylvania Bureau of Employment and Unemployment Compensation, will have labor shortages and probably housing shortages of their own.

According to these reports, in Delaware County there will be a shortage of 10,000 men before 1941. In Chester, the supply seems about sufficient to meet its own demands. In Montgomery, there appears to be an oversupply of 8,000 men, but in Bucks County, even if Montgomery County's labor supply were utilized, there will be a labor shortage of almost 10,000. The New Brewster Aviation Plant at Hatboro, now under construction, will employ about 8,000, thus further increasing the shortage.

Even if all the unemployed were used, which is most improbable, there would still remain a shortage of 50,000. Some of the labor shortage will undoubtedly be met from the existing labor supply by the vocational training program and by the apprentice training program conducted by some of the larger industrial and shipbuilding plants. However, the knowledge that Philadelphia offers job opportunities will travel and may draw workers from other areas, who will be employed before apprentices are trained or all our own unemployed are absorbed.

Another factor to be considered in estimating the need for homes is that new jobs, wages and continued employment will mean more marriages, and a general increase in demand for living quarters by families now doubled together.

This increased demand for homes in Philadelphia has already evidenced itself in the declining vacancy rate and increasing rent levels. A survey made by the Philadelphia Housing Association shows that vacancies in all classes of dwellings show a reduction from 5% in August 1939 to 2.7% in April 1941. The W.P.A. Division of Re-

search fixed a gross vacancy rate in Philadelphia for April 1941 of 2.9 per cent and a habitable vacancy rate of 1.8 per cent. More than 25 per cent of these vacancies lacked some standard facility. In the lower rental brackets, vacancies are approaching the vanishing point.

According to a survey made by the Apartment Owners and Managers Association, in cooperation with the Federal Works Program, apartment vacancies are vanishing. The Philadelphia Record conducted a survey in June 1941, among local real estate agents and found little or no vacancies in homes renting at $40.00 or under.

Rents are also on the increase. A study of the Philadelphia Housing Association made in December 1940, indicated that 32% of the units renting for $30.00 a month or less showed a rent increase averaging 13%. The trend towards shortage and rent increases is unmistakable. The witnesses, representing the Philadelphia Real Estate Board, while stating that there was presently no shortage, agreed that such shortage was likely with the expansion of the defense program.

The Philadelphia Housing Association, after weighing all the surveys and evidence, reported its conclusions that accommodations would have to be found to house 30,000 new workers before the end of 1941. These needs can only be partially met by existing vacancies, by rehabilitation, by conversion and by new private construction. The existing vacancies in April 1941 were less than 5,000, and have probably declined sharply since then.

Even if every encouragement were given to rehabilitation, it is boubtful whether more than 2,000 substandard homes could be modernized before the end of the year. Conversion of single family homes into multiple occupancy amounted to 2,000 last year. Even doubling this figure to 4,000, which is unlikely, the total of all sources of housing supply mentioned above would amount to only 11,000 units. These figures are optimism figures.

New construction, either by private enterprise or by the Government, is therefore necessary. The Housing Coordinator's Office in Washington has estimated the needs of the Philadelphia area at 16,000 units, of which he hopes private enterprise will supply 12,000. Assuming that Philadelphia's new construction by private enterprise increases fifty per cent over 1940, this will account for only 6,000 units.

Since most of the new construction, as already pointed out, is for sale and not for rent, most of the 6,000 units would not be available to the migrating worker, unwilling or unable to make the necessary ten per cent down payment. However, recent amendments to the F.H.A. now permit the insurance of rental housing under Title 602.

Operative builders building under Title VI contemplate the rental purchase plan without down payment whereby the monthly rent will include not only the carrying charge, but an additional sum which will be credited as the equity payment after a period of three years.

According to the testimony of the Regional Director of the F.H.A., the total monthly charge on a $4,000 mortgage insured under Title VI would be $37.19, to which would have to be added an additional $12.00 towards the equity payment, thus making the monthly rental payment over $49.00 per month. This is obviously too much for most defense workers .

The Executive Director of the Home Builders Association of Philadelphia, testifying before the Committee, explained that in order to lower these costs one of Philadelphia's builders was undertaking a development of 350 units under Title VI, whose unit cost would be $3,450. The dwelling would have two bedrooms, a bath, living room, kitchen-dinette and modern heating and plumbing. The monthly carrying charge would be $37.50, of which $11.65 would be for amortization and $6.00 for accumulating the down payment. At the end of five years, the purchaser would take title subject to a mortgage of $2,450, and the balance of carrying charges would be $27.13 plus, of course, repairs and depreciation.

So far no other builders have taken advantage of Title VI. Since the builders are personally responsible on the insured mortgage, the risks of rental housing under this Title do not make such ventures particularly attractive.

The Committee has not examined into the type of structure which could be supplied for $3,450, or whether it would be a permanent benefit to the community. Assuming, however, that the operative builders would be interested in building under Title VI, that new construction totalling several thousand units was erected under that Title, there still remains an estimated housing shortage in required family accommodations over the estimated demands of 11,000 units. Of this number, 1,000 units of defense housing are under construction by the Federal Works Administration for the use of the Navy Yard employees, and another 1,400 units have been authorized in other portions of the City.

This number is entirely insufficient to meet the emergency, and in 1942, when the full impact of the defense program is felt by Philadelphia's industries, we will probably face a housing crisis.

The summary of supply and demand prepared by the Philadelphia Housing Association graphically illustrates the problem.

Supply and Demand of Family Accommodations by Rent Ranges

Family Accommodations	Under $35.00		Over $35.00		Total
Demand		19,000		9,500	28,500
Supply:					
Vacancies	1,500		3,500	5,000	
Rehabilitations	1,500		500	2,000	
Conversions	3,000		1,000	4,000	
New Construction	1,000		5,000	6,000	
Defense Projects	1,000		....	1,000	
Total	—	8,000	—	10,000	— 18,000
Deficit		—11,000	(Surplus)	+500	—10,500

The same opposition which met public housing is now being directed against government defense housing. Considerable effort has been and will be made to induce the government to erect temporary demountable housing, rather than permanent housing. While temporary housing is desirable in communities where there is no permanent need, in Philadelphia it would be a serious mistake. Not only is it almost as costly, but its standards of construction are not as desirable, and it offers no permanent benefits to the community.

According to detailed statistics presented to the Committee by W. Pope Barney of the Defense Housing Committee of the Philadelphia Chapter of the American Institute of Architects, the total cost of demountable hous-

ing is $3,753 per unit, which is $53.00 more than the cost per unit, including site improvement, of permanent housing constructed to the standard of the Glenwood Project of the Philadelphia Housing Authority.

The Mayor of Philadelphia has recently appointed a defense council, which includes among its subcommittees a housing committee. It is hoped that this committee will keep closely in touch with the situation and attempt to meet it realistically. A constant check should be kept on vacancies and provision made for listing available dwellings and rooms. Unless, however, the situation is met by creating an adequate supply of medium rental homes, some form of rent control will be necessary to protect the public.

Your Committee has examined into the proposed model Fair Rent Act suggested by the Consumer's Division of the National Defense Advisory Commission. This legislation, creating a fair rent board, does not automatically freeze rents, which would be undesirable, but is permissive only and permits regulation in those areas where it is found control is needed.

In the defense housing program the State Board of Housing, if adequately staffed and given sufficient funds, would make a real contribution. However, the Board is for all practical purposes a dead letter; its members have never been confirmed, and do not function. It has no appropriation and its staff consists of an executive director and secretary, who have single-handed attempted to carry on its functions. This condition should be corrected.

SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

In the brief space of this report, it has been impossible to do more than highlight some of the more outstanding aspects of the investigation. Lack of funds and press of time make it impossible to arrange and attach to the report the many valuable tables, charts and statistical data bearing on the investigation which were presented for the consideration of the Committee. Those desiring fuller details of the matter are referred to the transcript of the testimony, the statistical reports and charts, and the selected bibliography of pertinent material attached to this report.

In summary, your Committee finds

(1) That Philadelphia suffers from a shortage of decent, sanitary and safe housing accommodations for low income families; that more than 80,000 dwellings are substandard, and that Philadelphia's slum areas constitute a menace to health, safety and morals. Due to the impact of the defense program, Philadelphia faces a housing shortage for defense workers of all income levels. Vacancy rates have already approached dangerous minimums and rents are on the increase. A housing crisis of major proportions faces Philadelphia in 1942, unless immediate steps are taken.

(2) That the inspection services of the various City departments, intended to improve housing conditions through housing and sanitation codes, building codes and fire regulations, are hopelessly neglected by the City administration, which fails to provide sufficient funds for personnel and administration. Consequently, adequate inspection, reinspection and enforcement of orders by prosecution or otherwise, is impossible. The City administration, in addition, refuses to supply the inspection departments with the necessary funds to abate nuisances where owners fail or refuse to act.

(3) The housing problem of low income families is further aggravated by the shortage of decent accommodations and the inadequacy of the rent relief grants. The present maximum rent relief allowance is $9.75 per month. Decent accommodations, even if available, could not be obtained for this sum. Relief families, in fact, pay more than $9.75; their average rent being $16.00, and such families are therefore compelled to use their food and clothing allowance to make up the difference. Undernourishment and ill health are thus the natural concomitants of such action.

(4) Private enterprise has not, and is apparently unable to solve the housing problem of low income families. Practically all of the new dwelling construction is for sale and not for rent, and the price range of new construction places it beyond the reach of low income families.

(5) Rehabilitation or modernization of existing substandard units as a solution has yet to demonstrate that such a program can be of sufficient size to achieve sufficiently low rentals to meet the problem of low income families. Rehabilitation of existing tax delinquent property may offer a partial solution, provided such properties are placed in strong ownership, which will agree to control of rents and limited profits; otherwise, there is a real danger that such property will fall into the same speculative and greedy ownership which now profits in slum misery. The City should consider the possibility of itself acquiring delinquent property and developing a municipal land policy which will make such property available for public housing slum clearance projects, or other low rent projects.

(6) Limited dividend corporations and other similar agencies, even with partial tax exemption, cannot solve the housing problem of low income groups. Such corporations may, however, render great service in slum clearance and supplying housing for medium income groups. Such programs of slum clearance by limited dividend or redevelopment corporations will have to be accompanied by public housing programs to rehouse dispossessed slum dwellers; otherwise, the housing problem of low income groups will be aggravated.

(7) Philadelphia's neglect of city planning and rezoning has made impossible the development of a coordinated plan whereby housing and slum clearance by public and private agencies may be utilized to combat the destructive forces of blight and deterioration, which are creeping over large portions of the City. The present City Planning Commission is ineffective and does not function. It has no power and can make only advisory recommendations which have been consistently ignored. It has never been given funds by City Council, which shares little understanding of planning principles. Zoning, which is an integral part of City Planning, likewise suffers from the indifference of City Council. Variances from the Zoning ordinance granted by City Council bear no relation to any coordinated plan for the harmonious development of the City.

(8) Public housing, which offered Philadelphia an opportunity to improve housing conditions, has been rejected by an administration politically hostile to what it considers "new deal" legislation, socially indifferent to the plight of its underprivileged citizens, and so budget conscious it permits an infinitesimal tax loss on public housing projects to blind it—not only to the social gains from a public housing program, but the actual savings in governmental expense, life and community health.

(9) Philadelphia has refused to fully recognize the housing emergency which is being created by the defense program. All agencies and methods which can help solve the problem should be coordinated. The opposition of real estate and other interests, which cannot obviously meet the entire need itself, should not be permitted to hinder or delay the Federal Government from undertaking such defense housing as is necessary to meet the growing shortage. The number of defense units now allocated is insufficient and should be increased. Such defense housing should be of a permanent and not a temporary nature, and should be so situated, planned and constructed as to contribute to the greatest extent possible to the solution of Philadelphia's long time housing problem.

Legislative Recommendations

(1) The inspection services should be strengthened by the enactment of a use and occupancy permit law requiring landlords of other than new construction to obtain a certificate of occupancy, certifying that the property meets the minimum requirements of law as to sanitation and safety. Such a law, by requiring owners to seek out inspection rather than wait till they are found out by the inspectors, will do much to end present abuses. A small fee of fifty cents has been estimated as sufficient to cover the cost of administering the law so as to provide speedy twenty-four hour service on applications.

(2) Provision should be made by city ordinance, or by enabling legislation, for semi-annual inspection of every property within the City of Philadelphia. An inspection fee of fifty cents or less would be sufficient to make such inspection service self-sustaining. Consideration should be given to the possibility of merging into one department the present inspection services—housing and sanitation, building and fire marshal. Objection has been made by the various department heads affected that each division is so specialized and requires special training on the part of its inspectors that the plan is not feasible. The Committee is not convinced that these objections are entirely valid and suggests that further study be given to the plan.

(3) The Fire Marshal's Act of 1911 should be strengthened so as to permit the Fire Marshal to order vacation of unsafe dwellings and to quarantine them. Although this power is granted to the Division of Housing and Sanitation in regard to unsanitary dwellings, the Fire Marshal has no such power in regard to dwellings constituting fire hazards.

(4) The Fire Marshal's Act of 1911 should be further amended so as to require the Fire Marshal to publish general regulations. At present it is impossible to ascertain just what regulations are in effect without consulting the Fire Marshal.

(5) The Building Code Enabling Act of 1937 should be amended so as to restore the demolition procedure of Section 404 of the repealed Code of 1929, which section permitted petition proceedings to remove dangerous buildings, instead of the cumbersome equity procedure now required under the decision of Phila. v. Buckell, 139 Superior Court 319 (1940).

(6) The acts concerning demolition of unsafe buildings should be amended so as to permit the City to utilize the salvage materials in satisfaction of its liens. The City should be permittted to sell such salvage, or to award bids permitting the contractors to deduct salvage from their costs. Under present practice, the City is not permitted to utilize salvage which remains on the premises.

(7) The Housing and Sanitation Code should be amended so as to bring in closer conformity the provisions of the Zoning Code and Section 6 of the Housing Act. Where certificates of variance have been granted from the Zoning Code, and such variance will not affect health and safety, the Director should be empowered in his discretion to permit similar variance from the Housing Code and to issue a tenement license. While ordinarily your Committee would oppose any relaxation of the tenement house code, this amendment has been urged as a desirable and necessary measure by the head of the Division of Housing and Sanitation and approved and recommended in principle by the Philadelphia Housing Association.

(8) The tax lien laws should be amended so as to permit the City, where it levies on rents in satisfaction of delinquent taxes, to make the necessary repairs required to correct violations of the Housing and Sanitation Code, Building Code and Fire Marshal's regulations, and to deduct such cost from the rents.

(9) The tax lien laws should be further amended to permit the City, without the necessity of cumbersome sequestration proceedings, to take possession of vacant tax delinquent dwellings, to rent the same and keep them in necessary repair, and upon payment of the taxes to account to and return possession to the owner or mortgagee.

(10) Legislation should be adopted increasing relief appropriations so that relief families may be granted adequate rent relief allowances, sufficient to purchase decent accommodations. In order that such increased allowance may not result merely in increased rent without improvement of housing conditions there should be full cooperation between the Department of Public Assistance and the public agencies charged with enforcement of housing standards in order that relief families may be furnished with decent and sanitary dwelling accommodations in accordance with similar practices in Milwaukee and New York.

(11) Legislation should be adopted amending Philadelphia's present City Planning and Zoning Acts. There should be created a strong, effective City Planning Commission with power to plan and rezone the City. Such Commission, in addition to its power over physical planning, should also be concerned with capital budget planning.

(12) The Housing Authorities Law should be amended so as to permit local housing authorities to act as agents of the Federal Government in the defense program, to

enable them to erect defense projects during the emergency.

(13) Enabling legislation should be adopted to supply State funds to local housing authorities. A $50,000,000 revolving loan fund should be made available to further the public housing program throughout the State.

Numerous other suggestions are under consideration by the Committee, but due to the press of time and the prospect of adjournment, these subjects should await further consideration by a continuing committe, the establishment of which is recommended to the Legislature.

Counsel for the Committee have been instructed and have already prepared legislation concerning the points discussed and the favorable consideration of the legislative body is respectfully urged.

In closing, the Committee again wishes to express its appreciation of the splendid work of its counsel, John Morgan Davis, and of Sidney Schulman, Associate Counsel and Housing Consultant.

Due to the decision of the Honorable Charles E. Voorhees to embark upon the sea of matrimony during the preparation of this report, he has been unable to join in its consideration and approval.

Respectfully submitted,
SAMUEL M. ROSENFELD,
JOSEPH M. O'BRIEN.

REPORT TO THE GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA ON THE ORGANIZATION AND ADMINISTRATION OF PENNSYLVANIA'S STATE GOVERNMENT BY THE JOINT STATE GOVERNMENT COMMISSION OF THE GENERAL ASSEMBLY

Capitol Building, Harrisburg, Pennsylvania
January, 1941

JOINT STATE GOVERNMENT COMMISSION OF THE GENERAL ASSEMBLY

(Created in 1937, P. L. 2460, as amended 1939, P. L. 1084)

"A continuing agency of the General Assembly to undertake studies and develop facts, information and data on all phases of government for the use of the General Assembly and Departments and Agencies of the State Government."

LETTER OF TRANSMITTAL

To the Members of the General Assembly of the Commonwealth of Pennsylvania

Under the authority of the Act of July 1, 1937, P. L. 2460, as amended by the Act of June 26, 1939, P. L. 1084 (Act creating the Joint State Government Commission), we submit herewith a report on the Organization and Administration of Pennsylvania's State Government.

ELLWOOD J. TURNER, Chairman,
Joint State Government Commission.

February, 1941

FOREWORD

The information contained in the following pages represents an effort on the part of the Joint State Government Commission and its Committee on Departmental Organization to present a "behind-the-scenes" picture of how the State Government of Pennsylvania operates. In this respect the material presented is to be considered as a manual or reference book on the State Government, rather than an analytical study of methods of operation.

Procedure

The work in connection with this report was begun in October, 1939, with the submission of a questionnaire to all branches of the State Government inquiring into their powers, duties, and methods of operation and administration. Following the return of the replies to this questionnaire, the Committee on Departmental Organization held a total of 52 hearings, at which time representatives of departments, boards or commissions appeared for questioning and further elaboration on their administrative procedures.

During the course of the above hearings, numerous suggestions were made to the Committee relative to the need for new or amendatory legislation to produce increased efficiency and greater economy of operation in the affairs of particular departments. These recommendations have been reviewed and, in addition to those developed by the Committee itself, are contained in a supplementary report which will be submitted to the members of the General Assembly. It is hoped that many of these recommendations will serve as a basis for legislation to be introduced during the 1941 Session of the General Assembly or future Legislative sessions.

The drafting of the report was undertaken by the Commission's staff during the latter part of 1940. In this stage of the work, numerous conferences were held with officials and employes of the various State departments, for the purpose of obtaining additional details on methods of operation.

Plan of the Report

With respect to each department, board or commission of the State Government, the Commission's report is confined to a standardized form of presentation. This consists of (1) the function of a department, board or commission, (2) its powers and duties as prescribed by Pennsylvania laws, (3) the organization plan and methods of operation followed in carrying out the prescribed powers and duties, (4) personnel employed to perform the job, and (5) the over-all cost of operation.

Although the Commission has not prepared an index to the material contained in this report, the Table of Contents (pp. 6789 to 6798) is presented in sufficient detail to enable the reader to ascertain the scope of the information presented with respect to each department. An Alphabetical Index to Chapters is set forth on page 6789 in order to facilitate the task of locating the discussion relating to any one department.

Throughout each chapter references are made to legal and source citations. For this report, the Commission has adopted the plan of placing all footnote references at the end of each chapter.

Further Studies Required

As a part of this report, it was the intent of the Commission to present three special studies relating to (1) the regionalization of the Commonwealth by State departments for the performance of their functions, (2) the office and other space occupied and rented by departments in various municipalities throughout the Commonwealth, and (3) the coordination of statistical services in the State Government. These studies were started under the supervision of technical assistance loaned to the Commission by the Pennsylvania State College and the University of Pennsylvania. Due to the pressure of other work, however, and the lack of sufficient time, it was impossible to complete these studies. It is recommended that they be continued at a later date.

Acknowledgment of Assistance

The Commission takes pleasure in acknowledging the helpful cooperation of the Pennsylvania Economy League. For a period of one year, the League made available without cost to the Commission, the technical and editorial services of its staff to aid in the preparation of this report. This assistance made possible the completion of the Commission's report.

The Commission extends an especial acknowledgment and appreciation to Harry P. Griffiths of the Pennsylvania Economy League for his conscientious effort, work and invaluable assistance in drafting various chapters and in directing and supervising the preparation of this report in all its phases.

The Commission also wishes to express its appreciation of the assistance rendered by many individuals, including: Dr. W. Brook Graves and Irving J. Zipin; Dr. Edward W. Carter, Dr. Victor S. Karabasz, Dr. Stephen B. Sweeney, Dr. Jacob Tanger, and Dr. Fred F. Lininger. The services of Dr. Graves and Mr. Zipin were loaned to the Commission through the kindness of Temple University; those of Dr. Carter, Dr. Karabasz, and Dr. Sweeney through the kindness of the University of Pennsylvania; and of Dr. Tanger and Dr. Lininger through the Pennsylvania State College. Acknowledgment is also made to John H. Fertig, Esq.; Edward S. Hannestad, Assistant Director of the Legislative Reference Bureau; and Edward S. Moore, Parliamentarian of the House of Representatives for their aid in reviewing and editing the chapter on the General Assembly.

Finally, the Commission expresses its sincere gratitude to all officials and employes in the various branches of the State Government for their cooperation in furnishing the Commission with the material and information requested for the preparation of this report.

WILLIAM E. HABBYSHAW, Chairman,
Committee on Departmental Organization.

Constitutional Powers 6825
Administrative Code 6825
Organization and Operations 6826
Administrative Bureau 6826
Notary Public Commisions 6826
Issuance of Corporate Charters 6826
Budget Bureau 6826
Formulation of the Budget 6826
Control of State Expenditures 6826
Additional Duties 6826
Personnel Bureau 6826
Personnel 6827
Fiances 6827
Footnotes 6828

CHAPTER II—THE GENERAL ASSEMBLY

Function 6828
Powers and Duties 6828
Constitutional Restrictions 6828
Specified Powers 6828
Organization and Operations 6829
Membership 6829
Number 6829
Election and Term of Office 6829
Vacancies 6829
Qualifications and Restrictions 6829
Privileges 6829
Compensation 6829
Organization 6830
Sessions 6830
Regular and Special Sessions 6830
Adjournment 6830
Officers 6830
Committees 6830
Standing Committees 6830
Special Committees 6831
Procedure 6831
Constitutional Provisions 6831
Legislative Process 6831
Bill Drafting 6831
Introduction of Bills 6831
Committee Action 6831
Readings 6832
Reconsideration by Committee 6832
Conference Committee 6832
Signing 6832
Recall 6832
Veto 6832
Approval 6832
Enrollment 6832
Legislative Printing 6833
The Journals 6833
Other Printing 6833
